President Truman's Point 4 Program

In his inaugural address, Jan. 20, 1949, President Truman outlined a four-point U. S. policy for helping to maintain world peace and freedom: Point 1. Continued unfaltering support of the United Nations. Point 2. Continuation of American program for world economic recovery. Point 3. The strengthening of freedom-loving nations against aggression through collective defense agreements.

He then outlined Point 4:

"We must embark on a bold new program for making the benefits of our scientific advances and industrial progress available for the improvement and growth of the underdeveloped areas. More than half of the people of the world are living in conditions approaching misery. Their food is inadequate. They are victims of disease. Their economic life is primitive and stagnant. Their poverty is a handicap and a threat both to themselves and to more prosperous nations. * * *

"We invite other countries to pool their technological resources in this undertaking. Their contributions will be warmly welcomed. This should be a cooperative enterprise in which all nations work together through the United Nations and its specialized agencies whenever practicable. * * *

"The old imperialism—exploitation for foreign profit—has no place in our plans. What we envisage is a program of development based on the concepts of democratic fair-dealing."

On June 24, President Truman asked Congress for $45,000,000 to initiate the technical assistance program and also requested that the Export-Import Bank be authorized to extend limited guarantees on private investments in the backward areas. Legislation to carry out the Point 4 plan was introduced Sept. 27, but neither chamber took action by the time of adjournment, Oct. 19, postponing it until the 1950 session.

The United Nations pledged full support to the program. The Economic and Social Council, March 4, endorsed it unanimously, and at the request of the U. S., drafted two proposals on technical assistance. One provided for the doubling of the scope of an existing U. N. technical aid program, and the other for integration of President Truman's Point 4 plan in the U. N. program. Both were adopted unanimously Oct. 14.

ADDITIONS AND CHANGES WHILE PRESS WAS RUNNING

Printing the WORLD ALMANAC is a big undertaking and is done by sections. During that time events do not halt—officials resign or die and are replaced; catastrophes occur; statistics change. The following memoranda record these activities.

ACTORS

Desmond, William, p. 234, died Nov. 3, 1949, in Hollywood, Calif.

Dix, Richard, p. 234, died Sept. 20, 1949, in Hollywood, Calif.

Lieber, Fritz, p. 237, died Oct. 14, 1949, in Hollywood, Calif.

Morgan, Frank, p. 237, died Sept. 18, 1949, in Hollywood, Calif.

Ouspenskaya, Mme. Maria, p. 238, died Dec. 3, 1949, in Hollywood, Calif.

Robinson, Bill, p. 238, died Nov. 25, 1949, in New York, N. Y.

AGRICULTURE

(pp. 625-635)

International Live Stock Exposition, Chicago, Nov. 28-Dec. 3, 50th anniversary show, exhibited 10,005 head of live stock; had 510,000 admissions. Grand champion steer: Judge Roy Bean, Hereford from the Pecos County, Texas, 4-H Club, wgt. 1,200 lbs. Sold for $11.50 a lb., or $13,800 to Dearborn Motors Co., marketing organization for Ford farm implements.

Reserve G. C. steer; Hereford calf, Chino Farms, Churchill, Md.; G. C. wether lamb; Southdown, Univ. of Kentucky; Champion Hereford bull; Hillcrest Larry Lv, C. A. Smith, Chester, W. Va.; Champion Aberdeen-Angus bull; Elleenmere 1032, Ankony Farm, Rhinebeck, N. Y.; Champion shorthorn bull; Killiarn Max Juggler, Homer Clausen, Spencer, Ia.; Grand champion barrow: Berkshire, Ohio State Univ. Junior G. C. steer; Lin-Lo, Aberdeen-Angus, Bonnie Lu Logan, Van Wert. O.; Junior G. C. hog: Poland China, Roland Anderson, Leland, Ill.; G. C. Percheron: La Don, L. D. Hay, Loudenville, O., G. C. Clydesdale stallion: Chester Weston, Concord, Mich.; G. C. Belgian stallion: Jay Farceur II., C. O. House, Arcadia, Ind.; Champion five-gaited saddle horse; Wing Commander, Dodge stables, Rochester, Mich.

National Dairy Cattle Congress, Waterloo, Ia., Oct. 3-9, exhibited 1,781 dairy cattle, 126 Belgian horses. Grand champion cow, Brown Swiss, Royal Rapture, Lee's Hill Farm, Morristown, N. J. Record: 5 yr. old, gave 29,095.7 lbs. milk, 1,228.84 lbs. butter fat, for 365 days. This broke record for butter fat, but did not top 12-year champion, Illini Nellie, whose record is 29,569.5 lbs. milk.

Grand champion Ayrshire, owned by Robt. Seitz, Waukesha, Wis.; G. C. Holstein, by Allen Heers, Ft. Atkinson, Wis.; G. C. Jersey, by Adams Bros., Moulton, Ia.; G. C. Belgian stallion, by Water Cress Farm. Northville, Mich.; G. C. mare, by W. G. Harkness & Son, Upper Sandusky, O.

National Guernsey Show, at Waterloo Dairy Congress, 269 entries. National grand champion bull. Cowham Farm Tress King, owned by C. F. Cowham, Jackson, Mich.; G. C. cow, Pearlette, by Adchr Farms, Camarillo, Calif. Record: 12,502 lbs. milk, 664 lbs. butter fat. Junior champion bull, owned by O. J. Kjome, Spring Grove, Minn., J. C. heifer, by J. M. McDonald, Cortland, N. Y.

All American Jersey Show, Memphis, Tenn., Sept. 26-Oct. 1: Grand champion bull, owned by J. L. Hutcheson, Jr., Rossville, Ga.

National Angus Show, Dallas, Texas. Grand champion bull, Eileenmere 1050, owned by J. Garrett Tolan, Pleasant Plains, Ill. Junior champion from El-Jon Farms, Rosehill, Ia.

First International Dairy Show, Indianapolis, Ind., Oct. 8-15, had 7 breeds, 1,500 head cattle; juniors, nearly 2,000 head. Grand champion Jersey bull, owned by Pioneer Farms, Old Lyme, Conn.; G. C. Jersey cow, by Folly Farm, Simsbury, Conn.; G. C. Holstein cow, by Franlo Farms, Hopkins, Minn.; G. C. Red Poll bull, by A. E. Miller & Son, Columbus, Wis.; G. C. Red Poll cow, by Lloyd Hollingsworth, Frankfort, Ind. G. C. Guernsey cow, by McDonald Farm, Cortland, N. Y.; G. C. Brown Swiss cow, by Judd's Bridge Farm, New Milford, Conn:; G. C. Ayrshire bull, by Robt. Seitz, Waukesha, Wis.

ASSASSINATIONS

(p. 314)

Kim Koo, past provisional president of the Korean exile government, assassinated June 26, 1949 in Seoul, Korea.

ASTRONOMY

Correction to Sunrise, p. 784, note should read "The same correction is applied to sunset as to sunrise, but in the opposite way subtracted instead of added and vice versa."

AVIATION

Global flights, p. 266. Thomas G. Lanphier, Jr., claimed a world speed record of 119 hours, 47 minutes, or thirteen minutes short of five days, for a 22,180-mile flight around the world from New York City and return over scheduled air routes, Dec. 2-7, 1949. Total cost of fares, including Federal tax on domestic legs of the trip, was $1,598.36.

Transatlantic flights, p. 267. A new speed record for commercial aircraft was claimed by a Scandinavian Airlines DC-6 which flew from Idlewild Airport, New York to Prestwick, Scotland, in 8 hours 55 minutes aided by a tailwind, Nov. 6, 1949. Average speed: 362 mph.

AWARDS—MEDALS—PRIZES

(pp. 595-608)

Nobel Prize Winners, 1949

Physics—Hideki Yukawa, Japanese. **Chemistry**—William F. Giauque, American. **Medicine and Physiology**—Walter R. Hess, Swiss, and Antonio C. D. F. E. Moniz, Portuguese; **Literature**—Not awarded*. **Peace**—Lord Boid Orr, English.

(*) Criticized for failing to name a winner, The Swedish Academy of Literature, November 11, 1949, authorized all past winners to nominate candidates for the award in 1950. The academy revised its rules in an effort to obtain more international guidance in its selections, having been criticized by literary circles for extreme conservatism. (Pages 595, 596.)

Graduate School of Journalism

Additional Members on the Advisory Board (year term expires in parentheses): Hodding Carter (1953), Delta Democrat-Times, Greenville, Miss.; Frank R. Kent (1953), The Sun, Baltimore, Md. (Page 596.)

Abingdon-Cokesbury Award of $7,500, consisting of $5,000 outright and $2,500 advance royalties on a book accepted for publication. 1949: Dr. Ronald H. Brinto, Yale Divinity School, for Here I Stand, biography of Martin Luther.

B'nai B'rith Award, presented annually by the Upper New York State Council of B'nai B'rith. 1948: Robert P. Patterson, 1949: Mrs. Franklin D. Roosevelt.

Peter Cooper Medal. 1949: David Sarnoff, of RCA, and Frank Lloyd Wright, architect, for the advancement of science and art, respectively.

John H. Finley Award. Established in 1949 in honor of Mr. Finley, third president of the College of the City of New York. 1949: Bernard M. Baruch.

Fulbright Awards

Recent recipients under the Fulbright Act, to teach or conduct research abroad during the academic year, as announced by the U. S. Department of State, Nov. 18, 1949:

Dr. John Arthos, Un. of Michigan, to Un. of Florence, Italy; Miss Marian Blake, to continue research in Italy; Dr. Samuel E. Braden, Indiana Un., to London School of Economics; Dr. Otto J. Brendel, Indiana Un., to American Academy in Rome; Dr. A. Robert Caponigri, Un. of Notre Dame, to Un. of Naples, Italy; Dr. Donald H. Chapman, Un. of New Hampshire, to Un. of Oslo, Norway; Dr. Robert F. Gray, to continue research, to Makerere College, Kampala, Uganda, East Africa; Dr. Noland R. Heiden, late of the Un. of Michigan, to Un. of Oslo; Joseph Hirsch, artist, to Un. of Paris; Dr. John C. Jordan, Un. of Arkansas, to Un. of Oslo; Dr. Donald F. Lach,

Un. of Chicago, to Un. of Paris; Dr. Lander MacClintock, Indiana Un., to Un. of Rome; Dr. Robert B. Mesrobian, Polytechnic Institute of Brooklyn, to Groningen Un., the Netherlands; Dr. Edward Molumphy, New Haven (Conn.) Hospital, to Un. of Paris; Dr. Leonard O. Olsen, Case Institute of Technology, to Un. of Oslo; Henry V. Poor, painter and ceramist, as visiting professor of art at American Academy in Rome; Dr. William J. Roach, Un. of Pennsylvania, to Un. of Paris; Dr. Otto R. Steuer, formerly of the Un. of California Medical Center, to Un. of Paris; Dr. Mottram Torre, Un. of Minnesota, to Un. of Paris; Dr. George M. Wiley, writer and lecturer, to Un. of Oslo; Donald M. Wyatt, Fisk Un., to Un. of Paris.

The Act authorizes the use of foreign currencies and credits acquired through the sale of surplus property abroad for programs of educational exchange with other nations. Countries now participating in the program are Australia, China, Burma, Greece, the Philippines, New Zealand, Belgium and Luxembourg, the Netherlands, Norway, the United Kingdom, France, Italy, Iran, and Egypt. It is expected that ultimately the program will include more than twenty countries and involve an expenditure in foreign currencies of $140 million during the next twenty years.

Americans seeking awards in the countries mentioned (except China), for the 1950-51 academic year, should write to:

For graduate study. If enrolled in American college or university, to the adviser on the campus; others to the Institute of International Education, 2 West 45th St., New York 19, N. Y.

University teaching and advanced research; for teaching in American secondary schools abroad. To the Conference Board of Associated Research Councils, 2101 Constitution Ave., N. W., Washington 25, D. C.

Teaching in national secondary schools abroad, to the United States Office of Education, Federal Security Agency, Washington 25, D. C.

Hoover Medal. 1949: Frank B. Jewett, former president of the National Academy of Sciences. (p. 605).

Limited Editions Gold Medal. 1949: Robert Frost, Collected Poems.

Pillsbury Mills Awards. On Dec. 13, 1949, $70,000 was awarded for winning recipes. First prize of $50,000 went to Mrs. Ralph Smafield, of Detroit; $10,000 to Miss Laura Rott, a farm girl, of Naperville, Ill., $4,000 to Mrs. R. W. Sprague, of San Marino, Calif. Awards of $1,000 each went to Mrs. Harry W. O'Donnell, Crandon, Wis.; Mrs. Robert Monroe, Atlantic City, N. J.; Mrs. Eddie R. Wagoner, Bryan, Tex.; Mrs. Estella Worley, Los Angeles, Calif.; Mrs. Joseph F. Maley, Osborn, Ohio; and Mrs. C. Arthur Reseland, Des Moines, Iowa.

BOOKS

Social, Political, Economic, p. 910. Should read: The Law, by Rene A. Wormser; Courts on Trial, by Jerome N. Frank.

COLLEGES AND UNIVERSITIES

Newly appointed governing officials, other corrections, pp. 545-562

Albertus Magnus College, founded 1925.

Albright College, founded 1856.

Alcorn A & M College, founded 1887.

Birmingham-Southern College (C., S.), Birmingham, Ala., founded 1856; Pres., George R. Stuart, Jr.; 1,948 students; 54 teachers.

Fort Lewis Branch College; president, C. Dale Rae.

Delaware, Un. of; President William S. Carlson will become President of Un. of Vermont on April 1, 1950.

Denver, Un. of; chancellor, Albert C. Jacobs.

Municipal Un. of Omaha; president, Philip M. Ball.

Rochester, Un. of; President Alan Valentine will resign June 30, 1950.

St. Bonaventure College; president, Juvenal Lalor.

St. Mary-of-the-Woods; president, Mother Marie Helene.

Smith College; president, Benjamin F. Wright.

Western Reserve Un.; president, John S. Millis.

Long Island College of Medicine, organized 1858; students 416; teachers, 447.

Medical College of the State of South Carolina, organized 1823; Charleston 16, S. C.; dean, Kenneth M. Lynch; students, 480; teachers, 98.

New York Medical College, organized 1860; students 446; teachers, 761.

Kokomo Junior College, no longer functioning.

Sheldon Junior College, organized 1926; pre
dent, V. A. Gunn; students 40; teachers 11.

Southwestern Bible Institute, organized 19
students, 199; teachers, 21.

CONSTITUTION

Proposed 22nd Amendment, p. 104. Should re
"Congress, on March 24, 1947, approved and s
to the Secretary of State the proposal. As
July 18, 1949, it had been ratified by 23 State
North Dakota and South Dakota in addition
States already listed in the proposal."

moter, turf authority; Louisville, Ky., Oct. 6, 19

DIVORCE LAWS

(p. 687)

California's new Uniform Divorce Recogniti
Act has also been adopted by New Hampshire
Washington, and its adoption been given c
sideration by Nebraska and Wisconsin. The C
fornia Act provides (by addition to the Calif
nia Civil Code) that:

"§150. This article may be cited as the Unif
Divorce Recognition Act.

§150.1. A divorce obtained in another juris
tion shall be of no force or effect in this State
both parties to the marriage were domiciled
this State at the time the proceeding for
divorce was commenced.

§150.2. Proof that a person hereafter obtain
a divorce from the bonds of matrimony in anot
jurisdiction was (a) domiciled in this S
within twelve months prior to the commencem
of the proceeding therefor, and resumed reside
in this State, within eighteen months after
date of his departure therefrom, or (b) at all ti
after his departure from this State and until
return maintained a place of residence within
State, shall be prima facie evidence that
person was domiciled in this State when the
vorce proceeding was commenced.

§150.3. This article shall be so interpreted
construed as to effectuate its general purpos
make uniform the law of those states wi
enact it.

§150.4. The application of this article is lim
by the requirement of the Constitution of
United States that full faith and credit shal
given in each state to the public acts, records
judicial proceedings of every other state."

EDUCATION

The Principal Languages of the World, p.
Clarence A. Manning, Asst. Prof. of Slavic L
guages, Columbia University, declares that Ukr
ian is an independent language, not a dialec
Russian, that 40,000,000 persons speak it ab
and about 1,000,000 in the U. S. and Canada
familiar with it, and that it has its own litera
He also declares that Bylorussian, spoken
more persons than speak Czeck or Slovak, i
independent language.

FOREIGN

Australia, pp. 162-163. In general elections, Dec. 10, 1949, the incumbent Labor party was defeated by a coalition of Liberal and Country parties. An incomplete count Dec. 12 indicated distribution of the 121 seats in the House of Representatives as follows: Liberals 52; Country Party 21; Labor 48. Popular vote: Liberals, 1,543,089; Country 304,671; Labor 1,838,353; other parties. 144,743. The Senate, only a portion of which was affected by the election remained in control of the Labor party.

Austria, pp. 173-174. In a national election, Oct. 9, 1949, the Chamber's 165 seats were distributed as follows: Conservatives, 77; Socialists, 67; Independents, 16; Communists, 5. Popular vote: People's party, 1,844,649; Socialists, 1,620,508; Independents, 487,783; Communists, 174,257.

Bolivia, p. 175. President: Mamerto Urriolagoitia succeeded Dr. Enrique Hertzog, Oct. 22, 1949, inaugurated Oct. 24. Hertzog had resigned due to poor health.

China, pp. 177-179. More than four-fifths of China proper came under domination of Chinese Communist armies during 1949. The People's Republic of China, a Communist regime, was proclaimed in Peiping, Sept. 21, 1949, by the "Chinese People's Political Consultative Conference," under Mao Tze-tung. Chou En-lai was named Premier and Foreign Minister, Oct. 1. Chiang Kai-shek resumed the presidency of the Nationalist government, Dec. 5, 1949. The Nationalist government moved to its fourth capital in 1949, the city of T'aipei, Formosa, 110 miles from the mainland.

Colombia, pp. 179-180. President; Laureano Gomez, Conservative, elected Nov. 27, 1949, unopposed in a one-list election. Liberal party, chief opposition, withdrew its candidate and called for boycott of the election.

Costa Rica, p. 180. President-elect Otilio Ulate inducted, Nov. 8, 1949, as country returned to constitutional rule under a new constitution, following 18 months' rule by a provisional regime.

Denmark, pp. 181-182. In elections to the Folketing (House of Commons), October 1949, the current 150 seats were distributed: Labor, 86; Conservatives, 22; Communists, 1; other parties, 41.

France, pp. 184-187. Premier: Georges Bidault, Popular Republican, appointed Oct. 23, 1949, confirmed by National Assembly, Oct. 28. (Premier Henri Queuille and cabinet resigned Oct. 5, successively followed by Jules Moch, Socialist, and Rene Mayer, Radical, both of whom resigned after failing to form satisfactory cabinets.

Germany, pp. 187-189. Theodor Heuss, Liberal, elected first President of the Federal Republic of Germany (Western Germany), Sept. 12, 1949. Dr. Konrad Adenauer, Christian Democrat, elected Chancellor, Sept. 15. Civil occupation of Western Germany formally was begun Sept. 21 when the Council of Allied High Commission came into being and proclaimed the Occupation Statute which acts in lieu of a peace treaty between the Western occupying powers and the Federal Republic of Germany. An "All-German Republic" was proclaimed in Berlin, Oct. 7, 1949, by the Soviet-zone People's Council which transformed itself into the People's Chamber (lower house) of a Parliament. Otto Grotewohl former Socialist, was elected Chancellor. Wilhelm Pieck, 75, Communist, was elected President, Oct. 11. Elections were scheduled for Oct. 15, 1950. Following meetings of the Foreign Ministers of the Western occupying powers in Paris, Nov. 9-10, 1949, the Allied High Commissioners and Chancellor Konrad Adenauer signed an agreement in Bonn, Nov. 24, which pledged a ban on the re-arming of Germany and totalitarianism in all forms, restricted dismantling of essential industrial plants, and provided for the gradual reestablishment of peacetime relations with other countries.

India, pp. 158-159. New Constitution adopted Nov. 26, 1949, transforming India into a "sovereign democratic republic" under a President, effective Jan. 26, 1950.

Israel, pp. 193-194. The UN General Assembly voted Dec. 9, 1949, 38-14 with seven abstaining, reaffirming its previous decision to place Jerusalem under international administration by the Trusteeship Council.

Italy, pp. 194-196. Re Italy's former colonies, the UN General Assembly approved, Nov. 21, 1949, granting of independence to Libya, comprising Cyrenaica, Tripolitania and Fezzan, by Jan. 1, 1952, and scheduled the independence of Italian Somaliland for 1960, following 10 years' Italian-UN trusteeship. The Assembly voted to keep Eritrea under British occupation, pending findings of a five-nation committee to be sent to ascertain wishes of the inhabitants, and the resolution of Ethiopia's territorial claims.

Monaco, p. 200. Prince Rainier III, who succeeded to the throne at the death of his father, Prince Louis II, May 9, 1949, formally ascended the throne Nov. 19.

New Zealand, pp. 163-164. In elections Dec. 1, 1949, the 80 seats in House of Representatives were distributed: National party, 46; Labor, 34. Prime Minister: Sidney G. Holland.

Netherlands, pp. 201-202. Re Indonesia, agreements were signed in The Hague Nov. 2, 1949, by representatives of the Netherlands Kingdom, Republic of Indonesia and the Federalist States of Indonesia (representing almost two-thirds of the Indonesian archipelago not under "de facto" sovereignty of the Republic of Indonesia), transferring sovereignty over Indonesia, except Dutch New Guinea, to the projected United States of Indonesia not later than Dec. 30, 1949. The Union Statute, 28 articles, binds the Netherlands Kingdom and Indonesia in a union headed by Queen Juliana and her lawful successors upon ratification by the respective Parliaments. The status of Dutch New Guinea, under Netherlands sovereignty, remains in abeyance for one year.

Norway, pp. 202-203. In Parliamentary elections, Oct. 10, 1949, seats of the Storting were distributed as follows: Labor party, 87; Conservatives, 23; Radical Liberals, 19; Agrarians, 13; Christian People's party, 8.

Panama, p. 203. President: Dr. Arnulfo Arias, installed by National Police Nov. 24, 1949 following a bloodless revolution which deposed Provisional President Dr. Daniel Chanis, Jr., Nov. 20, and installed in his place Vice President Roberto F. Chiari who resigned Nov. 24 when the Supreme Court ruled President Chanis was still the constitutional chief executive.

Paraguay, pp. 203-204. Provision President: Federico Chaves, named by Congress, Sept. 11, 1949, to succeed Dr. Felipe Molas Lopez who resigned Sept. 10.

Republic of Philippines, pp. 204-205. In the Presidential election, Nov. 8, 1949, President Elpidio Quirino was reelected for a four-year term.

Portugal, pp. 206-207. In elections to the National Assembly, Nov. 13, 1949, all 120 Deputies supported by the administration's National Union party were elected against meager opposition.

Syria, p. 210. Col. Husni el-Zayim and Premier Barazi were executed Aug. 14, 1949, not 1948.

Uruguay, p. 215. A comprehensive treaty of friendship, commerce and economic development between the United States and Uruguay was signed in Montevideo, Nov. 23, 1949, the first of its kind ever signed with Uruguay and the most comprehensive in scope signed with any other American republic since 1927.

GOVERNORS

(p. 72)

New Jersey, Alfred E. Driscoll, Rep., reelected Nov. 8, 1949.

Virginia, John S. Battle, Dem., elected Nov. 8, 1949.

LABOR REVIEW

(pp. 382-84)

John L. Lewis signed contracts in Washington, Dec. 6, 1949, with a group of owners of small mines to set a "pattern" for contracts with the major anthracite and bituminous operators. The contracts called for an increase in the royalty payments to the United Miners Pension and Welfare Fund from 20c to 35c per ton and a rise in the basic wage for miners from $14.05 to $15 a day.

The first strike to hit one of the Atomic Energy Commission's projects crippled construction work at the Oak Ridge, Tenn., plant Dec. 5, 1949, when 250 A.F.L. workers walked out in the $66,000,000 K-29 gaseous diffusion plant in protest against the employment of non-union labor. The stoppage made 2,000 other workers idle.

A 52-day strike of 17,000 employees of the Aluminum Co. of America, members of the United Steelworkers, C.I.O., was settled Dec. 7, 1949, when the company agreed to non-contributory minimum pensions of $100 a month, a non-contributory social-insurance plan and a program for adjusting wage inequities.

S.M.U., and Arnold Galiffa, Army; Fullback: Charles Justice, North Carolina.

Football (professional), p. 961. All-America Conference playoff champions, Cleveland Browns; National League final standings: (Eastern div.), Philadelphia Eagles; (Western Div.), Los Angeles. (The National Football League and the All-America Conference were merged into a 13-team National-American Football League, Dec. 9, 1949, comprising the 10 former NFL teams and three of the former AAC teams, San Francisco Forty-Niners, Cleveland Browns, and Baltimore Colts. The merger was scheduled to become effective Dec. 19, following the NFL championship play-off.)

Football Scores, pp. 902-906. Canadian Intercollegiate championship: Univ. of Western Ontario defeated McGill, 12-9, in playoff, Nov. 19, 1949.

Polo, p. 856. Argentina won a two-nation series from the United States, defeating the Meadow Brook four in two straight matches, 11-9, and 10-9, Buenos Aires, Nov. 20. Nov. 27.

Rifle and Pistol Shooting, p. 899. World championships, Buenos Aires, Nov. 9-13—Center-fire pistol: Harry Reeves, Detroit, Mich., 559x600; Free shoot: Harry Reeves, 536x600; Silhouette: Tech. Sgt. Huelett Benner, U. S. Army, 565x600; Silhouette (team): Argentina, 2,219 points; Center-fire pistol (team): United States 2,161 points; Small-bore rifle: P. A. Janhonen, Finland; Small-bore (team); Finland: Service rifle: H. Erbern, Sweden, 529x600; Service rifle (team): Sweden, 2,534 points.

Skeet Shooting, p. 861. World record 447x450 claimed by Joe Frost, Jr., San Antonio, Texas, July 5, 1949.

Track, Cross Country Meets, p. 885. Big Ten (4 miles), Chicago, Ill.: Don McEwen, Univ. of Michigan, 19:44.5; team, Wisconsin, 49 points. Heptagonal (5 miles), New York, N. Y.: Richard Shea, Army, 25:48.7; team, Army, 27 points. Eastern Interscholastic championship (2½ miles), South Orange, N. J.: Thomas Coulter, Newton (L. I.) High School, 14:03.1; team, Bishop Loughlin H. S., Brooklyn, N. Y., 131 point, N.C.A.A. (4 miles), East Lansing, Mich: Bob Black, Rhode Island State, 20:25.7; team, Michigan State, 59 points. A.A.U. National championship (6¼ miles), Detroit, Mich.: Fred Wilt, New York A.C., 30:31.

UNITED NATIONS PROCEEDINGS

The United States, Dec. 4, 1949, named five representatives to the newly authorized permanent U. N. peace panel to investigate and conciliate international controversies. The U. S. members are: Ambassador-at-large Philip C. Jessup, Dr. Ralph J. Bunche, Mark F. Ethridge, U. S. Sen. Frank P. Graham of North Carolina and H. Merle Cochran.

The Assembly voted, 38 to 14, with 7 abstentions, for internationalization of Jerusalem under a Trusteeship Council administration. The Soviet bloc, France and five of the Arab League nations voted for the plan and the U. S. and Britain were among those against it. The fourth annual meeting of the Assembly adjourned Dec. 10, 1949, after approving a 1950 budget of $49,644,773, including $8,000,000 for the administration of Jerusalem.

UNITED NATIONS STRUCTURE

(p. 747)

Yugoslavia, Ecuador and India were elected non-permanent members of the Security Council for two-year terms, Oct. 12, 1949, replacing Argentina, Canada and the Ukraine.

U. S. GOVERNMENT

Cabinet Members, p. 54. Salaries increased from $15,000 to $22,500; Secretaries of the Army, Navy, and Air Force Departments, to $18,000.

Secretary of the Interior, pp. 54, 55. Oscar L. Chapman succeeded Julius A. Krug, effective Dec. 1, 1949.

Department of National Defense, p. 54. Vice Admiral Forrest P. Sherman made Chief of Naval Operations, succeeding Admiral Louis E. Denfield, Nov. 1, 1949.

Department of Commerce, p. 55. Bureau of the Census—Philip Hauser named Acting Director, succeeding the late J. C. Capt. Patent Office—Lawrence C. Kingsland resigned Nov. 1, 1949.

U. S. Courts, pp. 56, 57. Courts of Appeals—District of Columbia, Mrs. Burnito Shelton Matthews, James R. Kirkland, and Charles F. McLaughlin appointed to fill three newly created judgeships; the 3rd Circuit, William H. Hastie, of the Virgin Islands, appointed; the 7th Circuit, Walter C. Lindley succeeded Sherman Minton, appointed to the Supreme Court to replace the late Wiley Rutledge. District Judges—New York Southern District, John F. X. McGohey, Signey Sugarman, Gregory F. Noonan, and Irving R. Kaufman sworn in Nov. 2, 1949. Irving H. Saypol replaced Mr. McGohey as (Acting) United States Attorney.

Congress, pp. 58-61. The Senate: Connecticut, William Benton appointed to fill unexpired term of Raymond E. Baldwin, appointed by Governor Chester Bowles to the State Supreme Court of Errors. Idaho, Henry C. Dworshak appointed to fill unexpired term of the late Bert H. Miller. Kansas, Harry Darby appointed to fill unexpired term of the late Clyde M. Reed. House of Representatives: California, 5th District, John F. Shelly, Dem., elected. Illinois, 5th District, Morton Gorski died Dec. 4, 1949. Massachusetts, 6th District, George J. Bates died Nov. 1, 1949. New York, 10th District, Mrs. Edna F. Kelly, Dem., elected (Louis B. Heller represents the 7th District). Pennsylvania, 26th District, John P. Saylor, Rep., elected. Rep. J. Parnell Thomas, Rep., 7th District of New Jersey, resigned his seat as of Jan. 2, 1950. Thomas was a House member for 13 years.

Ambassadors and Ministers, p. 62. Irving Florman named U. S. Ambassador to Bolivia, Nov. 19, 1949; Mrs. Eugenie Anderson, Ambassador to Denmark, Oct. 12, 1949: Selden Chapin, Ambassador to the Netherlands, Sept. 21, 1949.

WASHINGTON NATIONAL MONUMENT

Erection was authorized by Congress in 1848, not 1948, p. 151.

WEIGHTS AND MEASURES

International Atomic Weights, p. 276. Tungsten has been renamed wolfrem; niobium replaces columbium; technetium and promethium rather than eum, Lutetium is chosen over lutecium, and protactinium over proto-actinium.

Outstanding Events of the Year 1949

Compiled by the United Press

The ten biggest stories from the standpoint of editors in various sections of the world.

In the United States

1. President Truman announces atomic explosion in Russia.
2. Communists overrun China.
3. Coal-steel strikes threaten American economy.
4. High Naval officers challenge unification policies.
5. Jury convicts 11 top Communists in U. S.
6. Kathy Fiscus dies 95 feet down a well pipe.
7. P-38 rams air liner at Washington, killing 55.
8. Hungarian court convicts Cardinal Mindszenty of treason.
9. Vice President Barkley marries Missouri widow.
10. Major league races end in baseball's closest finish.

In Europe and Near East

1. President Truman announces atomic explosion in Russia.
2. The Atlantic Pact is signed.
3. British devalue their currency.
4. Communists overrun China.
5. West German Republic is established.
6. Tito splits with the Kremlin.
7. The Berlin blockade is lifted.
8. Catholics and Communists locked in struggle in Central Europe; Mindszenty trial.
9. Greek civil war ends.
10. Peace established in Israel.

"Give Light and the People Will Find Their Own Way."

—Motto of the Scripps-Howard Publication

The World Almanac

and Book of Facts for 1950

The WORLD ALMANAC first appeared 82 years ago, in 1868, as a booklet. It reported the impeachment of President Andrew Johnson and the Reconstruction of the South. Annual publication was discontinued in 1876. In 1884 the WORLD ALMANAC was revived by Joseph Pulitzer, who called it "an expositor of all current information about the universe." It has been published continually since, this being the 65th annual issue of the series. Since 1931, when the properties of the New York World were acquired by Scripps Howard, the WORLD ALMANAC has been published by the New York World-Telegram.

☞ *The Editor is grateful to readers for the many letters, whether of comment or criticism, that attest the usefulness of the World Almanac, and invites suggestions. Address: 125 Barclay St., New York 15, N. Y. Telephone: BArclay 7-3211.*

Turn of the Half-Century

The year 1950 is the half-way milestone of the 20th century. The public, always in favor of round numbers, vociferously welcomed Jan. 1, 1900, with horns, guns and bells, as the start of the 20th century. Calendar experts, however, agreed with the WORLD ALMANAC for 1901, which said: "The 20th century began at midnight of Dec. 31, 1900; the year 1901 is therefore the first year of the 20th century."

Basis for this view is the Christian Era, which was arbitrarily dated from the year 1. (One), commemorating the birth of Jesus. Actually this ignored the first 12 months that must precede the attainment of the first year. Astronomers recognize this by calling the year 1 B. C. the year 0 (Zero).

The 20th century opened with the highest hopes and expectations ever voiced by mankind. To discuss its success and failure, between 1900 and 1950, is the purpose of this review.

Pivotal Political Events, 1900-1950

The following important political events are fraught with the greatest consequences to the welfare of mankind.

RISE OF WORLD COOPERATION TO AVOID WAR, INSURE PEACE.

Recurring attempts, civilian and official, to establish legal means of settling international disputes without war extended into the 20th century from the 19th. Czar Nicholas II had called the first conference at The Hague, 1899. Two major efforts of 20th century were: **League of Nations** including Permanent Court of International Justice, 1919 (non-adherence by U. S.); **United Nations**, 1945 (adherence by U. S.).

Also policy of China Open Door and territorial integrity, 1900; British-American arbitration, Alaskan boundary; arbitration Venezuelan debt dispute, 1902; John Hay's 14 arbitration treaties, 1904 (unratified); Elihu Root's 25 arbitration treaties, 1907 (ratified); Declaration of London, 1909 (unratified); Taft-Knox treaties with France, Britain, 1911 (withdrawn); W. J. Bryan's 22 "cooling-off" treaties, 1913 (unratified); Good Neighbor policy, from Elihu Root to F. D. Roosevelt; Pan-American Conferences, including Gonda treaty with South Americans, 1923; Washington naval conference, 1921-22; Kellogg-Briand 9 arbitration treaties, 1929 (ratified); London naval treaty, 1930; Geneva disarmament conference, 1932; London naval conference, 1935; Tacna-Arica arbitration; Carnegie Endowment for International Peace; World Peace Foundation, etc.

THE RUSSIAN REVOLUTION OF 1917 AND ITS RESULTS.

This broke imperial power and its semi-feudal caste system; interrupted logical course of representative government by substituting dictatorship of radicals; led to application of theories of Karl Marx as interpreted by Lenin and absolute rule of Communist party through self-perpetuating leadership; brought about socialization of private property, collectivization of agriculture, state control of industry and education, militarization; led to communist agitation in many nations to change their governments, to conquest of hitherto independent nations and subversion of others by communist minorities. In 25 years this policy of rule or ruin became the greatest threat to free nations.

RISE OF THE UNITED STATES AS A WORLD POWER.

In 1900, the United States, victor over Spain, was arbiter of Cuba, ruler of Philippines. Britain yielded dominance over Panama Canal. U. S. built canal and most powerful navy; stopped dismemberment of China by Open Door policy; ended Russo-Japanese war by negotiation; turned tide of two world wars and financed rehabilitation of European nations; obtained most of world's gold as creditor nation; maintained great military establishment and huge bureaucracy. By 1950 it was the principal support of competitive capitalism and bulwark of representative government.

DESTRUCTION OF GERMANY, AUSTRIA-HUNGARY, TURKEY; RISE OF NATIONALISM.

Two World Wars, 1914-1918 and 1939-1945, destroyed Germany and Austria-Hungary, which had held balance of power in Europe and checked Russian tide. World War I eliminated monarchies, yielded brief experiments in representative government. Also intensification of nationalism with forming of new republics: Finland, Poland, Free City of Danzig, Estonia, Latvia, Lithuania, Czechoslovakia, Russia, Hungary and kingdom of Serbs-Croats-Slovenes.

World War I also destroyed Turkish sultanate, removed Turkish control over other nations in Asia Minor, first organized as Hedjaz, Mesopotamia (Iraq), Syria, Lebanon, Trans-Jordan, Palestine.

Overturn of Weimar republic led to totalitarianism under Hitler, abrogation of Versailles treaty, annexation of Austria, war and massacre of millions, restoration of monarchy in Hungary World War II led to complete destruction of German governments, revision of Poland, incorporation of Danzig, absorption by Russia of Latvia, Estonia, Lithuania, parts of Finland, Rumania, East Prussia, Czechoslovakia; independence of Albania, republic in Hungary, Free City of Trieste. In Asia Hedjaz became part of Saudi Arabia; Iraq, Lebanon, Syria, Trans-Jordan (Jordan) and Israel established independence.

DECLINE OF BRITISH IMPERIAL POWER.

Early in the 20th century Britain was arbiter of world trade, ruler of vast territories, controlling l lions in colonies by appointed officials. It was waging war to eliminate independence of two So African republics and get control of South Africa. It checkmated ambitious German empire in Africa, Morocco, Samoa; formed protective entente with France. It had stalled off home rule Ireland. The half-century saw the rise of Dominions to self-government inside Commonwealth; h rule, then independence, for Ireland; release of India from colonialism to dominion status and in pendence; loss of royal prestige when a king abdicated, preferring personal liberty to public serv weakening of British financial strength in two world wars and nationalization of Bank of England; La party government, modified socialism, partial nationalization of industry and development of mans economy and welfare state by heavy taxation of resources and incomes.

WESTERNIZATION OF THE FAR EAST.

Rise of Japan as industrial and military power, able to defeat Russia, seize Formosa and Ko develop Manchurian industry, control vast trade. Breakup of Chinese monarchy, civil war among lords, organization of Chinese republic under Sun-Yat-Sen and Chiang Kai-shek. Loss of west influence through two world wars. Complete defeat of Japan; partial end to extraterritoriality; e of communism as political force; movement of British, French and Dutch colonials for self-gove ment, including recogniton of India, Pakistan and native organization in Indonesia; independenc Philippines; expansion of U.S.S.R. in Outer Mongolia, Sakhalien, Kurilies; republic in Korea; west control of strategic airports.

Balance Sheet of Half-a-Century

Universal disarmament, world-wide peace, general education and a good living for everybody were forecast for the new 20th century.

Actually there were more peace movements, disarmament conferences, treaties of arbitration and pacific settlements of tense disputes than there were wars. But the wars were bigger and killed more people.

They Failed to Win Peace

The contradictions and contrasts of the first half of the 20th century were fabulous. The autocratic czar of Russia, who had initiated the first international peace conference in The Hague in 1899, died at the hands of Russian bolshevists in 1918.

President Woodrow Wilson, who had formulated the League of Nations covenant in 1919, was repudiated by his own countrymen and died embittered. He warned Americans that eventually they would have to join the world. They did—in the United Nations in 1945.

Showers of Gold

The half-century showered riches on the inventive, the shrewd, the industrious and the lucky. Frank W. Woolworth built the world's largest building of 1912 on a foundation of dimes. Basil Zaharoff became enormously wealthy peddling munitions.

Henry Ford, a grease-stained mechanic, put the motor car within reach of the common man and became a billionaire. Once he startled the nation by announcing a minimum wage of $5 a day for every employe, which many thought ruinous.

Benefactions in Abundance

Contrariwise, two rich men began unloading their pockets and hundreds of others followed suit. The richest man of 1900, John D. Rockefeller, target of criticism for his business methods, became the greatest benefactor of general education and medical research the world has known. Andrew Carnegie, the iron-master, filled the country with libraries and poured millions into colleges.

Dramatic Moments of Peace

The possibilities of Marconi's wireless was dramatized by the steamship Republic on the high seas in 1909.

The radio became a national institution when a robust voice yelled over and over on roll call at the Democratic convention of 1924: "Alabama casts 24 votes for Un-der-wood!"

Even Prize-Fighting Paid

When Bob Fitzsimmons, the prizefighter with diamonds in his teeth, defeated James J. Jeffries before the century began, they divided less than $100,000; when Gene Tunney defeated Jack Dempsey at Chicago in 1927 they had a gate of $2,650,000 and social standing.

By means of motion pictures and radio entertainers dipped into the golden flood; Mary Pickford, Charles Chaplin, Jerome Kern, Irving Berlin, Bing Crosby led a long list of millionaires.

Easy Street Blues

In the first half of the 20th century oil wells and Wall Street competed in making men rich; but Wall Street betrayed its followers on that dark day, Oct. 29, 1929. The crash ushered in losse $15,000,000,000 by the end of the year and followed by the great depression and the entr the Federal government into relief financing.

A Man Named Gandhi

More individuals worshiped in churches t ever before, and in India a man named Gan made the doctrine of non-violence the guid inspiration of a nation. Science halted ravage yellow, typhoid, puerperal fever, juvenile disea poliomyelitis; increased longevity; still baffled cancer and heart disease. Transfusion, Dakin s tion, penicillin, sulfa compounds were major vances.

Nature Uncontrolled

In the atomic bomb man acquired control of most destructive force. Yet he was unable to the disasters of nature.

Mt. Pelee erupted on Martinique, killing 30, Earthquake and fire ravaged a great part of Francisco. Flood and famine took a huge tol the Far East. In Chicago the Iroquois The burned, killing 602. At New York 1,000 died in burning of the Str. Gen. Slocum. The liner Tit sank in mid-ocean on its first voyage with victims.

World's Greatest Crime

Man's inhumanity to man reached the pea cruelty. Pogroms against the Jews flared in Ru when the century opened; 5,000 died in Oc alone; Kishenev became a by-word.

By the 1930s the Nazis starved their poli enemies in concentration camps and Adolf H became personally responsible for the scien extermination of 6,000,000 Jews, the crime of centuries, now call genocide—race murder.

Conquest of the Air

The internal combustion engine, put on w in the 1890s, successfully made the motor car the airplane practical vehicles in the 1900s. heavier-than-air planes and dirigible bal crossed the Atlantic.

Millions Died in Wars

The most civilized and advanced nations fo the most brutal wars of history. The 20th cen opened with American troops mopping up in S ish possessions; British, Japanese, French American troops putting down the Boxer reb in China; Britain fighting Orange Free State South African Republic in South Africa. were risings in Morocco, Tibet, Ireland and Ce America; South American insurrections wer like a string of firecrackers. A revolution in M changed the economic life of the country. world wars took millions of lives.

Man Hopes and Carries On

Yet the battle for individual security and dom, for the right of man to live an unfe life, goes on, inspired by the determinati peace-loving millions, while the functioning United Nations, stronger and more compreh than any earlier league, is proof of the g will to overcome all obstacles to peace.

Everyday Things in American Life Fifty Years Ago

American ways are continually changing. Some changes are the result of major inventions, such as the motor car and the airplane. Others appear because Americans welcome new gadgets and have the money to buy them. Here are composite portraits of other days.

THE AMERICAN MALE, 1900

He was careless about keeping his clothes pressed (at home) and often wore baggy trousers, which had no cuffs, with a frock coat. He wore a derby hat in winter, a straw sailor and black alpaca coat in summer. He could buy a ready-made suit for $25-$35. (Tom Murray, Chicago haberdasher, who advertised the back of his head with "Meet Me Face to Face," sold suits for $10.) The American wore a high, stiff, detachable collar and detachable cuffs, with adjustable clips. He could change collars and cuffs and still get several days' wear out of his shirt, which went on over his head and had a huge shirt-tail. The shirt that went "on and off like a coat" was still to be invented. Some men wore celluloid collars that could be wiped clean to last a week, but the average male ascribed them to country bumpkins. He wore high laced shoes in winter and oxfords in summer. He shaved with an open-blade razor and heard with curiosity about a safety razor with which he couldn't "cut himself." He made lather in a shaving mug and applied it to his face with a brush.

This American wore a jewelled tie-pin. Diamonds were preferred by flashy gamblers and race-track touts. A married man wore "a plain gold band." He carried a heavy gold hunting-case watch, considered an improvement on the "open-face." From his heavy watch chain hung small objects, usually fraternity emblems; sometimes little cats, dogs and green pickles. A device in his coat lapel indicated membership in secret orders, such as the Masons, Odd Fellows, Knights of Pythias, Woodmen and "going to lodge" was his favorite alibi.

In middle-sized American cities the man of 1900 walked to work, or used a trolley or cable car; in New York and Chicago he boarded elevated trains, drawn by dummy steam locomotives. He worked 10 hours a day, six days a week, vacation periods 10 days to 2 weeks. If his own boss he could leave the office at 10 or 11 a.m. for the corner saloon (not bar) where a glass of beer, 5c, entitled him to a free lunch of beef stew or roast veal, or he could sample pickles and anchovies. He preferred cigars to cigarets, and if middle-aged called cigarets "coffin-nails." His father's brand, Sweet Caporal ("Sweet Caps") was disregarded by college boys for Fatimas, Murads, Egyptian Deities, Pall Malls. He could still buy cigars at a store identified by a wooden Indian, though most city stores had discarded them. The cigar lighter was a gas jet.

The American of 1900 thought spitting a necessity and brass spittoons a sign of affluence. This habit came from chewing tobacco; "cut plug" was widely advertised on billboards. Beer, by Schlitz, Pabst, Blatz and Anheuser-Busch was also on billboards, but "dry" beer was not mentioned. A pretty girl's face appeared on calendars, but not with beer signs. This American could eat lunch for 25 to 30 cents at a lunch counter, where a waitress yelled orders to the cook and the cook repeated the order ("Two on a raft, wreck 'em" meant poached eggs on toast.) A steak dinner cost 50c; course dinner with wine, $1. He was still a bit skeptical about canned soups, introduced in 1897 by a man named Campbell.

He travelled on "vestibuled" trains that had observation platforms and chemical gas lamps. He endured layers of soot to get fresh air; at night double screens failed to protect his berth from dust and soot. (The Lackawanna burned anthracite; advertised Phoebe Snow, whose gowns were spotless.) A hotel charged him $1.50 for room with bath, $1 without bath. Domestic letter postage was 2c an ounce.

The American, at the beginning of the century, was excessively proud of the U. S. Navy. He knew the names of the principal commanders in the Spanish-American war. He enjoyed G. A. R. parades and political torchlight processions. He voted on paper ballots. His boys wore celluloid picture buttons of military heroes, warships, flags and mottoes. He believed it was patriotic to explode gunpowder on July 4. He declared that the party good enough for his father was good enough for him. He was convinced that trusts, especially the oil trust, grabbed profits by unfair advantages; on the other hand he admired bigness, praised the "self-made man," and envied "captains of industry." He was vaguely conscious of clamor for reform —for eight-hour day; employers' liability for industrial accidents; fire-proofing; regulation of railroads, meat packing and drugs; taking street railway franchise out of politics. He heard evangelists urge wiping out segregated vice districts, but thought this as unlikely to happen as prohibition. (Both happened.) He thought rubber tires a great improvement for buggies. He had given up riding a bicycle, though he followed the bicycle races. Probably he had never ridden in a "machine" (automobile) or even seen one by 1900. He was quite wary about attending "nickel shows" established in "remodelled" stores. He paid no income tax, and if his government had taken 33% of his earnings (the average 45 years later) he would have reached for his grandfather's Colt.

THE AMERICAN WOMAN

The average American woman, when the 20th century began, dressed her age. Young matrons did not try to look like teen-agers. Although white dresses and colored prints were favored by older women in summer, black, brown and more subdued tones were worn in winter. Widows advertised their bereaved state for a year by wearing black veils, gloves and hats and using black-bordered handkerchiefs and stationery. The average woman was encased in a whalebone corset which, constricted at the waist, developed bulging bosoms and hips and enabled her to sit stiffly upright. Crossing the knees was considered bad manners and probably was difficult. Her skirts swept the ground and were raised at street crossings by a dextrous twist of the wrist. She wore dead birds of brilliant plumage on her hats, and if well-off, egrets. Her blouse was called a shirt-waist; lace or embroidery above the bosom made it a "peek-a-boo." Collars were high, jabots in favor circa 1910. Small gold watches were worn on shirt waists.

Elderly women carried black parasols; young women went in for brightly-colored ones; both shunned the sun and would have been horrified by sun-tan. Face powder was used sparingly; rouge was considered characteristic of fast women; lipstick and finger-nail paint were unknown and the cosmetic industry concentrated on soaps and perfumes. No American woman applied make-up in public or smoked cigarets. On her head she carried a high pompadour, augmented by a hidden switch of her own or some other person's hair.

At home, early in the 20th century, the American woman had a wood or coal-burning kitchen range, a gas plate, or a gas stove. "Cook with Gas" was a popular slogan. The ice man filled the ice box daily. Her house was heated by a coal-burning hot-air furnace. She used a sad iron and operated a washing machine. Her house was lighted by both gas and electricity and a Welsbach reading lamp was fed by a hose from a gas jet.

The American woman of the 1900s enjoyed dancing the two-step and the waltz, especially ragtime like "Creole Belles" and "darky" tunes. Like everyone else she played an upright piano, probably Chopin, Chaminade and Ethelbert Nevin. If she "had to work" she attended a business college to learn typewriting and bookkeeping. In offices she was deferred to, and a staple joke in the comic weeklies (Puck, Judge) dealt with the irate wife discovering a blond hair on her husband's coat. (40 years later it was lipstick.) In the office she was called a typewriter, not a secretary, and when she typed the clank of her Remington could be heard all over the place.

Younger girls became sales clerks or telephone operators. Men rightly believed that this hurt their capabilities as cooks. The telephone operator was everybody's sweetheart, and some men were proficient in "jollying" her. Every office clerk called her dearie and she responded with the same freedom, but kept aloof personally.

Twilight of the Kings—Rise of Republics 1900-1950

MONARCHIES ABOLISHED

Albania; Austria; Bavaria; Bulgaria;' China; German Empire; Greece, 1925 (Restored 1935); Hungary, 1918 (Restored 1920; abolished 1944); Iceland (left Denmark); Italy; Montenegro; Manchukuo (Jap puppet state); Portugal; Prussia; Rumania; Russian Empire; Saxony; Serbia; Spain, (Abolished 1931; Monarchy to succeed Franco voted 1947); Turkey; Wuerttemberg.

MONARCHIES ESTABLISHED

Albania (later abolished); Egypt; Hedjaz (Saudi Arabia); Iraq; Jordan (Trans-Jordan); Norway (independent of Sweden).

SPECIAL STATES ESTABLISHED

Free City of Danzig (now Poland); Free City of Trieste; State of Vatican City.

REPUBLICS ESTABLISHED

Albania; Austria; Bulgaria; Burma; Coc China; Cuba; Czechoslovakia; Eire; Estonia (19 1940); Finland; Germany (Weimar); Greece (19 1935); Iceland; India; Indonesia; Israel; Ita Korea; Latvia (1918-1940); Lebanon; Lithua (1918-1940); Pakistan; Panama; Philippin Poland; Portugal; Rumania; Spain (1931-193 Syria; Turkey; U.S.S.R. (Communist); Viet N (Annam, temporary); Yugoslavia; Federal public of Western Germany (1949).

REPUBLICS ABOLISHED

Estonia; Germany (Weimar); Greece; Latv Lithuania; Orange Free State; South Afri Republic (Transvaal); Spain.

Major U. S. Political, Economic Changes of Fifty Years

1. Shift of political power from financial-industrial conservatism (stand-pat) to progressive-liberal-reform elements in major parties.

2. Increased responsibility of public officials to voters; direct election of senators; elimination of street railway franchises from politics; intensified fight on municipal and state corruption.

3. Expansion of Federal power over corporations, beginning with laws against unfair competition, regulating banks and life insurance concerns; extending to direction of labor policies, allocation of materials, supervision of financial organization (SEC), curtailment of profits.

4. Extension of Federal and State responsibility for individual welfare, from employers' liability to social security, unemployment relief, make-work projects, proposed medical care.

5. Lifting of farmer from bankruptcy to solvency, via political pressure, including direct subsidies government buying of crops to support price lev

6. Rise of labor as economic and political pow raising standard of living, achieving collective b gaining, eliminating strike-breaking, guarantee employment, including wage fixing by governm commissions.

7. Lessening of racial tensions and discriminati laws against unfair employment, disenfranchi ment.

8. Wider participation of women in business public affairs; national woman's suffrage; wome military and naval auxiliaries.

9. Growth of government in business, from rec mation to flood control and public utilities.

10. Redistribution of wealth by limiting fortu through inheritance and income taxes; rejection early policy of economy and balanced budgets public works projects, subsidies, deficit financ and huge taxation.

American Military Action, 1900-1950

1900—Occupation of Puerto Rico (annexed 1899).
1900—2,500 Marines help relieve Peking in Boxer rebellion.
1900-1902—Occupation of Cuba.
1900-1902—Guerrilla war in Philippines.
1903—Sailors and Marines from U. S. S. Nashville stop Colombian Army at Panama.
1904—Brief intervention in Dominican Republic.
1906-1909—Intervention in Cuba.
1909—Brief intervention in Honduras.
1911—Intervention (to collect customs) in Honduras, Nicaragua, Dominican Republic.
1913—Marines seize Vera Cruz.
1914—Marines enter Haiti, stay until 1934.
1916—Gen. John J. Pershing, with cavalry fo enters Mexico to punish Villa.

Margaret Fuller, Countess d'Ossoli, Ameri critic and woman's rights advocate, in shipwr off Fire island, July 19, 40.

Honore de Balzac, French author, Aug. 17,

Louis Philippe, exiled king of France, at Cl mont, Eng., Aug. 26, 77.

Commodore Jacob Jones, commander of W in War of 1812.

Lord Francis Jeffrey, critic of Edinburgh view, 77.

SLAVERY FIGHT IN U. S.

In 1850 the United States was torn by dissen over slavery. In the Senate Henry Clay, the "G Compromiser," on Jan. 29 offered a set of res tions, the Compromise of 1850. As a result Ca ornia was admitted to the Union Sept. 9 as 31st state, with slavery forbidden. Utah and Mexico were made territories, with no reservat about slavery. The north and west boundarie Texas were determined and Texas was paid $10,0 000 for relinquishing claims to New Mexico. Sla was ordered abolished in the District of Colun on Jan. 1, 1851.

Finally, the old Fugitive Slave Law of 1793 amended with stringent regulations, by which ficers of the law in free states were called upo cooperate with Southern constables pursuing away slaves. Feeling against this was so stron the North that Chicago "nullified" the act ordered its police not to obey it. When co

heads prevailed, this was tabled. When Daniel Webster supported the Compromise, especially in the matter of New Mexico, in his "Seventh of March" speech, he alienated the Abolitionists.

BATTLE FOR RELIGIOUS TOLERANCE

In 1850 Franklin Pierce, member of the New Hampshire house, presented resolutions for the removal of restrictions on Roman Catholics from holding office in that state; also the removal of property qualifications for voting. The measures were submitted to the electorate and defeated.

In England the Oxford Movement, which had brought converts to Rome, had just quieted down when a decree by Pope Pius IX, who had re-entered Rome April 12, announced the replacement of the vicars apostolic by a hierarchy in England and Wales. An archiepiscopal see and 12 episcopal sees were created, and Dr. Wiseman became cardinal and first archbishop of Westminster. This led to strong protests in parliament. Nov. 5 (Guy Fawkes' Day) was given over to demonstrations by Protestants.

In the same year the pope established the archiepiscopacy of New York.

There was also argument in the House of Commons when Baron Lionel Nathan de Rothschild appeared to take his seat as a member for the City of London. When asked to take the oath of office on the Bible he asked permission to swear only on the Old Testament. This led to heated debate, but eventual permission. When he repeated the oath he omitted the words "upon the true faith of a Christian," explaining they were incompatible with his conscience. Amid protests that this was a Christian parliament, action was held up and the member not sworn.

BOOKS OF 1850

William Allingham, Poems.
Elizabeth Barrett Browning, Sonnets from the Portuguese.
Robert Browning, Christmas Eve and Easter Day.
William Cullen Bryant, Letters of a Traveler.
Thomas Carlyle, Latter-day Pamphlets.

Alfred Tennyson, In Memoriam.
Bayard Taylor, El Dorado.
William M. Thackeray, Pendennis (completed); Rebecca and Rowena.
Elizabeth Wetherell, The Wide, Wide World.
John Whittier, Songs of Labor.

FAMOUS MURDER TRIAL

In 1850 Dr. John White Webster, of Harvard Medical School, was tried for the murder, in 1849, of his colleague, Dr. George Parkman. The jury found him guilty in 10 minutes and he was hanged in public Aug. 30. He confessed hitting Parkman with part of a trunk and burning his body.

JENNY LIND A SENSATION

Jenny Lind, the "Swedish Nightingale," aged 29, was brought to New York by P. T. Barnum and gave her first concert at Castle Garden Sept. 11, 1850. Barnum had agreed to pay her $1,000 a concert for 150 concerts. So great was the sensation on her arrival, with a feverish bidding for tickets, that Barnum, according to Phillip Hone, revised her contract, giving her one-half of the net income, or $12,600, for the first performance, for purposes of charity, $3,000 going to the fire department. However, it is reported that Barnum decided what charities to favor. Jenny Lind broke her contract with Barnum because he compelled her to sing one concert "in a stable." This was the New National Theatre, which had been used for a circus shortly before her concert. Miss Lind also sang the soprano role in the Messiah Oratorio with the New York Philharmonic. In 1852 she married Otto Goldschmidt, a German composer, pupil of Mendelssohn, 9 years her junior, who became an authority on Bach in London.

SEARCH FOR FRANKLIN EXPEDITION

Sir John Franklin, Arctic explorer, had set out from England with the Erebus and Terror, May 26, 1845, and had disappeared. In England a new expedition to find him was led by Capt. Horatio Austin. In the United States Henry Grinnell, a New York merchant, put up $30,000 to fit out the Advance, 140 tons, and the Rescue, 90 tons, which sailed from New York May 23, 1850, under Lieut. Edwin J. de Haven, U. S. N. He discovered Grinnell Land. Later search disclosed that Franklin had died in 1847. The graves of his party were found 1879-80.

EVENTS OF 1850

President Taylor reported a national debt of $63,452,773.55.

The Postoffice Department reported a profit of $369,986 and proposed reducing ordinary letter postage from 3c to 2c.

The seventh census of the U. S. showed a population of 23,191,876, of which 3,204,313, over 7 per cent, were slaves. The center of population was 23 miles southeast of Parkersburg, W. Va.

Congress prohibited flogging on naval and merchant vessels.

The New York Times was founded by George Jones and Henry J. Raymond.

The first railroad out of Chicago, the Galena & Chicago Union, ran 42 miles to Elgin, Ill.

Emanuel Leutze completed painting Washington Crossing the Delaware.

Kansas City, Mo., and Sacramento, Cal., were founded.

Harper's New Monthly Magazine was started by Harper & Bros.

U. S. and Britain signed the Clayton-Bulwer treaty for joint control of a canal to be cut across Nicaragua by an American company. (Annulled 1902).

James Gordon Bennett, publisher, New York Herald, was assaulted with a cowhide whip on Broadway by an unsuccessful candidate for district attorney.

Millard Fillmore became 13th president July 10 and made Daniel Webster secretary of state July 20.

Edwin Forrest, actor, beat up Nathaniel P. Willis, author and critic, alleging undue attentions to his wife.

M. de Gasparris, Naples, discovered two planets (asteroids): Parthenope and Egeria. Hind, Englishman, discovered Victoria.

Congress granted land for rights of way in Illinois, Mississippi and Alabama to Illinois Central and Mobile & Ohio.

The largest tree was discovered in California by W. Whitehead, Nov. 11 and named Wellingtonia Gigantua.

Alfred Tennyson was named poet laureate by Queen Victoria on the death of William Wordsworth.

In New Jersey Gail Borden invented a meat biscuit, Nov. 11.

Lola Montez made her first appearance in New York Dec. 29.

The first Young Men's Christian Assn. was opened in Boston, Dec. 29.

Franz Liszt presented Richard Wagner's Lohengrin in Weimar.

Prussia agreed, at Olmuetz, to recognize the Germanic Diet at Frankfurt, thereby failing to establish a union dominated by Prussia instead of Austria. This became known as the "Disgrace of Olmuetz."

Jerome Bonaparte, former husband of Elizabeth Patterson of Baltimore, last surviving brother of Napoleon, made marshal of France.

Clipper ship Sea Witch cut New York-San Francisco passage, via Cape Horn, from 159 to 97 days; Flying Cloud used 89 days.

Judiciary of the United States

SUPREME COURT

(Dates in parentheses show when born and when appointed.)
Chief Justice ($25,500)—Fred M. Vinson, of Kentucky (1890—June 6, 1946).
Associate Justices ($25,000)—Hugo L. Black, of Alabama (1886—Aug. 12, 1937); Stanley Reed, of Kentucky (1884—Jan. 15, 1938); Felix Frankfurter, of Massachusetts (1882—Jan. 5, 1939); William O. Douglas, of Connecticut (1898—March 20, 1939); Robert H. Jackson, of New York (1892—June 12, 1941); Harold H. Burton, of Ohio (1888—Sept. 18, 1945); Thomas C. Clark, of Texas (1899—July 28, 1949); Sherman Minton of Indiana (1890—Sept. 15, 1949).
Clerk—Charles Elmore Cropley. **Marshal**—Thomas E. Waggaman. **Reporter**—Walter Wyatt. **Librarian**—Helen Newman, Washington 13, D. C.

UNITED STATES COURTS OF APPEALS

($17,500 each)

District of Columbia Circuit—Judges: Harold M. Stephens, Henry White Edgerton, Bennet Champ Clark, Wilbur K. Miller, E. Barrett Prettyman, James M. Proctor.

Clerk—Joseph W. Stewart, Washington 1.

First Circuit (Maine, Massachusetts, New Hampshire, Rhode Island, Puerto Rico)—Calvert Magruder, Boston 9, Mass.; John C. Mahoney, Providence 3, R. I.; Peter Woodbury, Concord, N. H. (P. O. Manchester, N. H.).

Clerk—Roger Stinchfield, Boston 9, Mass.

Second Circuit (Connecticut, New York, Vermont)—Learned Hand, New York 7, N. Y.; Thomas W. Swan, New Haven, Conn., (P. O., Foley Square, New York 7, N. Y.); Augustus N. Hand, New York 7, N. Y.; Harrie B. Chase, Brattleboro, Vt.; Charles E. Clark, New Haven 6, Conn.; Jerome N. Frank, New York 7, N. Y.

Clerk—Alexander M. Bell, New York 7, N. Y.

Third Circuit (Delaware, New Jersey, Pennsylvania, Virgin Islands)—John Biggs, Jr., Wilmington 33, Del.; Albert B. Maris, Philadelphia 7, Pa., Herbert F. Goodrich, Philadelphia 7, Pa.; Gerald McLaughlin, Newark 1, N. J.; John J. O'Connell, Pittsburgh 19, Pa.; Harry E. Kalodner, Philadelphia 7, Pa.

Clerk—Mrs. Ida O. Creskoff, Philadelphia 7, Pa.

Fourth Circuit (Maryland, North Carolina, South Carolina, West Virginia, Virginia)—John J. Parker, Charlotte 2, N. C.; Morris A. Soper, Baltimore 2, Md.; Armistead M. Dobie, Charlottesville, Va.

Clerk—Claude M. Dean, Richmond 4, Va.

Fifth Circuit (Alabama, Florida, Georgia, Louisiana, Mississippi, Texas, Canal Zone)—Joseph C. Hutcheson, Jr., Houston 2, Texas; Samuel H. Sibley, Atlanta, Ga. (P. O. Box 23, New Orleans, La.); Edwin R. Holmes, New Orleans, La. (P. O. Yazoo City, Miss.); Leon McCord, Montgomery 2, Ala.; Curtis L. Waller, Tallahassee, Fla.; Elmo P. Lee, P. O. 103, Shreveport 81, La.

Clerk—Oakley F. Dodd, New Orleans 6, La.

Sixth Circuit (Kentucky, Michigan, Ohio, Tennessee)—Xen Hicks, Knoxville 12, Tenn.; Charles C. Simons, Detroit 31, Mich.; Florence E. Allen, Cleveland 14, Ohio; John D. Martin, Sr., Memphis 3, Tenn.; Thomas F. McAllister, Grand Rapids 1, Mich.; Shackelford Miller, Jr., Louisville 2, Ky.

Clerk—John W. Menzies, Cincinnati 2, Ohio.

Seventh Circuit—(Illinois, Indiana, Wisconsin)—J. Earl Major, Springfield, Ill.; Otto Kerner, Chicago 10, Ill.; Sherman Minton, New Albany, Ind.; F. Ryan Duffy, Milwaukee, Wis.; vacancy. (P. O. address all judges, 1212 Lake Shore Drive, Chicago 10, Ill.).

Clerk—Kenneth J. Carrick, Chicago 10, Ill.

Eighth Circuit (Arkansas, Iowa, Minnesota, Missouri, Nebraska, North Dakota, South Dakota)—Archibald K. Gardner, Aberdeen, S. Dak. (P. O. Huron, S. Dak.); John B. Sanborn, St. Paul 2, Minn.; Joseph W. Woodrough, Omaha 2, Nebr.; Seth Thomas, Fort Dodge, Iowa; Harvey M. Johnsen, Omaha 6, Nebr. (P. O. Kansas City, Mo.); Walter G. Riddick, Little Rock, Ark; John C. Collet, Kansas City 6, Mo.

Clerk—E. E. Koch, St. Louis 1, Mo.

Ninth Circuit (Arizona, California, Idaho, Montana, Nevada, Oregon, Washington, Alaska, Hawaii)—William Denman and Clifton Mathews, P. O. Box 547, San Francisco 1, Calif.; Albert Lee Stephens, Los Angeles 12, Calif.; William Healy, Boise, Idaho (P. O. Box 547, San Francisco 1, Calif.); Homer T. Bone, Tacoma 1, Wash. (P. O. Box 547, San Francisco 1, Calif.); William E. Orr, Las Vegas, Nev. (P. O. Box 547, San Francisco 1, Calif.); Walter L. Pope, Missoula, Mont. (Rm. 407 P. O. Bldg., 7th & Mission Sts., San Francisco, Calif.).

Clerk—Paul P. O'Brien, P. O. Box 547, San Francisco 1, Calif.

Tenth Circuit (Colorado, Kansas, New Mexico, Oklahoma, Utah, Wyoming)—Orie L. Phillips, Denver 1, Colo.; Sam G. Bratton, Albuquerque, N. Mex.; Walter A. Huxman, Topeka, Kan.; Alfred P. Murrah, P. O. Box 1554, Oklahoma City 1, Okla.

Clerk—Robert B. Cartwright, Denver 2, Colo.

UNITED STATES COURT OF CUSTOMS AND PATENT APPEALS

Chief Judge—Finis J. Garrett, of Tenn.

Associate Judges—Charles S. Hatfield of Ohio; Joseph R. Jackson, of N. Y.; Ambrose O'Connell, of N. Y.; Noble J. Jackson, of Ind.; ($17,500 each).

Clerk—Arthur B. Shelton, Washington 25, D. C.

UNITED STATES CUSTOMS COURT

Chief Judge—Webster J. Oliver, N. Y.

Judges—Genevieve R. Cline, of Ohio; William A. Ekwall, Ga.; William P. Cole, Jr., Md.; Charles D. Lawrence, N. Y.; Irvin C. Mollison, Ill.; Jed Johnson, Okla.; Paul P. Rao, N. Y.; Morgan Ford, N. [illegible] ($15,000 each).

Clerk—William F. X. Band. **Marshal**—Patrick DeMarco. **Librarian**—Anna H. Miller. All 201 Vari[illegible] St., New York 11, N. Y.

UNITED STATES COURT OF CLAIMS

Chief Judge—Marvin Jones, of Texas. **Associat[illegible]**—Benjamin H. Littleton and Sam E. Whitake[illegible] of Tenn.; Joseph Warren Madden, of Pa.; Eva[illegible] Howell, of Ill.; ($17,500 each).

Clerk—Willard L. Hart, Washington 25, D. [illegible]

U. S. EMERGENCY COURT OF APPEALS

(Serve without additional compensation in the[illegible] positions.)

Chief Judge—Albert Branson Maris, Philade[illegible] phia, Pa. (U. S. Circuit Judge, 3rd Circuit[illegible] **Judges**—Calvert Magruder, Boston 9, Mass. (Chi[illegible] Judge, U. S. Court of Appeals, 1st Circuit); Thomas F. McAllister, Grand Rapids, Mich. (U. [illegible] Circuit Judge, 6th Circuit); Walter C. Lindle[illegible] Danville, Ill. (Chief Judge, U. S. Communications addressed to him as Charge d'Affaires ad interim of Nepal to the United States should therefore be sent to 12A Kensington Palace Gardens, London, W8, England.

CABINETS OF THE UNITED STATES

Secretaries of State

The Department of Foreign Affairs was created by Act of Congress July 27, 1789, and the name changed to Department of State on Sept. 15. Thomas Jefferson, the Minister to France, was appointed Secretary of State by President Washington Sept. 26, and took office March 21, 1790. John Jay, who had held the office of Secretary for Foreign Affairs since his appointment by the Ninth Continental Congress in March 1784, in place of Robert R. Livingston (appointed Jan. 1781), left it in September, 1789, when the U. S. Supreme Court was established with him as Chief Justice.

The Secretary of State is charged, under the direction of the President, with the duties appertaining to correspondence with the public ministers and the consuls of the United States and with the representatives of foreign powers accredied to the United States, and to negotiations of whatever character relating to the foreign affairs of the United States.

Secretaries of the Treasury

The Second Continental Congress on July 29, 1775, appointed Michael Hillegas and George Clymer, Esqs., as "joint treasurers of the United Colonies." Francis Hopkinson was elected Treasurer of Loans July 27, 1778. Robert Morris was appointed Superintendent of Finances by the Seventh Continental Congress on Feb. 20, 1781. The Treasury Department was organized by Act of Congress on Sept. 2, 1789, and President Washington commissioned Alexander Hamilton, Secretary of the Treasury on Sept. 11

Secretary of Defense

The National Military Establishment was created by Public Law 253, dated July 26, 1947, of which the Secretary of Defense, as head, is a Member of the President's Cabinet. The Departments of the Army, the Navy, and the Air Force function within the National Military Establishment. The Secretaries of War and the Navy are no longer members of the President's Cabinet.

Secretaries of War

The Second Continental Congress set up in June, 1776, a Board of War and Ordnance consisting of five members: John Adams, Roger Sherman, Benjamin Harrison, James Wilson and Edward Rutledge. Richard Peters was elected Secretary on June 12. This Board several times changed, continued until Oct. 30, 1781, when Congress appointed Benjamin Lincoln Secretary of War, a position created by Act of Congress the previous February. The Eleventh Continental Congress on March 8, 1785, appointed Gen. Henry Knox to succeed him with the added duties of the Navy. The War (and Navy) Department was created by Act of Congress Aug. 7, 1789, and Gen. Henry Knox was commissioned Secretary of War under that Act Sept. 12, 1789.

Postmasters General

Benjamin Franklin had been Deputy Postmaster in America (1737), and Postmaster General for the Colonies (1753) under the King until summarily dismissed by him Jan. 30, 1774. The Second Continental Congress created the Post Office Department with headquarters in Philadelphia and on July 26, 1775, elected Benjamin Franklin Postmaster General, for one year. On his sailing later for France as one of the Ambassadors, Richard Bache succeeded him on Nov. 7, 1776. Ebenezer Hazard was appointed Postmaster General Jan. 28, 1782. Congress temporarily established the Post Office Department as a branch of the Treasury, on Sept. 22, 1789, and Washington commissioned Samuel Osgood Postmaster General on Sept. 26. The Postmaster General was made a member of the Cabinet March 9, 1829. It is the only portfolio in the Cabinet that expires every four years.

*Retired. (a) Rejected Dec. 15, 1795; (b) resigned Sept. 30, 1800.

Note—Robert H. Harrison, who is listed above as an Associate Justice of the Court, was nominated Sept. 24, 1789; confirmed by the Senate, September 26, 1789; and commissioned September 28, 1789. There is nothing affirmative to show that he ever accepted the commission or took the oath. Justice Iredell was nominated February 9, 1790, "vice Harrison, resigned." Under date of Jan. 1790, Harrison wrote to the President saying, "I cannot accept the appointment."

Congress, on March 3, 1911, added to the Statutes at Large, as follows: "The Supreme Court of the United States shall consist of a Chief Justice of the United States and eight Assistant Justices, any six of whom shall constitute a quorum."

Comptroller General of the United States

The Comptroller General, as head of the General Accounting Office (created June 10, 1921), is charged by law with the settlement and adjustment, independently of the executive departments, of all claims and demands whatever by the Government or against it, and all accounts whatever in which the Government is concerned, either as debtor or creditor, and is vested with all powers and duties previously conferred or imposed by law upon the former Comptroller of the Treasury and the six Auditors of the Treasury department.

He superintends the recovery of all debts finally certified by audited settlements to be due the United States, and the preservation of all accounts, with their vouchers, etc., which have been finally adjusted, and countersigns all warrants authorized by law to be signed by the Secretary of the Treasury.

The Comptroller General and the Assistant hold office for fifteen years and the Comptroller General is not eligible for reappointment. The salary is $12,000 a year. The Comptroller General is Lindsay C. Warren, of North Carolina.

STATE GOVERNMENT OFFICIALS

Alabama

Governor—James E. Folsom, Dem.; $6,000.
Lieut. Governor—J. C. Inzer, Dem.; $20 per day during legislature.
Sec. of State—Sibyl Pool, Dem., $4,800.

Law on Succession to the Presidency

Approved July 18, 1947.

If, by reason of death, resignation, removal from office, inability, or failure to qualify there is neither a President nor Vice President to discharge the powers and duties of the office of President, then the Speaker of the House of Representatives shall, upon his resignation as Speaker and as Representative, act as President. The same rule shall apply in the case of the death, resignation, removal from office, or inability of an individual acting as President.

If, at the time when a Speaker is to begin the discharge of the powers and duties of the office of President there is no Speaker, or the Speaker fails to qualify as Acting President, then the President pro tempore of the Senate, upon his resignation as President pro tempore and as Senator, shall act as President.

An individual acting as President shall continue to act until the expiration of the then current Presidential term, except that (1) if his discharge of the powers and duties of the office is founded in whole or in part in the failure of both the President-elect and the Vice-President-elect to qualify, then he shall act only until a President or Vice President qualifies, and (2) if his discharge of the powers and duties of the office is founded in whole or in part on the inability of the President or Vice President, then he shall act only until the removal of the disability of one of such individuals.

If, by reason of death, resignation, removal from office, or failure to qualify, there is no President pro tempore to act as President, then the officer of the United States who is highest on the following list, and who is not under disability to discharge the powers and duties of President, shall act as President: Secretary of State, Secretary of the Treasury, Secretary of Defense, Attorney General, Postmaster General, Secretary of the Interior, Secretary of Agriculture, Secretary of Commerce, Secretary of Labor.

Sections 1 and 2 of the Act entitled "An Act to provide for the performance of the duties of the office of President in case of the removal, death, resignation, or inability both of the President and Vice President," approved Jan. 19, 1886 (24 Stat. 1; U. S. C., 1940 edition, title 3, secs. 21 and 22), are repealed.

Oath of the President; Judicial and Executive Officers

The Constitution directs that the President shall take the following oath or affirmation: "I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States." (Custom decrees the use of the words "So help me God" at the end of the oath when taken by the President-elect, his left hand on the Bible for the duration of the oath, with his right hand slightly raised.)

Federal judges and justices take the following oath or affirmation before performing the duties of office: "I, - - - - - - - - - -, do solemnly swear (or affirm) that I will administer justice without respect to persons, and do equal right to the poor and to the rich, and that I will faithfully and impartially discharge and perform all the duties incumbent upon me as - - - - - according to the best of my abilities and understanding, agreeably to the Constitution and laws of the United States. So help me God."

Presidential Inaugurations

New York and Philadelphia, as well as Washington, have witnessed inaugurations. On several occasions the United States was technically without a president, and a brief period when two men held the office. It was because March 4 sometimes fell on Sunday that these occurrences took place. In succeeding himself, in 1821, James Monroe was sworn in on Monday, March 5, so theoretically there was no chief executive for one day. Rutherford B. Hayes, on the other hand, was privately sworn in on March 3, with a slight presidential overlapping.

Death, slow travel, and inclement weather have played major parts in inaugural history. Odd dates for the occasion resulted when vice-presidents were called suddenly to fill unexpired terms. On the death of Franklin D. Roosevelt in April, 1945, Harry S. Truman, 33rd president, became the seventh vice president thus to succeed.

The first inauguration, in New York City, also was in April. Washington had been scheduled to take the oath on March 4, 1789, but the ceremony was held up until April 30, due to delay in gathering the electoral votes, and the time taken by the president-elect to journey from Virginia to New York. Washington's second inauguration was held in Philadelphia, as was that of John Adams.

Jefferson, in 1801, was the first president to be inaugurated in Washington. The first inaugural ball was March 4, 1809, when James Madison became president. Dolly Madison presided. Warren G. Harding was the first president to use the automobile and public-address microphone. Calvin Coolidge's inaugural address was the first to be broadcast.

Presidents of the Continental Congresses

WHO WAS THE FIRST PRESIDENT?

On Sept. 5, 1774, delegates from twelve states (Georgia was not then represented) met in Philadelphia and organized what has since been commonly called the Continental Congress. The members were Delegates, and the voting on all questions was by States (Colonies), each State having one vote. The Delegate in charge was styled *President of the Congress*.

The Continental Congress was in session, at various times and places, until March 2, 1789. One of its important acts was the drawing up, and adoption on July 4, 1776, of the Declaration of Independence, which was signed by "The Representatives of the United States of America, in General Congress, assembled."

Between Nov. 15, 1777, and July 9, 1778, the Continental Congress adopted "Articles of Confederation and Perpetual Union between the States." These Articles gave to the Thirteen Colonies the name "The United States of America," and the Articles, generally known as the First Constitution, remained in force until March 4, 1789, when the Constitution of the United States was proclaimed in effect.

The Articles of Confederation, though adopted by the Continental Congress in 1778, were not ratified by all of the States, Maryland being the last to assent, until March 1, 1781. The Articles designated Congress as "the United States in Congress Assembled." Presidents of the Sessions of the Continental Congress were:

Name	Chosen or elected	Born	Died
Peyton Randolph, Va.	Sept. 5, 1774	1721	1775
Henry Middleton, S. C.	Oct. 22, 1774	1717	1784
Peyton Randolph, Va.	May 10, 1775	1721	1775
John Hancock, Mass.	May 24, 1775	1737	1793
Henry Laurens, S. C.	Nov. 1, 1777	1724	1792
John Jay, N. Y.	Dec. 10, 1778	1745	1829
Samuel Huntington, Conn.	Sept. 28, 1779	1731	1796
Thomas McKean, Del. (1)	July 10, 1781	1734	1817
John Hanson, Md. (2)	Nov. 5, 1781	1715	1783
Elias Boudinot, N. J.	Nov. 4, 1782	1740	1821
Thomas Mifflin, Pa.	Nov. 3, 1783	1744	1800
Richard Henry Lee, Va.	Nov. 30, 1784	1732	1794
John Hancock, Mass. (3)	Nov. 23, 1785	1737	1793
Nathaniel Gorham, Mass.	June 6, 1785	1738	1796
Arthur St. Clair, Pa.	Feb. 2, 1787	1734	1818
Cyrus Griffin, Va.	Jan. 22, 1788	1748	1810

[1]First president to serve after final ratification of Articles of Confederation was announced, by order of Congress, March 1, 1781. [2]First president to serve after surrender of Cornwallis at Yorktown, Oct. 19, 1781. [3]Did not serve owing to illness.

George Washington was the first President of the United States under the Constitution. Others for whom the claim has been frequently made were merely presiding officers of the Continental Congress.

Presidents of the United States

32.	Franklin Delano Roosevelt	Dem.	N. Y.	1882, Jan. 30	1933	51	1945, April 12	63
33.	Harry S. Truman	Dem.	Mo.	1884, May 8	1945	60	....	..

*A Democrat but nominated vice-president and elected on the Republican ticket with Abraham Lincoln.

Cleveland's baptismal name was Stephen Grover; Grant's, Hiram Ulysses; Wilson's, Thomas Woodrow; that of Coolidge, John Calvin. Mr. Truman uses the initial S, but has no middle name.

RELIGIOUS AFFILIATIONS

Friends (Quakers)—Hoover.
Episcopalian—Washington, Madison, Monroe, William Henry Harrison, Tyler, Taylor, Pierce, Arthur, and Franklin D. Roosevelt.
Presbyterian—Jackson, Buchanan, Cleveland, Benjamin Harrison, Wilson.
Methodist—Polk, Johnson, Grant, McKinley.
Unitarian—John Adams, John Quincy Adams, Fillmore, Taft.
Reformed Dutch—Van Buren, Theodore Roosevelt.
Baptist—Harding, Truman.
Disciples of Christ—Garfield.
Congregationalist—Coolidge.

Jefferson and Lincoln did not claim membership in any denomination. Jefferson expressed a preference for the Unitarian Faith. Hayes attended the Methodist Church, but never joined.
Freemasons — Washington, Monroe, Jackson, Polk, Buchanan, Johnson, Garfield, McKinley, Theodore Roosevelt, Franklin D. Roosevelt, Taft, Harding, Truman.

ANCESTRY

Swiss—Hoover.
English—Washington, John Adams, Madison, John Quincy Adams, William Henry Harrison, Tyler, Taylor, Fillmore, Pierce, Lincoln, Johnson, Grant, Garfield, Cleveland, Benjamin Harrison, Taft, Harding, Coolidge.
Welsh—Jefferson (a family tradition).
Scottish—Monroe, Hayes. **Scotch-Irish**—Jackson, Polk, Buchanan, Arthur, McKinley, Wilson.
Dutch—Van Buren, Theodore Roosevelt, Franklin D. Roosevelt.

*Although born in London, her father was an American, and his family were Marylanders.

BIOGRAPHIES OF THE PRESIDENTS AND THEIR WIVES

George Washington

George Washington, first president, was born Friday, Feb. 22, 1732, (actually Feb. 11, O. S.) the son of Augustine Washington and Mary Ball, at Wakefield on Pope's creek, Westmoreland Co., Va. Col. John Washington, George's great-grandfather, came from Northamptonshire in 1657 or 1658; in 1665 he and an associate named Spencer bought 5,000 acres on the Potomac. In England the Washingtons had prospered in the wool trade and lived in a small Tudor manor house at Sulgrave from 1539 to 1610, when they suffered reverses. It was restored in 1914. George's father took the north 2,500 acres near Hunting creek in 1735 and built a house in which George lived from 3 to 6 years of age; when 6 the family moved to Ferry farm, near Fredericksburg. His father died in 1743 when he was 11. He studied mathematics and surveying and when 16 went to live with his half-brother Lawrence, who had inherited the Potomac farm and built Mount Vernon, the original house having burned. George surveyed the lands of William Fairfax on the Shenandoah, keeping a diary. He accompanied Lawrence to Barbadoes, West Indies, contracted smallpox and was deeply scarred. Lawrence died in 1752 and George acquired his property by inheritance and purchase and added the 2,500 acres held by the Spencers. He valued land and when he died owned 70,000 acres in Virginia and 40,000 acres on the Great Kanawa and environs.

Washington's military service began in 1753 when Gov. Dinwiddie of Virginia made him lieut. colonel of militia. He clashed with the French and had to surrender Fort Necessity, July 3, 1754. He was an aide to Braddock and helped organize the retreat after the fatal ambuscade of July 9, 1755. He helped take Fort DuQuesne from the French in 1758.

After his marriage to Martha Dandridge Custis, 1759, Washington lived at Mount Vernon, bred horses and cattle, raised fruit and practiced crop rotation. In 1773 he enlarged the house. During the stamp act agitation, 1765, he supported the protesting Virginians. His war experience had soured him on British military arrogance. Although not at first for independence, he stood out against British exactions and took charge of the Virginia troops before war broke out. He was made commander-in-chief by the Continental Congress June 15, 1775 and took command at Cambridge July 3.

The successful issue of a war filled with hardships was largely due to his leadership. He was resourceful, a stern disciplinarian, and the one strong, dependable force for unity. He early saw the need of one indissoluble union and became chairman of the Constitutional convention of 1787. He helped get the Constitution ratified and was unanimously elected president and inaugurated, April 30, 1789, on the balcony of New York's Federal hall at Broad and Wall Sts., now marked by his statue. In New York his mansion, near Franklin Sq., was the scene of formal dinners and levees. His pew in St. Paul's chapel is preserved.

His birthplace, Wakefield, was burned in 1780. For years its location was marked solely by a 50-foot granite shaft. On Feb. 22, 1932, a new Wakefield, built by donations, was dedicated as the George Washington Birthplace Monument, administered by the National Parks Service. The older Washingtons are buried there. It is 34 miles from Fredericksburg, Va., on State road 3, and five miles from Stratford Hall, birthplace of Robert E. Lee.

Although a Federalist, Washington made Thomas Jefferson secretary of state (resigned 1793). He was reelected 1792, but refused to consider a third term and retired to Mount Vernon, 1797. Though the object of bitter criticism he remained greatly respected. He suffered acute laryngitis after a ride in snow and rain around his estate, was bled profusely, and died Dec. 14, 1799, aged 67. He was mourned here and abroad as one of the great men of his time. He was buried in a vault at Mount Vernon.

MARTHA WASHINGTON

Mrs. Martha Dandridge Custis Washington was born June 2, 1732, in New Kent Co., Va. In 1749 she married Daniel Parke Custis, wealthy planter, who died in 1757. She lived in the White House on the Pamunkey, site of McClellan's supply depot in 1862. (Her house had burned down and been replaced before the Civil War.) In 1758 Washington, hurrying to Williamsburg, was invited by the owner of Poplar Grove to meet "the prettiest and richest widow in Virginia." She was plump, small, had dark hair and hazel eyes. Washington fell, and on his return from taking Fort DuQuesne they were married, Jan. 6, 1759. Martha had two children living, two having died in infancy. Her daughter Martha died at 17. Her son, Col. John Parke Custis, bought the 1,100 acres of Arlington in 1778, but died 1781, from wounds received at Yorktown. Washington adopted John's son, George Washington Parke Custis, who inherited Arlington and built the present house; his daughter Mary married Robert E. Lee there in 1831. Martha Washington managed her husband's plantations in his absence and in winter visited him at Valley Forge, Newburgh and other camps. She presided gracefully at official levees as Lady Washington. She died in 1802 and was buried at Mount Vernon.

John Adams

John Adams, 2nd president, Federalist, was born in Braintree, (Quincy) Mass., Oct. 30, 1735, (Oct. 19, O. S.) the son of John Adams, a farmer and Susanna Boylston of Brookline. He was a great-grandson of Henry Adams who came from England in 1636. He was graduated from Harvard, 1755, taught school, studied law. In 1765 he argued against taxation without representation before the royal governor. In 1770 he defended the British soldiers who fired on civilians in the "Boston Massacre." He took part in the Provincial Congress of Massachusetts and the Continental Congress, seconded the independence resolution presented by Richard Henry Lee and with his cousin, Samuel Adams, signed the Declaration of Independence. He was a commissioner to France, 1778, with Benjamin Franklin and Arthur Lee; won recognition of the United States by The Hague, 1782; was first American minister to England, 1785-1788, and elected vice president with Washington, 1788 and 1792.

In 1796 Adams was chosen president by the electors, 71 to 68 so that opponents called him "president by 3 votes." The candidate with the second highest number of votes became vice president; this was Thomas Jefferson, his opponent. Intense antagonism to America by France caused agitation for war, led by Alexander Hamilton. Adams, breaking with Hamilton, opposed war but put the Navy on a fighting basis. The U.S.N. Constitution, the United States, both 44 guns, and the Constellation, 36 guns, and armed merchantmen bagged 84 French ships in an undeclared war. To fight alien influence and muzzle criticism Adams supported the Alien and Sedition laws of 1800, which led to his defeat for reelection. He died July 4, 1826, on the same day as Jefferson, and was buried in the First Unitarian church in Quincy, Mass.

ABIGAIL ADAMS

Mrs. Abigail Smith Adams was born at Weymouth, Mass., Nov. 23, 1744 (Nov. 12, O. S.), daughter of a Congregational minister and descendant of the Puritan divine, Thomas Shepard of Cambridge, Mass. She died at Quincy, Oct. 28, 1818. She had a daughter and three sons, one of whom, John Quincy Adams, became the sixth president. Often separated from John Adams during the Revolution, she joined him in Paris in 1784, and from 1785 to 1788 endured social slights at the court of St. James's, where Adams was our first minister. When New York was the seat of Washington's administration she lived at Richmond Hill, a manor house located where Charlton crosses Varick St. She left fever-stricken Philadelphia in 1798 for her daughter's home in Eastchester, now part of Mount Vernon, N. Y. She was well-read but puritanical toward laxness in behavior and attire, intensely loyal to Adams and sharp-spoken toward his opponents.

Thomas Jefferson

Thomas Jefferson, 3rd president, was born April 13, 1743 (Apr. 2, O. S.) at Shadwell, Va., the son of Peter Jefferson, a civil engineer of Welsh descent who raised tobacco, and Jane Randolph. Jefferson was an agrarian, an expansionist; because he opposed the Federalists and centralization he was called a Republican, now synonymous with Democrat. His father died when he was 14, leaving him 2,750 acres and his slaves. Jefferson was graduated from the College of William and Mary at 20; read classics in Greek and Latin; studied law with George Wythe in Williamsburg; played the violin and rode horses. In 1769 he was elected to the House of Burgesses. In 1770 Shadwell burned and he began Monticello, near Charlottesville. In 1772 he married Martha Wayles Skelton. He was a member of the Virginia Committee of Correspondence and the Continental Congress and denied Britain's right to tax. Named a member of the committee to draw up a Declaration of Independence, he wrote the basic draft, 1776. He was a member of the Virginia House of Delegates, 1776-79, elected governor to succeed Patrick Henry, 1779, re-elected 1780, resigned, June, 1781, amid charges of ineffectual military preparation. During his term he wrote the statute on religious freedom. In the Continental Congress, 1783, he drew up an ordinance for the Northwest Territory, forbidding slavery after 1800; its terms were put into the Ordinance of 1787. He was sent to Paris with Benjamin Franklin and John Adams to negotiate treaties of commerce, 1784; made minister to France, 1785, he made treaties with France and Prussia, studied architecture, gardening and the French Revolution, whose leaders consulted him.

Washington appointed him secretary of state, 1789. Jefferson's strong faith in the consent of the governed, as opposed to executive control favored by Hamilton, secretary of the treasury, often led to conflict; Dec. 31, 1793, he resigned. He was the Republican candidate for president in 1796; beaten by John Adams, he became vice president. He opposed Adams' alien and sedition laws with the Kentucky and Virginia resolutions, reiterating the basic rights of states. In 1800 Jefferson and Aaron Burr received equal votes for president, so the House of Representatives voted Jefferson in, with the help of Hamilton, who preferred Jefferson to Burr. Adams did not wait to see Jefferson inaugurated, but when Jefferson was re-elected in 1804, even Adams voted for him. Jefferson cancelled levees and titles and ignored diplomatic precedence. He turned Federalists out of office. He opposed a strong navy. By fighting those who feared to give power to the people he made democracy work. He considered John Marshall's Supreme Court reactionary. Big events of his administration were the Louisiana purchase, 1803, and the Lewis and Clark expedition. He established the University of Virginia and designed its buildings. After the Library of Congress was burned by the British he sold Congress 13,000 vols. for $23,950. He was 6 ft. 2, temperate in debate, practically a Unitarian in religion, though not a church member. He died July 4, 1826, on the same day as John Adams, and was buried at Monticello, which, after various vicissitudes, passed to the Thomas Jefferson Memorial Foundation in 1923.

MRS. THOMAS JEFFERSON

Mrs. Martha Wayles Jefferson, daughter of John Wayles, was 23 and the widow of Bathurst Skelton when she married Jefferson Jan. 1, 1772. She bore Jefferson six children at Monticello, two of whom lived to maturity. Martha, 1772-1836, married Thomas Mann Randolph, Jr.; Mary (Marie) 1778-1804, married her cousin, J. W. Eppes. Mrs. Jefferson's father's large farm and slaves became part of the estate. She died Sept. 6, 1782.

James Madison

James Madison, 4th President, Republican, was born Mar 16, 1751 (Mar. 5, O. S.) at Port Conway, King George Co., Va., the eldest of 12 children of James Madison and Eleanor Rose Conway. His great-grandfather, James Taylor (1674-1729) was also the great-grandfather of Zachary Taylor. Madison was graduated from Princeton, 1771, studied theology, 1772, sat in the Virginia Constitutional convention, 1776, where his resolution on religious freedom was voted down; was a member of the Continental Congress and of the Annapolis convention, 1786, where he and Hamilton proposed the Constitutional convention. He was chief recorder at that convention in 1787, and supported ratification in the Federalist papers, written with Hamilton and Jay. In 1785 he carried Jefferson's statute on religious liberty through the Virginia assembly. He was elected to the House of Representatives in 1789, helped adopt the Bill of Rights and fought John Adams' alien and sedition laws. He favored agrarian policies with Jefferson and in 1800 became Jefferson's secretary of state. In 1803, when the Louisiana Purchase was consummated, he insisted on free navigation of the Mississippi, which he had already urged on Jay in 1780.

Elected president in 1808, Madison was a "strict constructionist," opposed to the free interpretation of the Constitution by the Federalists; he vetoed federal funds for state improvements, but changed in his second term. Madison inherited the conflict with Britain over its orders in council and impressment of American seamen, which had led to Jefferson's embargo act and injured American commerce. He was reelected in 1812 by the votes of the agrarian South and recently admitted western states. Caught between British and French maritime restrictions, Madison drifted into war, declared June 12, 1812, unaware that Britain had cancelled the orders two days before. While the war was inconclusive, it opened the way to peaceful negotiations. Madison successfully advocated a tariff to protect industry, a national system of roads and canals and a strong military organization. He retired in 1817 to his estate at Montpellier (now Montpelier) Va., built 1760, with a portico suggested by Jefferson. There he edited his famous papers on the Constitutional Convention. He died June 28, 1836, and was buried near his home.

DOLLY MADISON

Mrs. Dolly Payne Madison, first social leader in the White House, was born May 12, 1768, in North Carolina, the daughter of John Payne, a Virginia Quaker, who later freed his slaves. She grew up in Hanover county, Va. Her first husband, John Todd, died in 1793. She married Madison Sept. 15, 1794, and when he became secretary of state in 1801, became hostess for Jefferson in the White House. She presided at the first inaugural ball in 1809. On Aug. 24, 1814, when the British threatened Washington, she rescued Gilbert Stuart's portrait of Washington and Madison's official papers from the White House. These supposedly included the Declaration of Independence and the Constitution. She helped edit Madison's highly important records of the Constitutional Convention. From 1817 to 1837 she lived at Montpellier, Orange Co., Va., (now Montpelier, privately owned). She returned to Washington as a welcome, but impecunious, social leader, in 1837. Congress bought her husband's records in 1837 for $30,000, and other papers in 1848, for $25,000. She took part in the dedication of the Washington monument and sent the first personal message over S. F. B. Morse's telegraph wire. She was respected for her tact and intelligence by presidents from Washington to Polk. In old age she suffered from the wastefulness of a son. She died July 12, 1849, aged 81, and is buried beside Madison near Montpelier.

James Monroe

James Monroe, 5th president, Republican, was born April 28, 1758, in Westmoreland Co., Va., the son of Spencer Monroe and Eliza Jones, who were of Scottish and Welsh descent, respectively. He attended the College of William and Mary, fought in the 3rd Virginia regiment at White Plains, Brandywine, Monmouth, and was wounded at Trenton. He studied law with Thomas Jefferson, 1780, was a member of the Virginia house of delegates and of Congress, 1783-86. He had a law office in Fredericksburg, 1786-90, now a Monroe museum. He helped Virginia ratify the Constitution, 1788; was U. S. Senator, 1790; minister to France under Washington, 1794-96; thrice governor of Virginia, 1799-1802, and 1811. Jefferson sent him to France as minister, 1803, to join R. R. Livingston in buying the isle of New Orleans from France and East and West Florida from Spain. Exceeding instructions,

he signed a treaty for all of Louisiana. (Navigation of the Mississippi was one of his demands as early as 1783.) He was secretary of state under Madison, 1811-1817; also secretary of war Sept., 1814-Mar., 1815.

In 1816 Monroe was elected president; in 1820 reelected with all but one vote, this being cast by John Quincy Adams so that only Washington might have unanimous election. Monroe's administration became the Era of Good Feeling. He obtained the Floridas from Spain and suppressed the Seminoles; settled boundaries with Canada and eliminated border forts; supported the anti-slavery position that led to the Missouri Compromise. (In 1801 he had proposed settling Negro slaves in Africa. Monrovia, Liberia was named for him.) In July, 1823, the U. S. served notice on Russia that it would oppose any Russian colony on this continent, after Russia had prohibited fishing on the northwest coasts. On Dec. 2 Monroe announced the Monroe Doctrine, that the U. S. would consider its safety endangered if European powers had authority on this hemisphere or attempted colonization. First half had been suggested by George Canning, British foreign minister, to curb Spain; U. S., rejecting proposal for joint declaration, issued it also as warning to Russia. Monroe inherited Oak Hill, Loudon Co., Va., from his uncle Jones, but lived most of 1799-1825 at Ash Lawn, 5 miles from Charlottesville. He moved to New York, 1830, to be with his daughters, and died there July 4, 1831, and was buried in Marble cemetery. In 1858 his remains were removed to Richmond.

MRS. JAMES MONROE

Mrs. Eliza Monroe was born in New York, 1768, the daughter of Lawrence Kortwright, former British army officer. She married Monroe in 1786. They had two daughters, who married and lived in New York. Mrs. Monroe, while in Paris, obtained the release from prison of Mme. de la Fayette, who expected to be executed. She died 1830.

John Quincy Adams

John Quincy Adams, 6th president, independent Federalist, was born July 11, 1767, at Braintree (Quincy), Mass., the son of John and Abigail Adams. He was educated in Paris, Leyden, and Harvard, graduating in 1787. He served as American minister in the Netherlands, Berlin, St. Petersburg and London and helped draft the peace treaty of 1814. He had served as senator from 1803 to 1808 and his support of the Republican administration alienated the Federalists. President Monroe made him secretary of state, 1817, and he negotiated the cession of the Floridas from Spain, supported exclusion of slavery in the Missouri Compromise, and laid the base for the Monroe Doctrine, of which he, as much as Monroe, was the creator. In 1824 he was elected President by the House when Henry Clay threw his 37 votes to Adams, who had 84 against Andrew Jackson's 99. His expansion of executive powers was strongly opposed and he was beaten in 1828 by Jackson. In 1831 he was sent to Congress as Representative and served eight terms with distinction and independence. He fought slavery, opposed the annexation of Texas and the war with Mexico; was responsible for the Smithsonian institution. He had a stroke in the House and died in the Speaker's room, Feb. 23, 1848.

References: Dictionary of American Biography; Writings, edited by W. C. Ford.

MRS. JOHN QUINCY ADAMS

Mrs. Louisa Catherine Johnson Adams was born in London, Feb. 12, 1775, the daughter of Joshua Johnson, a Marylander who acted as American fiscal agent there. She married Adams July 26, 1797. Of their four children, George Washington Adams, John Q. Adams, Jr., Charles Francis Adams and Louisa Catherine Adams, Charles Francis became Free Soil candidate for vice president in 1848, member of Congress, minister to England during the Civil War and president of the Geneva Board of Arbitration. He was father of Charles Francis Adams, Henry Adams and Brooks Adams.

Andrew Jackson

Andrew Jackson, 7th president, Democrat, was born in the Waxhaws district, New Lancaster Co., S. C., Mar. 15, 1767, the posthumous son of Andrew Jackson, who came from County Antrim, Ire land, with his wife, Elizabeth Hutchinson, and tw sons, in 1765. His brothers died in the Revolu tion and there is a legend that a British office struck Andrew with his sword when the boy re fused to shine his boots. He read law in Salisbur N. C., moved to Nashville, Tenn., speculated land, married and raised cotton at the Hermitag originally a log house. In 1796 he helped draft th Constitution of Tennessee and for one year occu pied its one seat in the national House. He wa in the Senate in 1797, and again in 1823. He de feated the marauding Cherokees at Horsesho Bend, Ala., 1814, and as major general, U. S. A drove the British out of Pensacola. With 6,000 back woods fighters he defeated Packenham's 12,000 Bri ish troops at Chalmette, outside New Orleans, Ja 8, 1815, losing only seven to the British loss 2,000. In 1818 he fought so recklessly against th Seminoles in Florida that he endangered foreig relations. In 1824 he ran for President against Joh Quincy Adams and was voted down by the Hous though he had the most votes; in 1828 he carrie everything, the West rising to support "Old Hick ory" and a liberal land policy. He was a noisy de bater and duellist and introduced rotation in offic or "spoils system." He was suspicious of privilege ruined the Bank of the United States by depositin federal funds with state banks. Though "Let th people rule" was his slogan, he at times supporte strict constructionist policies against the expan sionist West. He killed the Congressional cauc for nominating presidential candidates and sub stituted the national convention, 1832, when h was reelected, with Martin van Buren vice pres dent. When South Carolina refused to colle imports under his protective tariff he sent arm and naval forces to Charleston. At the Jefferso Day dinner, 1830, he retorted to Calhoun's defen of liberty over the Union with "Our Federal Unio it must be preserved." His strong personality in creased the power of the executive and offset state rights agitation. He died at the Hermitage, June 1845, and is buried there.

Martin van Buren

Martin van Buren, 8th president, Democrat, w born Dec. 5, 1782, at Kinderhook, N. Y., the s of Abraham van Buren, a Dutch farmer, and Ma Hoes. He was surrogate of Columbia county, N York, state senator and attorney general and law partner of Benj. F. Butler in Albany. He w U. S. senator 1821, re-elected, 1827, elected go ernor of New York, 1828. He helped swing easte support to Andrew Jackson in 1828 and was secretary of state, 1829-31. In 1832 he was elect vice president. He was a consummate politicia known as "the little magician," and influenc Jackson's policies. In 1836 he defeated Willi Henry Harrison for president by 170 to 72 electo votes. He inaugurated the independent treas system, and was the first advocate of mutual surance of deposits by banks. He advocated ta for revenue only and opposed internal impro ments at national expense. His refusal to spe land revenues led to his defeat by Harrison in 18 He lost the Democratic nomination of 1844 to P because he opposed annexation of Texas. In 1848 ran for president on the Free Soil ticket and lo Thus he ran three times. He died July 24, 18 at Kinderhook, N. Y.

MRS. MARTIN VAN BUREN

Mrs. Hannah Hoes van Buren, born 1783, was a relative of van Buren's mother and his classmate in school. She married in 1807, died 1819. Their son Abraham, 1807-1873, a West Pointer, was secretary to the President, an officer in the Mexican war and a New York resident. His wife, Angelica Singleton, cousin of Dolly Madison, was White House hostess during van Buren's term. Another son, John van Buren (1810-1866) was elected attorney general of New York, 1845.

William Henry Harrison

William Henry Harrison, 9th president, Whig, who served only 31 days, was born in Berkeley, Charles City Co., Va., Feb. 9, 1773, the third son of Benjamin Harrison, signer of the Declaration of Independence. Educated at Hampden Sydney college, he later studied medicine under Dr. Benjamin Rush. Commissioned by Washington, he fought under Gen. Anthony Wayne at Fallen Timbers, 1794. He was secretary of Northwest Terr., 1798; its delegate in Congress, 1799; first governor of Indiana Terr., and supt. of Indian affairs. With 900 men he routed Tecumseh's Indians at Tippecanoe, Nov. 6, 1811. A major general, he defeated British and Indians at Battle of the Thames, Oct. 15, 1813. He served Ohio in Congress, 1816; as senator, 1824; was minister to Colombia. In 1840, when 68, he was elected president with John Tyler, 294 to 60, on a "log cabin and hard cider" slogan. He caught pneumonia during the inauguration and died April 4, 1841. He was buried in North Bend, O.

Reference: Old Tippecanoe, by Freeman Cleaves.

MRS. WILLIAM HENRY HARRISON

Mrs. Anna Symnes Harrison, daughter of Col. John Cleaves Symnes, chief justice of the New Jersey Supreme Court and Revolutionary veteran, was born in Morristown, N. J., 1775 and died 1864. She did not leave her North Bend, O., home for Washington and Mrs. Jane Findlay Harrison, wife of her son, Col. W. H. Harrison, Jr., stayed in the White House during Harrison's illness. Another son, John Scott Harrison, 1804-1878, was member of Congress and father of Benjamin Harrison, 23rd president.

John Tyler

John Tyler, 10th president, independent Whig, was born Mar. 29, 1790, in Greenway, Charles City Co., Va., son of John Tyler and Mary Armistead. His father was governor of Virginia, 1808-11. Tyler was graduated from William and Mary, 1807; member of the House of Delegates, 1811; in Congress, 1816-21; in Virginia legislature, 1823-25; governor of Virginia, 1825-26; U. S. senator, 1827-36. In 1836 he was defeated for vice president on a states' rights Whig ticket. In 1840 he was elected vice president on a Whig ticket with Harrison and succeeded him. He favored pre-emption, allowing settlers to get government land; rejected a new bank bill and thus alienated Whig supporters except Daniel Webster, his secretary of state; refused to honor the spoils system. He signed the resolution annexing Texas, Mar. 1, 1845. He accepted renomination, 1844, but withdrew before election. He condemned South Carolina's nullification and secession and as Virginia's commissioner to Buchanan tried to keep Fort Sumter neutralized. He was president of the peace congress called in Washington by Virginia, 1861. After its failure he supported secession, sat in the provisional Confederate congress, became a member of the Confederate House, but died, Jan. 18, 1862, before it met. He is buried in Richmond.

MARRIAGES OF JOHN TYLER

When 23 John Tyler married **Letitia Christian** of Cedar Grove, Va., born 1790, daughter of a planter. She was an invalid and died in the White House, 1842. She was an Episcopalian. Of her children Robert Tyler, 1818-1877, married Priscilla Cooper, daughter of a tragedian; presided in the White House. On June 28, 1844, in New York, Tyler married **Julia Gardiner,** born 1820, daughter of David Gardiner of Gardiner's Island, N. Y., a Catholic. She died in 1889. Her son Lyon Gardiner Tyler, became president of William and Mary, 1888; died 1935. Another, David Gardiner Tyler, judge, member of Congress and Confederate veteran, died 1927. A third son, Robert Fitzwalter Tyler, died 1927 at Richmond, aged 70.

James Knox Polk

James Knox Polk, 11th president, Democrat, was born in Mecklenburg Co., N. C., Nov. 2, 1795, the son of Samuel Polk, farmer and surveyor of Scotch-Irish descent, and Jane Knox. He went to Maury Co. Tenn., 1806; was graduated from the University of North Carolina, 1818; member of the Tenn. state legislature, 1823-25, known as "Napoleon of the Stump." He served in Congress 1825-39 and as speaker 1835-39. He supported Jackson and Van Buren, but was always expansionist. He was governor of Tennessee, 1839-41, being defeated 1841, '43. In 1844, when both Clay and Van Buren announced opposition to annexing Texas, the Democrats made Polk the first dark horse nominee because he demanded control of all Oregon and annexation of Texas. He won 170 to 105. James Buchanan was his secretary of state. He re-established the independent treasury system originated by Van Buren. His expansionist policy was opposed by Clay, Webster, Calhoun; he sent Zachary Taylor and an army to the Mexican border and when Mexicans attacked declared war existed. Abraham Lincoln, a Whig in Congress, opposed his war policy. Polk approved the acquisition of California, Utah and New Mexico (522,568 square miles) as part of America's "manifest destiny," but opposed retaining Mexico by force. He compromised on the Oregon boundary ("54-40 or fight!") by accepting the 49th parallel and giving Vancouver to the British. The Wilmot Proviso, outlawing slavery in new states, was debated in his term. Polk died in Nashville, Jan. 15, 1849, and is buried on the capitol grounds there.

MRS. JAMES K. POLK

Mrs. Sarah Childress Polk was born in 1803 and married Polk Jan. 1, 1824. Her father was a wealthy planter near Murfreesboro, Tenn. She was educated by the Moravians. The Polks were Methodists and Mrs. Polk prohibited liquor and dancing in the White House. They had no children.

Zachary Taylor

Zachary Taylor, 12th president, Whig, who served only 16 months, was born Sept. 14, 1784, in Orange Co., Va., the son of Richard Taylor, later collector of the port of Louisville. His grandfather and James Madison's paternal grandmother were brother and sister. Taylor enlisted 1806; was commissioned lieutenant by Jefferson, 1808; fought in the War of 1812, the Black Hawk War, 1832, and the Seminole war, 1837. He became known as Old Rough and Ready. He settled on a plantation near Baton Rouge, La. In 1845 Polk sent him to the Rio Grande; when the Mexicans attacked him, Polk declared war. Taylor was successful at Palo Alto and Resaca de la Palma, May 8 and 9, 1846; occupied Monterey. Polk made him major general but gave many of his troops to Gen. Winfield Scott at Vera Cruz. Taylor, with 5,000 men, defeated Santa Anna's 20,000 at Buena Vista, Feb. 22, 1847. He defeated Scott at the Whig convention, 1849; was elected president over Martin van Buren (Free Soil) with Millard Fillmore vice pres. He resumed the spoils system and though once a slave-holder worked to have California admitted as a free state. He died of typhus July 9, 1850, and was buried near Louisville.

References: Zachary Taylor, by Holman Hamilton; Old Rough and Ready, by Silas Bent McKinley and Silas Bent.

MRS. ZACHARY TAYLOR

Mrs. Margaret Smith Taylor was born in 1788, the daughter of Walter Smith, Maryland planter. She married Taylor, 1807, died 1852. Their daughter Elizabeth, Mrs. W. W. S. Bliss, was hostess of the White House. Another daughter, Ann, married Dr. Robert Wood, ass't surgeon general, U. S. A.; a third, Sarah Knox Taylor, married Jefferson Davis, 1835, and died three months later. A son, Richard, 1826-79, served under Stonewall Jackson and became a Confederate general. He died in New York.

Millard Fillmore

Millard Fillmore, 13th president, Whig, was born Jan. 7, 1800, in a log cabin on a farm in Cayuga

Co., N. Y., cleared in 1795 by his father, Nathaniel. He was apprenticed to a fuller and dyer; bought his freedom for $30 to study and became a teacher and postmaster in Buffalo, N. Y. He was counsellor of the state supreme court, 1829; in the state assembly, 1829-32; in Congress, 1833-35 and again 1837-43. He opposed the entrance of Texas as slave territory and voted for a protective tariff. He supported the appropriation of $30,000 for Morse's telegraph. In 1844 he was defeated for governor of New York. In 1848 he was elected vice-president and succeeded as president July 10, 1850. Daniel Webster was secretary of state until he died, 1852; then Edward Everett. Fillmore favored the compromise of 1850 and signed the Fugitive Slave Law. His policies pleased neither expansionists nor slave-holders and he was not renominated. In 1856 he was nominated by the American (Know-Nothing) party and accepted by the Whigs, but defeated by Buchanan. He was chancellor of the University of Buffalo. He died in Buffalo, Mar. 8, 1874.

Reference: Dictionary of American Biography.

FILLMORE'S TWO MARRIAGES

The first Mrs. Fillmore, 1798-1853, was **Abigail** Powers the daughter of Lemuel Powers, a Baptist clergyman of Stillwater, N. Y., and taught school in Cayuga Co. Owing to her poor health her daughter, Mary Abigail (1832-54) was the White House hostess. Their other child was Millard Powers Fillmore (1828-89). The second Mrs. Fillmore was **Mrs. Caroline Carmichael McIntosh**, born in Morristown, N. J., and widow of an Albany merchant. They had no children.

Franklin Pierce

Franklin Pierce, 14th president, Democrat, was born in Hillsboro, N. H., Nov. 23, 1804, the son of Benjamin Pierce, veteran of the Revolution and governor of New Hampshire, 1827. He attended Exeter and was graduated from Bowdoin, 1824. A lawyer, he served in the New Hampshire House, 1829-32; in Congress, supporting Jackson, 1833; U. S. Senator, 1837-42. He enlisted in the Mexican war, became brigadier general of volunteers and was wounded at Contreras. In 1852 Pierce was nominated on the 49th ballot over Clay, Douglas and Buchanan, defeating Gen. Winfield Scott, Whig. Though against slavery Pierce was influenced by southern pro-slavery men. Jefferson Davis was his secretary of state. During his administration the Ostend Manifesto that we either buy or take Cuba by force was a sensation; William Walker, filibuster, took Nicaragua and was recognized by Pierce. The Kansas-Nebraska bill, leaving slavery to popular vote ("popular sovereignty") passed, 1854; Pierce appointed a pro-slavery governor for "bleeding Kansas." Commodore Matthew Perry opened Japan, 1854. The Gadsden Purchase from Mexico extended U. S. boundaries south of the Gila river. The slavery issue became acute and a new Republican party was begun by anti-slavery men at Ripon, Wis., July 6. 1854. Pierce died at Concord, N. H., Oct. 8, 1869.

References: "Franklin Pierce, Young Hickory of the Granite Hills, by Roy Franklin Nichols; Dictionary of American Biography.

MRS. FRANKLIN PIERCE

Mrs. Jane Means Appleton Pierce was born at Hampton, N. H., 1806, daughter of the Rev. Jesse A. Appleton, president of Bowdoin. The Pierces had three children; one died in infancy, one at 4 and one was killed in a railroad accident at 11. Mrs. Pierce died 1863.

James Buchanan

James Buchanan, 15th president, Federalist, later Democrat, was born of Scottish descent near Mercersburg, Pa., Apr. 23, 1791. He was a volunteer in the war of 1812; graduated from Dickinson, 1809; was in the Pennsylvania legislature, 1814-16; Congress, 1820-31; minister to Russia, appointed by Jackson; Senator, 1834-45; secretary of state under Polk, 1845-49, favoring the Mexican war and Texas annexation; minister to England, 1853. Signed the Ostend Manifesto favoring taking Cuba, 1854. Nominated by Democrats over Pierce and Stephen A. Douglas and elected 1856 over John C. Fremont (Republican) and Millard Fillmore (American-Know-Nothing and Whig tickets). The Dred Scott case, a victory for slavery, was decided when he took office. He favored Kansas as a pro-slavery state and endorsed the pro-slavery Lecompton Constitution. This lost him support of Douglas. The panic of 1857 hit the industrial North, spared the agricultural South. The Republicans now opened their fight against a nation "half slave and half free"; Douglas was challenged for the senate by Abraham Lincoln in the Lincoln-Douglas debates, 1858. John Brown seized Harper's Ferry Oct. 16, 1859; was caught and hanged by Col. R. E. Lee. Buchanan's position was that no state had the right to secede from the Union, but that the Union had no power to coerce it. He died at Wheatland, near Lancaster, Pa., June 1, 1868, aged 77.

Buchanan was a bachelor. The mistress of the White House was his sister Jane's daughter, Harriet Lane, of Mercersburg. Her parents died when she was a child. She was an Episcopalian.

Abraham Lincoln

Abraham Lincoln, 16th president, Republican, was born Feb. 12, 1809, in a log cabin on a farm then in Hardin Co., Ky., now in Larue. He was the son of Thomas Lincoln (1778-1851), a descendant of Samuel Lincoln, who came with his wife Martha from Hingham, England, 1635, settled at Salem and Hingham, Mass., and had 11 children. Thomas, a carpenter, married Nancy Hanks, June 12, 1806. She was the natural daughter of Lucy Hanks, whose ancestor, Thomas Hanks, came from England to Virginia, 1644. Abe had a sister, Sarah 2 years older, and a brother, Thomas, who died in infancy.

The Lincolns moved to Spencer Co., Ind., near Gentryville, when Abe was 7. His mother died Oct. 5, 1818, aged 35. His father married Mrs. Sarah Bush Johnston, 1819; she had a favorable influence on Abe. He was over 6 ft. 3 in. tall. He made two trips on flatboats down the Ohio-Mississippi to New Orleans in 1828 and 1831. In 1831 the family moved to Macon Co., Ill., and on to Coles Co. Abe and a cousin split 3,000 fence rails. He clerked and surveyed land in New Salem, Ill. 1831-37. In 1832 he lost election to the legislature; in 1834 he succeeded. Ann Rutledge, whom he is supposed to have loved, died in New Salem, 1835, aged 19.

Lincoln went to Springfield, read law and practiced in the circuit courts. He failed to get the nomination for Congress, 1843, but was elected as a Whig for 1847-49. He opposed the Mexican war. He was offered the governorship of Oregon Terr. and refused it. He opposed the Kansas-Nebraska bill, which threatened to extend slavery. He failed to get the senatorial nomination in 1854. In 1856 he joined the Republican party and was defeated for the senate by Stephen A. Douglas, after the Lincoln-Douglas debates, 1858, in which he declared a nation could not endure half slave and half free.

Lincoln was nominated for president by the Republicans over William H. Seward on an anti-slavery platform, 1860. The northern Democrats nominated Stephen A. Douglas; the southern, pro-slavery Democrats, John C. Breckenridge. The Constitutional Union party (Whig-Know-Nothing) led by John Bell, had no clear-cut program. Lincoln got only 40 per cent of the total votes, but 180 electoral votes to 123. As a result South Carolina seceded Dec. 20, 1860, followed by Mississippi, Florida, Alabama, Georgia, Louisiana and Texas. On Feb. 8-9 the Confederate States of America was formed in Montgomery, Ala., with Jefferson Davis, president.

Lincoln's policy after Fort Sumter was to bring the seceded states back by force. He had hope for the gradual extinction of slavery, with possible indemnification of owners. On Sept. 22, 1862, five days after Antietam, he declared slaves in territory then in rebellion would be free Jan. 1, 1863, date of the Emancipation Proclamation. He reached the highest note of eloquence in his address at Gettysburg, Nov. 19, 1863 (reproduced in this book).

Lincoln was re-elected, 1864, over Gen. Geo. B. McClellan, Democrat, Lee surrendered April 9, 1865. On April 14 (Good Friday) Lincoln was shot by John Wilkes Booth while attending a performance of Our American Cousin in Ford's theatre, Washington. He died the next day. His body lay in state in New York, Chicago and other cities before burial in Springfield, Ill. His estate reached $110,295, most of it saved from his annual salary of $25,000.

Booth was shot to death by Sergt. Boston Corbett near Fredericksburg, Va. Mrs. Mary Suratt, Davis'

E. Herold, George Atzerodt and Lewis Payne (Powell) were hanged for complicity.

MRS. LINCOLN AND FAMILY

Mrs. Mary Todd Lincoln was born in Lexington, Ky., 1818 and died in 1882. She was a daughter of Robert Smith Todd, a pioneer. Her half sister, Emily Todd, became the wife of Brig. Gen. Ben Hardin Helm of the Confederate Army, who was killed at Chickamauga. The Lincolns were married in Springfield, Nov. 4, 1842. Their married life was stormy and Mrs. Lincoln was accused of undue extravagance in the White House. In 1875 she was temporarily in a mental hospital. Of the Lincoln children, William Wallace died in 1862, Thomas, "Tad" in 1871, Edward Baker in 1850. Robert Todd Lincoln, born Aug. 1, 1843, in Springfield, studied law at Harvard, served in the Civil War, was secretary of war in Garfield's cabinet, minister to Great Britain and president of the Pullman Palace Car Co. He married Mary Harlan, daughter of Senator James Harlan of Iowa, who died Mar. 31, 1937. They had two daughters, Mrs. Charles Isham and Mrs. Robert J. Randolph. Robert Lincoln died July 26, 1926, at Manchester, Vt., and was buried in the National Cemetery, Arlington, Va. He gave the Library of Congress 18,350 Lincoln letters and documents, which were opened to the public July 26, 1947. Mrs. Robert Lincoln gave the Library the Bible on which Lincoln took the oath of office and the Lincoln family Bible. Her estate was estimated at $3,000,000.

Andrew Johnson

Andrew Johnson, 17th president, Democrat, was born in Raleigh, N. C., Dec. 29, 1808, the son of Jacob Johnson, porter at an inn and church sexton, and Mary McDonough Johnson, who had been a maid at the inn. At 10 he was apprenticed to a tailor and chained to his table to keep him at work. His father died when he was 5. At 16 he ran off to Greenville, Tenn. He became an alderman, 1824; mayor, 1830; state representative and senator, 1835-43; member of Congress, 1843-53; governor of Tennessee, 1853-57; U. S. Senator, 1857-62. He supported John C. Breckenridge against Lincoln in 1860. He had held slaves, but opposed secession and refused to follow Tennessee out of the Union. In March, 1862, Lincoln appointed him military governor of occupied Tennessee. In 1864 he was nominated for vice president with Lincoln on the National Union ticket to win Democratic support. He succeeded Lincoln as president April 15, 1865. In a controversy with Congress over the president's power over the South, he proclaimed, May 26, 1865, an amnesty to all Confederates except certain leaders if they would abolish slavery and ratify the 13th amendment. States doing so added anti-Negro provisions that enraged Congress, which intended to enfranchise all Negroes and disenfranchise former Confederates. Congress restored military control over the South. When Johnson removed Edwin M. Stanton, secretary of war, without notifying the Senate, thus repudiating the Tenure of Office Act, the House impeached him for this and other reasons. He was tried by the Senate, which voted 35 for conviction, 19 for acquittal, lacking the two-thirds necessary to convict, May 26, 1868. He was a candidate before the next Democratic convention, but not nominated. He returned to the Senate in 1875, and in a strong speech, defended his course. He supported the Lincoln policies, but was a poor executive, and his attitude toward the South was called partisanship by the radical Republicans. Johnson died July 31, 1875, and was buried at Greeneville, where his log-cabin tailor shop is now a state museum.

References: Andrew Johnson, Plebian and Patriot, by Robert W. Winston. Dictionary of American Biography.

MRS. ANDREW JOHNSON

Mrs. Eliza McCordle Johnson was born in Leesburg, Tenn., in 1810, the only daughter of a widow in a mountain hamlet when Johnson married her. She helped him get an education. Their daughter Martha, born 1828, educated in Georgetown, D. C., was often a guest at the White House in Polk's administration. In 1857 she married Judge D. T. Patterson. She was mistress of the White House in place of her invalid mother. Another daughter, Mary, married Daniel Stover of Carter Co., Tenn., and had three children; after Stover's death she married W. R. Bacon of Greeneville. Mrs. Johnson died in 1876.

Ulysses S. Grant

Ulysses Simpson Grant, 18th president, Republican, was born on the farm of his father, Jesse R. Grant, a tanner, at Point Pleasant, O., April 27, 1822. He was descended from Matthew Grant, who reached Dorchester, Mass., 1630. Grant's mother was Hannah Simpson. Grant was named Ulysses Hiram, but on entering West Point, 1839, his name was entered as Ulysses Simpson and he adopted it. He was graduated in 1843; was 1st lieut. and captain under Gens. Taylor and Scott in the Mexican War; resigned, 1854, worked in St. Louis until 1860, then went to Galena, Ill., where his father sold leather and hardware. He became colonel of the 21st Illinois Vols., 1861, then brigadier general; fought at Shiloh and Donelson; after taking Vicksburg he was made major general, and in March, 1864, lieut. general. He accepted Lee's surrender at Appomattox. In 1866 he was named General of the Army. President Johnson appointed Grant secretary of war when he suspended Stanton in defiance of the Senate, but Grant was not confirmed. He was nominated on the first ballot, May 30, 1868, and elected over Horatio Seymour, Democrat, 214 vs. 80 electoral votes. The 15th amendment, amnesty bill and civil service reform were events of his administration. The Liberal Republicans opposed him with Horace Greeley, also Democratic nominee, 1872, but he was re-elected. He vetoed the inflation bill, 1874. He returned to Galena, Ill. An attempt by the Stalwarts (Old Guard) to nominate him in 1880 failed. In 1881 the collapse of Grant & Ward, investment house, left him penniless. He began his Personal Memoirs, writing at Mt. McGregor, N. Y., while ill of cancer and completing them four days before his death in New York, July 23, 1885. The book realized over $450,000. Grant was buried in an imposing tomb on Riverside Drive, New York.

References: Personal Memoirs of U. S. Grant; Meet General Grant, by W. E. Woodward.

MRS. ULYSSES S. GRANT

Mrs. Julia Dent Grant (1826-1902) was the daughter of Judge Frederick Dent of St. Louis, son of a Revolutionary officer. She married Grant, Aug. 1848. Their children were Frederick Dent Grant (1850-1912), minister to Austria-Hungary, police commissioner of New York, major general, Spanish-American War; Ulysses, Jr. (1852-1929); Jesse R. (1858-1934); Nellie (1857-1922) who was married in the White House to Capt. Algernon Sartoris, 1874, and in 1912, a widow, married Frank H. Jones, Cleveland's assistant postmaster general.

Rutherford Birchard Hayes

Rutherford Birchard Hayes, 19th president, Republican, was born in Delaware, O., Oct. 4, 1822, the posthumous son of Rutherford Hayes, a farmer, and Sophia Birchard. He was descended from George Hayes, a Scot who reached Windsor, Conn., in 1680. He was raised by his uncle Sardis Birchard, educated in Norwalk, O., and Middletown, Conn., and graduated from Kenyon College, 1842, and Harvard Law school, 1845. He practiced law in Lower Sandusky, O., now Fremont; was city solicitor of Cincinnati, 1858-61. He was major of the 23d Ohio Vols., wounded at South Mountain; became brigadier general and major general by brevet, 1864. He served in Congress 1864-67, supporting Reconstruction and Johnson's impeachment. He was elected governor of Ohio, 1867 and 1869; beaten for Congress 1872; re-elected governor, 1875. He supported the merit principle in appointments, economy, prison reform and public libraries. In 1876 he was nominated for president over James G. Blaine and believed he had lost to Samuel J. Tilden, Democrat, 184 to 163 electoral votes. But Zachariah Chandler, chairman of the Republican National Committee, relying on Republican domination of the South, urged the validity of contesting 22 electoral returns from Florida, South Carolina, Louisiana; also Oregon. Frauds in Louisiana injuring Tilden were permitted to stand. Promises to withdraw troops from the South were reported used to suborn Democrats. The election was judged by an Electoral Commission, appointed by Congress, 8 Republicans and 7 Democrats, who

refused to "go behind state returns" and by strict party vote elected Hayes by 185 over 184. Tilden's refusal to fight back was blamed by his party. The withdrawal of troops followed, but handicapped Republican rule, and as Hayes proceeded to reform civil service he alienated political spoilsmen. He advocated repeal of the Tenure of Office Act that had led to Johnson's impeachment. He supported sound money and specie payments. Hayes died in Fremont, O., Jan. 17, 1893.

Reference: Encyclopedia Americana.

MRS. RUTHERFORD B. HAYES

Mrs. Lucy Webb Hayes, born 1831, was the daughter of Dr. James Webb of Chillicothe, O. She married Hayes Dec. 30, 1852. She was an advocate of temperance, as was Hayes, and did not permit alcoholic beverages in the White House. The Hayes had eight children: Birchard A. (1853-1926); Webb C. (1856-1934); Rutherford P. (1858-1927); Joseph T. (1861-1863); George C. (1864-66); Fanny (1867); Scott R. (1871-1923); Manning F. (1873-74). Mrs. Hayes died June, 1889.

James Abram Garfield

James A. Garfield, 20th president, Republican, was born Nov. 19, 1831, in a log cabin at Orange, Cuyahoga Co., Ohio., the son of Abram and Eliza Ballou Garfield. His father, a canal contractor and farmer from New York, was descended from Edward Garfield, who reached Massachusetts Bay Colony in 1630 and helped found Watertown, Mass.; his mother was a descendant of an owner of Providence Plantation. James was the youngest of four children; his father died in 1833 and his mother supported them. He worked as canal bargeman, farmer and carpenter; got an education at Western Reserve Eclectic, later Hiram College, and was graduated from Williams in 1856. He became professor of ancient languages and literature at Hiram, then principal. He was in the Ohio senate in 1859. Anti-slavery and anti-secession, he volunteered for the war, became colonel of the 42nd Ohio Infantry and brigadier general in 1862. He fought at Shiloh, was chief of staff for Rosencrans and was made major general for gallantry at Chickamauga. He entered Congress as a radical Republican in 1863; supported specie payment as against paper money (greenbacks). On the electoral commission in 1876 he voted for Hayes against Tilden on strict party lines. He was senator-elect in 1880 when he became the Republican nominee for President. He was chosen on the 36th ballot as a compromise between Gen. Grant, James G. Blaine and John Sherman. This alienated the Grant following but Garfield was elected and Blaine became his secretary of state. On July 2, 1881, Garfield was shot by an unbalanced office-seeker, Charles J. Guiteau, while entering the old Baltimore & Ohio station in Washington. He died Sept. 9, 1881, at Elberon, N. J., and was buried in Cleveland, O. Guiteau was hanged June 30, 1882.

References: Dictionary of American Biography; History of the United States from Hayes to McKinley by James Ford Rhodes.

MRS. JAMES A. GARFIELD

Mrs. Lucretia Rudolph Garfield was born in 1832, daughter of an Ohio farmer. Her mother was a descendant of Gen. Nathaniel Greene. She and Garfield were schoolmates and were married Nov. 11, 1858, when he was principal at Hiram, O. After his death a trust fund of $360,000 was raised for her and her children. She died March 13, 1918. Five children survived. James R. became secretary of the interior, 1907-09; Harry A. was president of Williams College; Irvin M. became a Boston lawyer and Abram G. a Cleveland architect; a daughter, Mrs. Mary Stanley-Brown, died Dec. 30, 1947.

Chester Alan Arthur

Chester A. Arthur, 21st president, Republican, was born at Fairfield, Vt., Oct. 5, 1830, the son of the Rev. William Arthur, an immigrant from County Antrim, and Malvina Stone Arthur, member of a New Hampshire family. He was graduated at Union College, 1848, taught school at Pownall, Vt., studied law in New York. In 1853 he argued in a fugitive slave case that slaves transported through New York state were thereby freed; in 1855 he obtained a ruling that Negroes were to be treated the same as whites on street cars. He helped organize the New York State militia, 1861; was made quartermaster general and equipped troops for the front. He was made collector of the port of New York, 1871. In 1877 President Hayes, reforming the civil service, ordered Arthur's resignation; he refused because he was not personally culpable, but was removed, 1879. This made Senators Conkling, Platt and the New York machine stalwarts enemies of Hayes. Arthur and the stalwarts tried to nominate Grant for a third term, 1880; when Garfield was nominated, Arthur received second place in the interests of harmony. On Sept. 19, 1881, he succeeded Garfield as president. He supported civil service reform and the tariff of 1883; arranged an unratified canal treaty with Nicaragua. He was defeated for renomination by James G. Blaine, 1884, but supported Blaine. He died Nov. 18, 1886, and was buried in Albany, N. Y.

Reference: Dictionary of American Biography.

MRS. CHESTER A. ARTHUR

Mrs. Ellen Lewis Herndon Arthur was born in Fredericksburg, Va., in 1837, the daughter of Commander William Lewis Herndon, U. S. N. She died in 1880. The Arthurs had three children: W. L. H. Arthur, who died in infancy; Chester Alan Arthur, Jr., (1865-1937) and Ella Herndon Arthur, born 1871 (Mrs. Charles Pinkerton). The mistress of the White House was Arthur's sister Mary, Mrs. John E. McElroy of Albany, N. Y.

Grover Cleveland

Grover Cleveland, 22nd and 24th president, Democrat, was born in Caldwell, N. J., Mar. 18, 1837, the son of Richard F. Cleveland, a Presbyterian minister, and Ann Neale, daughter of a Baltimore merchant who had come from Ireland. He was named Stephen Grover, but dropped Stephen. He clerked in Clinton and Buffalo, N. Y., taught in the New York City Institution for the Blind; was admitted to the bar in Buffalo, 1859; ass't. district attorney, 1863; sheriff, 1869; mayor, 1881; governor of New York, 1882. He was an independent, honest administrator who hated corruption. He was nominated for president over Tammany opposition, 1884, defeating James G. Blaine, 219 to 182. He enlarged the civil service, vetoed many pension raids on Treasury. In 1888 he was defeated by Benjamin Harrison, although his popular vote was larger. Re-elected over Harrison, 1893-97, by 271 to 145, he faced a money crisis brought about by lowering of the gold reserve, circulation of paper and exorbitant silver purchases under the Sherman act; he obtained repeal of the latter and a reduced tariff. An income tax was passed but declared unconstitutional by the Supreme Court, 1895. A severe depression and labor trouble racked his administration but he refused to interfere in business matters and rejected as crackpot theory, Jacob Coxey's demand for work relief at $20,000,000 monthly. He broke the Pullman strike with U. S. troops to move the mails. He rejected the platform of W. J. Bryan's silver Democrats, 1896, and supported the gold Democrats, Palmer & Buckner. He had part in the reorganization of the Equitable Life Assurance Assn. He died in Princeton, N. J., 1908.

MRS. GROVER CLEVELAND

Mrs. Frances Folsom Cleveland was born in 1864, the daughter of Cleveland's law partner in Buffalo, Oscar Folsom and Emma C. Harmon. She married Cleveland in the White House, 1886. They had five children, Ruth, Esther, Marion, Richard Folsom and Frances Grover. Mrs. Cleveland married, Feb. 10, 1913, Thomas J. Preston, Jr., professor of archaeology in Princeton. She died Oct. 29, 1947.

Benjamin Harrison

Benjamin Harrison, 23rd president, Republican, was born at North Bend, O., Aug. 20, 1833. His great-grandfather, Benjamin Harrison, was a signer of the Declaration of Independence; his grandfather, William Henry Harrison, was 9th president; his father John Scott Harrison was a Member of Congress, 1853-57. His mother was Elizabeth F. Irwin. He attended school in a log cabin on his father's farm; was graduated from Miami Univ. 1852; admitted to the bar, 1853 and practiced in Indianapolis, Ind. As 2nd lieut. he raised recruits and became colonel of the 70th Indiana Volunteer Infantry. He fought at Kenesa

Mountain, Peachtree Creek, Nashville and on Sherman's march to the sea. In 1865 he was made brigadier general by brevet. He failed to be elected governor of Indiana, 1876; but became Senator, 1881, and worked for the G. A. R. pensions vetoed by Cleveland. In 1888 he defeated Cleveland for president, 233 to 168. He expanded the pension list greatly; suppressed the Louisiana lottery; signed the McKinley high tariff bill and the Sherman silver purchase act. He helped the admission of North and South Dakota, Montana, Washington, Idaho and Wyoming, Republican states. He was defeated for reelection, 1892. He represented Venezuela in arbitration with Great Britain in Paris, 1899. He died at Indianapolis, Mar. 31, 1901, and was buried there.

HARRISON'S TWO MARRIAGES

Mrs. Caroline Lavinia Scott Harrison was born in 1832 in Oxford, O., the daughter of Prof. John W. Scott of Miami Univ. She married Harrison Oct. 29, 1853. She was the first head of the Daughters of the American Revolution. She died in the White House, 1892. Her son Russell B. became a mining engineer. Her daughter Mary married an Indianapolis merchant, James R. McKee; her child, "Baby McKee", was a White House favorite and is now a New York business man. She died in Greenwich in 1930. Harrison's second wife was Mrs. Harrison's niece, **Mrs. Mary Scott Lord Dimmock**, whose husband died in 1882. She was born in Honesdale, Pa., 1858, and died in New York, Jan. 5, 1948. She spent two years in the White House during her aunt's lifetime. She had one daughter, Elizabeth Harrison, born 1897, who married James Blaine Walker, Jr., great-nephew of Blaine.

William McKinley

William McKinley, 25th president, Republican, was born in Niles, O., Jan. 29, 1843, the son of William McKinley, an iron manufacturer, and Nancy Allison McKinley, and was the seventh of nine children. His father's family was Scotch-Irish from County Antrim; his great-grandfather fought in the American Revolution. McKinley attended school in Poland, O., and Alleghany College, Meadville, Pa., and enlisted for the Civil War at 18. He saw fighting at South Mountain, Antietam, Winchester and Cedar Creek. The state of Ohio honored him with the tallest monument at Antietam, where he had been a doughboy. He rose to captain and in 1865 was made major by brevet. He opened a law office in Canton, O., in 1867, and campaigned for Grant and Hayes. From 1876 to 1890, excepting 1882, he served in the House of Representatives and led the fight for a high tariff to protect "infant industries," with reciprocal trade agreements. (McKinley bill, enacted Oct. 1, 1890). Defeated on this issue in 1890, he was elected governor of Ohio, 1891 and 1893. He received 182 ballots for president in the Republican convention that nominated Benjamin Harrison in 1892. In 1896 he was elected president on a protective tariff, sound money (gold standard) platform over William J. Bryan, Democratic proponent of free silver. Chief factor was the astute vote-getting of Senator Marcus A. Hanna. McKinley was reluctant to intervene in Cuba on grounds of humanity, but the loss of the battleship Maine at Havana crystallized opinion. He demanded Spain's withdrawal from Cuba; Spain replied by declaring war. McKinley signed the American declaration Mar. 23, 1898. (Peace signed Dec. 10.). In the 1900 campaign he defeated Bryan's anti-imperialist arguments with the prestige of prosperity, "the full dinner pail" and the vigorous campaigning of Theodore Roosevelt, vice presidential nominee. McKinley was a Methodist, beloved for his conciliatory nature, but conservative (stand-pat) on business issues. He abhorred violence. The need to regulate the Philippines is believed to have inspired John Hay's Open Door Policy in Asia. On Sept. 6, 1901, while welcoming citizens at the Pan-American exposition, Buffalo, N. Y., he was shot by Leon Czolgosz, an anarchist terrorist. He died Sept. 14. His last words were: "It is God's way. His will, not ours, be done." McKinley, his wife and infant daughters rest in an imposing tomb in Canton. His favorite flower, the red carnation, was made the state flower.

MRS. WILLIAM McKINLEY

Mrs. Ida Saxton McKinley, born 1847, was the daughter of James A. Saxton and Katherine DeWalt. She was cashier in her father's bank in Canton, O., when she married McKinley. Their two children died in childhood. Mrs. McKinley became an invalid through a nervous ailment, but presided in the White House and was with her husband when he was assassinated. She died in 1907.

Theodore Roosevelt

Theodore Roosevelt, 26th president, Republican, was born in New York City, Oct. 27, 1858, the son of Theodore Roosevelt, Collector of the Port, and Martha Bulloch, daughter of Maj. Jas. S. Bulloch, Roswell, Ga. He was descended from Claes Martensen van Roosevelt, and his wife Janette, who reached New Netherland from Holland about 1650. Theodore was a fifth cousin of Franklin D. Roosevelt and an uncle of Mrs. Eleanor Roosevelt. His mother was of Scotch-Irish, Huguenot stock and a Southern sympathizer. Roosevelt was graduated from Harvard, 1880, attended Columbia Law School briefly; sat in the New York State Assembly, 1882-84; ranched in North Dakota, 1884-86; failed of election as mayor of New York, 1886; member of U. S. Civil Service Comm. 1889; president, New York Police Board, 1895, supporting the merit system; Asst. Secy. of the Navy under McKinley, Apr. 19, 1897—May 10, 1898, during which he instituted naval target practice and instructed Commodore George Dewey to take Manila in the event of war with Spain. He organized the 1st U. S. Volunteer Cavalry (Rough Riders) as lieut. col., Leonard Wood, col.; led the charge up Kettle Hill at San Juan and was made colonel by brevet. Elected governor, New York, 1898-1900, he fought the spoils system and achieved taxation of corporation franchises. Drafted for vice president, 1900, he became nation's youngest president at 43, when McKinley died at Buffalo, Sept. 11. As president he fought corruption of politics by big business; dissolved Northern Securities Co. and others for violating anti-trust laws; intervened in coal strike on behalf of the public, 1902; instituted Dept. of Commerce and Labor; obtained Elkins law forbidding rebates to favored corporations, 1903; Hepburn law regulating railroad rates, 1906; Pure Food and Drugs Act, 1906, Reclamation Act and employers' liability laws. He organized Conservation, mediated the peace between Japan and Russia, 1905; won the Nobel peace prize. He was the first to use the Hague Court of International Arbitration. By recognizing the new Republic of Panama he made Panama Canal possible, appointed Col. Geo. W. Goethals head commissioner and began canal. He was re-elected, 1904, with 366 electoral votes vs. 140.

In 1908 he obtained the nomination of William H. Taft, who was elected; considering Taft's administration inimical to liberal policies he organized the Progressive party, June 22, 1912, and ran for president against Taft and Woodrow Wilson, in which Wilson obtained 6,293,097 votes, Roosevelt 4,119,517. He was shot during the campaign but recovered. He advocated recall of elected officials, referendum on legislation and recall of judicial decisions, which alienated conservatives. In 1916 he left the Progressives and supported Charles A. Hughes, Republican. A strong friend of Britain, he fought American isolation. In 1917 President Wilson refused to let him organize a division. His four sons served in World War I; two were wounded, one killed. He wrote on many topics—his Winning of the West is best known—was a naturalist and hunter and traced the River of Doubt in Brazil, 1913, now Rio Roosevelt. He was looked upon as certain nominee of the Republicans in 1920. He died Jan. 6, 1919, at Sagamore Hill, Oyster Bay, Long Island, N. Y., and was buried near the Roosevelt bird refuge there.

THEODORE ROOSEVELT'S FAMILY

Mrs. Alice Hathaway Lee Roosevelt, daughter of George Cabot Lee and Caroline Haskell Lee, of Boston, married Roosevelt Oct. 27, 1880, in Boston. She and Roosevelt's mother died in New York Feb. 14, 1884. She was the mother of Alice Lee Roosevelt, who married Nicholas Longworth, of Cincinnati, Member of Congress, in the White House, 1906. Their daughter, Paulina, was born Feb. 14, 1925. Longworth, Republican Speaker of the House, died April 9, 1931.

Roosevelt's second wife, **Edith Kermit Carow,** married him Dec. 2, 1886, in London. She was born in Norwich, Conn., Aug. 16, 1861, daughter of Charles and Gertrude Tyler Carow, and survived her husband 29 years, dying Sept. 30, 1948, aged 87. Of their five children Theodore Roosevelt, Jr., was lieut. col. in World War I, assistant secretary of the Navy, governor of Puerto Rico and governor general of the Philippines. He failed of election as governor of New York. A brigadier general, he served in North Africa, Italy and in Normandy with the 1st Army, and died there July 12, 1944, aged 56. Kermit, major in World War II, died on active duty in Alaska, June 4, 1943, aged 53. Ethel Carow is Mrs. Richard Derby. Archibald Bulloch was a lieut. colonel in World War II. Quentin, aviator in World War I, was killed in action and buried where he fell in France.

William Howard Taft

William Howard Taft, 27th president, Republican, was born in Cincinnati, O., Sept. 15, 1857, the son of Alphonso Taft and Louisa Maria Torrey. His father was secretary of war and attorney general in Grant's cabinet; minister to Austria and Russia under Arthur. Taft was graduated from Yale, 1898, Cincinnati Law School, 1880, became law reporter for Cincinnati newspapers; was ass't. prosecuting attorney, 1881-83; ass't. county solicitor, 1885; judge, Superior Court, 1887; U. S. solicitor-general, 1890; federal circuit judge, 1892. In 1900 he became head of the U. S. Philippine Comm. and was first civil governor of the Philippines, 1901-04; in 1902 he negotiated the purchase of the Friars' lands with the Vatican. Secretary of war, 1904; provisional governor of Cuba, 1906. He was groomed for president by Theodore Roosevelt as an exemplary public servant and elected over W. J. Bryan, 1907. His administration dissolved Standard Oil and tobacco trusts; instituted Department of Labor; drafted direct election of senators and income tax amendments. His tariff and conservation policies angered progressives; though renominated he was fought by Theodore Roosevelt; the result was Wilson's election. Taft was president League to Enforce Peace, supporting the League of Nations. He was professor of constitutional law, Yale, 1913-21; Chief Justice of the U. S. Supreme Court, 1921-30, when illness forced him to resign. He died in Washington, Mar. 8, 1930, and was buried in Arlington National cemetery.

MRS. WILLIAM H. TAFT

Mrs. Helen Herron Taft was born 1862 in Cincinnati, the daughter of John W. Herron and Harriet Collins. She was a musician and a founder of the Cincinnati orchestra. Her father was a law partner of Rutherford B. Hayes. The Taft children are Helen, (Mrs. Frederick J. Manning), born 1891, prof. of history and former dean and acting president at Bryn Mawr; Robert Alphonso Taft, born 1889, U. S. Senator from Ohio, and Charles Phelps Taft, born 1897, Cincinnati lawyer, former president Federal Council of Churches of Christ in America. Both sons have served in important government posts.

Woodrow Wilson

Woodrow Wilson, 28th president, Democrat, was born at Staunton, Va., Dec. 28, 1856, as Thomas Woodrow Wilson, son of a Presbyterian minister, the Rev. Joseph Ruggles and Janet (Jessie) Woodrow, daughter of a Scotch Presbyterian minister. He was a grandson of James Wilson, a Presbyterian of Ulster who reached Philadelphia in 1807, became a printer and in 1808 married an Ulster Presbyterian girl, a shipmate. In his youth Wilson lived in Augusta, Ga., Columbia, S. C., and Wilmington, N. C. He attended Davidson College, 1873-74; was graduated from Princeton, A.B., 1879; A.M., 1882; read law at the Univ. of Virginia, 1881; practiced law, Atlanta, 1882-83; Ph.D., Johns Hopkins, 1886 with "Congressional Government." He taught history and political economy at Bryn Mawr, 1885-88; at Wesleyan, 1888-90; was professor of jurisprudence and political economy at Princeton, 1890-10; president of Princeton, 1902-1910, during which he tried to introduce innovations of organization that were fought by the graduate dean and alumni; governor of New Jersey, 1911-13, during which he obtained a primary election law, an employers' liability law and other reforms. In 1912 he was nominated for president by the strategy of Wm. J. Bryan, who was out to defeat Champ Clark and Tammany. He won because the Republican vote for Taft was split by the Progressives under Theodore Roosevelt.

Wilson protected American interests in revolutionary Mexico and fought for American rights on the high seas as the first World War opened. His sharp warnings to Germany led to the resignation of his secretary of state, Wm. J. Bryan, pacifist, while his protests against British interference with American ships disturbed the Allies. In 1916 he was re-elected by a slim margin with the slogan "He kept us out of war" over Charles Evans Hughes, supported by Theodore Roosevelt and strong pro-Ally groups. His offer to mediate in the war (Dec. 18, 1916) was snubbed, as was his suggestion for "peace without victory." When the Germans started unrestricted submarine warfare contrary to pledges, he broke diplomatic relations. After four American ships had been sunk he asked a declaration of war; it was voted April 6, 1917.

Wilson proposed peace on the basis of his Fourteen Points Jan. 8, 1918, which the Germans accepted Nov. 11. He went to Paris to help negotiate the peace treaty, the crux of which he considered the League of Nations, also urged by Gen. J. C. Smuts, Lord Robert Cecil, Lord Phillimore, William H. Taft and Elihu Root. In the U. S. Senate Henry Cabot Lodge, William E. Borah and Hiram Johnson demanded reservations that would not make the United States subservient to the votes of other nations in case of war. Wilson refused to consider any reservations and toured the country to get support. At Pueblo, Colo., Sept. 25, 1919, he broke down and several days later suffered a stroke that made him an invalid. The treaty was rejected Mar., 1920, by 49 to 35 (29 being sufficient to kill it). He made a public appearance on the day of Harding's inauguration, and formed a law partnership with Bainbridge Colby, but did not practice. He won the Nobel peace prize, 1919. He died in Washington, Feb. 3, 1924, and was buried in the Episcopal cathedral there.

WILSON'S TWO MARRIAGES

Mrs. Ellen Louise Axson Wilson was born in Rome, Ga., in 1860, the daughter of the Rev. S. E. Axson and Margaret Hoyt. She married Wilson June 28, 1885, and died in the White House Aug. 6, 1914. They had three daughters: Margaret W., born 1886, member of a religious colony in Pondicherry, India, when she died in 1944; Eleanor B., second wife of William G. McAdoo, Wilson's secretary of the treasury, later divorced; Jessie W., who married Francis B. Sayre in the White House Nov. 25, 1913 and died Jan. 15, 1933.

Mrs. Edith Bolling Wilson was born in Wytheville, Va., 1872, and was the widow of Norman Galt, a Washington jeweler, when she married Wilson, Dec. 18, 1915. She accompanied him to Europe on his peace mission and was with him on his speaking tour when he broke down. She lives in Washington.

Reference: My Memoir, by Edith Bolling Wilson.

Warren Gamaliel Harding

Warren Gamaliel Harding, 29th president, Republican, was born near Blooming Grove, now Corsica, O., Nov. 2, 1865, the son of Dr. Geo. Tyron Harding, a country doctor, and Phoebe Elizabeth Dickerson. He attended Ohio Central College, Iberia, O., 1879-82; worked on the Daily Star, Marion, O., 1884 and a few years later bought the paper with a friend. He was state senator, 1900-04; lieut. governor, 1904-06; defeated for governor, 1910; U. S. Senator, 1915. He was a regular, Old Guard Republican; supported Taft, opposed Federal control of food and fuel, voted for anti-strike legislation, woman's suffrage, Volstead prohibition enforcement act over President Wilson's veto and opposed the League of Nations as a loss of sovereignty. In 1920 he was nominated for president on the tenth ballot with Calvin Coolidge and overwhelmingly defeated the Democrats, James M. Cox and Franklin D. Roosevelt. (Harding, 16,138,000; Cox, 9,142,000). He stressed a return to "normalcy"; worked for repeal of excess profits and high income taxes and a revision of tariff. On announcing ratification of treaties with Germany, Austro-Hungary, Nov. 14, 1921, he declared war officially ended July 2, 1921. His cabinet included

Charles E. Hughes and Herbert Hoover. He called the International Conference on Limitation of Armament, Nov. 11, 1921-Feb. 1, 1922, and dedicated the Lincoln Memorial. He left for Alaska June 20, 1923; became ill on his return and died in San Francisco, Aug. 2, 1923. He was buried in Marion, O.

References: Dictionary of National Biography; Only Yesterday, by Frederick Lewis Allen.

MRS. WARREN GAMALIEL HARDING

Mrs. Florence Kling Harding was born Aug. 15, 1860, the daughter of Amos O. Kling, a Marion, O., hardware merchant and later banker. She married, first, Henry De Wolfe, and had a son, Marshall Eugene De Wolfe. She married Harding in 1891 and helped him on the Star. She died in Marion, Nov. 21, 1924.

Calvin Coolidge

Calvin Coolidge, 30th president, Republican, was born in Plymouth, Vt., July 4, 1872, the son of John Calvin Coolidge, a storekeeper, and Victoria J. Moor. His ancestors, John and Mary Coolidge, came from England to Watertown, later Cambridge, Massachusetts Bay Colony, in 1630. Coolidge was graduated at Amherst, 1895; admitted to the bar in Northampton, 1897; city councilman, 1899; city solicitor, 1900-01; clerk of the courts, 1904; member of the lower Massachusetts house, 1907-08; mayor of Northampton, 1910-11; State Senator, 1912-15; and president of Senate; 1914-15; lieut. governor, 1916-18; governor, 1919; re-elected, 1920. In Sept., 1919, Coolidge attained national prominence by his action in the Boston police strike, during which he wired Samuel Gompers of the A. F. of L.: "There is no right to strike against the public safety by anybody, anywhere, anytime." This brought his name before the Republican convention of 1920, where he received 34 votes for president and was nominated for vice president by 674¼ votes. He succeeded to the presidency on Harding's death, Aug. 2, 1923, the oath being administered by his father, a justice of the peace, in his home in Plymouth, Aug. 3, and again Aug. 17 before Justice A. A. Hoehling of the Supreme Court of the District of Columbia. He opposed the League of Nations; approved the World Court; vetoed the soldiers' bonus bill, which was passed over his veto. In 1924 he was re-elected by a huge majority with 15,718,789 over John W. Davis, Dem., 8,738,962, and Robert M. LaFollette, Prog., 4,822,319. He reduced the national debt by $2,000,000,000 in three years. He opposed the McNary-Haugen farm bill and price fixing, and supported his secretary of state, Frank B. Kellogg, in the Kellogg-Briand treaties outlawing war. His dry, laconic remarks are often quoted: opposing reduction of Europe's war debt, "They hired the money, didn't they?" With Republicans eager to renominate him he announced, Aug. 2, 1927: "I do not choose to run for President in 1928." He became a life insurance director, wrote syndicated articles and died of a heart attack in Northampton, Jan. 5, 1933. He was buried on a Plymouth hillside.

Reference: A Puritan in Babylon, by William Allen White.

MRS. CALVIN COOLIDGE

Mrs. Grace Anne Goodhue Coolidge, of Northampton, Mass., was born in Burlington, Vt., Jan. 3, 1879, the daughter of Andrew I. Goodhue and Lemira Barrett. He was a steamboat inspector under Cleveland. She was graduated from the Univ. of Vermont, 1902; taught in the Clarke School for the Deaf, 1902-05; she is now president of its board. She married Coolidge Oct. 4, 1905. The Coolidges had two sons: John B., born 1906, who married Florence, daughter of Gov. John H. Trumbull of Connecticut, and Calvin (1908-1924).

Herbert Hoover

Herbert Clark Hoover, 31st president, Republican, was born at West Branch, Ia., Aug. 10, 1874, the son of Jesse Clark Hoover, a blacksmith (1847-80) and Hulda Randall Minthorn (1848-83). His ancestor, Andrew Hoover, came to Pennsylvania from the Palatinate, 1738, and his great-grandfather settled in West Branch in 1854. Hoover grew up in the homes of his uncles in Indian Territory and Oregon, entered Leland Stanford, Jr., University (now Stanford) in its first class, 1891; A.B., Engineering, 1895. After brief experience in the U. S. Geological Survey and western mines he began in Western Australia his extraordinary career as a mining engineer in Asia, Europe, Africa and America, which made him a director of numerous British mining corporations and a millionaire early in life. In 1900, while chief engineer of imperial mines in China, he became food administrator for refugees at Tientsin during the Boxer rebellion. He was chairman, American Relief Committee, London, 1914-15; Comm. for Relief in Belgium, 1915-1919; U. S. Food Administrator, 1917-1919, mem. War Trade Council; Ch., Supreme Economic Council; ch., European Relief Council. Secretary of Commerce, 1921-28; elected president over Alfred E. Smith, 1929; defeated for re-election, 1932. Initiated Boulder Canyon project (Hoover Dam); Reconstruction Finance Corp.; Supported relief measures in Farm Loan Bank, Home Loan Banks, Agricultural Credit Corp. Hoover gave his official salaries to charities and underpaid officials. President Truman appointed him co-ordinator of European Food program, 1946; German Food program, 1947; ch., Committee on Reorganization of U. S. Executive Depts., 1948. Founded the Hoover Library on War, Revolution and Peace, Stanford University.

References: Encyclopedia Americana; The Problems of Lasting Peace, by Herbert Hoover.

MRS. HERBERT HOOVER

Mrs. Lou Henry Hoover was born in Waterloo, Ia., Mar. 29, 1875, daughter of Charles D. Henry, a banker. The family moved to Monterey, Calif. She was graduated from Stanford University 1898 and married Hoover in 1899, sailing with him for his post in China. She died Jan. 7, 1944. The Hoovers had two sons, Herbert, born 1903, a Pasadena consulting engineer, and Allan Henry.

Franklin D. Roosevelt

Franklin Delano Roosevelt, 32nd president, Democrat, was born near Hyde Park, N. Y., Jan. 30, 1882, the son of James Roosevelt (died 1900) and Sara Delano (died 1941). His ancestor, Claes Martensen van Roosevelt, came to New Amsterdam from Holland in 1649. Claes' son Nicholas, a New York alderman in 1700 and 1715, had a son Johannes, from whom Theodore Roosevelt was descended, and a son Jacobus, from whom Franklin D. Roosevelt was descended. Roosevelt was graduated at Harvard, 1904; attended Columbia Law school, was admitted to the bar. He went to the New York Senate from his Dutchess county district 1910 and 1913. He voted for Woodrow Wilson at the 1912 Democratic convention; in 1913 Wilson made him assistant secretary of the Navy.

Roosevelt was nominated for vice president, to run with James M. Cox, July, 1920, at San Francisco, Alfred E. Smith making the seconding speech. From 1920 to 1928 he was a New York lawyer and vice president of the Fidelity & Deposit Co. In Aug., 1921, he was stricken with infantile paralysis, which paralyzed his legs. He learned to walk with leg braces and a cane and established the Warm Springs, Ga., Foundation for helping those so afflicted, for which the March of Dimes was founded.

Roosevelt presented the name of Alfred E. Smith to the Democratic convention of 1924 in New York, and 1928 in Houston, Texas, calling Smith the Happy Warrior. Smith was nominated in 1928 and defeated. Roosevelt was elected governor of New York, 1928 and 1930. In 1932 at Chicago W. G. McAdoo, pledged to John N. Garner, with both Smith and Roosevelt candidates, threw his votes to Roosevelt, who was chosen, alienating Smith. The financial crash, unemployment and the Democratic promise to repeal prohibition made his victory inevitable. He asked emergency powers, proclaimed the New Deal, and put into effect a vast number of administrative changes. Foremost was "pump priming," or use of public funds for relief and public works, resulting in deficit financing. He greatly expanded the controls of the central government over business and by an excess profits tax and pyramiding income taxes produced a redistribution of earnings on an unprecedented scale. The Wagner act gave labor many advantages in organizing and collective bargaining, at the same time denying equal privileges to employers. Government employes increased to several millions.

Roosevelt was a tremendous worker and traveler despite physical handicaps. By personal persuasiveness he held factions together. He was the first president to use radio for "fireside chats" on policies. When the Supreme Court voided his meas-

ures he demanded additional judges of Congress. It refused, but resignations soon enabled him to replace conservatives who had opposed him. He was the first president to break the third term tradition and was elected to a fourth term, 1945, despite failing health. The culminating event of his career was World War II. He was openly hostile to Fascist governments before the war and gave Britain substantial support, such as exchanging 50 destroyers for air bases, before Pearl Harbor made the United States a belligerent. He wrote the principles of fair dealing into the Atlantic Charter, Aug. 14, 1941 (with Winston Churchill) and in the Four Freedoms (Freedom of speech, of worship, from want, from fear) Jan. 6, 1941. He personally conferred with the heads of states at Casablanca, Jan., 1943; Quebec, Aug., 1943; Tehran, Nov.-Dec., 1943; Yalta, Feb., 1945 and assumed responsibility for many state and military policies. He died at Warm Springs, Ga., April 12, 1945, aged 63 and was buried on his Hyde Park estate, where his house and library, containing over 6,000,000 letters and documents, are in the care of the national government.

ELEANOR ROOSEVELT

Mrs. Anna Eleanor Roosevelt was born Oct. 11, 1884, the daughter of Elliott Roosevelt, a younger brother of Theodore Roosevelt, and Anna Hall. She was educated in private schools. She married Franklin D. Roosevelt Mar. 17, 1905. In 1924-28 she was finance chairman of the New York Democratic State committee. In 1941-42 she was assistant director, Office of Civilian Defense. In Dec., 1945, she was appointed U. S. representative in the general assembly of the United Nations and later became chairman of the Human Rights Commission. She edited her father's letters under the title, Hunting Big Game in the 80s, in 1932; wrote This Is My Story, 1937, My Days, 1938. She was the first of presidents' wives to devote herself to a career of social reform and political support of her husband's measures; her daily syndicated column, My Day, reflected her wide interests. The Roosevelts had six children, one dying in infancy. The others:

James, married, June 4, 1930, Miss Betsy Cushing of Brookline, Mass., divorced March, 1940; married, April 14, 1941, Miss Romelle Theresa Schneider of Rochester, Minn.

Elliott, married, Jan. 16, 1932, Miss Elizabeth B. Donner of Bryn Mawr, Pa., divorced, July 17, 1933; married, July 22, 1933, Ruth Josephine Googins of Fort Worth, Tex., divorced, April 18, 1944; married, Dec. 3, 1944, Faye Emerson, screen actress, of Los Angeles.

Franklin D. Jr., married, June 30, 1937, Miss Ethel duPont of Wilmington, Del., divorced, May 21, 1949; married, Aug. 31, 1949, Suzanne Perrin of New York.

John A., married, June 18, 1938, Miss Anne L. Clark of Nahant, Mass.

Anna Eleanor, married, June 5, 1926, Curtis B. Dall of New York City, divorced, July 30, 1934; married, Jan. 18, 1935, John Boettiger of New York City, divorced Aug. 1, 1949.

Harry S. Truman

Harry S. Truman, 33rd president, Democrat, was born at Lamar, Mo., May 8, 1884, the son of John Anderson and Martha Ellen Young Truman. He was not given a middle name. He uses S, with a period, as his middle initial. He attended public schools in Independence, Mo., worked for the Kansas City Star, 1901, and as railroad timekeeper and helper in Kansas City banks up to 1905. He joined the Missouri National Guard, 1905, and was rejected by West Point for defective eyesight. He ran his family's farm, 1906-17. He entered the Field Artillery school at Fort Sill, Okla., 1917; became 1st lieut., Battery F and capt., Battery D, 129th Field Artillery, 35th Div., A. E. F. He served in the Vosges, Meuse-Argonne and St. Mihiel actions and was discharged as major, 1919. He is a colonel in the Field Artillery Reserve. After the war he ran a haberdashery, became judge of Jackson Co. Court, 1922-24; attended Kansas City School of Law, 1923-25. Although supported by "Boss" Tom Pendergast he was defeated for the next term, then elected presiding judge. The court administered $60,000,000 for public works.

Truman was chosen Senator Nov. 6, 1934; re-elected Nov. 5, 1940. He became known as an honest, straight-shooting, plain-spoken man who worked hard at public tasks. He investigated the civil service and was efficient chairman of the Senate committee investigating National Defense. In 1944 President Roosevelt refused to have Henry A. Wallace as vice president on his fourth ticket, after seeming to favor James F. Byrnes and Judge Douglas he gave Robert E. Hannegan word to support Truman. On Roosevelt's death, April 12, 1945 Truman became president. First change in the Roosevelt cabinet took place April 30, when he named Hannegan postmaster general, vice Frank C. Walker. Other changes followed quickly: Thomas C. Clark for Francis Biddle, attorney general; Lewis B. Schwellenbach for Mrs. Frances Perkins, labor; Clinton P. Anderson for Claude Wickard, agriculture; John W. Snyder for Henry Morgenthau, Jr., treasury; James F. Byrnes for Edward J. Stettinius, state (the latter was made chairman of the U. S. delegation in the General Assembly U. N.); Robert P. Patterson for Henry L. Stimson, war. Three assistant secretaries of state resigned: Archibald MacLeish, Gen. J. C. Holmes and Nelson Rockefeller. Harold L. Ickes, Interior resigned Feb. 13, 1946, as a protest against the nomination of Edwin W. Pauley for under-secretary of the Navy and was succeeded by Julius W. Krug. Truman removed Henry A. Wallace, Commerce Sept. 20, 1946, for his anti-administration policy on Russia and appointed W. Averill Harriman.

President Truman, by radio, opened and closed the San Francisco U. N. conference and attended the Potsdam Conference with Stalin and Attlee July 17—Aug. 2, 1945. He sent Harry Hopkins to Moscow and supported James F. Byrnes' patient attempts to reach an understanding with Russia in the Council of Foreign Ministers. After Byrnes resigned he made George C. Marshall secretary of state and backed the Marshall plan and its successor, European Recovery Program, and named Paul A. Hoffman administrator. He made official visits to Mexico City and Ottawa, Ont., Canada, attended the Inter-American Defense Conference in Brazil, Sept., 1917, which endorsed hemispheric mutual defense. He asked a reorganization of the executive departments, which resulted in the commission headed by Herbert Hoover, and supported the unification of military and naval departments. His labor policy was erratic. He vetoed the Case bill for federal mediation and a cooling off period before strikes, and the Taft-Hartley bill but signed the Hobbs bill against labor racketeering. He demanded drastic legislation, including injunctions and use of the Army, when the Railway Brotherhoods were on strike; the legislation was considered too extreme by Senator Taft, Republican leader, and dropped.

Mr. Truman was elected, 1948, after the principal poll-takers and political experts had forecast an easy victory for Thomas E. Dewey. Truman spoke in all parts of the country, promising repeal of the Taft-Hartley law, minimum wage of 75 cents an hour, old age insurance, national health program, housing legislation and price control. He won farmer-labor support although his plurality was cut by Henry A. Wallace, Progressive, sufficiently to make him lose New York's electoral votes, and by J. S. Thurmond, (States' Rights Democrat), in the South. He immediately asked the 81st Congress (Democratic) to put these promises into law and to raise $4,000,000,000 additional by income tax and $2,000,000,000 by a corporation tax. The Democratic Congress, was not agreed on the immediate necessity for this taxation.

MRS. HARRY S. TRUMAN

Mrs. Truman was born Feb. 13, 1885, in Independence, Mo., the eldest of four children and the only daughter of David Willock Wallace. Christened Elizabeth Virginia, she is known to her family and friends as "Bess." She and Mr. Truman attended the same grade and high schools in Independence, both being graduated in 1901. She attended Barstow, a girls' preparatory school in Kansas City, Mo., for a year. She and Mr. Truman were married June 28, 1919, soon after he returned from overseas. They have one daughter, Margaret, born 1924, a concert singer. Mrs. Truman and her daughter are Episcopalians. Her husband is a Baptist.

The National Anthem—The Star-Spangled Banner

The Star-Spangled Banner was designated the National Anthem by Act of Congress, March 3, 1931. It was written by Francis Scott Key, of Georgetown, D. C., during the bombardment of Fort McHenry, Baltimore, Md., Sept. 13-14, 1813. Key was a lawyer, a graduate of St. John's College, Annapolis, and a volunteer in a light artillery company. When a friend, Dr. Beanes, a physician of Upper Marlborough, Md., was taken aboard Admiral Cochrane's British squadron for interfering with ground troops, Key and J. S. Skinner, carrying a note from President Monroe, went to the fleet under a flag of truce on the cartel ship Minden to ask Beanes' release. Admiral Cochrane consented, but as the fleet was about to sail up the Patapsco to bombard Fort McHenry he detained them, first on H. M. S. Surprise, and then under guard on their own ship, the Minden.

Key witnessed the bombardment from his own vessel. It began at 7 a.m., Sept. 13, 1814, and lasted, with intermissions, for 25 hours. The British fired over 1,500 shells, each weighing as much as 220 lbs. They were unable to approach closely because the Americans had sunk 22 vessels in the channel. Only four Americans were killed and 24 wounded. A British bomb-ship was disabled.

During the night Key anxiously observed "the bombs bursting in air" and in the murky dawn saw that the "flag was still there." He wrote a stanza on the back of an envelope to the tune of Anacreon in Heaven. This envelope seems to have disappeared. Key made a clean copy next day in his hotel, and this copy is supposed to be the one in the Walters Art Gallery, Baltimore. A broadside of the song was distributed and on Sept. 21 it was published in the Baltimore American. Later Key made three copies; that written Oct. 21, 1840, is in the Library of Congress; a second is in the Pennsylvania Historical Society, Philadelphia.

THE STAR-SPANGLED BANNER

I

Oh, say can you see by the dawn's early light
What so proudly we hailed at the twilight's last gleaming?
Whose broad stripes and bright stars, thru the perilous fight,
O'er the ramparts we watched were so gallantly streaming?
And the rocket's red glare, the bombs bursting in air,
Gave proof through the night that our flag was still there.
Oh, say does that star-spangled banner yet wave
O'er the land of the free and the home of the brave?

II

On the shore, dimly seen through the mists of the deep,
Where the foe's haughty host in dread silence reposes,
What is that which the breeze, o'er the towering steep,
As it fitfully blows, now conceals, now discloses?
Now it catches the gleam of the morning's first beam,
In full glory reflected now shines on the stream:
'Tis the star-spangled banner! O long may it wave
O'er the land of the free and the home of the brave!

III

And where is that band who so vauntingly swore
That the havoc of war and the battle's confusion,
A home and a country should leave us no more!
Their blood has washed out their foul footsteps' pollution.
No refuge could save the hireling and slave
From the terror of flight, or the gloom of the grave:
And the star-spangled banner in triumph doth wave
O'er the land of the free and the home of the brave!

IV

Oh! thus be it ever, when freemen shall stand
Between their loved homes and the war's desolation!
Blest with victory and peace, may the heav'n rescued land
Praise the Power that hath made and preserved us a nation.
Then conquer we must, for our cause it is just,
And this be our motto: "In God is our trust."
And the star-spangled banner in triumph shall wave
O'er the land of the free and the home of the brave!

The Confederate States of America

South Carolina began the movement which led to the organization of the Southern Confederacy by the adoption at Charleston (Dec. 20, 1860), by a convention of the people of the following ordinance of secession:

"We, the people of the State of South Carolina, in convention assembled, do declare and ordain, and it is hereby declared and ordained, that the ordinance adopted by us in convention on the 23rd day of May, in the year of our Lord 1788, whereby the Constitution of the United States was ratified and also all acts and parts of the General Assembly of this State ratifying amendments of the said Constitution are hereby repealed; and that the Union now subsisting between South Carolina and other States under the name of the United States of America is hereby dissolved."

December 24 the Convention adopted a declaration setting forth the cause of the secession of the State, and the Governor issued a proclamation announcing the action of the State.

Acts of secession were adopted by the Legislatures of the other seceding States, as follows:

Jan.	9, 1861,	Miss.,	by a vote of	84 to 15
Jan.	10, "	Fla.,	" "	62 to 7
Jan.	11, "	Ala.,	" "	61 to 39
Jan.	19, "	Ga.,	" "	208 to 89
Jan.	26, "	La.,	" "	113 to 17
Feb.	1, "	Texas,	" "	166 to 7
April	17, 1861,	Va.,	" "	88 to 55
May	6, "	Ark.,	" "	69 to 1
May	21, "	N. C.,	by a vote of	unanimous
June	8, "	Tenn.,	" "	"

The States of Delaware, Maryland, Kentucky and Missouri, which were afterward represented in the Confederate Congress, did not pass ordinances of secession. In two States a popular vote was taken. The vote of Virginia for secession was 128,884; opposed, 32,134. Of Tennessee, for secession, 104,019; opposed, 47,238.

The congress of delegates from the seceding States met at Montgomery, Ala. (Feb. 4, 1861), and prepared a provisional Constitution of the Confederate States of America. This Constitution was discussed in detail and adopted (Feb. 8). On the next day an election was held for chief executive officers, and Jefferson Davis, of Mississippi, was elected provisional President and Alexander H. Stephens, of Georgia, provisional Vice-President.

The joint convention of the provisional Senate and House of Representatives counted (Feb. 19, 1861), the electoral vote for President and Vice-President. The number of States voting was 11; total electoral votes, 109; all of which were for Jefferson Davis and Alexander H. Stephens.

President Davis was inducted into office at Montgomery, Ala., Feb. 18, 1861. He was elected Oct., 1861, and formally inaugurated at Richmond, Va., Feb. 22, 1862. Military resistance by the Confederacy ceased in April, 1865, and the organization died.

With the comment "the Future arrives," the Information Bulletin of the Library of Congress described an unusual request by a reader in the Newspaper Reference Room of the Library in Washington, D. C. Referring to what seemed an odd-shaped typewriter case, he asked permission to use his portable wire recorder while taking notes from newspapers. Explained that he read the passages he needed into the recording microphone and his wife typed his notes therefrom. The librarian agreed if the recorder operated on direct current. It did not, but another "first" had been encountered.

The Flag of the United States

Source: Department of the Army

The flag has 13 horizontal stripes—7 red and 6 white—the red and white stripes alternating, and a union which consists of white stars of five points on a blue field placed in the upper quarter next the staff and extending to the lower edge of the fourth red stripe from the top. Each star represents a State. The flag now contains 48 stars arranged in six horizontal and eight vertical rows, each star with one point upward. On the admission of a State into the Union a star is added to the flag, the addition taking effect on the 4th day of July next succeeding such admission.

In the Army Regulations four kinds of national flags are described: flags flown at military posts or on ships and used for display generally; small flags or ensigns used on small boats; colors which are carried by unmounted regiments, and standards which are carried by mounted regiments and are, therefore, smaller in size than colors.

PROPER DISPLAY OF FLAG

Congress, by joint resolution (approved by the President June 22, 1942) established the following regulations as to the display and use of the American flag by such civilians or civilian groups or organizations as may not be required to conform with regulations promulgated by one or more executive departments of the Government of the United States.

It is the universal custom to display the flag only from sunrise to sunset on buildings and on stationary flagstaffs in the open. However, the flag may be displayed at night upon special occasions when it is desired to produce a patriotic effect. It should be hoisted briskly and lowered ceremoniously. It should not be displayed on days when the weather is inclement.

The flag should be displayed on all days when the weather permits, especially on New Year's Day, Inauguration Day, Lincoln's Birthday, Washington's Birthday, Army Day, Easter Sunday, Mother's Day, Memorial Day (half staff until noon), Flag Day, Independence Day, Labor Day, Constitution Day, Columbus Day, Navy Day, Armistice Day, Thanksgiving Day, Christmas Day, and such other days as may be proclaimed by the President of the United States; the birthdays of States (dates of admission); and on State holidays.

It should be displayed daily, weather permitting, on or near the main administration building of every public institution. It should be displayed in or near every polling place on election days. It should be displayed during school days in or near every schoolhouse.

Over only three buildings in the United States does the national flag fly officially night and day continuously—over the east and west fronts of the National Capitol, and over the adjacent House of Representatives and Senate Office Buildings.

Over the Senate and House of Representatives wings of the Capitol the flags fly only while those bodies are in session and during a recess. At adjournment either at the end of a day's work or for a session, they are lowered.

When the Stars and Stripes float from the flagstaff of The White House, from sunrise to sunset, it is indicative of the presence in Washington of the President.

When carried in a procession with another flag or flags, it should be either on the marching right; that is, the flag's own right, or, if there is a line of other flags, in front of the center of that line.

It should not be displayed on a float in a parade except from a staff, or as otherwise provided. It should not be draped over the hood, top, sides, or back of a vehicle or of a railroad train or a boat. When the flag is displayed on a motorcar, the staff shall be fixed firmly to the chassis or clamped to the radiator cap.

No other flag or pennant should be placed above or, if on the same level, to the right of the American flag, except during church services conducted by naval chaplains at sea, when the church pennant may be flown above the flag during church services for the personnel of the Navy. When displayed with another flag against a wall from crossed staffs, it should be on the right, the flag's own right, and its staff should be in front of the staff of the other flag; at the center and at the highest point of the group when a number of flags of States or localities or pennants of societies are grouped, and displayed from staffs.

When flags of States, cities, or localities, or pennants of societies are flown on the same halyard with the flag of the United States, the latter should always be at the peak. When the flags are flown from adjacent staffs, the flag of the United States should be hoisted first and lowered last. No such flag or pennant may be placed above the flag of the United States or to its right. When flags of two or more nations are displayed, they are to be flown from separate staffs of the same height. The flags should be of approximately equal size. International usage forbids the display of the flag of one nation above that of another nation in time of peace.

When the flag is displayed from a staff projecting horizontally or at an angle from the window sill, balcony, or front of a building, the union of the flag should be placed at the peak of the staff, unless the flag is at half staff. When the flag is suspended over a sidewalk from a rope extending from a house to a pole at the edge of the sidewalk, the flag should be hoisted out, union first, from the building. When the flag is displayed otherwise than by being flown from a staff, it should be displayed flat, whether indoors or out, or so suspended that its folds fall as free as though the flag were staffed. When the flag is displayed over the middle of the street, it should be suspended vertically with the union to the north in an east and west street or to the east in a north and south street.

When used on a speaker's platform, the flag, displayed flat, should be displayed above and behind the speaker. When displayed from a staff in a church or public auditorium, if it is displayed in the chancel of a church, or on the speaker's platform in a public auditorium, the flag should occupy the position of honor and be placed at the clergyman's or speaker's right as he faces the congregation or audience. Any other flag so displayed in the chancel or on the platform should be placed at the clergyman's or speaker's left as he faces the congregation or audience. But when the flag is displayed from a staff in a church or public auditorium elsewhere than in the chancel or on the platform it shall be placed in the position of honor at the right of the congregation or audience as they face the chancel or platform. Any other flag so displayed should be placed on the left of the congregation or audience as they face the chancel or platform.

The flag should form a distinctive feature of the ceremony of unveiling a statue or monument, but it should never be used as the covering for the statue or monument. When flown at half staff, should be first hoisted to the peak for an instant and then lowered to the half-staff position. The flag should be again raised to the peak before it is lowered for the day. By "half staff" is meant lowering the flag to one-half the distance between the top and bottom of the staff. Crepe streamers may be affixed to spear heads or flagstaffs in parade only by order of the President.

When used to cover a casket, the flag should be so placed that the union is at the head and over the left shoulder. The flag should not be lowered into the grave or allowed to touch the ground.

That no disrespect should be shown to the flag it should not be dipped to any person or thing. Regimental colors, State flags, and organization or institutional flags are to be dipped as a mark of honor. It should never be displayed with the union down save as a signal of dire distress. It should never touch anything beneath it, such as the ground, the floor, water, or merchandise. It should never be carried flat or horizontally, but always aloft and free.

Never use as a drapery of any sort whatsoever, never festooned, drawn back, nor up, in folds, but always allow it to fall free. Bunting of blue, white and red, always arranged with the blue above, the white in the middle and the red below, should be used for covering a speaker's desk, draping the front of a platform, and for decoration in general. The flag should never be fastened, displayed, used, or stored in such a manner as will permit it to be easily torn, soiled, or damaged in any way. It should never be used as a covering for a ceiling. It should never have placed upon it, nor on any part of it, nor attached to it any mark, insignia, letter, word, figure, design, picture, or drawing of any nature. It should never be used as a receptacle for receiving, holding, carrying, or delivering anything.

The flag should never be used for advertising purposes in any manner whatsoever, nor should it be embroidered on such articles as cushions or handkerchiefs and the like, printed or otherwise impressed on paper napkins or boxes or anything that is designed for temporary use and discard, or used as any portion of a costume or athletic uniform. Advertising signs should not be fastened to a staff or halyard from which the flag is flown.

During the ceremony of hoisting or lowering the flag or when the flag is passing in a parade or in review, all persons present should face the flag, stand at attention, and salute. Those present in uniform should render the military salute. Those not in uniform, men should remove the headdress with the right hand holding it at the left shoulder, the hand being over the heart. Men without hats

should salute in the same manner. Aliens should stand at attention. Women should salute by placing the right hand over the heart. The salute to the flag in the moving column should be rendered at the moment the flag passes.

Rules or customs for flag display may be altered, modified, or repealed, or additional rules prescribed by the Commander in Chief of the Armed Forces, whenever he deems it to be appropriate or desirable. Any such alteration or additional rule shall be set forth in a proclamation.

The flag, when it is in such condition that it is no longer a fitting emblem for display, should be destroyed in a dignified way, preferably by burning.

When the national anthem is played and the flag is not displayed, all present should stand and face toward the music. Those in uniform should salute at the first note of the anthem, retaining this position until the last note. All others should stand at attention, men removing the headdress. When the flag is displayed, all present should face the flag and salute.

Origin of the Flag

In 1775 the Philadelphia Troop of Light Horse carried a standard with thirteen alternate blue and silver stripes in the upper left-hand corner. At Cambridge on January 2, 1776, Washington without authorization of the Continental Congress, raised a flag consisting of thirteen alternate white and red stripes with the crosses of St. George and St. Andrew in a blue field in the upper left-hand corner.

The tradition that Betsy Ross, as early as June, 1776, made a Stars and Stripes flag from a pencil sketch supplied by Washington but changed the points of the stars from six to five, has become a classic. Historians doubt its accuracy. Francis Hopkinson, a signer of the Declaration of Independence, was probably the designer of the Stars and Stripes. He also designed a number of coins and several items of paper currency in the early days of the Republic. Hopkinson, born in Philadelphia (Sept. 21, 1737) and a graduate of the University of Pennsylvania, was the first native American composer of a secular song "My Days Have Been So Wondrous Free." He was a lawyer and later a judge in New Jersey, and Pennsylvania. He played the organ and the harpsichord. He died in Philadelphia on May 9, 1791. His portrait, painted by himself, hangs in the rooms of the Pennsylvania Historical Society, Philadelphia.

The flag with thirteen stripes and thirteen stars, authorized on June 14, 1777, continued to be used as a national emblem until Congress passed the following act, which President Washington signed.

"That from and after May 1, 1795, the flag of the United States be fifteen stripes, alternate red and white; and that the union be fifteen stars, white in a blue field."

This action was necessitated by the admission of the states of Vermont and Kentucky to the Union.

"The flag of 1795 had the stars arranged in three rows of five each instead of in a circle, and served for 23 years.

With the admission of more new states, however, it became apparent that the 1795 flag would have to be further modified; hence in 1818 a law was passed by Congress providing:

"That from and after the fourth day of July next, the flag of the United States be thirteen horizontal stripes, alternate red and white; that the union have twenty stars, white in a blue field.

"That on the admission of every new state into the union, one star be added to the union of the flag; and that such addition shall take effect on the fourth of July next succeeding such admission."

Since 1818 additional stars have been added until today there are 48 on the flag. No law has been passed to designate how the stars shall be arranged. At one time they formed a design of a larger star. Now by common practice they form six rows of eight stars each.

The following description of the significance of the different parts of our national flag was written by a member of the committee appointed by the Continental Congress to design a flag for the young Republic:—

The stars of the new flag represent the new constellation of States rising in the West. The idea was taken from the constellation of Lyra, which in the land of Orpheus signifies harmony. The blue in the field was taken from the edges of the Covenanter's banner, in Scotland, significant of the league-covenant of the United Colonies against oppression, incidentally involving the virtues of vigilance, perseverance and justice. The stars were disposed in a circle symbolizing the perpetuity of the Union; the ring, like the serpent of the Egyptians, signifying eternity. The thirteen stripes showed with the stars, the number of the United Colonies, and denoted the subordination of the States to the Union, as well as equality among themselves. The whole was the blending of the various flags of the army and the white ones of the floating batteries. The red color, which in Roman days was the signal of defiance, denoted daring; and the white purity.

The Pledge to the Flag

"I pledge allegiance to the Flag of the United States of America and to the Republic for which it stands; one nation indivisible, with liberty and justice for all." (*)

According to a report of the Historical Committee of the United States Flag Association (May 18, 1939) the Pledge was written by Francis Bellamy (August 1892), a member of the editorial staff of The Youth Companion, in Boston, Mass., at the suggestion of James B. Upham, one of the junior partners. It was first repeated at exercises in connection with the celebration of Columbus Day (October 12, 1892, Old Style). The idea of this national celebration on Columbus Day was largely that of Mr. Upham.

(*) The original Pledge read: "I pledge allegiance to my Flag and the Republic for which it stands; one Nation indivisible, with Liberty and Justice for all." This was later changed to "the Flag of the United States", with the subsequent addition of "of America."

PRESIDENT'S FLAG

The President's flag consists of the President's seal in bronze, upon a blue background, with a large white star in each corner. The design of this seal may be seen in the floor of the entrance corridor of the White House.

By Executive Order, dated "The White House, October 25, 1945," two major changes were made in the President's Flag. The four stars, one in each corner of the flag, have been supplanted by 48 stars which encircle the heraldry. The latter was changed so that the eagle now faces toward the olive branch of peace rather than toward the arrows of war.

When the President visits a vessel of the United States, the President's flag is broken at the main the moment he reaches the deck and is kept flying as long as he is on board.

When the President is embarked on a boat he usually directs that his flag be displayed from the staff in the bow of his barge. When he passes in a boat flying his flag, vessels of the navy parade the full guards, four ruffles are given on the drum, four flourishes are sounded on the bugle, the National Anthem is played by the band, and officers and men salute.

America's Conservation Pledge

A 30-word creed defining conservation, suitable for schools and assemblies and adopted by many, grew out of a competition sponsored by Outdoor Life Magazine. The winning pledge, out of 15,000 entries, was written by L. L. Foreman, Santa Fe, N. M., and reads:

"I give my pledge as an American to save and faithfully to defend from waste the natural resources of my country—its soil and minerals, its forests, waters and wildlife."

The American's Creed

Written by William Tyler Page, Clerk of the U. S. House of Representatives, in 1917, and adopted and promulgated by the Government's Committee on Publication. Accepted by the House of Representatives, on behalf of the American People, April 3, 1918.

I believe in the United States of America as a Government of the people, by the people, for the people; whose just powers are derived from the consent of the governed; a democracy in a republic; a sovereign Nation of many sovereign States; a perfect union, one and inseparable; established upon those principles of freedom, equality, justice and humanity for which American patriots sacrificed their lives and fortunes.

I therefore believe it is my duty to my country to love it; to support its Constitution; to obey its laws; to respect its flag, and to defend it against all enemies.

North Atlantic Treaty (Pact)

Evolution of Collective Defense Plan—The Foreign Ministers of the five members of the Western European Union—Great Britain, France, Belgium, the Netherlands and Luxemburg—at a meeting in Paris, Oct. 26, 1948, invited the United States and Canada to join them in establishing a North Atlantic security alliance. They submitted a draft of the proposed treaty in Washington, Dec. 10.

The State Department announced, Jan. 14, 1949, that the U. S. would join the proposed alliance to promote "future peace and security." President Truman, in his inaugural speech Jan. 20, formally proclaimed U. S. participation.

The text of the North Atlantic Treaty was published simultaneously in the U. S., Canada and the five European countries March 18. It was signed in Washington, April 4 by the seven nations which originally proposed it and by five additional European nations. It was ratified by the Senate, 82 to 13, on July 21. Four days later President Truman asked Congress to implement it by helping the European signatories to rearm. The treaty went into effect Aug. 24 when all 12 participating nations had deposited their ratification documents in Washington.

The signatories—United States, Canada, Great Britain, France, Belgium, the Netherlands, Luxemburg, Norway, Denmark, Iceland, Italy and Portugal.

The treaty—In the preamble, the signatories reaffirm their faith in the purposes and principles of the United Nations, and pledge themselves to unite their efforts for collective defense and the preservation of peace and security. A summary of the treaty follows:

Article 1—The signatories undertake to settle any international dispute in which they may be involved by peaceful means and to refrain from the threat or the use of force in any manner inconsistent with the purposes of the U. N.

Article 2—The signatories will contribute toward the further development of peaceful and friendly international relations by strengthening their free institutions and promoting conditions of stability and well-being. They will seek to eliminate conflict in their international economic policies, and encourage economic collaboration between any or all of them.

Article 3—To achieve the objectives of this treaty more effectively, the signatories, separat and jointly, will maintain and develop their dividual and collective capacity to resist arm attack by means of continuous self-help and m tual aid.

Article 4—They will consult together whenev in the opinion of any of them, the territorial tegrity, political independence or security of a of them is threatened.

Article 5—They agree that an armed atta against one or more of them in Europe or No America shall be considered an attack agai all of them and that in the exercise of the rig of individual or collective self-defense, recogni by Article 51 of the U. N. Charter, they will ta such action as deemed necessary, including t use of armed force, to restore and maintain t security of the North Atlantic area. The atta and counter-measures shall immediately be ported to the U. N. Security Council and acti shall be terminated when the Council has tak measures to restore international peace.

Article 6—The provisions of Article 5 shall ap also to the territories of any of the signatories Europe and North America, the Algerian depa ments of France, the occupation forces of any the signatories in Europe, and to their islan warships and aircraft in the North Atlantic ar

Article 7—The treaty does not affect, and sh not be interpreted as affecting, the rights and ob gations of U. N. member nations under the Chart or the primary responsibility of the Secur Council for the maintenance of international pe and security.

Article 8—The signatories declare that none their engagements with any of the co-signatories any third state is in conflict with the provisions the treaty, and undertake not to enter into a such engagements.

Article 9—They agree to establish a council, which all are represented, to consider the nec sary steps toward implementing the treaty, p marily establishment of a defense committee recommend measures implementing Articles 3 a 5.

Article 10—Other European nations in a po tion to contribute to collective security in the No Atlantic area may be invited to join by unanim agreement of the signatories.

Bogota Hemispheric Pact of 1948

Delegates from the 21 American republics gathered in Bogota, Colombia, March 30, 1948, for the ninth Inter-American Conference. They adjourned May 2 after adopting and signing a charter setting up the Organization of the American States which superseded the Pan-American Union (founded March 29, 1890) and the Western Hemisphere Defense Treaty of 1947. The Pan-American Union was retained as the new organization's permanent central organ and general secretariat.

The charter, consisting of 112 articles, reaffirmed the solidarity of the American states and the principle of peaceful settlement of disputes between two or more American nations. It also condemned aggressive war, and pledged the member nations to mutual defense if one should be the subject of aggression by an extra-continental power. A specific clause stated that none of the provisions in the charter should impair the rights and obligations of member nations under the United Nations Charter.

In addition to the Pan-American Union, the functions of the organization were divided i five other categories: The Inter-American C ference; meetings of consultation among Ministers of Foreign Affairs; the Council, co posed of one representative of each of the republics with the rank of ambassador; spec lized conferences, and specialized organizatic The Council has power to draft regulations also the programs of future Inter-American C ferences. It has jurisdiction over three subsidi organs: The Inter-American Economic and So Council; the Inter-American Council of Juri and the Inter-American Culture Council. Wa ington was designated as the seat of the Cour

The Bogota Conference also approved a tre of hemispheric economic cooperation, and adop a resolution, sponsored by the United States, c ing for united resistance to the threat of in national Communism to democracy.

The Conference held 10 plenary sessions 350 committee meetings, but was interrupted five days after a rebellion (April 9) which Colombian Government called an attempt Communist elements to sabotage the meeting.

The Four Freedoms

President Roosevelt, in an address to Congress (Jan. 6, 1941) said:

"In the future days, which we seek to make secure, we look forward for a world founded upon four essential human freedoms.

"The first is freedom of speech and expression—everywhere in the world.

"The second is freedom of every person to worship God in his own way—everywhere in the world.

"The third is freedom from want—wh translated into world terms, means economic derstandings which will secure to every natio healthy, peaceful life for its inhabitants—ev where in the world.

"The fourth is freedom from fear—wh translated into world terms, means a worldv reduction of armaments to such a point and such a thorough fashion that no nation will b a position to commit an act of aggression aga any neighbor—anywhere in the world."

Lincoln's Gettysburg Address

President Abraham Lincoln delivered his address at Gettysburg, often called the peak of American eloquence, at the dedication of the military cemetery there Nov. 19, 1863. The battle had been fought July 1-3, 1863. He was preceded by Edward Everett, former president of Harvard, secretary of state and senator from Massachusetts, then 69 and one of the nation's great orators. Everett gave a full resume of the battle. Lincoln's speech was so short that the photographer did not get his camera adjusted in time. The report that newspapers ignored Lincoln's address is not entirely accurate; Everett's address swamped their columns, but the greatness of Lincoln's speech was immediately recognized. Everett wrote him: "I should be glad if I could flatter myself that I came as near the central idea of the occasion in two hours as you did in two minutes."

Five copies of the Gettysburg address in Lincoln's hand are extant. The first and second draft, prepared in Washington and Gettysburg just before delivery, are in the Library of Congress; the second draft was exhibited on the Freedom Train. The third draft, written at the request of Everett to be sold at a fair in New York for the benefit of soldiers, was given the Illinois State Historical Library by popular subscription. The fourth copy is owned by Mrs. Nicholas H. Noyes, Indianapolis, Ind., and is expected to go to Dartmouth College. The fifth copy, the clearest and best, was written by Lincoln for George Bancroft to be reproduced in a volume to be sold for the benefit of soldiers and sailors in Baltimore. It passed to Bancroft's stepchildren, named Bliss, and was sold for $54,000 by the estate of Dr. William J. A. Bliss in New York April 27, 1949, to Oscar B. Cintas, former Cuban ambassador to the United States. The official version follows:

Fourscore and seven years ago our fathers brought forth on this continent a new nation, conceived in liberty and dedicated to the proposition that all men are created equal.

Now we are engaged in a great civil war, testing whether that nation or any nation so conceived and so dedicated can long endure. We are met on a great battlefield of that war. We have come to dedicate a portion of that field, as a final resting-place of those who here gave their lives that that nation might live. It is altogether fitting and proper that we should do this.

But, in a larger sense, we cannot dedicate—we cannot consecrate—we cannot hallow—this ground. The brave men, living and dead, who struggled here, have consecrated it, far above our poor power to add or detract. The world will little note, nor long remember, what we say here, but it can never forget what they did here. It is for us the living, rather, to be dedicated here to the unfinished work which they who fought here have thus far so nobly advanced. It is rather for us to be here dedicated to the great task remaining before us—that from these honored dead we take increased devotion to that cause for which they gave the last full measure of devotion—that we here highly resolve that these dead shall not have died in vain—that this nation, under God, shall have a new birth of freedom—and that government of the people, by the people, for the people, shall not perish from the earth.

The Monroe Doctrine

President James Monroe in 1820 announced that the citizens of the United States wished success to the revolting Spanish colonies in South America, but that this government would maintain strict neutrality. In 1821 the Russian Emperor issued a ukase prohibiting citizens of other nations from navigating and fishing within 100 Italian miles of the northwest coast of North America south of Behring Straits to latitude 51°. In 1823 the Monroe administration denounced and defied the ukase and declared "the American continents are no longer subjects for any new colonial establishments."

Meantime the Holy Alliance of Austria, Russia and Prussia joined by France undertook "to put an end to the system of representative government" and it was proposed to overthrow new governments erected out of the old colonies of Spain in the Western Hemisphere.

This was the situation (August 1823) when George Canning, British foreign secretary, wrote to Richard Rush, American minister in London, suggesting a joint declaration, in substance, that the recovery of the colonies by Spain was hopeless; that neither Great Britain nor the United States was aiming at the possession of any portion of these colonies, and that they could not see with indifference any portion of them transferred to any other power.

It was after deliberation by the President and his Cabinet, which contained John Quincy Adams, Secretary of State, John C. Calhoun and William Wirt (and also after consultation with Thomas Jefferson, who approved), that the American position was formally stated in Monroe's message (Dec. 2, 1823) asserting, "as a principle in which the rights and interests of the United States are involved, that the American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers.

"It is only when our rights are invaded or seriously menaced that we resent injuries or make preparation for our defense. With the movements in this hemisphere we are of necessity more immediately connected and by causes which must be obvious to all enlightened and impartial observers. The political system of the allied powers is essentially different in this respect from that of America. This difference proceeds from that which exists in their respective governments. And to the defense of our own, which has been achieved by the loss of so much blood and treasure, and matured by the wisdom of their most enlightened citizens, and under which we have enjoyed unexampled felicity, this whole nation is devoted.

"We owe it, therefore, to candor and to the amicable relations existing between the United States and those powers to declare that we should consider any attempt on their part to extend their system to any portion of this hemisphere as dangerous to our peace and safety. With the existing colonies or dependencies of any European power we have not interfered and shall not interfere.

"But with the governments who have declared their independence and maintained it, and whose independence we have, on great consideration and on just principles, acknowledged, we could not view any interposition for the purpose of oppressing them, or controlling in any other manner their destiny, by any European power in any other light than as the manifestation of an unfriendly disposition toward the United States.

"Our policy in regard to Europe . . . remains the same, which is, not to interfere in the internal concerns of any of its powers; to consider the government de facto as the legitimate government for us; to cultivate friendly relations with it, and to preserve those relations by a frank, firm and manly policy, meeting in all instances the just claims of every power, submitting to injuries from none. But in regard to these continents, circumstances are eminently and conspicuously different. It is impossible that the allied powers should extend their political system to any portion of either continent without endangering our peace and happiness; nor can anyone believe that our southern brethren, if left to themselves, would adopt it of their own accord. It is equally impossible, therefore, that we should behold such interposition, in any form, with indifference. If we look to the comparative strength and resources of Spain and these new governments and their distance from each other, it must be obvious that she can never subdue them. It is still the true policy of the United States to leave the parties to themselves, in the hope that other powers will pursue the same course."

Independence Hall and the Liberty Bell

The Independence Hall group of buildings in Philadelphia comprises the main or central building—the State House now known as Independence Hall—two arcades connecting it with two two-story buildings called the East and West Wings, and two separate corner buildings, one Congress Hall, the other Old City Hall, one on the corner of Sixth street and the other at the corner of Fifth street, facing on Chestnut street. All the buildings are in Independence Square.

Work on the main building was begun in 1732, followed by construction of the two wing buildings and arcades, designed for offices. The main structure was completed in 1759.

In the meantime the Pennsylvania Assembly secured possession of its room while the rest was in an unfinished state in 1736 and relinquished it in 1775 to Continental Congress. The tower and spire were completed sufficiently to receive the bell in 1753.

Besides other historic events associated with the State House, it was the seat of the Continental Congress at the time the Declaration of Independence was adopted, in 1776, and, following the Revolution, the Convention which formulated the Constitution in 1787.

Adjoining the wing or office buildings and the arcades connecting them with the main building the Court Houses which complete the group were erected by the municipality.

The building at the western end known as Congress Hall, erected in 1787, was the seat of the United States Congress from 1790 to 1800.

The Court House, known as the City Hall at the eastern end which completes the symmetrical group, was built in 1790 for the municipal courts, and was the first seat of the Supreme Court of the United States.

All the buildings in the group were made a national shrine (1943) by an agreement signed by the city of Philadelphia and the Federal Government. The area around Independence Hall was created a national park (1948).

There are many historic oil portraits in the National Portrait Gallery in Independence Hall, including Washington and other early American public men.

Independence Hall was formally thrown open as a National Museum July 4, 1876. The collection consists of furniture, manuscripts, musical instruments, water colors, missals, maps, coins, currency, weapons, metals, prints, wearing apparel, utensils and books.

Casting of the Bell

A new Province bell was ordered from and cast by Thomas Lister of Whitechapel, London, to celebrate the 50th year of the Commonwealth of Pennsylvania. The bell arrived in Philadelphia, Aug., 1752, and cracked during its testing. It was recast twice by Pass and Stow, two Philadelphia workmen, who placed it in position in the State House in June, 1753; the State House was completed six years later. The bell bears the inscription from Leviticus, XXV, 10: "Proclaim Liberty throughout all the land unto all the inhabitants thereof."

The recast Province bell, later to be known as the Liberty Bell, was hung on trusses in the State House yard (now called Independence Square) to try out its sound before raising it to the tower. Early in September "it was cracked by a stroke of the clapper during a test without any other violence."

In the recasting the English model was broken up and the same metal was used with the addition of an ounce and one-half of American copper to a pound of the old bell metal to reduce the brittleness of the bell. The same form and lettering were preserved with the substitution of the names of the founders, the place and the years of recasting.

The third casting of the bell with the original metal proved satisfactory and it is the relic the visitor views today. The bell was hung the time permanently, in a steeple of the State House (Independence Hall) where it remained until the steeple was taken down, July 16, 1781, and the bell was lowered into the brick tower, where it remained until 1846. At this date it was placed on public exhibition as a relic in the Declaration Chamber in Independence Hall. It remained there until 1876 when it was placed on its old walnut frame in the tower hallway, remaining there until 1877 when it was hung from the ceiling of the story of the tower by a chain of 13 links. It was returned again to the Declaration Chamber and was placed in a glass case the following year and in 1896 was taken back to the tower hall. In 1915 the case was removed so that the public might have the opportunity to touch it, a reverent privilege constantly sought by many.

The measurements of the bell follow:
Circumference around the lip, 12 feet.
Circumference around the crown, 7 ft. 6 in.
Lip to the crown, 3 feet.
Height over the crown, 2 ft. 3 in.
Thickness at lip, 3 inches.
Thickness at crown, 1¼ inches.
Weight, 2080 pounds.
Length of clapper, 3 ft. 2 in.
Cost, £60 14s. 5d.

The bell—always brittle—cracked in 1835 when it tolled at the funeral procession of Chief Justice John Marshall of the United States Supreme Court.

Travels and Exhibitions

The bell has been removed from Independence Hall on the following occasions:

Sept. 18, 1777—When the British Army was about to occupy the City of Philadelphia. The bell was removed from the State House for its preservation. It was conveyed with the heavy baggage of the American Army in a supply train of 700 wagons guarded by 200 North Carolina and Virginia cavalry mounted troops, to Allentown, Pa., where it was hidden in Zion's Church until June 27, 1778, when it was returned to Philadelphia and rehung in the tower of Independence Hall.

Jan. 23, 1885—Philadelphia to New Orleans, La., World's Industrial and Cotton Exposition.

July 25, 1893—Philadelphia to Chicago, Ill., World's Columbian Exposition.

Oct. 24, 1895—Philadelphia to Atlanta, Ga., Cotton States and Atlanta Exposition.

Jan. 6, 1902—Philadelphia to Charleston, S. C., Interstate and West Indian Exposition.

June 15, 1903—Philadelphia to Boston, Mass., Bunker Hill celebration.

1904—Philadelphia to St. Louis, Mo., Louisiana Purchase Exposition.

Oct. 23, 1913—Philadelphia Historical Street Parade, Founder's Week celebration.

July 4, 1915—Philadelphia to San Francisco, Calif.; Panama-Pacific Exposition.

Oct. 10, 1917—Philadelphia Street Parade, First Liberty Loan Day.

Broadcasts

D-Day—June 6, 1944—The bell was tapped with a rubber mallet on two broadcasts by Mayor Bernard Samuel. The first broadcast was at 7 to 7:15 a.m. The program started at another point but the mayor spoke from Independence Hall at about 7.12 a.m. As the program ended the mayor tapped the bell, once for each letter in the word Independence.

The second broadcast was carried at 7:15 till 7:30 a.m. During this broadcast the bell was again tapped by Mayor Samuel seven times, once for each letter in the word Liberty.

☞ President Truman, pressing his drive to lop off useless timber in the Executive Branch of the Government, signed an order July 13, 1949, abolishing the IDBISIOPODD. The IDBISIOPOD hadn't been heard from for a long time. It was the "Inter-Departmental Board on International Service of Ice Observation, Patrol and Ocean Derelict Destruction." It was established by Presidential order in 1916, thirty-three years ago.

DECLARATION OF INDEPENDENCE

The Declaration of Independence was adopted by the Continental Congress, in Philadelphia, on July 4, 1776, and was signed by John Hancock as President and by Charles Thomson as Secretary. It was published first on July 6 in the Pennsylvania Evening Post. A copy of the Declaration, engrossed on parchment, was signed by members of Congress on and after Aug. 2, 1776.

When, in the Course of human events, it becomes necessary for one people to dissolve the political bands which have connected them with another, and to assume among the powers of the earth, the separate and equal station to which the Laws of Nature and of Nature's God entitle them, a decent respect to the opinions of mankind requires that they should declare the causes which impel them to the separation.

We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just powers from the consent of the governed. That whenever any Form of Government becomes destructive of these ends, it is the Right of the People to alter or to abolish it, and to institute new Government, laying its foundation on such principles and organizing its powers in such form, as to them shall seem most likely to effect their Safety and Happiness. Prudence, indeed, will dictate that Governments long established should not be changed for light and transient causes; and accordingly all experience hath shewn, that mankind are more disposed to suffer, while evils are sufferable, than to right themselves by abolishing the forms to which they are accustomed. But when a long train of abuses and usurpations, pursuing invariably the same object, evidence a design to reduce them under absolute Despotism, it is their right, it is their duty, to throw off such Government, and to provide new Guards for their future security. Such has been the patient sufferance of these Colonies; and such is now the necessity which constrains them to alter their former Systems of Government. The history of the present King of Great Britain is a history of repeated injuries and usurpations, all having in direct object the establishment of an absolute Tyranny over these States. To prove this, let Facts be submitted to a candid world.

He has refused his Assent to Laws, the most wholesome and necessary for the public good.

He has forbidden his Governors to pass Laws of immediate and pressing importance, unless suspended in their operation till his Assent should be obtained, and when so suspended, he has utterly neglected to attend to them.

He has refused to pass other Laws for the accommodation of large districts of people, unless those people would relinquish the right of Representation in the Legislature, a right inestimable to them and formidable to tyrants only.

He has called together legislative bodies at places, unusual, uncomfortable, and distant from the depository of their public Records, for the sole purpose of fatiguing them into compliance with his measures.

He has dissolved Representative Houses repeatedly, for opposing with manly firmness his invasions on the rights of the people.

He has refused for a long time, after such dissolutions, to cause others to be elected; whereby the Legislative powers, incapable of Annihilation, have returned to the People at large for their exercise; the State remaining in the meantime exposed to all the dangers of invasion from without, and convulsions within.

He has endeavored to prevent the population of these States; for that purpose obstructing the Laws for Naturalization of Foreigners; refusing to pass others to encourage their migrations hither, and raising the conditions of new Appropriations of Lands.

He has obstructed the Administration of Justice, by refusing his Assent to Laws for establishing Judiciary powers.

He has made Judges dependent on his Will alone, for the tenure of their offices, and the amount and payment of their salaries.

He has erected a multitude of New Offices, and sent hither swarms of Officers to harass our people, and eat out their substance.

He has kept among us, in times of peace, Standing Armies, without the Consent of our legislatures.

He has affected to render the Military independent of and superior to the Civil power.

He has combined with others to subject us to a jurisdiction foreign to our constitution and unacknowledged by our laws; giving his Assent to their Acts of pretended Legislation: For quartering large bodies of armed troops among us: For protecting them by a mock Trial from punishment for any Murders which they should commit on the Inhabitants of these States: For cutting off our Trade with all parts of the world: For imposing Taxes on us without our Consent: For depriving us in many cases of the benefits of Trial by Jury: For transporting us beyond Seas to be tried for pretended offenses: For abolishing the free System of English Laws in a neighbouring Province, establishing therein an Arbitrary government, and enlarging its Boundaries so as to render it at once an example and fit instrument for introducing the same absolute rule into these Colonies: For taking away our Charters, abolishing our most valuable Laws and altering fundamentally the Forms of our Governments: For suspending our own Legislatures and declaring themselves invested with power to legislate for us in all cases whatsoever.

He has abdicated Government here by declaring us out of his Protection and waging War against us.

He has plundered our seas, ravished our Coasts, burnt our towns, and destroyed the lives of our people.

He is at this time transporting large Armies of foreign Mercenaries to complete the works of death, desolation and tyranny, already begun with circumstances of cruelty and perfidy scarcely paralleled in the most barbarous ages, and totally unworthy the Head of a civilized nation.

He has constrained our fellow Citizens taken Captive on the high Seas to bear Arms against their Country, to become the executioners of their friends and Brethren, or to fall themselves by their Hands.

He has excited domestic insurrections amongst us, and has endeavoured to bring on the inhabitants of our frontiers, the merciless Indian Savages, whose known rule of warfare is an undistinguished destruction of all ages, sexes and conditions. In every stage of these Oppressions We have Petitioned for Redress in the most humble terms. Our repeated Petitions have been answered only by repeated injury. A Prince, whose character is thus marked by every act which may define a Tyrant, is unfit to be the ruler of a free people. Nor have We been wanting in attention to our British brethren. We have warned them from time to time of attempts by their legislature to extend an unwarrantable jurisdiction over us. We have reminded them of the circumstances of our emigration and settlement here. We have appealed to their native justice and magnanimity, and we have conjured them by the ties of our common kindred to disavow these usurpations, which would inevitably interrupt our connections and correspondence. They too have been deaf to the voice of justice and of consanguinity. We must, therefore, acquiesce in the necessity, which denounces our Separation, and hold them, as we hold the rest of mankind, Enemies in War, in Peace Friends.

WE, THEREFORE, the Representatives of the United States of America, in General Congress, Assembled, appealing to the Supreme Judge of the world for the rectitude of our intentions do, in the Name, and by authority of the good People of these Colonies, solemnly publish and declare, That these United Colonies are, and of Right ought to be, Free and Independent States: that they are Absolved from all Allegiance to the British Crown, and that all political connection between them and the State of Great Britain is and ought to be totally dissolved: and that as Free and Independent States, they have full Power to levy War, conclude Peace, contract Alliances, establish Commerce, and to do all other Acts and Things which Independent States may of right do. And for the support of this Declaration, with a firm reliance on the protection of Divine Providence, we mutually pledge to each other our Lives, our Fortunes, and our sacred Honor.

The Journal of Congress for Jan. 18, 1777, contains the following entry:

"Ordered, That an authenticated copy of the Declaration of Independence with the names of the members of Congress subscribing the same, be sent to each of the United States, and that they be desired to have the same put upon record."

Accordingly, authenticated copies of the Declaration with the names of the subscribing members and the order of Congress signed by John Hancock as President and attested by Charles Thomson, as Secretary, were printed in broadside form by Mary Katharine Goddard in Baltimore, where Congress was then in sessions.

Wythe, George (Va.)	Lawyer	Elizabeth City, Va. (Back River)	1726	1806, June 8

The Declaration, drawn by Jefferson, and slightly amended by Adams and Franklin, had been presented to the Congress June 28, 1776. Prior to that (June 7) Richard Henry Lee had introduced in the Congress a resolution declaring "that these United Colonies are, and of right ought to be, free and independent states, that they are absolved from all allegiance to the British Crown, and that all political connection between them and the state of Great Britain is, and ought to be, totally dissolved."

The resolution, seconded by John Adams on behalf of the Massachusetts delegation, came up again (June 10) when a committee of five, headed by Thomas Jefferson, was appointed with instructions to embody the spirit and purpose of the resolution in a declaration of independence. The others on the committee were John Adams, Benjamin Franklin, Robert R. Livingston, and Roger Sherman.

The Declaration was adopted substantially as prepared by Jefferson, the two most significant and important changes being the elimination of Jefferson's arraignment of the British people and of King George, for encouraging and fostering the slave trade which Jefferson called "An Execrable Commerce."

Congress adopted on July 19, 1776, the following resolution:

"Resolved, That the Declaration passed on the 4th, be fairly engrossed on parchment with the title and stile of 'The unanimous Declaration of the thirteen united States of America' and that the same, when engrossed, be signed by every member of Congress."

McKean voted for the resolution of independence but was with Washington's Army when it was engrossed and was not a member of Congress from Dec. 1776, to Jan. 30, 1778. He signed, he said later, in 1781. Wythe signed about Aug. 27; R. H. Lee, Elbridge Gerry, and Oliver Wolcott, in Sept. Thornton first attended Congress on Nov. 4.

Five Pennsylvania signers of the engrossed Declaration—Rush, Clymer, Smith, Taylor, and Ross—were not appointed to Congress until July 20, when they succeeded three Pennsylvania members who were in Congress on July 4 but did not support the Declaration.

Robert Morris of Pennsylvania, William Williams of Connecticut, and Samuel Chase of Maryland were absent on July 4, but signed the engrossed Declaration on August 2.

Oliver Wolcott of Connecticut, and George Wythe and Richard Henry Lee of Virginia, were absent on July 4 and Aug. 2.

Elbridge Gerry of Massachusetts was also absent on Aug. 2, and likewise signed on return to Congress.

Charles Carroll of Carrollton was appointed a Delegate by Maryland on July 4, 1776, presented his credentials on July 18, and signed the engrossed copy of the Declaration on Aug. 2.

The New York State convention did not, until July 9, authorize its delegates to approve the Declaration, and Congress was so notified on July 15. Four of the New York members who refrained from voting for lack of authority on July 4 signed the engrossed Declaration on Aug. 2.

Ratification of the Constitution

The Constitution originally consisted of a preamble and seven Articles, and in that form was adopted (Sept. 17, 1787) by a majority of the 55 delegates from 12 states which had begun their deliberations in Philadelphia on May 12 of that year. Rhode Island sent no delegates. Of the 65 chosen by other states, ten did not attend. Of the delegates in attendance, 16 declined or failed to sign.

Under the language of the Constitution itself (Article VII) ratification by nine states, by conventions, was sufficient for its establishment "between the states so ratifying the same." New Hampshire, on June 21, 1788, was the ninth state to ratify. But the Government did not declare the Constitution to be in effect until the first Wednesday in March, 1789.

The signers of the original Constitution, by virtue of their membership in the convention, were:

GEO. WASHINGTON, President and deputy from Virginia. New Hampshire—John Langdon, Nicholas Gilman. Massachusetts—Nathaniel Gorham, Rufus King. Connecticut—Wm. Saml. Johnson, Roger Sherman. New York—Alexander Hamilton. New Jersey—Wil. Livingston, David Brearley, Wm. Paterson, Jona. Dayton. Pennsylvania—B. Franklin, Robt. Morris, Thos. Fitzsimons, James Wilson, Thomas Mifflin, Geo. Clymer, Jared Inge Gouv. Morris. Delaware—Geo. Read, John Di son, Jaco. Broom, Gunning Bedford jun., Ric Bassett. Maryland—James McHenry, Danl. Ca Daniel of St. Tho. Jenifer. Virginia—John James Madison, Jr. North Carolina—Wm. Bl Hu. Williamson, Richd. Dobbs Spaight. Carolina—J. Rutledge, Charles Pinckney, Ch Cotesworth Pinckney, Pierce Butler. Geor William Few, Abr. Baldwin. Attest: William son, Secretary.

The Constitution was ratified, by convention the 13 original States in the following order:

Delaware (Dec. 7, 1787), unanimous; Pen vania (Dec. 12, 1787), 43 to 23; New Jersey (De 1787), unanimous; Georgia (Jan. 2, 1788), una ous; Connecticut (Jan. 9, 1788), 128 to 40; M chusetts (Feb. 6, 1788), 187 to 168; Maryland 28, 1788), 63 to 11; South Carolina (May 23. 1 149 to 73; New Hampshire (June 21, 1788), 46; Virginia (June 26, 1788), 89 to 79; New (July 26, 1788), 30 to 27; North Carolina (No 1789), 194 to 77; Rhode Island (May 29, 1790 to 32.

Vermont, by convention, ratified (Jan. 10, 105 to 4; and Congress (Feb. 18, 1791), adm that State into the Union.

The Constitution—Original Seven Articles

PREAMBLE

We, the people of the United States, in order to form a more perfect Union, establish jus insure domestic tranquillity, provide for the common defense, promote the general welfare, secure the blessings of liberty to ourselves and our posterity, do ordain and establish this Consti for the United States of America.

ARTICLE I.

Section 1—(Legislative powers; in whom vested:)

All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives.

Section 2—(House of Representatives, how and by whom chosen. Qualifications of a Representative. Representatives and direct taxes, how apportioned. Enumeration. Vacancies to be filled. Power of choosing officers, and of impeachment.)

1. The House of Representatives shall be composed of members chosen every second year by the people of the several States, and the electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislature.

2. No person shall be a Representative who shall not have attained to the age of twenty-five years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that State in which he shall be chosen.

3. Representatives and direct taxes shall be apportioned among the several States which may be included within this Union according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the Congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of Representatives shall not exceed one for every thirty thousand, but each State shall have at least one Representative; and until such enumeration shall be made, the State of New Hampshire shall be entitled to choose 3; Massachusetts, 8; Rhode Island and Providence Plantations, 1; Connecticut, 5; New York, 6; New Jersey, 4; Pennsylvania, 8; Delaware, 1; Maryland, 6; Virginia, 10; North Carolina, 5; South Carolina, 5, and Georgia, 3.

4. When vacancies happen in the representation from any State, the Executive Authority thereof shall issue writs of election to fill such vacancies.

5. The House of Representativesw shall choose their Speaker and other officers, and shall have the sole power of impeachment.

Section 3—(Senators, how and by whom chosen. How classified. State Executive, when to make temporary appointments, in case, etc. Qualifications of a Senator. President of the Senate, his right to vote. President pro tem., and other officers of the Senate, how chosen. Power to try impeachments. When President is tried, Chief Justice to preside. Sentence.)

1. The Senate of the United States shall be composed of two Senators from each State, chosen by the Legislature thereof, for six years; and each Senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election, they shall be divided as equally as may be into three classes. The seats of the Senators of the first class shall be vacated at the wexpiration of the second year, of the second class at the expiration of the fourth year, and of the third class at the expiratic the sixth year, so that one-third may be cl every second year; and if vacancies happe resignation or otherwise, during the recess o Legislature of any State, the Executive th may make temporary appointment until the meeting of the Legislature, which shall the such vacancies.

3. No person shall be a Senator who shal have attained to the age of thirty years, and nine years a citizen of the United States, and shall not, when elected, be an inhabitant of State for which he shall be chosen.

4. The Vice-President of the United States be President of the Senate, but shall have no unless they be equally divided.

5. The Senate shall choose their other off and also a President pro tempore, in the abser the Vice-President, or when he shall exercis office of the President of the United States.

6. The Senate shall have the sole power to t impeachments. When sitting for that purpose, shall be on oath or affirmation. When the Pres of the United States is tried, the Chief Justice preside; and no person shall be convicted wi the concurrence of two-thirds of the me present.

7. Judgment in cases of impeachment shal extend further than to removal from office, an qualification to hold and enjoy any office of h trust, or profit under the United States: bu party convicted shall nevertheless be liable subject to indictment, trial, judgment, and pu ment, according to law.

Section 4—(Times, etc., of holding electi how prescribed. One session in each year.)

1. The times, places and manner of he elections for Senators and Representatives sh prescribed in each State by the Legislature th but the Congress may at any time by law ma alter such regulations, except as to plac choosing Senators.

2. The Congress shall assemble at least on every year, and such meeting shall be on the Monday in December, unless they shall by appoint a different day.

Section 5—(Membership, Quorum, Adjou ments, Rules. Power to punish or expel. Jo nal. Time of adjournments, how limited, e

1. Each House shall be the judge of the elec returns, and qualifications of its own member a majority of each shall constitute a quorum business; but a smaller number may adjourn day to day, and may be authorized to comp attendance of absent members in such manne under such penalties as each House may pr

2. Each House may determine the rules proceedings, punish its members for diso behavior, and with the concurrence of two- expel a member.

3. Each House shall keep a journal of its pr ings, and from time to time publish the excepting such parts as may in their jud require secrecy; and the yeas and nays o members of either House on any question sh the desire of one-fifth of those present, be e on the journal.

4. Neither House, during the session on Co

shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two Houses shall be sitting.

Section 6—(Compensation. Privileges. Disqualifications in certain cases.)

1. The Senators and Representatives shall receive a compensation for their services to be ascertained by law, and paid out of the Treasury of the United States. They shall in all cases, except treason, felony, and breach of the peace, be privileged from arrest during their attendance at the session of their respective Houses, and in going to and returning from the same; and for any speech or debate in either House they shall not be questioned in any other place.

2. No Senator or Representative shall, during the time for which he was elected, be appointed to any civil office under the authority of the United States which shall have been created, or the emoluments whereof shall have been increased during such time; and no person holding any office under the United States shall be a member of either House during his continuance in office.

Section 7—(House to originate all revenue bills. Veto. Bill may be passed by two-thirds of each House, notwithstanding, etc. Bill, not returned in ten days, to become a law. Provisions as to orders, concurrent resolutions, etc.)

1. All bills for raising revenue shall originate in the House of Representatives, but the Senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the House of Representatives and the Senate shall, before it becomes a law, be presented to the President of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that House in which it shall have originated, who shall enter the objections at large on their journal, and proceed to reconsider it. If after such reconsideration two-thirds of that House shall agree to pass the bill, it shall be sent, together with the objections, to the other House, by which it shall likewise be reconsidered; and if approved by two-thirds of that House it shall become a law. But in all such cases the votes of both Houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each House respectively. If any bill shall not be returned by the President within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law in like manner as if he had signed it, unless the Congress by their adjournment prevent its return; in which case it shall not be a law.

3. Every order, resolution, or vote to which the concurrence of the Senate and House of Representatives may be necessary (except on a question of adjournment) shall be presented to the President of the United States, and before the same shall take effect shall be approved by him, or being disapproved by him, shall be repassed by two-thirds of the Senate and the House of Representatives, according to the rules and limitations prescribed in the case of a bill.

Section 8—(Powers of Congress.)

1. The Congress shall have power

To lay and collect taxes, duties, imposts, and excises to pay the debts and provide for the common defense and general welfare of the United States; but all duties, imposts, and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations, and among the several States and with the Indian tribes.

4. To establish a uniform rule of naturalization and uniform laws on the subject of bankruptcies throughout the United States.

5. To coin money, regulate the value thereof, and of foreign coin, and fix the standard of weights and measures.

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

7. To establish post-offices and post-roads.

8. To promote the progress of science and useful arts by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme Court.

10. To define and punish piracies and felonies committed on the high seas, and offences against the law of nations.

11. To declare war, grant letters of marque and reprisal, and make rules concerning captures on land and water.

12. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

13. To provide and maintain a navy.

14. To make rules for the government and regulation of the land and naval forces.

15. To provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions.

16. To provide for organizing, arming, and disciplining the militia, and for governing such part of them as may be employed in the service of the United States, reserving to the States respectively the appointment of the officers, and the authority of training the militia according to the discipline prescribed by Congress.

17. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten miles square) as may, by cession of particular States and the acceptance of Congress, become the seat of Government of the United States, and to exercise like authority over all places purchased by the consent of the Legislature of the State in which the same shall be, for the erection of forts, magazines, arsenals, dockyards, and other needful buildings;—And

18. To make all laws which shall be necessary and proper for carrying into execution the foregoing powers and all other powers vested by this Constitution in the Government of the United States, or in any department or officer thereof.

Section 9—(Provision as to migration or importation of certain persons. Habeas Corpus. Bills of attainder, etc. Taxes, how apportioned. No export duty. No commercial preference. Money, how drawn from Treasury, etc. No titular nobility. Officers not to receive presents, etc.)

1. The migration or importation of such persons as any of the States now existing shall think proper to admit shall not be prohibited by the Congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding ten dollars for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when in cases of rebellion or invasion the public safety may require it.

3. No bill of attainder or ex post facto law shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any State.

6. No preference shall be given by any regulation of commerce or revenue to the ports of one State over those of another, nor shall vessels bound to or from one State be obliged to enter, clear, or pay duties to another.

7. No money shall be drawn from the Treasury but in consequence of appropriations made by law; and a regular statement and account of the receipts and expenditures of all public money shall be published from time to time.

8. No title of nobility shall be granted by the United States: And no person holding any office of profit or trust under them shall, without the consent of the Congress, accept of any present, emolument, office, or title of any kind whatever from any king, prince, or foreign state.

Section 10—(States prohibited from the exercise of certain powers.)

1. No State shall enter into any treaty, alliance, or confederation, grant letters of marque and reprisal, coin money, emit bills of credit, make anything but gold and silver coin a tender in payment of debts, pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No State shall, without the consent of the Congress, lay any impost or duties on imports or exports, except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts, laid by any State on imports or exports, shall be for the use of the Treasury of the United States; and all such laws shall be subject to the revision and control of the Congress.

3. No State shall, without the consent of Congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into agreement or compact with another State, or with a foreign power, or engage in war, unless actually invaded, or in such imminent danger as will not admit of delay.

ARTICLE II.

Section 1—(President: his term of office. Electors of President; number and how appointed. Electors to vote on same day. Qualification of President. On whom his duties devolve in case of his removal, death, etc. President's compensation. His oath of office.)

1. The Executive power shall be vested in a President of the United States of America. He shall hold his office during the term of four years, and together with the Vice-President, chosen for the same term, be elected as follows:

2. Each State shall appoint, in such manner as the Legislature thereof may direct, a number of electors equal to the whole number of Senators and Representatives to which the State may be entitled in the Congress; but no Senator or Representative or person holding an office of trust or

profit under the United States shall be appointed an elector.

(*The electors shall meet in their respective States and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same State with themselves. And they shall make a list of all the persons voted for, and of the number of votes for each, which list they shall sign and certify and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate. The President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates, and the votes shall then be counted. The person having the greatest number of votes shall be the President, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such a majority, and have an equal number of votes, then the House of Representatives shall immediately choose by ballot one of them for President; and if no person have a majority, then from the five highest on the list the said House shall in like manner choose the President. But in choosing the President, the vote shall be taken by States, the representation from each State having one vote. A quorum, for this purpose, shall consist of a member or members from two-thirds of the States, and a majority of all the States shall be necessary to a choice. In every case, after the choice of the President, the person having the greatest number of votes of the electors shall be the Vice-President. But if there should remain two or more who have equal votes, the Senate shall choose from them by ballot the Vice President.)

(*This clause has been superseded by the 12th amendment.)

3. The Congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

4. No person except a natural born citizen, or a citizen of the United States at the time of the adoption of this Constitution, shall be eligible to the office of President; neither shall any person be eligible to that office who shall not have attained to the age of thirty-five years and been fourteen years a resident within the United States.

(For qualification of the Vice President, see Article XII of the amendments.)

5. In case of the removal of the President from office, or of his death, resignation, or inability to discharge the powers and duties of the said office, the same shall devolve on the Vice-President, and the Congress may by law provide for the case of removal, death, resignation, or inability, both of the President and Vice-President, declaring what officer shall then act as President, and such officer shall act accordingly until the disability be removed or a President shall be elected.

(This clause has been amended by Article XX, sections 3 and 4, of the amendments.)

6. The President shall, at stated times, receive for his services a compensation which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other emolument from the United States or any of them.

7. Before he enter on the execution of his office he shall take the following oath or affirmation:

"I do solemnly swear (or affirm) that I will faithfully execute the office of President of the United States, and will, to the best of my ability, preserve, protect, and defend the Constitution of the United States."

Section 2—(President to be Commander-in-Chief. He may require opinions of Cabinet Officers, etc., may pardon. Treaty-making power. Nomination of certain officers. When President may fill vacancies.)

1. The President shall be Commander-in-Chief of the Army and Navy of the United States, and of the militia of the several States when called into the actual service of the United States; he may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have power to grant reprieves and pardons for offenses against the United States except in cases of impeachment.

2. He shall have power by and with the advice and consent of the Senate to make treaties, provided two-thirds of the Senators present concur; and he shall nominate and by and with the advice and consent of the Senate shall appoint ambassadors, other public ministers and consuls, judges of the Supreme Court, and all other officers of the United States whose appointments are not herein otherwise provided for, and which shall be established by law; but the Congress may by law vest the appointment of such inferior officers as they think proper in the President alone, in the courts of law, or in the heads of departments.

3. The President shall have power to fill up all vacancies that may happen during the recess of the Senate by granting commissions, which shall expire at the end of their next session.

Section 3—(President shall communicate to Congress. He may convene and adjourn Congress, in case of disagreement, etc. Shall receive Ambassadors, execute laws, and commission officers.)

He shall from time to time give to the Congre information of the state of the Union, and recor mend to their consideration such measures as shall judge necessary and expedient; he may, extraordinary occasions, convene both Houses, either of them, and in case of disagreement b tween them with respect to the time of adjourn ment, he may adjourn them to such time as he sha think proper; he shall receive ambassadors a other public ministers; he shall take care that t laws be faithfully executed, and shall commissi all the officers of the United States.

Section 4—(All civil offices forfeited for certain crimes.)

The President, Vice-President, and all civil of cers of the United States shall be removed fro office on impeachment for and conviction of tre son, bribery or other high crimes and misdemea ors.

ARTICLE III

Section 1—(Judicial powers. Tenure. Compensation.)

The judicial power of the United States shall vested in one Supreme Court, and in such inferi courts as the Congress may from time to time o dain and establish. The judges, both of the S preme and inferior courts, shall hold their offic during good behavior, and shall at stated tim receive for their services a compensation whi shall not be diminished during their continuance office.

Section 2—(Judicial power; to what cases it extends. Original jurisdiction of Supreme Court Appellate. Trial by jury, etc. Trial, where.)

1. The judicial power shall extend to all cases law and equity arising under this Constitution, t laws of the United States, and treaties made, which shall be made, under their authority; to a cases affecting ambassadors, other public ministe and consuls; to all cases of admiralty and maritim jurisdiction; to controversies to which the Unite States shall be a party; to controversies betwee two or more States, between a State and citize of another State, between citizens of differe States, between citizens of the same State claimi lands under grants of different States, and betwe a State, or the citizens thereof, and foreign state citizens, or subjects.

(This section is abridged by Article XI of the amendments.)

2. In all cases affecting ambassadors, other pu lic ministers and consuls, and those in which State shall be party, the Supreme Court sha have original jurisdiction. In all the other cas before mentioned the Supreme Court shall ha appellate jurisdiction both as to law and fact, wi such exceptions and under such regulations as t Congress shall make.

3. The trial of all crimes, except in cases of im peachment, shall be by jury, and such trial sh be held in the State where the said crimes sh have been committed; but when not committ within any State the trial shall be at such place places as the Congress may by law have directe

Section 3—(Treason defined. Proof of. Punishment of.)

1. Treason against the United States shall co sist only in levying war against them, or in adh ing to their enemies, giving them aid and comfo No person shall be convicted of treason unless the testimony of two witnesses to the same ov act, or on confession in open court.

2. The Congress shall have power to declare t punishment of treason, but no attainder of tr son shall work corruption of blood or forfeiture cept during the life of the person attainted.

ARTICLE IV.

Section 1—(Each State to give credit to the public acts, etc., of every other State.)

Full faith and credit shall be given in each St to the public acts, records, and judicial proceedi of every other State. And the Congress may general laws prescribe the manner in which su acts, records, and proceedings shall be proved, a the effect therof.

Section 2—(Privileges of citizens of each State. Fugitives from justice to be delivered up. Persons held to service having escaped to be delivered up.)

1. The citizens of each State shall be entitled all privileges and immunities of citizens in several States.

2. A person charged in any State with treas felony, or other crime, who shall flee from just and be found in another State, shall, on dem of the Executive authority of the State from wh he fled, be delivered up, to be removed to the St having jurisdiction of the crime.

3. No person held to service or labor in State, under the laws thereof, escaping i another shall in consequence of any law or reg tion therein, be discharged from such service

labor but shall be delivered up on claim of the party to whom such service or labor may be due.

(See 13th amendment.)

Section 3—(Admission of new States. Power of Congress over territory and other property.)

1. New States may be admitted by the Congress into this Union; but no new State shall be formed or erected within the jurisdiction of any other State, nor any State be formed by the junction of two or more States, or parts of States, without the consent of the Legislatures of the States concerned, as well as of the Congress

2. The Congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States; and nothing in this Constitution shall be so construed as to prejudice any claims of the United States, or of any particular State.

Section 4—(Republican form of government guaranteed. Each State to be protected.)

The United States shall guarantee to every State in this Union a Republican form of government, and shall protect each of them against invasion; and, on application of the Legislature, or of the Executive (when the Legislature cannot be convened) against domestic violence.

ARTICLE V.

(Constitution: how amended, Proviso.)

The Congress, whenever two-thirds of both Houses shall deem it necessary, shall propose amendments to this Constitution, or, on the application of the Legislatures of two-thirds of the several States, shall call a convention for proposing amendments, which in either case, shall be valid to all intents and purposes, as part of this Constitution, when ratified by the Legislatures of three-fourths of the several States, or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the Congress, provided that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the Ninth Section of the First Article; and that no State, without its consent, shall be deprived of its equal suffrage in the Senate.

ARTICLE VI.

(Certain debts, etc., declared valid. Supremacy of Constitution, treaties, and laws of the United States. Oath to support Constitution, by whom taken. No religious test.)

1. All debts contracted and engagements entered into before the adoption of this Constitution shall be as valid against the United States under this Constitution as under the Confederation.

2. This Constitution and the laws of the United States which shall be made in pursuance thereof and all treaties made, or which shall be made, under the authority of the United States, shall be the supreme law of the land, and the judges in every State shall be bound thereby, anything in the Constitution or laws of any State to the contrary notwithstanding.

3. The Senators and Representatives before mentioned, and the members of the several State Legislatures, and all executive and judicial officers, both of the United States and of the several States, shall be bound by oath or affirmation to support this Constitution; but no religious test shall ever be required as a qualification to any office or public trust under the United States.

ARTICLE VII.

(What ratification shall establish Constitution.)

The ratification of the Conventions of nine States shall be sufficient for the establishment of this Constitution between the States so ratifying the same.

Ten Original Amendments (Bill of Rights)

(In force December 15, 1791.)

Opposition in and out of Congress to the Constitution, in that it was not sufficiently explicit as to individual and State rights, led to an agreement to submit to the people immediately after the adoption of the Constitution a number of safeguarding amendments.

And so it was that the First Congress, at its first session, in the City of New York, Sept. 25, 1789, submitted to the States twelve proposed amendments—A Bill of Rights as it has been popularly called

In the preamble to the resolution offering the proposed amendments, Congress said: "The conventions of a number of the States having at the time of their adopting the Constitution, expressed a desire, in order to prevent misconstruction or abuse of its powers, that further declaratory and restrictive clauses should be added, and as extending the ground of public confidence in the government will best insure the beneficent ends of its institution, be it resolved," etc.

Ten of these amendments (now commonly known as one to ten inclusive, but in reality three to twelve inclusive) were ratified by the States as follows—New Jersey, (Nov. 20, 1789); Maryland, (Dec. 19, 1789); North Carolina, (Dec. 22, 1789); South Carolina, (Jan. 19, 1790); New Hampshire, (Jan. 25, 1790); Delaware, (Jan. 28, 1790); Pennsylvania, (March 10, 1790); New York, (Feb. 24, 1790); Rhode Island, (June 11, 1790); Vermont, (Nov. 3, 1791); Virginia, (Dec. 15, 1791); Massachusetts, (March 2, 1939); Georgia, (March 18, 1939); Connecticut, (April 19, 1939). These original ten ratified amendments appear in order below as Article I to X inclusive.

The two of the original proposed amendments which were not ratified by the necessary number of States related, the first to apportionment of Representatives; the second, to compensation of members.

ARTICLE I.

(Religious Establishment Prohibited. Freedom of Speech, of the Press, and Right to Petition.)

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech or of the press; or the right of the people peaceably to assemble and to petition the Government for a redress of grievances.

ARTICLE II.

(Right to Keep and Bear Arms.)

A well-regulated militia being necessary to the security of a free State, the right of the people to keep and bear arms shall not be infringed.

ARTICLE III.

(No Soldier to be Quartered in Any House. Unless, etc.)

No soldier shall, in time of peace, be quartered in any house without the consent of the owner, nor in time of war but in a manner to be prescribed by law.

ARTICLE IV.

(Right of Search and Seizure Regulated.)

The right of the people to be secure in their persons, houses, papers, and effects, against unreasonable searches and seizures, shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched, and the persons or things to be seized.

ARTICLE V.

(Provisions Concerning Prosecution, Trial and Punishment—Private Property Not to Be Taken for Public Use Without Compensation.)

No person shall be held to answer for a capital or other infamous crime unless on a presentment or indictment of a Grand Jury, except in cases arising in the land or naval forces, or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty, or property, without due process of law; nor shall private property be taken for public use without just compensation.

ARTICLE VI.

(Right to Speedy Trial, Witnesses, etc.)

In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which districts shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

ARTICLE VII.

(Right of Trial by Jury.)

In suits at common law, where the value in controversy shall exceed twenty dollars, the right of trial by jury shall be preserved, and no fact tried by a jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

ARTICLE VIII.

(Excessive Bail or Fines and Cruel Punishment Prohibited.)

Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

ARTICLE IX.

(Rule of Construction of Constitution.)

The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people.

ARTICLE X.

(Rights of States Under Constitution.)

The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people.

Amendments Since the Bill of Rights

ARTICLE XI.

(Judicial Powers Construed.)

The following amendment was proposed to the Legislature of the several States by the Third Congress on the 5th of March 1794, and was declared to have been ratified in a message from the President to Congress, dated Jan. 8, 1798.

The judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States, by citizens of another State, or by citizens or subjects of any foreign state.

(It was on Jan. 5, 1798, that Secretary of State Pickering received from 12 of the States authenticated ratifications, and informed President John Adams of that fact.

As a result of recent research in the Department of State, it is now established that the Eleventh Amendment became part of the Constitution on Feb. 7, 1795, for on that date it had been ratified by twelve States as follows:

(1) New York, (March 27, 1794); (2) Rhode Island, (March 31, 1794); (3) Connecticut, (May 8, 1794); (4) New Hampshire, (June 16, 1794); (5) Massachusetts, (June 25, 1794); (6) Vermont, (between Oct. 9, 1794 and Nov. 9, 1794); (7) Virginia, (Nov. 18, 1794); (8) Georgia, (Nov. 29, 1794); (9) Kentucky, (Dec. 7, 1794); (10) Maryland, (Dec. 26, 1794); (11) Delaware, (Jan. 23, 1795); (12) North Carolina, (Feb. 7, 1795).

On June 1, 1796, more than a year after the Eleventh Amendment had become part of the Constitution (but before anyone was officially aware of this), Tennessee had been admitted as a State; but not until Oct. 16, 1797, was a certified copy of the resolution of Congress proposing the amendment sent to the Governor of Tennessee (John Sevier) by Secretary of State Pickering, whose office was then at Trenton, New Jersey, because of the epidemic of yellow fever at Philadelphia; it seems, however, that the Legislature of Tennessee took no action on the Eleventh Amendment, owing doubtless to the fact that public announcement of its adoption was made soon thereafter.

Besides the necessary twelve States, one other, South Carolina, ratified the Eleventh Amendment, but this action was not taken until Dec. 4, 1797; the two remaining States, New Jersey and Pennsylvania, failed to ratify.)

ARTICLE XII.

(Manner of Choosing President and Vice-President.)

The following amendment was proposed to the Legislatures of the several States by the Eighth Congress (Dec. 12, 1803), and was declared to have been ratified in a proclamation by the Secretary of State. (September 25, 1804). It was ratified by 12 of the 17 states, and was rejected by Connecticut.

The Electors shall meet in their respective States, and vote by ballot for President and Vice-President, one of whom at least shall not be an inhabitant of the same State with themselves; they shall name in their ballots the person voted for as President, and in distinct ballots the person voted for as Vice-President; and they shall make distinct lists of all persons voted for as President and of all persons voted for as Vice-President, and of the number of votes for each, which lists they shall sign and certify, and transmit, sealed, to the seat of the Government of the United States, directed to the President of the Senate; the President of the Senate shall, in the presence of the Senate and House of Representatives, open all the certificates and the votes shall then be counted—The person having the greatest number of votes for President shall be the President, if such number be a majority of the whole number of Electors appointed; and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as President, the House of Representatives shall choose immediately, by ballot the President. But in choosing the President, the votes shall be taken by States, the representation from each State having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the States and a majority of all the States shall be necessary to a choice. And if the House of Representatives shall not choose a President, whenever the right of choice shall devolve upon them, before the fourth day of March next following, then the Vice-President shall act as President, as in case of the death or other constitutional disability of the President. The person having the greatest number of votes as Vice-President shall be the Vice-President if such number be a majority of the whole number of Electors appointed, and if no person have a majority, then, from the two highest numbers on the list the Senate shall choose the Vice-President; a quorum for the purpose shall consist of two-thirds of the whole number of Senators, and a majority of the whole number shall be necessary to a choice. But no person constitutionally ineligible to the office of President shall be eligible to that of Vice-President of the United States.

TITLES OF NOBILITY

Congress, (May 1, 1810), proposed to the States the following Amendment to the Constitution:

"If any citizen of the United States shall accept, claim, receive, or retain any title of nobility or honor, or shall, without the consent of Congress accept and retain any present, pension, office, or emolument of any kind whatever, from any emperor, king, prince or foreign power, such person shall cease to be a citizen of the United States and shall be incapable of holding any office of trust or profit under them or either of them."

It was ratified by Maryland, (Dec. 25, 1810); Kentucky, (Jan. 31, 1811); Ohio, (Jan. 31, 1811); Delaware, (Feb. 2, 1811); Pennsylvania, (Feb. 6, 1811); New Jersey, (Feb. 13, 1811); Vermont, (Oct. 24, 1811); Tennessee, (Nov. 21, 1811); Georgia, (Dec. 13, 1811); North Carolina, (Dec. 23, 1811); Massachusetts, (Feb. 27, 1812); New Hampshire, (Dec. 10, 1812).

Rejected by New York (Senate), (March 1, 1811); Connecticut, (May session, 1813); South Carolina approved by Senate Nov. 28, 1811, reported unfavorably in House and not further considered Dec. 7, 1813; Rhode Island (Sept. 15, 1814).

The amendment failed, not having sufficient ratifications.

TO PROHIBIT INTERFERING WITH SLAVERY

(The Corwin Amendment.)

Congress, (March 2, 1861) in a joint resolution signed by President James Buchanan, proposed to the States the following Amendments to the Constitution:

"No amendment shall be made to the Constitution which will authorize or give to Congress the power to abolish or interfere, within any State, with the domestic institutions thereof, including that of persons held to labor or service by the laws of said State."

Ratified by Ohio, (March 13, 1861); Maryland, (Jan. 10, 1862); Illinois (convention), (Feb. 1, 1862). The amendment failed, for lack of a sufficient number of ratifications.

THE RECONSTRUCTION AMENDMENTS

The 13th, 14th and 15th Amendments to the Constitution are commonly known as the Reconstruction Amendments, inasmuch as they followed the Civil War, and were drafted by Republicans who were bent on imposing their own policy of reconstruction on the South. Post-bellum legislatures there—Mississippi, South Carolina, Georgia, for example—had set up laws which, it was charged, were contrived to perpetuate Negro slavery under other names.

ARTICLE XIII.

(Slavery Abolished.)

The following amendment was proposed to the Legislatures of the several states by the Thirty-eighth Congress (Feb. 1, 1865), and was declared to have been ratified in a proclamation by the Secretary of State (Dec. 18, 1865). It finally was ratified by 33 of the 36 States, and was rejected by Delaware (Feb. 8, 1865), ratified (Feb., 1901), and Mississippi.

The Amendment when first proposed by a resolution in Congress, was passed by the Senate, 38 to 6, on April 8, 1864, but was defeated in the House, 95 to 66 on June 15, 1864. On reconsideration by the Senate, on Jan. 31, 1865, the resolution passed, 119 to 56. It was approved by President Lincoln on Feb. 1, 1865, although the Supreme Court has decided, in 1798, that the President has nothing to do with the proposing of amendments to the Constitution, or their adoption.

1. Neither slavery nor involuntary servitude, except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States, or any place subject to their jurisdiction.

2. Congress shall have power by appropriate legislation, to enforce the provisions of this article.

ARTICLE XIV.

(Citizenship Rights Not to Be Abridged.)

The following amendment was proposed to the Legislature of the several States by the Thirty-ninth Congress (June 16, 1866), and was declared to have been ratified in a proclamation by the Secretary of State, (July 28, 1868). The amendment got the support of 23 Northern States; it was rejected by Delaware (Feb. 7, 1867), ratified (Feb., 1901); Kentucky, Maryland, and 10 Southern States. California took no action. Subsequently it was ratified by the 10 Southern States.

The 14th amendment was adopted only by virtue of ratification subsequent to earlier rejection. Newly constituted legislatures in both North Carolina and South Carolina, respectively, (July 4 and 9, 1868) ratified the proposed amendment

although earlier legislatures had rejected the proposal. The Secretary of State issued a proclamation which, though doubtful as to the effect of attempted withdrawals by New York and New Jersey, entertained no doubt as to the validity of the ratification by North and South Carolina. The following day (July 21, 1868), Congress passed a resolution which declared the 14th amendment to be a part of the Constitution and directed the Secretary of State so to promulgate it. The Secretary waited, however, until the newly constituted legislature of Georgia had ratified the amendment, subsequent to an earlier rejection, before the promulgation of the ratification of the new amendment.

1. All persons born or naturalized in the United States, and subject to the jurisdiction thereof, are citizens of the United States and of the State wherein they reside. No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty, or property without due process of law, nor deny to any person within its jurisdiction the equal protection of the laws.

Apportionment of Representatives in Congress.

2. Representatives shall be apportioned among the several States according to their respective numbers, counting the whole number of persons in each State excluding Indians not taxed. But when the right to Vote at any election for the choice of Electors for President and Vice-President of the United States, Representatives in Congress, the executive and judicial officers of a State, or the members of the Legislature thereof, is denied to any of the male inhabitants of such State, being twenty-one years of age, and citizens of the United States, or in any way abridged, except for participation in rebellion, or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall bear to the whole number of male citizens twenty-one years of age in such State.

Power of Congress to Remove Disabilities of United States Officials for Rebellion.

3. No person shall be a Senator or Representative in Congress, or Elector of President and Vice-President or hold any office, civil or military, under the United States, or under any State, who, having previously taken an oath, as a member of Congress, or as an officer of the United States, or as a member of any State Legislature or as an executive or judicial officer of any State, to support the Constitution of the United States, shall have engaged in insurrection or rebellion against the same, or given aid or comfort to the enemies thereof. But Congress may, by a vote of two-thirds of each House, remove such disability.

What Public Debts Are Valid.

4. The validity of the public debt of the United States, authorized by law, including debts incurred for payment of pensions and bounties for services in suppressing insurrection and rebellion, shall not be questioned. But neither the United States nor any State shall assume or pay any debt or obligation incurred in aid of insurrection or rebellion against the United States, or any claim for the loss or emancipation of any slave; but all such debts, obligations, and claims shall be held illegal and void.

5. The Congress shall have power to enforce by appropriate legislation the provisions of this article.

ARTICLE XV.

(Equal Rights for White and Colored Citizens.)

The following amendment was proposed to the Legislatures of the several States by the Fortieth Congress (Feb. 26, 1869), and was declared to have been ratified in a proclamation by the Secretary of State (March 30, 1870). It was ratified by 31 of the 37 States, and was rejected by California, Delaware (March 18, 1869) ratified (Feb. 1901) and Kentucky. New York rescinded its ratification (Jan. 5, 1870). New Jersey rejected it in 1870, but ratified it in 1871.

1. The right of the citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

2. The Congress shall have power to enforce this article by appropriate legislation.

ARTICLE XVI.

(Income Taxes Authorized.)

The following amendment was proposed to the Legislatures of the several States by the Sixty-first Congress (July 12, 1909) and was declared to have been ratified in a proclamation by the Secretary of State (Feb. 25, 1913). The amendment was ratified by 42 of the 48 States, and was rejected by Connecticut, Rhode Island, and Utah.

The Congress shall have power to lay and collect taxes on incomes, from whatever sources derived, without apportionment among the several States, and without regard to any census or enumeration.

ARTICLE XVII.

(United States Senators to Be Elected by Direct Popular Vote.)

The following amendment was proposed to the Legislatures of the several States by the Sixty-second Congress (May 16, 1912) and was declared to have been ratified in a proclamation by the Secretary of State (May 31, 1913). The amendment was adopted by 37 of the 48 states, but was rejected by Utah.

1. The Senate of the United States shall be composed of two Senators from each State, elected by the people thereof, for six years and each Senator shall have one vote. The electors in each State shall have the qualifications requisite for electors of the most numerous branch of the State Legislatures.

2. When vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies: Provided, That the Legislature of any State may empower the Executive thereof to make temporary appointment until the people fill the vacancies by election as the Legislature may direct.

3. This amendment shall not be so construed as to affect the election or term of any Senator chosen before it becomes valid as part of the Constitution.

ARTICLE XVIII.

(Liquor Prohibition Amendment.)

The following amendment was proposed to the Legislatures of the several States by the Sixty-fifth Congress (Dec. 18, 1917), and (Jan. 29, 1919) the United States Secretary of State proclaimed its adoption by 36 States, and declared it in effect (Jan. 16, 1920).

The total vote in the Senates of the various States was, 1,310 for, 237 against—84.6% dry. In the lower houses of the States the vote was, 3,782 for, 1,035 against—78.5% dry.

The amendment ultimately was adopted by all the States except Connecticut and Rhode Island.

1. After one year from the ratification of this article the manufacture, sale, or transportation of intoxicating liquors within, the importation thereof into, or the exportation thereof from the United States and all territory subject to the jurisdiction thereof for beverage purposes is hereby prohibited.

2. The Congress and the several States shall have concurrent power to enforce this article by appropriate legislation.

3. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the Legislatures of the several States, as provided in the Constitution, within seven years from the date of the submission hereof to the States by the Congress.

(Repealed by Article XXI effective Dec. 5, 1933.)

ARTICLE XIX.

(Giving Nation-Wide Suffrage to Women.)

The following amendment was presented to the Legislatures of the several States by the Sixty-fifth Congress having been adopted by the House of Representatives (May 12, 1919) and by the Senate (June 4, 1919). The Secretary of State (Aug. 26, 1920) proclaimed it in effect, having been adopted (June 10, 1919- August 18, 1920) by three-quarters of the States. In West Virginia, despite Senate rules of procedure which forbade reconsideration of a measure during the sessions in which it was defeated, the Senate ratified the proposed 19th amendment, subsequent to a rejection in the same session. The amendment was rejected by Alabama, Maryland, and Virginia.

1. The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of sex.

2. Congress shall have power, by appropriate legislation, to enforce the provisions of this article.

ARTICLE XX.

(Terms of President and Vice-President to Begin on Jan. 20; Those of Senators and Representatives, on Jan. 3.)

The following amendment was proposed to the Legislatures of the several States by the Seventy-second Congress (March, 1932), a joint resolution to that effect having been adopted, first by the House, and then (March 2) by the Senate. The Secretary of State (Feb. 6, 1933) proclaimed it in effect, 39 of the 48 States having ratified. By Oct. 15, 1933, it had been ratified by all of the 48 States.

Section 1. The terms of the President and Vice-President shall end at noon on the 20th day of January, and the terms of Senators and Representatives at noon on the 3rd day of January, of the years in which such terms would have ended if this article had not been ratified; and the terms of their successors shall then begin.

Section 2. The Congress shall assemble at least once in every year, and such meeting shall begin at noon on the 3rd day of January, unless they shall by law appoint a different day.

Section 3. If, at the time fixed for the beginning of the term of the President, the President elect shall have died, the Vice-President elect shall become President. If a President shall not have been chosen before the time fixed for the beginning of his term, or if the President elect shall have failed to qualify, then the Vice-President elect shall act as President until a President shall have qualified; and the Congress may by law provide for the case wherein neither a President elect nor a Vice-President elect shall have qualified, declaring who shall then act as President, or the manner in which one who is to act shall be selected, and such person shall act accordingly until a President or Vice-President shall have qualified.

Section 4. The Congress may by law provide for the case of the death of any of the persons from whom the House of Representatives may choose a President whenever the right of choice shall have devolved upon them, and for the case of the death of any of the persons from whom the Senate may choose a Vice-President whenever the right of choice shall have devolved upon them.

Section 5. Sections 1 and 2 shall take effect on the 15th day of October following the ratification of this article (Oct., 1933).

Section 6. This article shall be inoperative unless it shall have been ratified as an amendment to th Constitution by the Legislatures of three-fourths of the several States within seven years from the date of its submission.

ARTICLE XXI.

(Repeal of the Eighteenth (Prohibition) Amendment by Conventions in the States.)

The following proposed amendment in the Constitution, embodied in a joint resolution of the 72nd Congress (Senate, Feb. 16, 1933, by 63 to 23; House, Feb. 20, 1933, by 289 to 121), was transmitted to Secretary of State on Feb. 21 and he at once s to the governors of the States copies of the res tion. The amendment went into effect on Dec 1933. having been adopted by 36 of the 48 State Utah was the 36th State to ratify.

Section 1. The eighteenth article of amendm to the Constitution of the United States is her repealed.

Section 2. The transportation or importa into any State, Territory, or Possession of United States for delivery or use therein of toxicating liquors, in violation of the laws ther is hereby prohibited.

Section 3. This article shall be inoperative less it shall have been ratified as an amendmen the Constitution by convention in the seve States, as provided in the Constitution, wit seven years from the date of the submission he to the States by the Congress.

PROPOSED TWENTY-SECOND AMENDMEN

Congress, on March 26, 1947, approved and s to the States a proposal which would limit to the number of terms any person may serve as Pr dent of the United States. It shall be inopera unless ratified as an amendment to the Constitut by the Legislatures of three-fourths of the Sta within seven years from the date of its submiss to the States by the Congress of the United Sta

It has been ratified by twenty-one States (as July 1, 1949)—California, Colorado, Connecti Delaware, Illinois, Iowa, Kansas, Maine, Michig Mississippi, Missouri, Nebraska, New Hampsh New Jersey, New York, Ohio, Oregon, Pennsylva Vermont, Virginia and Wisconsin. Maine on Ma 31, 1947, was the first state to ratify. It has b rejected by Texas, Idaho and Minnesota. Oklaho has indefinitely postponed action.

SOURCES OF THE CONSTITUTION

The sources from which the Constitution of the United States was derived included the evolution of the British government; the political institutions of the British colonies; the various state constitutions created during and after the Revolution; and the Articles of Confederation. Max Farrand, a recognized authority on the history the framing of the Constitution, says, "It is of terest that the New York Constitution of 1 seems to have been more extensively used t any other."

Forms of Address for Persons of Rank

The President of the United States is addressed as "Mr. President" when spoken to. In writing to him, the letter may be addressed "The President, The White House, Washington, D. C." or "The Hon. Harry S. Truman, President of the United States, Washington, D. C." The salutation may be the simple American form, "Dear Sir," or the more informal "Dear Mr. President." If there is a basis of personal acquaintance, "My dear Mr. President" may be used. The wife of the President takes no title; she is Mrs. Harry S. Truman. While foreign letters usually address the President as "Excellency," this custom is not followed by Americans.

Although "Dear Sir" is always correct, the following variations are suggested by official sources:

A member of the cabinet may be addressed "Dear Mr. Secretary" or "My dear Mr. Secretary"; the head of a bureau, "Dear Mr. Commissioner" or "My dear Mr. Commissioner"; a member of the Senate, "Dear Mr. Senator" or "My dear Mr. Senator"; a member of the House of Representatives is usually addressed by his own name.

A member of the Supreme Court may be addressed in letters as "Mr. Justice ....." The Supreme Court of the United States, Washington, D. C." The salutation is "Dear Mr. Justice," for the Chief Justice it is "Dear Mr. Chief Justice."

While the prefix "The Honorable" is often placed before the names of public officials, including governors, mayors and even aldermen, the tendency is to look on this as an overworked embellishment and to use it as little as possible.

An Emperor is to be addressed in a letter as "Sir," or "Your Imperial Majesty."

A King or Queen is to be addressed, in a letter, as "Sir" or "Madam." The envelope is addressed to "His Majesty (Name), King of (Name)," or "Her Majesty (Name), Queen of (Name)."

Princes and Princesses and other persons of royal blood are addressed as "His (or Her) Royal Highness." Here, as in the cases above, a letter may begin "May it please," following with the words "Your Majesty" or "Your Royal Highness."

A Duke or Marquis is "My Lord Duke" (or "M quis"), a Duke is "His (or Your) Grace."

A foreign Ambassador is "Your Excellency." Minister Plenipotentiary is "Sir." In the addr an Ambassador is "His Excellency," a Minis Plenipotentiary "The Honorable," and Cha d'Affaires is "Mr."

Wives of any peer may be addressed "Madam," with the further alternative of "Y Ladyship," or "Your Grace," if she is of h rank.

The Pope is addsessed, "His Holiness the Po or, "His Holiness Pius XII, Vatican City." salutation is "Your Holiness" and the com mentary close, "Respectfully yours,".

A Cardinal is "Your (His) Eminence." Archbishop or Bishop of the Roman Cath Church is addressed as "The Most Reverend" the salutation is "Your Excellency." A M signor (prelate) is addressed Right Rever Monsignor and the salutation is "Right Rever and dear Monsignor," (Chamberlain), Very R erend Monsignor, and Very Reverend and Monsignor. A priest is Reverend and dear Fat

Protestant Episcopal Bishops are addressed " Right Reverend" and the salutation is "My Bishop," or "Rt. Rev. and dear Sir."

Methodist Bishops are addressed simply "Bishop", and the salutation is "My dear Bish or "My dear Bishop Blank." In the case of lesser clergy, the form also is simple. Whe doctor's degree has been attained, the addres "The Rev. George Blank, D.D.", and the sal tion, "My dear Dr. Blank." When a minister no doctor's degree, the address is "The George Blank", and the salutation, "My Mr. Blank."

A clergyman should never be referred to a Reverend," or addressed as "Reverend Bla "Reverend" should be used only as "Honorable used. It is "The Rev. Mr. Blank", or "The Dr. Blank," or "The Rev. John Blank," never "Rev. Blank."

The Seal of the United States

The custom of solemnizing an important document by affixing a seal to it had its origin deep in antiquity and has continued to be observed to the present day among governmental authorities the world over. A document that has been "signed and sealed" is regarded as bearing legal evidence of its authenticity. Four principal methods of placing a seal upon a document have been employed: (1) spreading a small quantity of wax on the document and impressing the design of the seal upon the wax by means of a die; (2) impressing the design upon a separate wax disk (sometimes one design upon the obverse and another upon the reverse), placing the disk in a protective box known as a skippet, and attaching the disk to the document by a ribbon; (3) impressing the design of the seal upon a paper wafer which has been glued to the document; and (4) impressing the design of the seal upon the document itself.

The desirability of adopting an official seal for the newly established Republic was recognized by the Founding Fathers within a few hours after the adoption of the Declaration of Independence. Late in the afternoon of July 4, 1776, the Continental Congress appointed a committee "to bring in a device for a seal for the United States of America." A report was presented by the committee on Aug. 20, 1776, but this report was not acted upon. A report of a second committee, appointed March 25, 1780, was presented May 10 (or 11), 1780, but it met a similar fate: it was recommitted on May 17.

A third committee, appointed early in May 1782, presented on May 9 of that year a design prepared by William Barton, a private citizen who had studied heraldry. The report was referred on June 13 to the Secretary of Congress, Charles Thomson, who suggested certain changes and returned the design to Barton. On June 19 Barton presented a design incorporating most of Thomson's suggestions, and on June 20, 1782, the Continental Congress adopted Thomson's report on the subject, which embodied with some modifications Barton's "improvement of the Secretary's device." The "Device for a Great Seal for the United States in Congress Assembled" as adopted consists of a verbal description of an obverse and a reverse (including directions in regard to colors of the various parts), with certain "Remarks and Explanation," but without any accompanying pictorial representation.

On the obverse, according to the Remarks and Explanation, the stripes of the escutcheon on the breast of the eagle "represent the Several States all joined in one solid compact entire" and the upper portion of the escutcheon "unites the whole & represents Congress." The motto "E Pluribus Unum" (one out of many) "alludes to this union . . . The Olive branch and arrows denote the power of peace & war . . . The Constellation denotes a new State taking its place and rank among other sovereign powers." On the reverse, the pyramid "signifies Strength and Duration"; the eye over it and the motto "Annuit Cœptis" "He (God) has favored our undertakings" "allude to the many signal interpositions of providence in favour of the American cause." The date 1776 and the words "Novus Ordo Seclorum" (a new order of the ages) "signify the beginning of the new American Æra, which commences from that date."

A brass die to be used for making impressions of the obverse of the seal was cut soon after the adoption of the design. An example of a seal impressed by this die is found on a full power issued by the Continental Congress under date of Sept. 16, 1782, to General Washington to negotiate an exchange of prisoners of war with the British Army.

Provisions relating to the custody and use of the seal were included in the act of Sept. 15, 1789, which changed the Department of Foreign Affairs (the first executive department created under the Constitution) to the Department of State and designated the principal officer thereof the Secretary of State. Sections 3 and 4 of the act read as follows:

"Sec. 3. *And be it further enacted*, That the seal heretofore used by the United States in Congress assembled, shall be, and hereby is declared to be, the seal of the United States.

"Sec. 4. *And be it further enacted*, That the said Secretary shall keep the said seal, and shall make out and record, and shall affix the said seal to all civil commissions, to offices of the United States, to be appointed by the President by and with the advice and consent of the Senate, or by the President alone. *Provided*, That the said seal shall not be affixed to any commission, before the same shall have been signed by the President of the United States, nor to any other instrument or act, without the special warrant of the President therefor."

These sections are incorporated in the current Code of the Laws of the United States of America, title 4, sections 4 and 5.

The die of 1782 continued in use until April, 1841, when it was replaced by a die cut in cast steel, the design of which, however, departed from the law in that its sheaf of arrows contained only six instead of the specified thirteen. The die of 1841 was replaced in Nov. 1877 by one of very similar execution which likewise included only six arrows. Agitation over the difference of the die from the design of the seal as adopted by Congress in 1782, resulted in the cutting of a new die which was put into service in April 1885. The present die has been in use since Jan. 1904. A large die, of about 4½ inches in diameter, was cut in 1825 and was employed exclusively for embossing wax pendant seals which, enclosed in skippets of silver or gold, were affixed to instruments of ratification of treaties destined for exchange with foreign governments. Use of this seal was abandoned in 1871.

All of the dies mentioned are of the obverse of the seal only. The reverse has never been cut for the purpose of sealing documents. Engravings of the obverse and the reverse of the seal were, however, made on the two sides of a medal struck by the mint at Philadelphia in 1882 in commemoration of the centennial of the adpotion of the seal.

The seal of the United States is kept in the Division of Protocol of the Department of State. It is affixed to proclamations of the President, instruments of ratification of treaties, full powers, exequaturs, presidential warrants for the extradition of fugitives from the justice of the United States, commissions of Cabinet officers, commissions of Ambassadors, Ministers, and other Foreign Service officers, and commissions of all other civil officers appointed by the President which are not required by law to issue under another seal; and it is placed on the outside of the envelope containing a letter of credence or other ceremonial communication from the President to the chief of a foreign government.

The Mayflower Pact

In the Name of God, Amen. We whose names are underwritten, the loyal subjects of our dread sovereign Lord, King James, by the grace of God, of Great Britain, France and Ireland King, Defender of the Faith, etc.,

Having undertaken, for the glory of God, and advancement of the Christian faith and honor of our King and Country, a voyage to plant the first colony in the northern parts of Virginia, do by these presents solemnly and mutually in the presence of God, and one of another, covenant and combine ourselves together into a civil body politic, for our better ordering and preservation and furtherance of the ends aforesaid; and by virtue hereof to enact, constitute, and frame such just and equal laws, ordinances, acts, constitutions and offices, from time to time, as shall be thought most meet and convenient for the general good of the Colony; unto which we promise all due submission and obedience.

In witness whereof we have hereunder subscribed our names at Cape Cod the 11 of November, (Nov. 21 new style calendar), in the year of the reign of our sovereign Lord, King James of England, France and Ireland the eighteenth and of Scotland the fifty-fourth. Ano. Dom. 1620.

STATES OF THE UNION

(HISTORICAL AND DESCRIPTIVE)

Statistical tables, elsewhere in The ALMANAC, cover, by States, details of population, births an deaths, religion, agriculture, mining, manufacture, banking, finance, and other phases of activity. Th information contained here is compiled from official sources in the various States.

Alabama

CAPITAL, Montgomery—Cotton State, Yellow-hammer State—STATE FLOWER, Goldenrod—MOTTO: We Dare Defend Our Rights—AREA, 51,609 sq. mi.—POPULATION (Est. 1948), 2,848,000—RANK: Area, 28th; Population (1940 census), 17th; Admission, 22nd.

Alabama, one of the States of the Old South is in the heart of the cotton belt, in the East South Central group, on the Gulf of Mexico, bounded on the north by Tennessee, on the east by Georgia, on the south by Florida and the Gulf, and on the west by Mississippi.

The northern part, the Cumberland plateau, through which runs the Tennessee River, is diversified and picturesque. The Coosa Valley lies to the south, hemmed in by the Piedmont plateau. The remainder of the State is occupied by the alluvial coastal plain with broad valleys. The Alabama River, formed by the junction of the Coosa and the Tallapoosa above Montgomery, and the Tombigbee unite about 35 miles above Mobile, forming the Mobile River. Five miles above, the Tensas branches off the Alabama to the east. Both rivers discharge into Mobile Bay and are important carriers. Much of the State's foreign commerce passes through Mobile, one of the nation's largest ports.

Muscle Shoals is a stretch of the Tennessee River in Northern Alabama, about 37 miles long, with a total vertical fall of 134 feet, creating a rapid current. Its power was first harnessed when it was used for nitrate production during World War I.

Agriculture is the chief interest, although in the last thirty years the mineral industries have been developed. Birmingham is known as "the Pittsburgh of the South." Alabama, one of the 16 cotton States, normally raises nearly one-tenth of the nation's cotton. Peanuts, corn, sweet potatoes, oats, tobacco, sugar, hay and fruits are important crops.

Coal underlies about 8,000 square miles and the iron ore deposits are sufficient to supply the blast furnaces for 160 years. Cement and clay products also are produced.

Alabama has 26 institutions of higher learning—nine colleges, two professional schools, four teachers' colleges and normal schools, four junior colleges and seven institutions for negroes, Tuskegee Institute, founded by the late Booker T. Washington, is devoted to the upbringing of the Negro.

The 1947 Legislature passed a measure for compulsory X-raying to combat tuberculosis in a program similar to the blood-testing system against syphilis, begun in 1945. Another measure increased the average pay of Alabama school teachers from $1,350 to $1,800 annually.

Alabama has 19 State parks, 33,929 acres; 101 State forests, 17,041 acres, and nine community forests, 3,697 acres (U. S. Forest Service, June 30, 1948).

Mobile (founded in 1711 by the French) maintains its old charm; claims to be the Mother of Carnivals, which have spread to the Southern cities; is proud of its tarpon fishing and its 18-mile "azalea trail."

Cheaha mountain, a State park, five miles north of Oxford, is the highest point in Alabama (2,407 feet). Gulf State park, embracing three fresh-water lakes and multi-colored semi-tropical vegetation, is in Baldwin County, on the Gulf of Mexico. Among other points of tourist interest are the Clear Creek falls near Falls City, Winston County; and Bellingrath Gardens, near Mobile. The home of Helen Keller in Tuscumbia, her birthplace, is a public museum.

One of the largest collections of Confederate documents, letters and relics is preserved in the Alabama Memorial Building.

Visited by De Soto (1540), Alabama was settled by the French (1702) and ceded to the British (1763); acquired by the Spanish as part of West Florida (1779-80) and became a part of the United States in successive years (1783-1813). It was in Alabama at Talladega and Horse Shoe Bend (on the Tallapoosa River) that Andrew Jackson decisively defeated the Creek Indians. At Montgomery (Feb. 4, 1861) the Confederate States of America were voted into existence by the provisional congress; Jefferson Davis took his oath of office here (Feb. 18) and for a few months Montgomery was the capital of the Confederacy. Daniel Emmett, composer of "Dixie," copied the words of the famous battle hymn of the Confederate Armies on the walls of the old Montgomery Theater fo Herman Arnold who later turned them into band piece.

Arizona

CAPITAL, Phoenix—Grand Canyon State; als Baby State, Valentine State, Copper State—STAT FLOWER, Saguaro Cactus—MOTTO: Ditat Deu (God Enriches)—AREA, 113,909 sq. mi.—POPULA TION (Est. 1948), 664,000—RANK: Area, 5th; Pop ulation (1940 census), 44th; Admission, 48th.

Arizona is situated in Southwestern Unite States. It is bounded on the north by Utah, o the east by New Mexico, on the west by Nevad and California, and on the south by Mexico.

Vast reaches of arid and semi-arid lands, useles before irrigating water was led into the valley have been made highly productive. The topograph is broken, being mountainous in portions of eve section; the northern plateau is 4,000 to 7,000 fe in altitude, and the southern from 300 to 2,50

Principal crops are alfalfa, cotton, truck crop flax seed, grain and sub-tropical fruits. Livestoc is a leading industry.

Mining is extremely important. The State's co per mines are among the greatest in the worl Zinc, lead, silver and gold are mined in quantit

Hoover (Boulder) Dam in the Black Canyo harnesses the Colorado River, while Parker, In perial and Laguna Dams furnish water for irriga tion in both Arizona and California. Roosevelt an tributary dams in the Salt River, and Coolidg Dam in the Gila, furnish water for the Salt Riv and Casa Grande Valleys.

Arizona has six institutions of higher learning one university, one professional school, two teach ers' colleges and two junior colleges.

The first white man known to have entere Arizona was Fra. Marcos de Niza, a Francisca priest (1539), although Vasconcellos is believe to have explored the Grand Canyon some yea before. Arizona, originally a part of Mexico, w ceded to the United States with New Mexi (Feb. 2, 1848). The area south of the Gila Riv was not acquired until the Gadsden Purchase 1853. Arizona and New Mexico were separat (Feb. 24, 1863).

The petrified forests, covering many thousands acres, are an attraction to scores of tourists a nually. These forests consist of pine and ced trees that in past ages were turned to solid sto by the action of mineral-laden water.

The Grand Canyon of the Colorado River is o of the scenic wonders of the world. It is 217 mil long, mostly in northern Arizona, with a width the top of from four to 18 miles, and descends in series of gradations to a depth in some places 4,000 to 5,500 feet below the surrounding platea

Arkansas

CAPITAL, Little Rock—Wonder State—STA FLOWER, Apple Blossom—MOTTO: Regn Populus (The People Rule)—AREA, 53,102 sq. —POPULATION (Est. 1948), 1,925,000—RAN Area, 26th; Population (1940 census), 24th; A mission, 25th.

Arkansas is of the Old South, situated inla in the West South Central group, Missouri boun ing it on the north, Tennessee and Mississippi the east; Louisiana on the south, and Texas a Oklahoma on the west. The Mississippi Ri forms the entire Eastern boundary. Its topograp is about equally divided between the lowland a of the Gulf Coastal Plain on the east and sou and the Interior Highlands on the west and nor Principal mountain ranges are the Ozarks and Ouachitas.

The State ranks high in production of cot and rice. Other important crops are corn, h fruit and truck crops.

The State is richly endowed with a wide vari of forest wealth.

Arkansas produces much of the bauxite in country. Other important minerals are petrole coal and natural gas. The State has the only kno deposit of diamonds in North America.

Arkansas has 24 institutions of higher educat —13 colleges and universities, one professio school, two teachers' colleges, and eight jun colleges. Five are for Negroes.

There are six State-maintained park areas a according to the U. S. Forest Service (June 1948), seven State forests, 19,800 acres, and community forests, 2,193 acres.

Vacationers find excellent fresh water fishing

lakes and streams and a "duck hunter's paradise" in the ricelands of southeast Arkansas. Recreational centers include world-fmous Hot Springs National Park in the Ouachita Mountains, the State park areas and a number of historic shrines; and government-sponsored dam and reservoir areas at Nimrod, Norfolk, Bull Shoals, the Narrows and Blue Mountain in the Ozarks.

The Hot Springs of Arkansas, 47 in number, and the only Government-owned and operated hot springs in the United States, are included in the Hot Springs National Park. Adjoining the park area on all sides is the city of Hot Springs. The park and city are near the center of the State, about 50 miles southwest of Little Rock.

Evidence as to the source of the heat of the spring water, which ranges from 95° to 147° F. is not conclusive. One explanation is that these springs begin as meteoric water or rainfall which seeps downward through sandy, porous layers and is heated by a buried mass of slowly cooling rock. A second explanation is that the water has never been near the surface before, but is discharged by buried, cooling rocks.

California

CAPITAL, Sacramento—Golden State—STATE FLOWER, Golden Poppy—MOTTO: Eureka (I Have Found It)—AREA, 158,693 sq. mi.—POPULATION (Est. 1948), 10,031,000—RANK: Area, 2nd; Population (1940 census), 5th; Admission, 31st.

California, in the Pacific group, occupies more than one-half of the Pacific coastline of the United States; is bounded on the north by Oregon, on the east by Nevada and Arizona, and on the south by Mexico. Its topography and climate are most varied. Every phase of surface character is presented, and the geological peculiarity of the North and South American Continents is here seen.

The State has many navigable rivers of which the leaders are the Sacramento and the San Joaquin. The Sacramento is navigable for 180 miles and the San Joaquin accommodates ocean going vessels to Stockton, 88 miles from the Pacific. Both rivers are tributary to San Francisco Bay. Other navigable rivers in California with large traffic tonnage include Petaluma Creek, Old River, Napa River and Middle River and connecting channels.

California is the leading State in irrigation, abundant smaller streams enabling irrigation of much otherwise useless land. The Central Valley Water Project, with Shasta, Friant and later dams, and a network of canals will provide electric power and irrigation water, and improve river navigation. Developed water power in California is approximately 2,500,000 horse-power annually.

There are two extensive mountain ranges —the Sierra Nevada (which is a part of the Cascade Mountains) and the Coast Range. The tallest peaks, including Mount Whitney, highest mountain in continental United States, are in the southern part of Sierra Nevada, with the exception of Mount Shasta, which is near the Oregon border. California has 12 mountains with an altitude of more than 14,000 feet. Lassen Peak in the Cascade Range is the only active volcano in the United States.

While less than 10 per cent of California's population lives on farms, it ranks high among the States in cash farm income.

Approximately one-half of the nation's commercial supply of fruits and nuts are grown in this state, and about one-fourth of the vegetables. The State is a leader in the production of citrus fruits, grapes, peaches, pears, apricots, prunes, olives, lettuce and other fruits and vegetables, most of which are sold through cooperative marketing organizations. Other important products are beef, dairy and poultry products, barley, sugar beets and rice. Dried fruits, wine and brandy are produced on a large scale.

California claims leadership in fishery products, with 80 percent of the tuna and more than half of the sardine production of the nation.

Petroleum and natural gas are the most important mineral resources, followed by natural gasoline and cement. Gold, mercury and borates are other leading mineral products, together with copper, lead, zinc, iron ore, manganese, tungsten, magnesium, silica and soda ash.

Manufacturing is the most important industry in the State. Principal manufactures are food products, iron and steel products, aircraft; petroleum, rubber and lumber products; apparel, chemicals and plastics fabrication.

The State has 95 institutions of higher learning —36 colleges and universities, 14 professional schools and 45 junior colleges.

Recent progressive legislation provided for creation of a State aviation commission and a seven-man recreation commission. Provisions were made for State mediation of labor disputes, with jurisdictional strikes outlawed; liberalization of workmen's compensation benefits, an increase in funds for veterans' housing, and registration with local police departments of persons convicted of sex crimes.

There are 18 National Forests comprising one-fifth of the State's area, and an extensive State Park system preserving redwood groves, beaches and scenic desert areas for public use. Coniferous trees are most numerous. The giant redwood groves are the destination of many tourists. The Sequoia trees number 1,156,000, and in Sequoia National Park there are 8,722 exceeding 10 feet in diameter, some older than the pyramids. The largest is "General Sherman."

California has 36 State Parks, 516,986 acres; seven State forests, 66,907 acres; and two community forests, 2,703 acres (U. S. Forest Service, June 30, 1948).

It is a State of romance in history. Acquired from Mexico political control (1846), gold was discovered (1848), and (1849) the most remarkable "gold rush" ever known began.

The Mariposa Big Trees in Yosemite Park are the world's oldest and largest living things. Here also is the famous Wawona tree through which automobiles may drive.

Catalina Island, with an area of some 75 square miles, attracts thousands of travellers and vacationists annually. The Island is in the Pacific Ocean about 22 miles south of Los Angeles Harbor and is reached by boat and plane.

Death Valley, in Inyo County, 276 feet below sea level and the lowest point in the United States, is a National Monument.

The Big Trees are the attraction of General Grant Park, although the mountain scenery and the fishing are added allurements. The Big Trees *Sequoia gigantea*, are sometimes confused with the redwood, *Sequoia sempervirens*, the smaller species of sequoia found only in the Coast Range of California. While the *gigantea* approaches 40 feet in the base diameter, the *sempervirens* rarely exceeds 20 feet. The wood is similar in color and texture, but the foliage is distinct, and the bark of the Big Tree is much thicker and of a rich red color instead of a dull brown.

The highest lake in the United States, is Tulainyo, one and one-half miles northeast of Whitney. The lake has an elevation of 12,865 feet. America's billion-dollar movie industry is centered in Hollywood, borough of Los Angeles, but studios are located also in North Hollywood, Burbank and Culver City, while movie stars live in Beverly Hills and Bel Air. First picture made in Hollywood was a western, by Nestor Co. in 1911.

Colorado

CAPITAL, Denver—Centennial State, Silver State—STATE FLOWER, Columbine—MOTTO: Nil Sine Numine (Nothing Without God)—AREA 104,247 sq. mi.—POPULATION (Est. 1948), 1,165,000—RANK: Area, 7th; Population (1940 census), 33rd; Admission, 38th.

Colorado, one of the Mountain States, is situated near the center of the western half of the United States, on the western rim of the Mississippi River's basin and in the east central part of the Rocky Mountains. It is bounded on the north by Nebraska and Wyoming, on the east by Kansas and Nebraska, on the south by New Mexico and a small strip of the Oklahoma panhandle, and on the west by Utah. Originally a part of the Louisiana Purchase, Colorado was first settled when gold was found, 1858.

The topography is extremely varied, with a difference of more than 11,000 feet between the lowest and highest points. The western half is mountainous with more than 50 peaks rising to an altitude of more than 14,000 feet.

The Continental Divide through the State separates the waterheads of the Pacific on the west from those of the Mississippi River on the east. The largest stream is the Colorado River. With its tributaries it forms the principal drainage for western Colorado. Many of its rivers travel in deep narrow canyons, notably the Arkansas which makes its way through the "Royal Gorge," or canyon of the Arkansas, at a depth of 1,000-1,500 feet.

Other famous gorges are the Colorado River Canyon and the Toltec Gorge in the south.

There are 12 National Forests wholly within the State, embracing 13,500,000 acres and comprising 20 per cent of the State's area.

Colorado has a State forest, 388,000 acres, and 23 community forests, 37,165 acres.

Soils vary from arid to productive. Irrigation is extensive and has lifted agriculture to first place in the State. Other industries are manufacturing, mining, livestock raising, dairying, quarrying, lumbering, and oil and gas production. Tourist travel also is an important industry.

Principal crops are corn, sugar beets, onions, wheat, hay, potatoes, barley and dry beans. Other quality crops are peaches, cherries, cantaloupes and celery.

Colorado leads the nation in reserves of vanadium, molybdenum, uranium, bituminous coal and oil shale. Other important minerals include

zinc, copper, gold, silver, lead, radium and tungsten. Large quantities of helium also are available, used in inflating lighter-than-air craft and for its therapeutic qualities.

Higher education is offered at 18 institutions—including six colleges and universities, two professional schools, and a number of teachers' and junior colleges.

Recent additions to Colorado's well advanced social legislation include increased benefits in Unemployment and workmen's compensation cases, and liberalized aid to the handicapped.

There are two national parks—Mesa Verde, situated in southwestern Colorado, in Montezuma County, noted for the ruins of ancient cliff dwellers; Rocky Mountain National Park, in the heart of the Rockies, includes some of the most picturesque portions of the range. Long's Peak within this park rises to an elevation of 14,255 feet, and 13 other peaks rise to more than 13,000 feet.

The State also has eight National Monuments, including one on the boundary between Colorado and Utah.

Big game still is abundant in Colorado, including deer, antelope, bear, elk, mountain lion, gray wolf and coyote. There is also much small game and over 6,000 miles of trout streams and 2,000 fishing lakes.

The highest suspension bridge in the world spans the canyon of the Arkansas River. The floor of the bridge is 1,053 feet above the bed of the river; the main span is 880 feet long and the total length exclusive of approaches, is 1,260 feet.

The highest automobile road in the United States is the Mount Evans highway in Clear Creek County, which rises to an altitude of 14,260 feet. The highest railroad in the nation, the "Cog-Road," ascends to the top of Pikes Peak, Colorado's best known mountain.

Connecticut

CAPITAL, Hartford—Constitution State, Land of Steady Habits, also Nutmeg State—STATE FLOWER, Mountain Laurel—MOTTO: Qui Transtulit Sustinet (He Who Transplanted Still Sustains—AREA, 5,009 sq. mi.—POPULATION (Est. 1949), 1,910,000—RANK: Area, 46th; Population, (1940 census), 31st.; 5th of the Original 13 States.

Connecticut, southernmost of the New England states, is bounded on the north by Massachusetts, on the east by Rhode Island, on the south by Long Island Sound and on the west by New York.

Connecticut consists of a broad central valley and coastal plain with rugged highlands to the east and to the west. More than half of the entire area of the State is in hardwood forests. The eastern and western highlands are well adapted to dairying, second only to poultry as a source of farm income. The river valleys and coastal plains have soil that is especially suitable for the intensive growing of truck crops, tobacco and potatoes and fruits. Since the State's largest cities are also in this lowland area, the markets for these products are nearby. Connecticut shade-grown tobacco commands the highest price per-acre of any crop grown in the United States.

The principal mineral products are clay products, stone, sand and gravel, and lime.

The State is primarily industrial and more than half of the gainfully employed are in manufacturing industries. Two of the nation's 33 principal industrial areas are located within its compact borders. Since the days of the American Revolution, Connecticut has been known as the "Arsenal of the Nation" and firearms are still an important factor in the State's manufacturing. This industry laid the foundation for modern mass production and precision manufacturing in Connecticut.

The State stands at or near the top in the making of products as varied as pins and anti-friction bearings, silverware and counting devices, fine fabrics and machine guns, cutlery and rubber footwear, textiles, builders' hardware, clocks and sewing machines, typewriters, electrical appliances, pay telephones and airplane motors.

Sixty-one of the nation's insurance companies with admitted assets of more than six billion dollars have their home offices in the State, most of them in Hartford.

Connecticut, a pioneer in the development of public education, has 25 institutions of higher learning—seven colleges and universities, five professional schools, six teachers' colleges and seven private junior colleges.

The best known of the colleges is Yale University in New Haven, founded in 1701; Trinity College in Hartford and Wesleyan University in Middletown also are more than 100 years old.

This third smallest of the states offers a great variety of scenery, surroundings and recreational opportunities. There are 208 State parks, 7,114 acres; 25 State forests, 109,828 acres; and 27 community forests, 44,657 acres.

The 1947 Legislature passed a Fair Employment Practices act and liberalized unemployment compensation and old age assistance.

Connecticut was first settled in the 17th century by the Dutch from New York, who set trading posts. The Dutch were outnumbered displaced by English colonists, the first of wh settled in the Connecticut Valley near Hartf in 1635.

The Fundamental Orders, adopted in 1639 these early settlements, was the first written c stitution of an autonomous government and forerunner in many respects of the constitution the United States; hence, the title "Constitut State" for Connecticut. Charter Oak Place Hartford marks the site where the Connecti charter was said to have been concealed (16 when Gov. Edmund Andros, whose jurisdiction cluded Connecticut, demanded its surrender to Assembly.

Delaware

CAPITAL, Dover—First State, Diamond St Blue Hen State—STATE FLOWER, Peach Bloss —MOTTO: Liberty and Independence—AREA, 2, sq. mi.—POPULTION (Est. 1948), 297,00 RANK: Area, 47th; Population (1940 census), 47 1st of the Original 13 States.

Delaware, next to Rhode Island the smal state, lies in the South Atlantic group, boun on the north by Pennsylvania, on the east by Jersey, Delaware Bay, and the Atlantic Ocean, the south by Maryland, and on the west by Ma land and Pennsylvania. The land is low lying, o twentieth being marshy.

Fifty fresh water lakes, the Delaware River Bay, connecting streams and the Atlantic Oc provide an enormous amount of aquatic life. Al the Atlantic coastline, Delaware fishing fleets low the migrations of fish and much shad, herri and rock are taken. Delaware Bay yields oyst clams, crabs and lobsters. Important crops apples, peaches and the smaller fruits; wheat corn. Fruit-evaporating and canning is car on in large plants in Dover, Milford, Middlet and Smyrna.

The principal mineral products are clay pr ucts, sand and gravel, and stone.

The broiler chicken industry produces greatest agricultural income in the State.

Wilmington and vicinity is the chief ma facturing center of the State. The port is world's center of vulcanized fibre manufactur glazed kid and morocco leathers. Located th is the world's largest braided hose manufactu plant; also the world's largest single cotton dyeing works. Another important activity is sh building. Machinery and hardware also are m ufactured. Kaolin clay is an important qua product.

The city is the headquarters of the E. I. duP de Nemours & Company, the country's lar manufacturer of diversified chemical products

Wilmington is the chief port, ship traffic pas up the Delaware River. A Government canal c nects Delaware and Chesapeake Bays and converted (1927) into a sea-level canal.

Delaware has only one clear-cut recreation —the shore line north and south of Cape Henlo where the Delaware Bay meets the Atlantic Oc There is excellent salt water fishing and batl on the Bay and ocean. Fresh water streams provide good fishing for bass, crappie, pike, ye perch and catfish. The lower part of the St offers excellent gunning for small game. There five State forests comprising 4,200 acres.

The State has four institutions of higher learn —one university, one professional school, junior college and one state college for Negr

Delaware retains the whipping post as a pun ment for criminals (under a law enacted in 17 Delaware was the first State to ratify the Un States Constitution (1787). It retained slavery u it was abrogated (1865) by the Thirteenth ame ment to the Federal Constitution.

The 200-year-old Sunday blue-laws were pealed in 1941. Recent progressive legislation cludes provision of a State employees' pension tem, requirement of a physical examination, cluding blood tests, for applicants for marr licenses; survey for an improved school system creation of a uniform State-supported pay s for teachers.

Delaware, though small in area, has the tinction of having had the flags of four nat floating over its soil at different times, nam the Netherlands, Sweden, Great Britain, and United States of America. The periods of several sovereignties are as follows:

1. The Dutch settlement at Zwaanendael, 1 2. the Swedish period (1638-1655); 3. the se Dutch period (1655-1664); 4. the British pe (1664-1776); 5. the American period (1776 to present time).

The Dutch interest in the Delaware River re began with the discovery of Delaware Bay 1609, by Henry Hudson, who was in comman

he "Half Moon," a ship belonging to the Dutch ast India Company. Oddly enough, the State ears the name of an Englishman who never set oot on its soil, Lord De la Warr (Thomas West), overnor of Virginia.

Old Swedes Church, in Wilmington, is one of the ation's oldest historic religious edifices.

Florida

CAPITAL, Tallahassee—Peninsula State—STATE LOWER, Orange Blossom—MOTTO: In God We rust—AREA, 58,560 sq. mi.—POPULATION (Est. 948), 2,320,000—RANK: Area, 21st.; Population 940 census), 27th; Admission, 27th.

Florida, a South Atlantic State, discovered Easter Sunday, March 27, 1513) by the Spaniard, once de Leon, in his search for the "fountain of erpetual youth," is the southeasternmost point the United States. It is bounded on the north y Georgia and Alabama, on the east by the At- ntic Ocean, on the south by the Straits of Florida. nd on the west by the Gulf of Mexico and Ala- ama.

Florida is of limestone formation, with no high evations—the highest is 325 feet—and in the outhern part are vast swamps, the Everglades, hich are steadily being drained and provided with oads to make available large potential agricultural ealth. The drainage district embraces 4,927,759 res, of which the State owns 589,894 acres.

Coastwise, the vegetation is sub-tropical. In he interior is a coniferous tree-clad, sandy region here citrus fruits have been developed. The State one of the top producers of grapefruit and anges. During the winter and early spring it is principal source of beans, cabbage, celery, cucumbers, peppers, and other vegetables. Both ue-cured and shade-grown tobacco are grown in northern Florida. Florida ranks second in beef attle production east of the Mississippi River.

A source of great wealth are the natural deposits phosphate rock, of which 6,381,282 long tons were roduced (1947) for use as land fertilizer. Other rincipal mineral products are stone, cement, nd and gravel, fullers earth and kaolin.

Leading ports of foreign trade are Jacksonville, ampa and Miami. Miami is one of the leading orts of foreign trade by air.

Florida is known the world over as a winter esort area. Of the State's 1,197 miles of general astline, much is developed for beach recreation. mong the most famous resorts are Palm Beach, acksonville and Miami.

The State has 21 institutions of higher learning -nine colleges and universities, one professional hool, seven junior colleges and four Negro olleges.

Under the 1947 revision of the school law in- reased State aid is given to schools, with the ducational attainments of teachers an important actor in determining the amount a county re- ives. State aid now is granted for capital im- rovements to school property. Other recent social gislation includes a law creating the Florida hildren's Commission (1947), responsible for re- earch and legislative proposals governing State rvices to children.

Florida has 21 state parks totaling approximately 3,000 acres, of which 10 parks are developed and pen to the public. There are three State forest, 1,971 acres and 37 community forests, 2,972 acres U. S. Forest Service, June 30, 1948). Natural prings, caverns, animal farms and public gardens re found throughout the State. Samples: Wakulla prings, the world's largest springs, near Talla- assee, and Silver Springs, near Ocala; the Ocean- rium at Marineland, near St. Augustine; the inging Tower on Iron Mountain near Lake Wales.

A $30,000,000, 123-mile highway connecting Key Vest, southernmost point of the nation, to the ainland was opened in 1944.

St. Augustine, the oldest city of European origin n the United States, was founded 1565. It has hanged hands 13 times and has floated the panish, French, British, Confederate and Amer- an flags.

The two venerable strongholds, Fort Marion Castle San Marcos) and Fort Matanzas, on the Matanzas River, were declared national monu- ents by Presidential proclamation Oct. 15, 924. Built by the Spanish, they are impressive emorials of the momentous struggle among the uropean nations for empire in the New World.

Another historic stronghold is Fort Jefferson, on arden Key of the Dry Tortugas Islands off the oast, declared a national monument Jan. 4, 935 by Presidential proclamation. It was planned s the key to American defense in the Gulf of Mexico and was first garrisoned by Union forces n 1861.

Georgia

CAPITAL, Atlanta—Empire State of the South—TATE FLOWER, Cherokee Rose—MOTTO: Wis- om, Justice, Moderation—AREA: 58,876 sq. mi.; POPULATION (Est. 1948), 3,200,000—RANK: Area, 20th; Population (1940 census), 14th; 4th of the Original 13 States.

Georgia, of the South Atlantic group, is bounded on the north by Tennessee, North Carolina and South Carolina, on the east by South Carolina and the Atlantic, on the south by Florida, and on the west by Alabama. It is the largest State east of the Mississippi River and contains the largest area of woodland.

The topography is varied, with a mountainous region in the north and northwest which is interspersed with wide fertile valleys. Some of the Blue Ridge Mountains exceed 3,000 feet. The most important river is the Savannah.

Agriculture is important. The chief crops are cotton, peanuts, tobacco, corn, peaches, rice, sweet potatoes, truck produce and sugar cane syrup. Georgia is the largest producer of sea-island cotton.

The State grazes a million cattle, and raises as many swine.

The lumber cut is mostly pine, from which come resin and turpentine. Georgia supplies more than one half of the United States production of naval stores and Savannah is the world's largest market for such goods.

Georgia is the largest producer of kaolin for use as a paper and china clay in the United States. The State also ranks high in production of marble, second in barite, and third in granite. Other mineral products include limestone, clay products, cement, talc, bauxite, coal, iron ore, manganese, mica, gold and silver and gemstones.

Transportation is highly developed, with abundant rail lines and large ocean shipping in and out from Savannah, chief port.

The State's most important manufactures are textiles, food products and wood products. Atlanta, Columbus, Savannah, Rome and LaGrange are the largest industrial centers.

Georgia has 51 institutions of higher education—16 colleges and universities, including the University of Georgia in Athens (chartered in 1785, opened 1801); six professional schools, one teachers' college and 11 institutions for Negroes.

Georgia has many places of recreation summer and winter. In the mountains of north Georgia and along the seashore. The National Park Service maintains seven parks and there are 22 State Parks with an area of 36,500 acres. Notable among them are the Franklin D. Roosevelt State Park, Chipley, on U. S. Highway 27, 80 miles southwest of Atlanta near Warm Springs; Vogel State Park, at Blairsville, and Jekyll Island, off Brunswick, on U. S. Highway 17. There are two State forests, 2000 acres, and 18 community forests, 11,184 acres (U. S. Forest Service, June 30, 1948).

At Warm Springs is a sanitarium for the treatment of sufferers from infantile paralysis. It was here that the late Franklin D. Roosevelt was restored to health following his attack of poliomyelitis.

Fort Pulaski, on Cockspur Island, at the mouth of the Savannah River, is a national monument. It was constructed for coast defense by the United States in the first half of the nineteenth century. The fort (begun in 1829) was named in honor of the Polish hero, Count Casimir Pulaski, who fought in the American Revolution and was mortally wounded at the battle of Savannah (1779).

Robert E. Lee's first appointment after his graduation from West Point was to this post.

Georgia was visited by De Soto (1540). It was a part of the tract of land granted to the lords proprietors of Carolina (1663 and 1665); received a provincial charter (1719), and became an independent colony (1732) under James Oglethorpe, who founded it as a refuge for poor debtors from England. Georgia ratified the Confederate constitution (March, 1861), and was the scene of much bloodshed during the Civil War. It was at Irwinville that Jefferson Davis was captured (May 10, 1865). The State was readmitted to the Union (July, 1870).

Idaho

CAPITAL, Boise—Gem State—STATE FLOWER, Syringa—MOTTO: Esto Perpetua—(It is Perpetuated or It is Forever)—AREA, 83,557 sq. mi.; POPULATION (Est. 1948), 524,000—RANK: Area, 12th; Population (1940 census), 43rd.; Admission, 43rd.

Idaho, of the Mountain group, is situated west of the Rockies in the Pacific Coast region, bounded on the north by British Columbia and Montana, on the east by Montana and Wyoming, on the south by Utah and Nevada, and on the west by Oregon and Washington.

Its topography is mountainous, with broad level plateaus. Altitudes range from 700 feet to Mount Borah (12,665 feet) in the Sawtooths, the highest peak in the State. More like the Sahara Desert than Idaho is an area of sand dunes west of St. Anthony. These dunes, of pure white sand, range in height from 10 to 100 feet. The Snake River drains the State to the Columbia River, twisting

northward through Hells Canyon which averages 5,510 feet for over 40 miles. At one point the canyon is 7,900 feet deep, a mile and a half from rim to river, which considerably exceeds the maximum depth (6,100 feet) of the Grand Canyon. It is 10 miles from rim to rim at its widest point. The Salmon (the river of no return) is also important. The St. Joe, in the area of the largest stand of white pine in the United States, is the highest navigable river in the world. The climate is dry and stimulating.

There are a number of mountain ranges—Cabinet, Coeur d'Alene, Beaverhead and Bitter Root in the north; Salmon River, Sawtooth and Lost Rivers in the center of the State; the Bear, Blackfoot and Snake River mountains in the southeast, and the Rockies on the Montana border. The Snake or Shoshone River is noted for several waterfalls —the American, Shoshone and Salmon, and for a deep canyon.

There are 30 irrigation dams in Idaho of more than 10,000 acre feet capacity impounding a total of 5,736,043 acre feet of water. The largest of these is American Falls Dam with a capacity of 1,700,000 acre feet of water.

Agriculture is important, chief crops being wheat, hay, oats, barley, potatoes, beans, peas, sugar beets, apples and prunes. High-grade field and garden seed are raised and sold throughout the United States. Stock raising, particularly sheep, is an important industry. Much wool is shipped. Near Mesa are the largest individually-owned orchards in the world. Lumber, beet sugar, dairy products and flour are the chief manufactures. The world's largest lumber mill is in Potlatch.

The principal mineral products are zinc, lead, silver, phosphate rock, antimony and tungsten.

Idaho has nine institutions of higher education —four colleges and universities, two teachers' colleges and three junior colleges.

The 1947 Legislature adopted the Peabody Institute survey recommendations which completely revised the public school system and raised teachers' salaries.

There are 11 State parks, 3,050 acres, and six community forests, 1,789 acres (U. S. Forest Service, June 30, 1948).

Idaho ranks as one of the leading states in wild life resources and points to many thousands of fishing and hunting licenses each year. There is pheasant, grouse, partridge and duck shooting. Big game, including mountain goat, elk, deer, bear and antelope can be found in almost any section of the State. There is skiing in the winter months.

Shoshone Falls is higher than Niagara, and is called the "Niagara of the West." At night the spectacle is illuminated with floodlights. Twin Falls also attracts many visitors.

Other scenic attractions are Kaniksu, Pend Oreille and Coeur d'Alene lakes in the north and Bear Lake in the southeastern corner. Lake Pend Oreille in northern Idaho, is one of the largest freshwater lakes wholly within the boundaries of the United States. It has a shore line of more than 500 miles and in places is 1,100 feet deep. This lake is the home of the Kamloop rainbow trout, largest in the world.

Lewis and Clark led the parade of pioneers into Idaho. Fur traders and a few scattered missionaries constituted the sole white population until discovery of gold near Orofino (1860). Stirring rush days followed, equalled only when a burro accidentally brought about the lead-silver strike in the Coeur d'Alenes (1884).

Illinois

CAPITAL, Springfield—Prairie State, Sucker State—STATE FLOWER, Violet—MOTTO: State Sovereignty, National Union—AREA, 56,400 sq. mi. —POPULATION (Est. 1948), 8,670,000—RANK: Area, 23rd.; Population (1940 census), 3rd; Admission, 21st.

Illinois lies in the East North Central group, its northeastern corner touching Lake Michigan, the Mississippi River flowing along its western boundary line, the Ohio River along its southern end. It is bounded on the north by Wisconsin, on the east by Indiana and Lake Michigan, on the south by Kentucky and Missouri and on the west by Missouri and Iowa.

Illinois is almost uniformly level, being situated in a glacial moraine, and is alluvial in all parts with a climate such as prevails in the whole of the Middle West. Once largely wooded, the State now has only 10 percent of forest cover.

The State is provided with a remarkable mileage of riverways. The Illinois River, principal intrastate stream, and the Chicago Sanitary Canal, an artificial waterway, combine to form the Illinois Deep Waterway connecting Chicago with the Mississippi River and the Gulf of Mexico. The Canal, extending 40 miles from Chicago to Joliet, is an engineering device by which the flow of the Chicago River was reversed to provide for sanitary drainage for the metropolitan area.

Illinois, with 14,000 miles of hard roads, the nation in paved highways.

Chicago is one of the great transportation ce of the world. The city is served by 22 trunk and 17 belt and terminal railroads. More tha truck and bus lines also afford transportatio

Traffic on the Great Lakes to and from Ch has reached huge proportions. The bulk o receipts are iron ore carried from the Minn Wisconsin and Michigan mines to the great of the United States Steel Corporation in Ind., a part of the Chicago Industrial Area.

Corn, wheat, oats, barley and rye are g in large quantities. Other agricultural pro are livestock, potatoes, hay, milk, soy beans wool.

Leading industries are wholesale meat pac steel mills and blast furnaces, foundries machine shops, petroleum refining, electric chinery factories, automobile plants, railroa construction and repair shops, and agricultura plement factories. The printing and publi plants are very important; also the clothing h

Bituminous coal underlies more than hal area of Illinois which ranks third in soft coal put. Other important mineral products are p leum, stone and clay products.

The Chicago Board of Trade is the prin grain dealing exchange of the country.

The State has 98 institutions of higher lea —36 colleges and universities, 35 profes schools, nine teachers' colleges and 16 junio leges.

The Illinois Aeronautics Act, passed by the General Assembly (1945), affords all commu in the State opportunity to construct with opportunity to construct with state and feder modern municipal airports. Similar legis (1947) encouraged the construction of badly n hospital facilities.

Illinois offers much in recreational faci ranging from the metropolitan life of Ch with its art centers and museums, to the n beauty of the 42 State Parks which have a tota of approximately 28,000 acres. According t U. S. Forest Service (June 30, 1948) Illinoi three State forests, 10,277 acres, and 93 comm forests, 54,446 acres.

Springfield, aside from the fact that it capital of Illinois, is hallowed by the mark of ham Lincoln. In the legislative session (1837) in Vandalia, then the capital of Illinois, Lincoln, a rising young lawyer, who led the to move the capital to Springfield. Lincoln's ment and tomb are in Springfield's Oak cemetery.

Indiana

CAPITAL, Indianapolis—Hoosier State—S FLOWER, Zinnia—MOTTO: The Crossroa America—AREA, 36,291 sq. mi.—POPULA (Est. 1948), 3,909,000—RANK: Area, 27th; P tion (1940 census), 12th; Admission, 19th.

Indiana is bounded on the north by Mi and Lake Michigan, on the east by Ohio and tucky, on the south by Kentucky, and on th by Illinois. The north side of the Ohio Ri low tide in 1792, is the boundary line south and the Wabash forms almost half the ern boundary. These rivers and the Whit Whitewater Rivers were important in the settlement of the State.

Indiana is predominantly a manufac State, with diversified industries and both and small factories. Leading in productio steel and other rolling mill products. Manuf of automotive parts, furniture, glass, soa frigerators, farm implements, pumps, grai products, and clothing is also important. Calumet region, including Gary, Hammond Chicago and Whiting, with its steel mills a fineries, is one of the great industrial cen the world. Harbors at Gary and Indiana are Lake Michigan ports for freighters c ore for the Calumet region.

Bituminous coal, from strip and shaft in the southwestern part of the State; c petroleum and limestone are imporant products. Coke, gypsum and pig iron al produced in quantities.

Agriculture is important. Corn is the bi with wheat, tomatoes, oats, rye, hay, soy bea tobacco following. The predominant type of sified farming is a combination of stock particularly hogs, and grain farming. Th is known for its canned vegetable products cially tomatoes and tomato juice. Two-th all the peppermint and spearmint oil prod the United States come from acres of mu in northern Indiana.

Indiana has 38 institutions of higher educ 25 colleges and universities, eight profe schools, two teachers' colleges and three colleges.

In recent years legislation has materia creased salaries of teachers, state support o

schools and rural school consolidation by county units. Civil rights and anti-discrimination laws have been enacted and employment security laws strengthened. A complete recodification of health laws was enacted by the 1949 Legislature.

The limestone area of southern Indiana contains many sinkholes and caves. Most widely known are Wyandotte Cave, the third largest cavern in the United States, Marengo, in Crawford County, Porters cave in Owen County, and Donaldsons in Lawrence.

Sixteen State parks, totaling approximately 42,312 acres, offer recreational and vacation facilities. There are 14 State forests, 68,512 acres, and 17 community forests, 2,514 acres (U. S. Forest Service, June 30, 1948).

Maintained by the State as memorials are the old State capitol in Corydon; Pigeon Roost monument, in Scott County, commemorating the massacre of pioneer settlers by the Indians; a monument in Tippecanoe County at the scene of William Henry Harrison's defeat of the Indians incited to uprising by Tecumseh and his brother, the Prophet; the grave of Nancy Hanks Lincoln and the site of Abraham Lincoln's boyhood cabin home in Spencer County; the memorial in Vincennes of the acquisition of the Old Northwest, popularly called the George Rogers Clark Memorial; New Harmony Memorial and the Indiana World War Memorial which includes the national headquarters of the American Legion.

French traders reached Indiana in the early 18th century; at their post, Vincennes, established about 1732, grew up the first permanent settlement in the State. Following the Revolution and the subjugation of the Indians, settlers came into the State from the south and east.

Indiana became a State in 1816. The seat of government during the Territorial period was Vincennes (1800-1813) and Corydon (1813-1816). Corydon continued as capital of the new State until 1825, when the government was moved to a site selected in the center of the State, Indianapolis.

Iowa

CAPITAL, Des Moines—Hawkeye State—STATE FLOWER, Wild Rose—MOTTO: Our Liberties We Prize and Our Rights We Will Maintain—AREA, 56,280 sq. mi.—POPULATION (Est. 1948), 2,625,000—RANK: Area, 24th; Population (1940 census), 20th; Admission, 29th.

Iowa lies in the West North Central part of the Middle West, bounded on the north by Minnesota, on the east by Wisconsin and Illinois, on the south by Missouri, and on the west by Nebraska and South Dakota. The Mississippi River flows along the entire eastern boundary line, and the Missouri River along three-fourths of the western line.

The surface is rolling prairie. No similar area in the world of equal size has such consistently fertile soil. Iowa contains 25 percent of all Grade A land in the United States. Altitudes range from 477 to 1,675 feet above sea level.

The proportion of area actually under cultivation —97 percent—is larger than in any other State. The diversity of crops is unexcelled anywhere in the world.

Iowa leads the nation in per capita wealth, value of farm buidings and equipment and frozen food lockers.

Iowa ranks high in the production of corn, oats, butter, eggs, fruit and nuts, and is the world center for popcorn and timothy seed.

Despite its high rank as an agricultural State, Iowa has a balanced economy, with agricultural and industrial incomes approximately equal. The nearly 4000 manufacturing industries are distributed in nearly every county.

Important industries are the processing of agricultural products and the handling of grain and live stock. Farm implements, washing machines, fountain pens, cosmetics, buttons, railroad equipment, furnaces, lawn mowers, calendars, cartons, vending machines, auto accessories and office equipment are among the manufactures.

Cement, clay products, stone and coal are the principal mineral products.

Iowa has 52 institutions of higher education—25 colleges, two professional schools, one teachers' school and 27 junior colleges. The State leads the nation (1949) in literacy rating—99.2 percent.

Iowa's government is traditionally conservative. There is no state debt, hence no state property tax.

Park sites in the State total 36,000 acres. There are ample lakes and recreational areas, including the chain of northern lakes—Okoboji, Spirit and Clear Lakes. According to the U. S. Forest Service (June 30, 1948) there are 10 State forests, 13,802 acres, and 10 community forests, 14,100 acres.

Iowa's surfaced road system of more than 52,524 miles gives the State an average of more surfaced roads per square mile than any other State.

Marquette and Joliet explored part of the land for France (1673) and the first settlement was made by Julien Dubuque (1788) near the site of the city named after him. Iowa was in the territory ceded to Spain (1762), ceded back to France (1801) and included in the Louisiana Purchase (1803).

Kansas

CAPITAL, Topeka—Sunflower State—STATE FLOWER, Sunflower—MOTTO: Ad Astra per Aspera (To the Stars Through Difficulties)—AREA, 82,276 sq. mi.—POPULATION (Est. 1948) 1,968,000—RANK: Area, 13th; Population (1940 census), 29th; Admission, 34th.

Kansas, a West North Central State, in the exact geographical center of the United States, is bounded on the north by Nebraska, on the east by Missouri, on the south by Oklahoma, and on the west by Colorado. About one-third of the eastern boundary is formed by the Missouri River.

The State's topography is varied. There are 18 principal rivers, including the Kansas and Arkansas Rivers; two great watersheds and two smaller ones. The altitude varies from 740 feet above sea level in the rolling eastern section of the State to 4,000 feet in the high plains area of western Kansas.

Important agricultural products include wheat, corn, alfalfa, potatoes, the hardier fruits, and flax. Kansas leads in wheat, and normally produces one fourth of all the wheat in the United States. The largest grain elevator in the country is in Kansas City and the world's largest broom corn market is in Wichita. It is one of the four leading cattle raising states. Dairy and poultry production are extensive.

Coal underlies more than 15,000 square miles. The State ranks high in oil and natural gas production. Other mineral products are zinc, cement, coal and lead. Large quantities of salt are found.

Important industries are the processing of agricultural products, handling of grain and livestock. Aircraft, meat packing, metalworking, milling and petroleum refining are among the manufactures.

Kansas has 43 institutions of higher education—19 colleges and universities, one professional school, two teachers' colleges and 21 junior colleges.

Recent progressive developments include a comprehensive rural health program, reorganization of social welfare and modernization of mental hospitals and penal institutions. Soil conservation and flood control have advanced under federal and state supervision. Kansas' 68-year-old prohibition amendment to the constitution forbidding the manufacture and sale of intoxicating liquor was repealed in a referendum (1948).

Kansas has more than 100 state and county lakes and a park area in excess of 12,000 acres and almost 4,000 acres of water. The State offers the leisurely automobile tourist much to see and enjoy in scenic points and historic spots. These include places of interest along the old Oregon, Santa Fe and Chisholm Trails and Pony Express route, fossil beds in which are found skeletons of prehistoric monsters that lived a million years ago.

The boyhood home of Gen. Dwight D. Eisenhower at Abilene was dedicated as a national shrine (June 22, 1947).

Francisco Vasquez de Coronado headed a Spanish exploring party that entered Kansas (1541) seeking gold in the fabled cities of Cibola. When Coronado returned to Mexico he left behind Father Juan de Padilla, who founded a mission among the Indians and became the first Christian martyr to die on United States soil. The Quiviran Indians killed him because he was about to leave them to establish another mission among a rival tribe.

Spanish explorations in Kansas gave way (1682) to the French when LaSalle laid claim to all the land drained by the Mississippi and its tributaries. France ceded the territory to Spain (1763); regained it (1800); and sold it to the United States as part of the Louisiana Purchase (1803).

Kentucky

CAPITAL, Frankfort—Blue Grass State—STATE FLOWER, Goldenrod—MOTTO: United We Stand, Divided We Fall—AREA, 40,395 sq. mi.—POPULATION (Est. 1948), 2,819,000—RANK: Area, 36th; Population (1940 census), 16th; Admission, 15th.

The Commonwealth of Kentucky, in the East South Central group, is bounded on the north by Indiana and Ohio, on the east by West Virginia, on the south by Tennessee, and on the west by Missouri and Illinois.

The region now constituting the Commonwealth of Kentucky was originally a part of Fincastle County, Virginia.

The surface of Kentucky rises gradually from an altitude of about 300 feet along the Mississippi River to the western edge of the Appalachian Mountain province, in which parallel ridges of folded mountains, the Cumberland and the Pine,

have crests in excess of 2,000 feet. The region west of the Tennessee is low, and broken only by creek and river valleys. The central portion is rolling to undulating, being part of the westward slope of the Allegheny Mountain region. The entire eastern part is much dissected. In the southeast is a mountainous region with small limestone valleys. The mean annual temperature is about 55 degrees for the entire State.

The principal resources of Kentucky are bituminous coal, petroleum, natural gas, stone, fluorspar, natural cement. Bituminous coal is the most important output, Kentucky ranking high among the coal-producing states.

The soil of Kentucky is well adapted to agriculture. The Blue Grass region is composed of heavy loams, clay loams and stony loams, derived from the almost pure Silurian limestone.

Corn is the largest and most valuable crop, followed by tobacco, wheat, oats, hemp, potatoes and fruits. Kentucky is excelled only by North Carolina in the culture of fine tobacco.

The livestock industry is an important branch of agriculture in Kentucky, and large numbers of horses, sheep, cattle, and swine are raised. Kentucky has long been noted for its fine horses. Poultry raising has developed into one of the State's top industries. Lumbering is extensively carried on.

Kentucky's important manufactures include flour and grist mills, tobacco products, woodworking, cotton goods, foundry and machine shop products, slaughtering and meatpacking.

The State has 37 institutions of higher education—13 colleges and universities, five professional schools, five teachers' colleges and 14 junior colleges.

Kentucky has 13 State parks, 8,136 acres; one State forest, 3,623 acres, and 5 community forests, 6,220 acres (U. S. Forest Service, June 30, 1948).

Kentucky contains many natural curiosities and places of historic interest. Mammoth Cave and Colossal Cave are both situated in Edmonson County, Cumberland Falls, southwest of Corbin, is famous as the only waterfall in the Western Hemisphere where a moon-bow may be seen.

At Covington is the smallest church in the world. Monte Casino Roman Catholic Church, with a seating capacity of three.

The house in which Stephen C. Foster wrote "My Old Kentucky Home," and the estate surrounding it, one mile east of Bardstown, has been preserved as a state park.

The Abraham Lincoln National Park, comprising 110 acres, three miles south of Hodgenville, contains a memorial housing a log cabin in which Lincoln is said to have been born (Feb. 12, 1809).

An obelisk at Fairview in Todd County marks the birthplace of Jefferson Davis, President of the Confederate States.

Pioneer Memorial Park at Harrodsburg includes a replica of old Fort Harrod, main stronghold of the Colonies west of the Allegheny during the Revolution; a $100,000 monument to the memory of the first permanent settlement in the West; and Lincoln Temple which encloses the log cabin in which Thomas Lincoln and Nancy Hanks, parents of Abraham Lincoln were married (June 12, 1806).

The first white men known to have discovered Kentucky territory were Marquette and Joliet (1673). Daniel Boone and his companions explored the region in 1769. The first settlement was at Harrodsburg (1774); Boonesborough was founded (1775). For a long time Indian wars harassed the settlement. The three counties which were formed (1780) from Kentucky County were united (1783) into Kentucky District. Virginia passed (1786) the first of four enabling acts giving conditional consent to the organization of Kentucky as a separate State. Kentucky with its present boundaries was admitted (1792) to the Union.

Louisiana

CAPITAL, Baton Rouge—Pelican State—STATE FLOWER, Magnolia — MOTTO: Union, Justice, Confidence—AREA, 48,523 sq. mi.—POPULATION (Est. 1948), 2,576,000—RANK: Area, 30th; Population (1940 census), 21st.; Admission, 18th.

Louisiana, situated in the South Central region, on the Gulf of Mexico, at the mouth of the Mississippi River, is bounded on the north by Arkansas and Mississippi, on the east by Mississippi State and the Gulf, on the south by the Gulf, and on the west by Texas.

Some of the land in the southern portion is lower than the immediate banks of the Mississippi. A system of levees and spillways obviates the danger of annual floods.

The climate is semi-tropical, with little of winter cold. The average annual temperature is 66.4 degrees and the average annual rainfall 55.33 inches.

Louisiana has 7,457 miles of navigable waterways, much of them being on the large bayous in the south.

New Orleans, Baton Rouge and Lake Charles a important seaports.

There are more than 3,000 square miles wat covered, and commercial fishing is an importa industry. Trappers market muskrat, opossum, ra coon, mink and other furs, Louisiana producir more furs than any other State in the Unio Muskrats are by far the most important fur-bea ing animals, yielding approximately 8,000,000 pel annually.

Louisiana leads in the production of sugar can strawberries, sweet potatoes, sugar cane syrup ar rice. Other important crops are corn, cotton, p tatoes, truck vegetables, citrus fruits and pecan The State ranks high in lumber production, kra paper mills consuming large amounts of the abu dant slash pine.

The principal mineral products are petroleur natural gas, natural gasoline, and there are ri sulphur mines; also four of the largest salt min in the world.

Louisiana has 23 institutions of higher learnir —18 colleges and universities, including Tula University, New Orleans, oldest university in th lower Mississippi Valley, founded in 1834 as medical college to combat yellow fever; and fi institutions for Negroes. There are also 20 trac schools and special schools maintained by th State.

The 1948 Legislature adopted an old age pensic law which liberalized provisions for payment old age assistance under federal-state regulation Approximately 70 percent of Louisiana citize over 65 have qualified. The average grant is ap proximately $47.

There are nine State parks, 7,000 acres; tw State forests, 8,800 acres, and eight communi forests, 4,963 acres (U. S. Forest Service, Ju 30, 1948).

Louisiana's recreational calendar includes th Mid-Winter Sports Carnival, a six-day event du ing which nationally famous college athletes com pete in all forms of sport at New Orleans, climax by the famous Sugar Bowl football game held New Year's Day.

The colorful New Orleans Mardi Gras, whi attracts thousands of tourists, occurs annually the day preceding Ash Wednesday.

Possibly discovered (1528) by the Spanish e plorer, Narvaez, or perhaps even earlier (1519) another Spaniard, Pineda, the history of Louisia divides into two major periods—the colonial, e tending from the first attempts at colonizati (about 1712, to the cession in 1803) and the Ame ican from the latter date to the present time. T colonial period comprises the French dominatic down to 1769; and the Spanish domination (176 1800), when, by secret treaty it was returned France, which country held it until sold to t United States (1803).

La Salle claimed the territory in the name France (1682) and attempted colonization (168 with 280 men who perished with him.

Jean Baptiste Lemoine Bienville founded N Orleans (1722), the first important settlement Louisiana proper.

The actual room in which final terms of t transfer of Louisiana to the United States w made still exists. It is called the "Sala Capitula and is the largest chamber in the Cabildo, New Orleans. The Cabildo, former seat of gove ment and later of justice, now is owned by State, and houses part of the Louisiana St Museum.

From 1760 to 1790 about 4,000 Acadians, expel by the British from Nova Scotia in 1755, sett in Louisiana and their descendants today forn large portion of southwest Louisiana's populati Other settlers included many Royalists who the Revolution and Reign of Terror in Fra (1789-1791), and refugees from Haiti and Sa Domingo.

Following the War of 1812, river trade, spur by the invention of the steamboat, began to bc New Orleans as a port. By 1840 it was sec only to New York in amount of tonnage hand

Not the least picturesque of those who fou under the American flag at the Battle of I Orleans (Jan. 8, 1815) was Jean Lafitte, the pir and his crew. Lafitte, upon whose head a p had been set by Louisiana authorities, spur British gold offered to him to guide warships within striking distance of New Orleans.

Maine

CAPITAL, Augusta—Pine Tree State—STA FLOWER, Pine Cone—MOTTO: Dirigo (I Dir —AREA, 33,215 sq. mi.—POPULATION (Est. 19 900,000—RANK: Area, 38th; Population (1940 sus), 35th; Admission, 23rd.

Maine, in New England, northeasternmost St is bounded on the north by Quebec, Canada, on east by New Brunswick, Canada, and the Ba Fundy, on the south by the Atlantic, and on west by New Hampshire and Quebec.

West Quoddy Head, longitude 66° 57', is the extreme eastern point of the United States. Eastport is the easternmost city in the United States.

Maine is heavily wooded, mostly with coniferous trees, and is of broken topography, rising to mountainous elevations in the northwest and sloping in broken form toward the rugged, picturesque coast which is torturous and indented with many harbors along its 2,379-mile length. There are ten mountains more than 4,000 feet high and hundreds more than 2,000 feet. Mt. Katahdin, 5,273 ft., in the center of the State, is the highest point.

The State has a healthful climate, cold in winter, while summer heat is tempered by sea breezes. It has 1,300 wooded islands, 2,465 lakes and twice the latter number of rivers and streams comprising one-tenth of its surface.

The mineral products include cement, stone sand and gravel, and slate.

Maine leads the nation in potato production. Other crops are blueberries, hay, oats, buckwheat and apples. Poultry flourish, and Maine's fisheries rank second in value in New England, producing more than 85 percent of the nation's lobsters.

Lumber products, particularly pulp and paper in which Maine is one of the leaders, are the principal manufacture. Maine forests provide much white pine, spruce, ash and basswood. Other industries are shipbuilding, textiles, tanning, oilcloth, boots and shoes, canning and machinery.

Maine has 14 institutions of higher learning—six colleges and universities, two professional schools, four teachers' colleges and two junior colleges.

Fish and game abound. The deer is by far the most important game animal in the State, and there is much grouse-shooting and salmon fishing. Fur-bearing animals are plentiful, including the black bear.

Acadia National Park is situated on Mount Desert Island, a mountainous uplift at the northern end of an archipelago of islands and sheltered waterways at the center of the coastline. Baxter State Park, within which lies Mount Katahdin, comprises 141,712 acres and was donated by former Governor Percival P. Baxter. According to the U. S. Forest Service (June 30, 1948) there are 45 community forest areas, totaling 15,000 acres.

Maine was visited by Sebastian Cabot (1496) and settled by Popham colonists (1607) at the mouth of the Kennebec River. It was the first region in the United States to build a church; the first to build a blockhouse and the first to build a ship (the Virginia), constructed at the mouth of the Kennebec (1607). The first chartered city in America was founded in the present town of York by Sir Ferdinando Gorges (1641).

Maryland

CAPITAL, Annapolis—Free State, Old Line State—STATE FLOWER, Blackeyed Susan—MOTTO: Fatti Maschii Parole Femine (Manly Deeds, Womanly Words)—AREA, 10,577 sq. mi.—POPULATION (Est. 1948) 2,148,000—RANK: Area, 41st; Poulation (1940 census), 28th; 7th of the Original 13 States.

Maryland, in the South Atlantic Group is bounded on the north by Pennsylvania, on the east by Delaware and the Atlantic Ocean, on the south and west by Virginia and West Virginia. It is penetrated from the south by Chesapeake Bay, a wide arm of the Atlantic, and an important channel of waterborne commerce. The Potomac River, which flows along the southwestern boundary, is also important in commerce. The topography is varied, low and flat in the portions toward the ocean, and rising to mountain levels in the western sections. Great Backbone Mountain, 3,340 feet, is the highest point.

Baltimore, the chief city, is a ranking foreign trade port.

The principal mineral products are coal, sand and gravel, cement and stone. Others are pig iron, coke, clay and asbestos.

Maryland produces iron and steel, textiles, clothing, processed foods, chemicals, electrical equipment, ships and aircraft.

There is a great diversity of crops and types of livestock. Maryland leads the nation in tomato canning. Poultry has become the leading agricultural enterprise. Others are milk, vegetables, livestock, corn, tobacco, wheat and fruit. The State is famed for oysters, crabs, terrapin and 43 species of finfish from Chesapeake Bay and tributaries.

Maryland has long been known for horse-breeding and raising. The Preakness at Pimlico, Baltimore, each spring is one of the three great eastern stake races.

Maryland has 31 institutions of higher education, including four for Negroes—16 colleges and universities, seven professional schools, five teachers' colleges and three junior colleges. The United States Naval Academy is in Annapolis.

Recent progressive legislation provides for an improved school system, including higher pay for teachers; and improved facilities in State mental hospitals.

There are five State parks, 4,043 acres, eight State forests, 76,697 acres, and seven community forests, 22,994 acres (U. S. Forest Service, June 30, 1948).

The State is a popular center for yachting, sport fishing, duck hunting and powerboat and sailing races.

Maryland has many points of historic and scenic interest. Fort McHenry National Park, bordering the waterfront of Baltimore, contains the old fort built to guard the entrance to the harbor during the Revolution. It was begun in the spring of 1776, and later strengthened and named after Col. James McHenry of Baltimore, an aide to General Washington and Secretary of War (1796-1800). The famous frigate Constellation (launched 1797) was built nearby.

Other points of interest are the house in Brookeville where President Madison and his family took refuge when the British burned Washington (1814); Antietam Battlefield near Hagerstown, Barbara Fritchie's House in Frederick, Crystal Grottoes in Boonesboro, so named because of the crystal clarity of the stalactites in the caves, and the Washington monument in Baltimore.

The original charter for Maryland was granted (1632) to Cecelius Calvert, second Lord Baltimore, and the first settlement was made at St. Mary's. It was named after Queen Henrietta Maria, wife of Charles I of England.

Maryland retains the whipping post for punishment of certain crimes.

Massachusetts

CAPITAL, Boston—Bean State, Bay State, also Old Colony State—STATE FLOWER, Mayflower—MOTTO: Ense Petit Placidam Sub Libertate Quietem (By the Sword We Seek Peace, But Peace Only Under Liberty)—AREA, 8,257 sq. mi.—POPULATION (Est. 1948), 4,718,000—RANK: Area, 44th; Population (1940 census), 8th; 6th of the Original 13 States.

The Commonwealth of Massachusetts lies in New England, bounded on the north by Vermont and New Hampshire, on the east by the Atlantic Ocean, on the south by Rhode Island, Connecticut and the Atlantic, and on the west by New York.

The highest elevations, about 3,500 ft. maximum, are in the Berkshires, in the western portion.

The leading industry is the manufacture of cotton goods, and woolens and worsteds. Others of great importance are the boot and shoe factories and tanneries, foundries and machine shops, electric equipment works, paper mills, printing and publishing houses and plastics.

Leading crops are hay, corn, tobacco, potatoes and cranberries; others are wheat, rye, buckwheat, apples and maple sugar.

Massachusetts is the leading fisheries State of New England and Boston is the greatest fishing port in the country.

Mineral products consist chiefly of quarry outputs, including granite for paving blocks, clay products and lime. Lee marble—the handsome white Dolcmite—is famous.

Massachusetts has 70 institutions of higher education—28 colleges and universities, including Harvard College in Cambridge, nucleus of Harvard University (founded 1636) and generally regarded as the oldest college in America; 15 professional schools, 16 teachers' colleges and 11 junior colleges.

The Commonwealth has been a pioneer in progressive legislation, being the first State to enact compulsory school laws, child labor laws, provide for the feeble-minded and orphaned, first State Board of Health, industrial accident reporting law. The 1948 Legislature established a Youth Service Board to provide for care and protection of delinquent children and truants. Discrimination in employment and housing is prohibited.

There are 70 State forests, 170,000 acres, and 140 community forests, 50,110 acres (U. S. Forest Service, June 30, 1948).

The Commonwealth is a popular recreation area, with many beaches dotting the more than 1,000 miles of shore, and sports facilities available in many of the State-owned forests. Hunting and fresh water fishing are confined to prescribed seasons. The coastal waters and islands are a mecca for salt water sportsmen. The Berkshire hills are a summer playground and Winter sport area.

The early history of Massachusetts is so much a history of America that the State is replete with landmarks of national interest. Among them are Provincetown, at the tip of the Cape where the Mayflower first landed (1620); Plymouth Rock and the town of Plymouth; Boston's Faneuil Hall, the Cradle of Liberty; Bunker Hill Monument, Paul Revere Home, Christ Church (Old North Church).

Michigan

CAPITAL, Lansing—Wolverine State—STATE FLOWER, Apple Blossom—MOTTO: Si Quaeris

Peninsulam Amoenam Circumspice (If You Seek a Pleasant Peninsula, Look About You)—AREA, 58,216 sq. mi.—POPULATION (Est. 1948) 6,195,000—RANK: Area, 22nd; Population (1940 census), 7th; Admission, 26th.

Michigan, lying along the Canadian border, is divided by Lake Michigan into two parts. The northern peninsula is bounded on the north by Lake Superior, on the south by Wisconsin. The southern peninsula has Lake Michigan on the west, Lake Huron, Ontario, Canada; and Lake Erie on the east, and Indiana and Ohio on the south.

The State is mostly rolling clay loam, with large areas of cut-over timberlands, mostly coniferous, with rugged topography in the north. The State, the Federal Government and large private enterprises are now making great efforts for the reforestation of the land.

No State has greater water boundary lines proportioned to area and the amount of water transportation is naturally great. Rail facilities also are abundant. The Sault Ste. Marie Ship Canal, between Lakes Huron and Superior, accommodates more tonnage than the Suez Canal.

The principal mineral products are iron ore, petroleum, cement and salt. The Michigan copper country is said to be the only large commercial deposit of native copper in the world. Other minerals are coal, natural gas, gypsum and silver.

The interests of the northern peninsula are mostly copper, iron and timber.

Manufacturing has grown to chief importance in the southern peninsula, and Michigan ranks first in automobile production.

Agriculture ranks high among Michigan industries. About half of the land area of the State is in farms. The chief crops are oats, corn, wheat, clover seed, hay, potatoes, sugar beets, cherries, apples, peaches, pears, grapes, beans.

Michigan has 43 institutions of higher education—21 colleges and universities, eight professional schools, four teachers' colleges and 10 junior colleges.

Michigan is an all-year-round vacation State, and the tourist industry has grown to be the State's second largest, with an estimated annual revenue in excess of $400,000,000. There are 6,000 inland lakes and 2,300 miles of shoreline on the Great Lakes that make the State outstanding for water sports. The State maintains 16 fish hatcheries, and has constructed roads and parks in great number. Isle Royale, in Lake Superior, is the site of a national park comprising 133,760 acres.

According to the U. S. Forest Service (June 30, 1948), there are 142 State parks, 109,200 acres; 22 State forests, 3,750,000 acres, and 846 community forests, 135,000 acres.

Michigan (until 1763) was a part of New France. French occupation has left its mark on the State in the presence of French geographical names, population, and traditions. The oldest settlements (Sault Ste. Marie, Mackinac, and Detroit) are of French origin.

Michigan was comprised within the territory covered by the famous Ordinance of 1787, in accordance with whose provision it became a territory (1805) and a State (1837).

French population and customs predominated until the opening of the Erie Canal (1825) introduced the dominant New England and New York stock.

Minnesota

CAPITAL, St. Paul—Gopher State—STATE FLOWER, Moccasin Flower—MOTTO: L'Etoile du Nord (The Star of the North)—AREA, 84,068 sq. mi.—POPULATION (Est. 1948), 2,940,000—RANK: Area, 11th; Population (1940 census), 18th; Admission, 32nd.

Minnesota is bounded on the south by Iowa, on the west by South and North Dakota, on the north by Canadian provinces of Manitoba and Ontario, and on the east by Wisconsin and Lake Superior. The headwaters of three great river systems are found in its limits, the Mississippi, Red River of the North, and the St. Lawrence. Its navigable rivers are the Mississippi, the Minnesota, the St. Croix, the Rainy, the Red River of the North and the Red Lake River, all of which at their sources, have valuable water powers. The Twin Cities (Minneapolis and St. Paul) are at the head of Mississippi River navigation. Duluth has the largest inland harbor in the United States, ranking second only to New York in commercial tonnage handled. About two-thirds of the state is prairie but in the northern portion there are extensive pine forests. Minnesota, west of the Mississippi River, was part of the Louisiana Purchase. The highest elevation is in the Misquah hills, in Cook county, (1,630 feet above Lake Superior; 2,230 feet above the sea.)

Minnesota is a national center for iron mining and produces 70 percent of all iron ore in the United States. Other important mineral products are stone, sand, gravel, and manganiferous ore.

The State's chief staple crop is corn, and Minnesota ranks high in the nation on the basis of corn produced. It holds high place also in the production of flaxseed and the manufacture of butter. Minnesota is one of the world's great wheat producing centers, and some of the largest flour mills in the world are in Minneapolis.

Industry is diversified, ranging from paper manufacturing to precision instruments. Dairy products and meat packing are important. There has been a remarkable growth of marketing through farmers' cooperative creameries. The introduction of commercial aviation to the Orient has made the Twin Cities an international crossways of the air.

Minnesota is known for its progressive social legislation. In 1949 the Legislature enacted laws expanding the mental health program, improved its child welfare laws, coordinated a plan for resettling displaced persons, liberalized public assistance statutes and implemented tuberculosis control.

Minnesota has 42 institutions of higher education—15 colleges and universities, nine professional schools, five teachers' colleges and 13 junior colleges.

The medical clinics at Rochester are world famous. A cooperative program between the Mayo Foundation and the University Medical School makes Minnesota outstanding in medical education and research. In music, the Minneapolis symphony orchestra ranks with the finest in the country. The St. Olaf college choir in Northfield is internationally recognized.

Minnesota, "Land of Ten Thousand Lakes" (actually 11,008), has a profusion of natural advantages for summer vacationists. According to the U. S. Forest Service (June 30, 1948) there are 56 State parks, 83,385 acres, including Itasca (32,000 acres); 32 State forests, 2,011,270 acres, and 123 community forests, 672,300 acres.

French explorers of the 17th century established trading posts. The British dominated the region until after the War of 1812. American occupation was secured by the establishment of Fort Snelling (1819) and territorial government was organized (1849) with St. Paul as a capital.

Pipestone National Monument in southwestern Minnesota is a region still rich in the lore of Indian days. Minnehaha Falls in Minnehaha Park, Minneapolis, was immortalized by Longfellow in "The Song of Hiawatha."

Mississippi

CAPITAL, Jackson — Magnolia State — STATE FLOWER, Magnolia—MOTTO: Virtute et Armis (By Valor and Arms)—AREA, 47,716 sq. mi.—POPULATION (Est. 1948), 2,121,000—RANK: Area, 31st; Population (1940 census), 23rd; Admission, 20th.

Mississippi, one of the States of the East South Central group, is bounded on the north by Tennessee, on the east by Alabama, on the south by Louisiana and the Gulf of Mexico, and on the west by Louisiana and Arkansas; the Mississippi River is the western boundary line. The State is hilly but not rugged, and in general slopes downward to the Mississippi and the Gulf shore. The climate is moist and mild, with average mean temperature ranging from 61 to 67 degrees.

The principal mineral products are petroleum, natural gas, sand and gravel, and clay products. Other minerals include limestone, bauxite, bentonite, lignite, building stone and cement rock.

Once primarily agricultural, the State's income from industries now matches or surpasses annually the value of agricultural activity. The value of Mississippi's manufactured products has increased 411 percent (1933-1947).

The state ranks second in the country in cotton production, its chief crop. The world's largest cotton plantation—35,000 acres in one unit—is a Scott. Other crops are pecans, sweet potatoes, corn, rice, wheat, oats, sugar cane, peanuts and fruits. The increase in dairying in the State has exceeded any other State (1927-1947) and ranks second only to cotton as a source of Mississippi farm income.

Mississippi ranks high in the production of lumber, particularly hardwood sawtimber. The nation's largest fibre board mill is located at Laurel; the State has more wall-board manufacturing plants than any other in the country.

Mississippi has 36 institutions of higher education—seven colleges and universities, two teachers' colleges, 17 junior colleges and 10 institutions for Negroes.

Mississippi's vacation season stretches the year around, affording many sports and sightseeing possibilities of historic interest. Notable among its parks is Vicksburg National Military Park, commemorating one of the turning points of the Civil War. There are 10 State parks totaling 10,972 acres (U. S. Forest Service, June 30, 1948).

The mile-long Iberville Memorial Bridge links across the entrance to Biloxi Bay where the French established their first capital in the Mississippi Valley (1699).

Missouri

CAPITAL, Jefferson City—Show Me State (unofficial). STATE FLOWER, Hawthorne—MOTTO: Salus Populi Supreme Lex Esto (Let the Welfare of the People Be the Supreme Law)—AREA, 69,674 sq. mi.—POPULATION (Est. 1948), 4,000,000—RANK: Area, 18th; Population (1940 census), 10th; Admission, 24th.

Missouri, a mid-western State, is bounded on the north by Iowa, on the east by Illinois, Kentucky and Tennessee, on the south by Arkansas, and on the west by Oklahoma, Kansas and Nebraska.

The Mississippi River forms the entire eastern boundary line for 545 miles, and the Missouri River the northern part of the western line cutting then through the State to confluence with the Mississippi above St. Louis. In all, Missouri has 1,927 miles of navigable waterways.

Its topography is varied—upland table in the north and west, the Ozark Mountains in the south central and southwestern portions, with low-lying river bottom areas in the extreme southeast. Its climate varies from the north temperate to the sub-tropical.

Corn is the chief crop, followed by large quantities of winter wheat, oats, potatoes and tobacco. Cotton is grown in the southeast counties. The State ranks high in production of mules and hogs.

The State is rich in minerals, the most important mineral products being lead, cement, coal, and stone, including grindstones, limestone, marble, sandstone and granite. Other minerals are zinc, iron, copper, barite, and small amounts of silver. The stockyards and packing plants in Kansas City are famous. Flour and feed mills, butter and cheese factories, have large outputs; as do the printing establishments and machine shops. Missouri is first in the world's output of corn cob pipes.

St. Louis is the gateway for north and south travel as well as of freight traffic. Nineteen main trunk lines furnish rail transportation. The Eads bridge across the Mississippi is said to accommodate more freight cars than any other in the world. River traffic is immense, to and from New Orleans and intermediate points.

The State has 54 institutions of higher education—16 colleges and universities, 10 professional schools, six teachers' colleges, 19 junior colleges and three institutions for Negroes.

In recent years State education has been removed from politics and placed under a bi-partisan board. Other legislation has modernized laws relating to juvenile offenders.

There are 23 State parks, 54,886 acres; and seven State forests, 121,000 acres (U. S. Forest Service, June 30, 1948).

The State is rich in sites of historic and prehistoric interest. Indian mounds and earthworks are numerous in various sections of the State. The old U. S. Grant log cabin, built by Grant himself outside of St. Louis, draws many visitors.

The boyhood home of Mark Twain (Samuel L. Clemens) stands in Hannibal, the region made famous by his books. In the same city is the statue of Tom Sawyer and Huckleberry Finn, two of his best-known characters. A portrait bust of Clemens, erected by the State, stands in the town of Florida, birthplace of the humorist in 1835. Many persons each year visit the farm home, about six miles from Excelsior Springs, of the most colorful bandit of the old days—Jesse James.

La Salle's explorations (1682) located what is now Missouri as a part of the vast Louisiana claim, which was relinquished to Spain (1762), returned to France (1800), and purchased by the United States (1803).

Montana

CAPITAL, Helena—Treasure State—STATE FLOWER, Bitterroot—MOTTO: Oro y Plata (Gold and Silver)—AREA, 147,138 sq. mi.—POPULATION (Est. 1948), 511,000—RANK: Area, 3rd; Population (1940 census), 40th; Admission, 41st.

Montana, a Mountain State, is bounded on the north by Canada, on the east by North and South Dakota, on the south by Wyoming and Idaho, and on the west by Idaho.

The Rocky Mountain range crosses the State in the west, with the Bitterroot range at the extreme western side. The country east of the Rockies slopes off into vast plains and valleys between smaller hill elevations. Its rivers of note are the Missouri, up which crude boat navigation passed for generations; the Yellowstone, Madison Bitterroot and Clark's Fork. Of the 50,000,000 acres, the forests of about 30,000,000 acres are, with other areas, ranges for livestock grazing.

That portion of the State east of Continental Divide was once a part of Louisiana and later of Dakota. The portion west of the Divide was in turn a part of Oregon, Washington and Idaho.

Irrigation has been highly developed, resulting in the production of large quantities of the standard fruits, orchard and small, of the temperate zone. Most notable irrigation development is in the Bitterroot and Flathead regions.

The chief crops are wheat, barley, oats, corn, rye, hay, potatoes, flaxseed and sugar beets. The annual wool clip is large.

Chief mineral products are copper, petroleum, natural gas and coal.

Montana has a stumpage of more than 58,000,000,000 feet of timber, of which most is the valuable western yellow pine. Lodge-pole pine also is being increasingly used.

The State has 11 institutions of higher education—four colleges and universities, one professional school, three teachers' colleges and three junior colleges.

Recent progressive legislation includes provision for the senile-aged, increased Workmen's Compensation benefits and aid to silicotics, and improved laws relating to child adoption.

Scenically, Montana is unsurpassed. Its lofty mountains are rugged and picturesque, and travel by rail or automobile takes one through beautiful places. Glacier National Park, on the line between the United States and Canada, is one of the greatest public preserves in the world (approximately 1,500 sq. mi. in area).

Montana's vacation resources are varied. There is every possible kind of sport—hunting, fishing, horseback riding, water sports, mountain climbing, skiing. The Fort Peck Recreational Area, surrounding Fort Peck dam across the Missouri River, is developing into an important recreation region. According to the U. C. Forest Service (June 30, 1948), there are seven State forests (235,876 acres.

Probably the first white man to venture into Montana was Chevalier De La Verendrye, a Frenchman who came down from Canada (about 1743). No more white men visited Montana until the Lewis and Clark Expedition 62 years later.

The discovery of gold (1850-1860) attracted swarms of miners and merchants. Bustling towns sprouted overnight on land where previously had roamed the Indians—Blackfeet, Flatheads, Crows, Sioux and Cheyennes. Strife developed between white man and red man, causing much bloodshed. It was at the junction of Little and Big Horn Rivers (1876) that General Custer and 276 of his men (est.) were massacred by the Indians under Chief Sitting Bull.

Nebraska

CAPITAL, Lincoln—Cornhusker State—STATE FLOWER, Goldenrod—MOTTO: Equality Before the Law—AREA, 77,237 sq. mi.—POPULATION (Est. 1948), 1,301,000—RANK: Area, 14th; Population (1940 census), 32nd; Admission, 37th.

Nebraska, a West North Central State, is bounded on the north by South Dakota, on the east by Iowa and Missouri, on the south by Kansas and Colorado, and on the west by Colorado and Wyoming. The Missouri River forms the eastern boundary.

The western portion lies in the foothills of the Rocky Mountains, with high table lands broken by low ridges reaching an altitude of about 5,300 ft. in the Bad Lands near Wyoming and South Dakota. Then come the sand hills section (about 15,000 sq. mi.) now well grassed over and stable. Thence the prairie slopes gently to the Missouri. The average altitude is about 2,000 ft. Three river systems, the Platte, the Niobrara and the Big Blue, drain eastward into the Missouri.

The climate is exceptionally healthful, with constant winds, much sunshine and dry, pure air. The winters are of considerable severity and the summers hot. The average annual temperature is around 50 degrees. Average rainfall over the State is 22 inches. Approximately 1,000,000 acres are under irrigation.

The chief mineral products are cement, sand and gravel, clay products and stone.

The soil is very fertile. The State leads in production of wild hay. Other important crops are corn, oats, wheat, barley, rye, alfalfa, potatoes, sugar beets, sorghums and soybeans.

Nebraska is a heavy producer of cattle, swine and sheep.

The chief industry is food processing. Omaha, chief industrial city, ranks first in the world as a butter manufacturing city; is a meat-packing center and the site of large industrial plants.

In 1934, Nebraska voted to install a unicameral legislature. The one-house system, which began operation in 1937, has 43 members, elected on a non-partisan ballot.

All electric power facilities in the State are publicly owned.

Nebraska has one State university one municipal university, two sectarian universities, 12 sectarian colleges and four State teachers' colleges.

There are eight State parks of from 40 to 800 acres each, and 48 fishing and recreation grounds.

There are seven State parks of from 40 to 800 acres each, and 25 State fishing grounds.

Francesco Vasquez Coronado and his party of 30 Spanish cavalry were the first white men to visit this region (1541). French fur traders and trappers began to venture up the Missouri River (about 1700). The Mallet brothers, with a party of eight Frenchmen, named the Platte River and traveled nearly the entire length of the State (1739). The area was part of the Louisiana Purchase (1803). Lewis and Clark led the first American expedition to Nebraska (1804-1806). The first military post was Fort Atkinson (1819).

Internationally famous Boys Town, the late Father Flanagan's "City of Little Men," is located 11 miles west of Omaha.

Nevada

CAPITAL, Carson City—Sagebrush State—STATE FLOWER, Sagebrush—MOTTO: All For Our Country—AREA, 110,540 sq. mi.—POPULATION (Est. 1948), 142,000—RANK: Area, 6th; Population (1940 census), 49th; Admission, 36th. (The Bureau of the Census, for population purposes, considers the District of Columbia as a State, thus increasing the number of States to 49 and accounting for the rank of Nevada as 49th.)

Nevada, least populous of all States, is of the Mountain group in Western United States, bounded on the north by Oregon and Idaho, on the east by Utah and Arizona, on the south and west by California.

It is mountainous and much of the high tablelands is arid or semi-arid. Agriculture is varied, and as irrigation advances diversification of products proceeds. Wheat, barley, potatoes are the chief crops.

Hoover (Boulder) Dam, the highest dam in the world, is on the Colorado River about 25 miles southeast of Las Vegas.

The mountains have produced more than a billion dollars of mineral wealth, chiefly in gold, silver and copper. Present day principal mineral products are copper, zinc, tungsten concentrates and gold.

Nevada produces wool, grains, cattle, sheep, horses, hogs, and poultry.

The University of Nevada, Reno, is the chief institution of higher education.

By reason of the short period of residence required for divorce suits—six weeks—Nevada is a popular resort, and the cities of Reno and Las Vegas are centers of that activity. Games of chance are legalized.

Nevada has 11 State parks totaling 23,000 acres (U. S. Forest Service, June 30, 1948). There are a number of interesting caverns in Nevada, the most noted being Gypsum Cave, 20 miles northeast of Las Vegas.

Franciscan friars were the first white men to set foot in what is now Nevada. They crossed the territory on their way to California (1775). A trading post was founded by the Mormons near the Carson River (1849).

Until the discovery of the famous Comstock Lode (1859), the inhabitants of Nevada numbered only about 1,000, chiefly Mormons and California gold seekers who had tarried on the way. After the discovery there was a stampede of fortune hunters from all over the country. The population of Virginia City spurted from a few hundred to 30,000. Bonanzas were struck and developed; men became wealthy beyond dreams over night. For several years the Comstock Lode was the richest silver mining center in the world and from it has come approximately one billion dollars in gold and silver.

New Hampshire

CAPITAL, Concord—Granite State—STATE FLOWER, Purple Lilac—MOTTO: Live Free or Die—AREA, 9,304 sq. mi.—POPULATION (Est. 1948), 548,000—RANK: Area, 43rd: Population (1940 census), 45th; 9th of the Original 13 States.

New Hampshire is bounded on the north by Canada, on the east by Maine and the Atlantic Ocean, on the south by Massachusetts, and on the west by Vermont.

Its northern parts are rugged, reaching in the White Mountains the highest elevations of the Northeastern United States (Mt. Washington, 6,288 ft.) There are 188 elevations of 3,000 feet or over in an area of 1,270 square miles. The Connecticut River rises in New Hampshire and forms the greater part of the Vermont border.

Agricultural income is below that from manufacturing and resorts, but farming occupies one-third of the State's land area. Most of the State's soil cover consists of sandy or stony loam, considered excellent for forest growth which covers four-fifths of the land, but requiring continuous fertilization when used for plowed crops.

The leading lines of agricultural activity are dairying and dairy products. Berries, apples, peaches and garden produce are grown in great quantities. The New Hampshire breed of poultry originated here.

The principal commercial minerals of Hampshire are, in order of their present portance; sand and gravel, feldspar, stone, clay products.

Textiles, leather products, paper and pulp dustries comprise, at present, about 60% of State's manufactures. Other important class industry are wood and lumber, iron and products, and electrical equipment.

The State has nine institutions of higher cation—five colleges and universities, two teac colleges and two junior colleges.

Recent social legislation includes acts establis a state board of fire control, interstate flood trol, low-rent housing aid; study, treatment care of inebriates; measures to control water lution and provide for soil conservation.

There are 44 State parks, 30,796 acres; 99 forests, 20,219 acres; 167 community forests acres (U. S. Forest Service, June 30, 1948). White Mountain National Forest and Bel County Recreation Area also are in New Ha shire. The State affords all summer sports a famous for its scenic attractions and skiing.

New Hampshire was first settled at Dover Portsmouth (1623). This was only three after the landing of the Pilgrim Fathers and seven years before Boston was founded. The settlers were fishermen, farmers and trader

In 1641, the New Hampshire towns then e lished elected to become a part of the pro of Massachusetts, but 38 years later (1679) be a province themselves.

New Hampshire is the only state to clin the observance of Fast Day (usually the Thursday in April), first proclaimed (1681) the governor of the province lay dying and or a day of public fasting and prayer in vie "sundry tokens of divine displeasure."

New Jersey

CAPITAL, Trenton—Garden State—ST FLOWER, Violet—MOTTO: Liberty and Prosp —AREA, 7,836 sq. mi.—POPULATION (Est. 4,729,000—RANK: Area, 45th; Population census), 9th; 3rd of the Original 13 States.

New Jersey is bounded on the north by New on the east by the Hudson River, the Atl Ocean and New York, on the south by the Atl and Delaware Bay, and on the western sid Delaware Bay, Delaware and Pennsylvania. southern half and the coastal area is fairly l the northern part ranges from rolling terrain t mountains in the northwestern corner.

New Jersey has extensive water navig facilities, with Delaware Bay and the Dela River along its western side, the Atlantic o east and the valuable facilities of New York h and branches on the northeast.

New Jersey shares with New York in the Po New York Authority, a body which has wide p over bridge and tunnel traffic affecting both S and with Pennsylvania in the Delaware River Commission established to own and operat Camden-Philadelphia bridge.

Petroleum refining and copper smelting ar portant industries. The silk mills and t industries, the manufacture of electrical mach and supplies, foundries, machine shops and r mills, the paint and chemical plants and the tery works are also of importance. Also cann meat-packing houses, soap and perfume fact gold and silver refineries and jewelry factorie

Chief crops are corn, peppers, asparagus, eggplant, lima beans and potatoes. The pri fruits are apples, blueberries, cranberries, che grapes, peaches, raspberries and strawberries Jersey holds high rank in the poultry ind dairying and the processing of vegetables. toes are the chief product canned.

New Jersey produces minerals abundantly principal products being zinc, in which the ranks high; sand and gravel, stone, and products. Other minerals include iron ore, and lime.

The State has 40 institutions of higher learn 12 universities and colleges, six teachers' co 11 professional and technical schools, 10 colleges, and one institute for advanced stud

The Bill of Rights of the State's new Con tion (ratified Nov. 4, 1947, effective Jan. 1, has been termed the most liberal ever enac the United States. In addition to all the guards to liberty provided in the charter of it guarantees the right of labor to organiz bargain collectively, permits public employe organize and present grievances, guarantees w equal constitutional rights, and prohibits der the exercise of civil and military rights or se tion in militia or public schools.

Atlantic City, Ocean City, Cape May, A Park, Ocean Grove, Wildwood, are amon larger sea coast resorts, attracting hundre thousands each year. There are 20 State 24,008 acres; one State forest, 57,080 acres, an

community forests, 52,033 acres (U. S. Forest Service, June 30, 1948).

New Jersey's many points of historic and scenic interest include the oldest operating lighthouse at Sandy Hook (erected 1764); the oldest highway in North America, Old Mine Road in Warren County (built 1650); the Palisades, massive vertical wall of rock rising more than 500 feet above the Hudson River; Morristown National Historical Park, which was the main winter camp site of Gen. Washington's Continental Army (1776-1780).

Holland was first to send out planters, under the auspices of the Dutch West India Company, claiming both the valleys of the Hudson and the Delaware, by virtue of the explorations of Hudson and Mey. By 1630 these claims were well established by occupancy, and by the creation of a center of local government in what is now New York City.

Sweden established prosperous rival colonies in the Delaware Valley. "New Sweden" was conquered by New Netherlands (1655), which was in turn forced to give up the territory to England (1664).

New Mexico

CAPITAL, Santa Fe—Sunshine State, "Land of Enchantment"—STATE FLOWER, Yucca—MOTTO: Crescit Eundo (It Grows as It Goes—literally, We Grow as We Go)—AREA, 121,666 sq. mi.—POPULATION (Est. 1949), 667,000—RANK: Area, 4th; Population (1940 census), 42nd; Admission, 47th.

New Mexico, in the southwestern part of the United States, is bounded on the north by Colorado, on the east by Oklahoma and Texas, on the south by Texas and Mexico, and on the west by Arizona. The Rocky Mountains run north and south through the center; the eastern part is of the flatter tableland of which Texas forms also a part, and in the south are desert-like plains, broken by gaunt peaks. The mirage is an interesting phenomenon in this section. The central-western portion is drained by the Rio Grande and the eastern districts by the Pecos River. Elevations range from less than 3,000 feet in the southeastern portion to over 13,000 feet at the summit of the highest mountains. The Continental Divide runs north and south through the western portion of the State.

The climate is dry, stimulating, with an annual rainfall of from seven to 16 inches and a State average of 14.46 inches. Mean temperature for the year is about 50 degrees, with 100 degrees of heat not infrequent on the plains in the summer.

In order of value within the State the principal mineral products are petroleum, potassium salts, natural gas and copper. The United States Geological Survey estimates that the undeveloped coal lands contain 192,000,000,000 tons, and that there are also 33,000,000 tons of gypsum.

The State is largely agricultural, and irrigation is an important factor. The principal crops are corn, wheat, potatoes, grain sorghums, pinto beans and cotton. All the cereals and vegetables, sugar beets, tobacco, peanuts and much fruit are raised.

New Mexico's tourist business is valued at $150,000,000 annually and the live stock industry and its products are valued at $75,000,000 annually.

More than 11 percent of the State is embraced in seven National Forests, which provide a major industry in timber, and extensive recreational facilities including big game hunting and trout fishing. More than 8,500,000 acres of land are included in the big timber areas, the most important commercial trees being Ponderosa pine and Douglas fir.

New Mexico has seven institutions of higher education—four colleges and universities, one professional school, one teachers' college and one junior college.

The State includes one National Park, Carlsbad Caverns, three State Parks, eight national monuments, 18 Indian pueblos, four American Indian reservations and innumerable points of scenic and historic interest.

The golden age of the Pueblo Indians in New Mexico was from 900 to 1200 A.D. They evolved a drama, a religion and a system of government so advanced that they were termed savages only because they had not developed a written language.

Santa Fe is the oldest capital city in the United States (settled by the Spanish 1605). The Palace of the Governors in Santa Fe, once a seat of government and now a museum, is the only royal palace ever built on American soil.

New Mexico became a United States territory in 1846 and a State in 1912.

New York

CAPITAL, Albany—Empire State—STATE FLOWER, Rose—MOTTO: Excelsior (Higher)—AREA—49,576 sq. mi.—POPULATION (Est. 1949), 14,749,128— RANK: Area, 29th; Population (1940 census), 1st; 11th of the Original 13 States.

New York, the Empire State, since 1820 the most populous in the Union, is bounded on the west and north by Lake Erie, Lake Ontario and Canada; on the east by Vermont, Massachusetts and Connecticut; and on the south by the Atlantic Ocean, New Jersey and Pennsylvania.

Topographically, New York is mountainous in the east and level or hilly in the central and western parts. About half of the boundary is water. Mt. Marcy, 5,344 feet, is the highest elevation.

Nearly all geological formations are present. The chief minerals are gypsum, salt, limestone; also petroleum, iron ore, titanium, lead, zinc, graphite, garnet, brick, sand, molding clay, slate, gravel, cement and natural gas. The State was originally covered with forests and New York was once a leading center of lumbering (about 1850), but the industry gradually declined and New York now imports lumber.

The State ranks high in transportation facilities, including 300 airports, 7,707 miles of single track railway lines, and a network of 63,000 miles of hard-surfaced highways. The New York State Barge Canal, State owned and operated, connects the Great Lakes and Lake Champlain with the Atlantic Ocean at New York City by a system of 907 miles of canal and canalized rivers and lakes.

The chief economic interests of the State are the international financial community of New York City, the foreign commerce in New York Harbor, heaviest in the world; the large manufacturing, and the rich agricultural resources.

Industrial revolution and the rise of the factory system, augmented by water, steam and electric power, and later influenced by the development of superior transportation facilities including the Port of New York, greatest in the world, gave the Empire State primacy in manufacturing and commerce. Of the 446 separate industries recognized by the U. S. Bureau of Census, 422 are found in New York. The State is a leader in production of all types of clothing, printing, rugs and carpets, furniture and photographic equipment. Other industries in which the State holds high rank are textiles, paper, steel, chemicals, tools, electrical equipment and scientific instruments.

Agriculture is a huge industry in New York. The leading type of farming is dairying and the State ranks high in production of cheese. It is the second largest producer of grapes, second largest also in maple syrup and allied products, and high in cabbage production. Other important crops are corn, potatoes, hay, oats, wheat, barley, apples, peaches, pears, cherries, onions, beans and buckwheat.

New York State lists 117 institutions of higher learning, including 53 colleges and universities, 31 professional schools, 16 teachers' colleges and 17 junior colleges. The United States Military Academy is at West Point, on the Hudson above New York City.

Much progressive legislation is in force in New York State, including a Fair Employment Practices act. In recent years, the New York Legislature has materially increased unemployment insurance and workmen's compensation benefits. A disability benefits law was adopted (1949) to cover periods of unemployment arising from sickness or injury away from employment, including the same general field as the unemployment insurance law. New York provides special training for delinquent children and assistance for cerebral palsy patients and handicapped children.

The State maintains 78 State Parks, and affords a multitude of year-round recreational and scenic attractions. Niagara Falls, the Thousand Islands, Lake Placid, Ausable Chasm and the Palisades are world famous. Large scale treatment of tuberculosis was first started at Saranac Lake, now also a sports center. There are 337 State forests, 501,195 acres, and 658 community forests, 150,000 acres (U. S. Forest Service, June 30, 1948).

The importance of New York as the nation's leading seaport is due to the fact that the Hudson is a tidal estuary. The silting up of the Lower Bay with sediments brought south by the river and the action of the tides have made necessary the dredging of the Ambrose Channel in the Lower Bay. This provides a depth of 40 feet for vessels entering the port. Almost unlimited anchorage is available in the Upper Bay, as well as docking facilities of the first rank in Manhattan and Brooklyn and along the New Jersey shore opposite Manhattan Island. The Port of New York handles half the foreign trade of the United States, 51.5 percent of the imports and 50.7 percent of the exports.

Two of the world's great airports—LaGuardia Field and International Airport (Idlewild)—enable the city to handle an almost unlimited number of passengers.

The The Dutch explored the Hudson Valley (1609), settled it (1624) and ruled New Netherlands until 1664. Meanwhile the French discovered Lake Champlain (1609) and laid claim to what is now northern and western New York. Lake George,

stretching 32 miles between mountain groups, was discovered (1646) by St. Isaac Joques, French Jesuit missionary, martyr and saint.

The English (1664) seized New Netherlands, named it New York, and after a century of conflict drove out the French (1763). Severed from the British Empire in the War for Independence, New York adopted a State Constitution (April 20, 1777), joined the Confederation (1778) as one of the Thirteen Original States and, by ratifying the Constitution (July 26, 1788) became a member of the United States. George Washington was inaugurated as the first President in New York City (April 30, 1789).

North Carolina

CAPITAL, Raleigh—Tar Heel State—STATE FLOWER, Dogwood—MOTTO: Esse Quam Videri (To Be Rather Than to Seem)—AREA, 52,712 sq. Mi.—POPULATION (Est. 1948), 3,715,000—RANK: Area, 27th; Population (1940 census), 11th; 12th of the Original 13 States.

North Carolina, a South Atlantic State, is bounded on the north by Virginia, on the east by the Atlantic Ocean, on the south by the Atlantic, South Carolina and Georgia, and on the west by Tennessee.

The topography consists of three distinct types—the coastal plain, the central Piedmont area, which attains an elevation of about 1,000 feet and from which spring the Blue Ridge Mountains; and the Appalachian Highlands. Mount Mitchell (6,684 feet) is the tallest peak east of the Mississippi. There are many rivers, principal of which are the French Broad, Catawba, Yadkin, Roanoke, Tar and Neuse.

The climate varies greatly between the southeast and northwest, ranging from sub-tropical to temperate.

Principal mineral products are stone, clay products, sand and gravel, and feldspar. North Carolina also is an important source of pyrophyllite, mica and asbestos, and produces also several rare minerals such as monazite, zircon, columbite, allamite and wolframite.

North Carolina is primarily an agricultural state, although it has many important industries, including cigarettes, textiles and wooden furniture in which it leads; lumbering, fisheries and food processing.

Agricultural produce is varied and North Carolina ranks high in the value of its farm crops. The State leads in tobacco production, growing 70 per cent of all the bright leaf cigarette crop produced in the United States. Cotton and cotton seed rank next. Corn, which ranks third, has more acres planted to that than any other single crop. Other crops are hay, peanuts, commercial truck crops, white and sweet potatoes, peaches and apples.

The State has 52 institutions of higher learning—18 colleges and universities, including the University of North Carolina, first State university in the United States; three teachers' colleges, 19 junior colleges and 12 Negro colleges.

Recent progressive legislation provided for an extensive State medical care program with federal assistance, and pay increases for school teachers.

About half of the Great Smoky Mountains National Park which comprises 720 sq. mi., is in North Carolina, the other half being in Tennessee. There are 13 State parks, 18,768 acres plus 17,000 acres in natural lakes; and 57 community forests, 57,171 acres (U. S. Forest Service, June 30, 1948). Asheville, with an elevation of 2,300 feet, is a popular resort city. The State has 300 miles of beaches and other all-year recreational facilities.

Roanoke Island is historically important as the site of the first English colony (the "Lost Colony") in America, 1584. Virginia Dare was born there (Aug. 18, 1587), the first white child of English parentage born in the New World. In Charlotte was signed the first American declaration of independence (May 20, 1775), known as the Mecklenburg Declaration.

North Carolina was next to last of the Thirteen Original Colonies (1789) to enter the Union, demanding a clause guaranteeing religious freedom before ratifying the Constitution.

Kill Devil Hill National Memorial is the site of the first mechanical airplane flight by the Wright Brothers (1903).

North Dakota

CAPITAL, Bismarck—Sioux State—STATE FLOWER, Wild Prairie Rose—MOTTO: Liberty and Union, Now and Forever, One and Inseparable—AREA, 70,665 sq. mi.—POPULATION (Est. 1948), 560,000—RANK: Area, 16th; Population (1940 census), 39th; Admission, 39th.

North Dakota, in the West North Central group, is bounded on the north by Canada, on the east by Minnesota, on the south by South Dakota, and on the west by Montana. It is drained in part by the Missouri River and in part by the Red River, whi stream is the line between North Dakota and Mi nesota. The surface in the eastern two-thirds a vast rolling plain, with moderate rainfall b sufficient for the large crops produced each yea

In the western part of the State are the B Lands, so named originally by the Indians a settlers because they were then difficult to travers

The geographic center of North America is Pierce County, approximately 50 miles west Devils Lake.

The State leads in the production of spring a durum wheat, and is second in rye and flaxsee Potatoes, wild hay, oats, barley and corn a grown extensively.

A vast proportion of the western part is unde laid with lignite coal, and there are large quant ties of sand and gravel and natural gas. Fine cla adapted to the manufacture of pottery are al found in extensive areas of western North Dakot A large pottery plant is located in Wahpeton.

North Dakota has 12 institutions of higher ed cation—four colleges and universities, five teacher colleges and three junior colleges.

There are six State Parks, one National Par seven recreational areas and 36 historic sites.

Explorations in what is now North Dakota we made (as early as 1738-1740) by French-Canadian The best known Indian tribes which inhabit North Dakota were the Mandan, Hidatsa, Arika and several divisions of Sioux. Others included t Cheyenne, Assiniboin, Crow and Cree.

The Lewis and Clark expedition (1804-180 passed through the territory which now is Nor Dakota, establishing Fort Mandan.

Fort Abraham Lincoln, now a State Park ne Mandan, was the starting point (May 17, 1876) Gen. George Custer and his troops for the battle the Little Big Horn in Montana (June 25), whe Custer and all his men were killed.

It was near Medora, a Bad Lands town in t western part of the State, that Theodore Roosev (later President), made his headquarters when rancher. His original cabin, made from logs c along the banks of the Little Missouri River a floated down to Medora, has been preserved a is operated by the State as an historic hou museum, on the Capital grounds in Bismarc Medora is the headquarters for the Theodore Roos velt National Memorial Park.

The Turtle Mountains of North Dakota are knov for the great variety of song birds found in t area. A joint American-Canadian Commission s aside 3,000 acres on the northern border of the mountains to be known as the Peace Garde commemorating the long years of continuous pea between Canada and the United States.

Ohio

CAPITAL, Columbus—Buckeye State—STA FLOWER, Scarlet Carnation—MOTTO: None: I perium in Imperio (A Government Within a Go ernment) was adopted 1866 and repealed 1868 AREA, 41,222 sq. mi.—POPULATION (Est. 194 7,799,000—RANK: Area, 34th; Population (19 census), 4th; Admission, 17th.

Ohio, an East North Central State, is bounded the north by Michigan and Lake Erie, on the ea by Pennsylvania and West Virginia, on the sou by West Virginia and Kentucky, and on the w by Indiana. It has no considerable elevatio being highest in the center, and sloping in ea direction to the lake on the north and to the Ob River, a great traffic route, on the southern boun ary line. Its climate is characteristic of the nor temperate zone, with abundant rainfall.

Ohio has navigable waterways for the 430 mi of the Ohio, the 230 miles of lake frontage a 100 miles up the Muskingum River in the sout east.

Toledo has the world's largest coal loading po Rail and motor truck transportation is hea throughout the State.

Manufacturing, mining and oil are the ch interests. The iron and steel ore and reducti and machinery industries lead all others.

Cleveland, Youngstown, Canton, Steubenvi and Middletown have the principal iron and st working plants. Manufacturing is extensive other lines, including rubber tires and mo vehicles and parts. Meat packing output is tensive.

Ohio's principal mineral products are coal, c products, natural gas and limestone; also pig ir petroleum, gypsum and salt.

Agriculture is carried on extensively. The pri cipal crops are corn, oats, winter wheat, potato hay, tobacco, grapes and soybeans. Millions gallons of wine are made from Ohio grapes. T annual woolclip is large.

The State has 66 institutions of higher edu tion—45 colleges and universities, 16 professio schools, two teachers' colleges, two junior c leges and one Negro university.

During recent years the Ohio Legislature

assed numerous bills to advance social progress. mong them are laws increasing aid for the aged nd needy blind; providing distribution of state unds for care of tuberculosis patients; increasing tate aid to public education; regulating hours of mployment of females and minors and prohibiting heir employment in certain work; providing for a ospital program in compliance with requirements f the federal hospital survey; increasing maximum enefits under workmen's compensation; creating n urban development and slum clearance com- ission.

Ohio has given the United States five Presidents. ll native born, while two others, elected as resi- ents of other States, were born in Ohio.

There are five State parks, 3,867 acres; 14 State orests, 82,381 acres, and 51 community forests, 8,259 acres (U. S. Forest Service, June 30, 1948).

The pre-historic Mound Builders who once in- abited the country from the Great Lakes to the Gulf of Mexico have left more traces of their ork in Ohio than in any other State: more than 0,000 mounds and 2,000 earth enclosures.

Other points of scenic and historic interest are he George Rogers Clark Park containing the site f the Battle of Piqua and birthplace of the ndian chief Tecumseh; the house in which Ulysses S. Grant was born in Point Pleasant, and Thomas Edison's birthplace in Milan.

During the Northwest Territory regime the Gov- rnor and judges also constituted the legislative ody, and the capitol, in effect, was wherever they happened to be. Governor St. Clair and his aide went to Marietta (July, 1788) and instituted gov- rnment under the Ordinance. From Marietta, St. Clair went to Cincinnati and thence to other cen- ers in the territory, organizing "counties" as units of government. He established his head- uarters (1791) in Cincinnati, which for a time was regarded as the capital.

Later Chillicothe was designated the capital (1799), and finally Columbus (1817).

Oklahoma

CAPITAL, Oklahoma City—Sooner State—STATE FLOWER, Mistletoe—MOTTO: Labor Omnia Vincit (Labor Conquers All Things)—Area, 69,919 sq. mi.—POPULATION (Est. 1948), 2,362,000—RANK: Area, 17th; Population (1940 census), 22nd; Admission, 46th.

Oklahoma, in the West South Central group, is bounded on the north by Colorado and Kansas, on the east by Missouri and Arkansas, on the south by Texas, and on the west by Texas and New Mexico. The surface is a vast rolling plain having a gentle southern and eastern slope and a mean elevation of 1,300 ft.

The western plains are treeless, but the Ozark Mountains in the eastern part are heavily wooded. Further west are the Wichita Mountains, and then the Chautauqua, while the extreme northwest is a lofty tableland (altitude about 4,700 ft.). The Arkansas River flows eastward through the middle of the State, and small rivers in the southern part drain into the Red River, which forms the southern boundary. The prevailing type of soil is a deep dark-red loam. The climate shows great variations of temperature, and the rainfall in the west is scanty, though generally sufficient in the east.

In northwest Oklahoma are the Great Salt Plains, an area of dazzling white salt six by eight miles in size and as level as a table top. This gigantic deposit is said to be the residuum of a great, prehistoric inland sea, from which the water drained to form the present salt plain.

Two Territories were combined to make the State; Oklahoma and Indian Territory, which was the home of the Five Civilized Tribes—Cherokees, Creeks, Choctaws, Chickasaws and Seminoles.

The more than 30 tribes in Oklahoma compose almost one-fifth of the Indian population of the United States.

Oil lifted on land owned by Indians, wards of the Nation, brought them riches. The Osage Indians received $22,000,000 (1926) at the peak of their oil riches; each "headright" drew $13,400. In addition to petroleum, Oklahoma's mineral production is heavy in natural gas, zinc, and natural gasoline.

Manufacturers in Oklahoma are largely the preparation of raw materials for shipment, such as petroleum refining, meat packing, flour milling, metal smelting and cottonseed oil milling. Glass and textile manufacturing have increased since World War II.

Important crops are winter wheat, cotton, corn, oats, rye, barley, grain sorghums, peanuts, hay and broom corn. The State is a heavy producer of livestock and poultry.

Oklahoma has 34 institutions of higher education—10 colleges and universities, one professional school, six teachers' colleges, 16 junior colleges and one Negro university.

There are seven State Parks and one National Park (Platt, at Sulphur) in the State. There is a wide variety of recreational facilities, including hunting, fishing, boating, swimming, hiking and an abundance of scenic beauty. According to the U. S. Forest Service (June 30, 1948) there are seven State forests, 63,372 acres, and six community forests, 2,738 acres.

Except for a small strip of land north of Texas, that territory now known as Oklahoma was organized (1834) as an Indian Territory. White people were barred as settlers. Although there was a large influx of Indians from other parts of the country, a considerable area in the central part of the territory remained unoccupied. This section was purchased by the United States Government and opened to the public (April 22,1889). More than 50,000 persons entered in one day.

Oregon

CAPITAL, Salem—Beaver State—STATE FLOWER, Oregon Grape—MOTTO: None: The Union (appears on State Seal and is unofficially considered as the motto)—AREA, 96,981 sq. mi.—POPULATION (Est. 1948), 1,626,000—RANK: Area, 9th; Population (1940 census), 34th; Admission, 33rd.

Oregon is bounded on the north by Washington, on the east by Idaho, on the south by California and Nevada and on the west by the Pacific Ocean.

It has every character of climate and soil and production known to the temperate zone, the lands ranging from the heavily vegetated coast areas where rainfall is abundant, to the large stretches of semi-arid lands of the southeastern parts. Mt. Hood (11,245 ft.) is the highest point in the State.

The part of Oregon west from the Cascade Range, which has peak elevations up to more than 11,000 feet, is slashed north and south by the Coast Range, a very aged ridge eroded to lower levels.

The coast climate is moderate, while the vast plateau east of the Cascade Range is dryer and colder.

It has important navigation facilities—the Columbia River flowing into the Pacific, and the Snake, running along the northern half of the eastern boundary.

The Bonneville Dam, a gigantic power and navigation project, is situated on the Columbia River at Bonneville, about 40 miles east of Portland. It has created a deep lake 50 miles inland to The Dalles on which ocean-going vessels may navigate.

Into Oregon pour the products of "The Inland Empire," a region comprising 250,000 square miles in Eastern Oregon, Eastern Washington and Northern Idaho, the Columbia being the waterway outlet, and the railways following the water grades from the Empire through the Columbia River Gorge to Portland, the chief port of entry.

Oregon has approximately one-third of the more than one trillion feet of timber standing in the three Coast States: Oregon, Washington, and California, and Oregon's cut of timber is first in the United States, averaging more than 6,600,000,000 board feet annually. In the southwest are found forests of the redwoods, with at least 20 other varieties of timber in abundance, some of it excellent for furniture manufacture, which is a considerable industry.

Crops bring in a greater percentage of Oregon's farm income than livestock. Principal crops are grain, hay and potatoes; the specialty crops include forage, cover crop and vegetable seeds, berries, tree fruits and nuts, flower bulbs, nursery products, flax, hops, sugar beets, vegetables and peppermint. The major livestock industry is cattle, followed by hogs and sheep. The poultry industry is extensive.

Salem is a center for fruit and vegetable canning and frozen food preservation; other canneries are located throughout the Willamette Valley. The salmon fisheries in Astoria and other coast cities are among the world's greatest.

All the basic minerals are found in Oregon. The principal mineral products are sand and gravel, cement, stone and clay products. Other minerals include mercury, gold, silver, copper, lead, iron ore and platinum.

Oregon has more than a score of institutions of higher education, including 14 colleges and universities, two professional schools, five teachers colleges and two junior colleges.

Oregon has been a leader in social legislation. The State was the first to require a minimum wage for women (1913). A fair employment practices act was enacted by the Legislature (1949).

There are more than 60,000 acres devoted to the several scores of State Parks and their recreational facilities. According to the U. S. Forest Service (June 30, 1948) there are 519,000 acres in State forests and 48 community forests totaling 239,386 acres.

Crater Lake, in Crater Lake National Park, reposes in what was once a gigantic volcano. Of an unusual sapphire blue, it is almost six miles in diameter and 2,000 feet deep.

Carrying sea letters granted by George Washington, Captain Robert Gray in his ship, the Columbia (May 11, 1792), sailed into the river which is named after his vessel. He gave the United States by right of discovery sound argument for claiming the vast region drained by the river—the Oregon country.

Through President Thomas Jefferson's efforts Lewis and Clark were commissioned to explore the country (1803). They reached the mouth of the Columbia (Nov. 11, 1805); built Fort Clatsop, a site near where Astoria stands today.

John Jacob Astor's Pacific Fur Company (April, 1811) established a fort, the beginning of Astoria, which fell into British hands during the War of 1812.

Pennsylvania

CAPITAL, Harrisburg—Keystone State—STATE FLOWER, Mountain Laurel—MOTTO: Virtue, Liberty and Independence—AREA, 45,333 sq. mi.; —POPULATION (Est. 1948), 10,689,000—RANK: Area, 32nd; Population (1940 census), 2nd; 2nd of the Original 13 States.

The Commonwealth of Pennsylvania, one of the Middle Atlantic group, is bounded on the north by Lake Erie and New York, on the east by New York and New Jersey, on the south by Delaware, Maryland and West Virginia, and on the west by West Virginia and Ohio.

It is of varied topography, like most Atlantic States, having leveler lands to the east, and rising to higher altitudes to the westward. The Appalachian range traverses the central part from northeast to southwest, a higher mountain region being in the extreme west, and another lower plain running down to the shores of Lake Erie. It has rivers important in navigation—the Delaware, the Allegheny and the Monongahela, which unite at Pittsburgh to form the Ohio.

The Commonwealth has built its industries largely on the basic elements. It produces nearly one-third of the steel of the country, shipping it to all parts of the world. Pittsburgh is the center of the greatest metal production ever attained in one locality. Its supplies of iron ore come mostly from Minnesota, and its operations have made more millionaires than any other single industrial center in the country. The perfected tonnage from Pittsburgh is the heaviest, excepting at New York and Chicago. Electrical goods and equipment are made in Pittsburgh in large quantity. Pennsylvania is a leader in the manufacture of knitted goods, including fine hosiery and many other important textile products.

The State originates one-sixth, and receives one-eighth of all American carload freight.

The bituminous coal annual output averages approximately 136,000,000 tons; anthracite, in production of which the State leads the world, averages more than 60,000,000 tons; and the Commonwealth produces coke, high-grade petroleum, iron ore, pig iron, steel for rails and structural purposes, lime, cement, slate, and other metals and minerals.

Pennsylvania leads in the production of buckwheat. Other important crops are winter wheat, rye, oats, corn, potatoes, tobacco, apples, peaches, pears and grapes. More than half of the farm income of the Commonwealth is derived from dairy products and poultry.

The Commonwealth has 107 institutions of higher education—52 colleges and universities, including University of Pennsylvania, Philadelphia (founded in 1740); 29 professional schools, 14 teachers' colleges, 10 junior colleges and two Negro institutions.

Recent progressive legislation includes measures advancing conservation which includes clearance of pollution and industrial waste from streams, an extensive program for new construction and rehabilitation of the State's general and psychiatric hospitals, and improvement of highways.

There are 92 State parks, 96,572 acres; 23 State forests, 1,675,211 acres, and 97 community forests, 95,848 acres (U. S. Forest Service, June 30, 1948).

The United States was born on Pennsylvania soil. In Philadelphia was adopted the Articles of Confederation; the Declaration of Independence was written and signed there; the Treaty of Peace that ended the Revolutionary War was ratified in that place, and there also later the Constitution of the United States formulated.

Pennsylvania was named in honor of Admiral William Penn, the founder of the province. Penn, a Quaker, received a charter (1631) from Charles II of Great Britain for land in America. The name "Pensilvania" (Penn's Woods) was used for many years by William Penn and his sons, Thomas and Richard, to designate the province.

Penn granted three charters; one (1682), the second one (1683) and the third (1701). Pennsylvania was governed under the latter charter until the Constitution of 1776 was framed during the period of the Revolution.

Jenn's invitation to Continental Europeans to come to his province brought to Pennsylvani mixture of English, Scotch-Irish, Scotch, Ir Welsh, Dutch, French, Swedish and German.

The terms "Commonwealth" as applied to province and "General Assembly" as the offi name for the law-making body of Pennsylva were originated by Penn and remain in the C stitution in force.

The Commonwealth is rich in historic la marks, including Valley Forge and the Battlef of Gettysburg, now national shrines.

The site of Benjamin Franklin's original print shop in Philadelphia is marked with a bro tablet, cemented into the sidewalk in front a building at 135 Market street, Philadelphia. the time of Franklin it was 51 High street.

The Pennsylvania Turnpike, a 160-mile long tomobile highway from Harrisburg to Pittsbu was completed (July, 1940) at a cost of $70,000,0 Extensions to the Ohio line and to Philadelphia are under construction (1949).

Rhode Island

CAPITAL, Providence—Little Rhody—STA FLOWER, Violet—MOTTO: Hope—AREA, 1,214 mi.—POPULATION (Est. 1948), 748,000—RAN Area, 48th; Population (1940 census), 36th; 1 of the Original 13 States.

Rhode Island, of the New England Group the smallest in the United States. It is bounded the north and east by Massachusetts, on the so by the Atlantic Ocean (Block Island Sound) on the west by Connecticut. The official name the State (since July 20, 1776) is "The State Rhode Island and Providence Plantations." W 674.2 persons to the square mile, it is the n densely populated of all the States and is percent urban. It exceeds all others in per ca industrial output.

The principal mineral products are stone, s and gravel, and graphite.

The textile mills account for nearly half value of the products, and the state has import jewelry factories. The first cotton spinning w of this country were established in Pawtucke the 18th century. Providence, Woonsocket, Pawtucket are the chief centers of industry.

The State has eight institutions of higher edu tion—three colleges and universities, three fessional schools and two teachers' colleges.

Recent social legislation includes the Cash S ness Act of 1942, Rhode Island being the first S to adopt such an act. The 1949 Legislature pa a fair employment practices measure.

Newport, on Narragansett Bay, has been decades a famous watering place. Many soci prominent New York families have mansions th Eastons Beach is the center of Newport's sum activities, though an exclusive colony is foun Baileys Beach on the Ocean Drive.

Rhode Island has 38 State parks, 6,762 ac three State forests, 3,407 acres, and six commu forests, 12,487 acres (U. S. Forest Service, J 30, 1948).

The Naval War College is in Newport. Quo Naval Air Station, the Northeastern naval arm and supplier of aircraft carriers is situate the town of North Kingstown on the opposite of Narragansett Bay from Newport.

The first settlement in Rhode Island was m by Roger Williams (1636). Banished for his p ical and religious opinions, to escape deporta to England he fled in the winter to the shore Narragansett Bay, where he founded Provide The second settlement was made at Portsmout William Coddington and his associates (1638)); third at Newport by Coddington and seceders Portsmouth (1639); these two settlements uni (1640) under a single government. The fourth tlement was made in Warwick by Samuel Gc (1642).

These four settlements united under a pe granted (1643-44) to form the Colony of Provid Plantations. A charter was granted the Colon King Charles II in 1663 and the State conti to operate under it until 1843 when the present stitution came into being.

The General Assembly of Rhode Island ado (May 4, 1776, two months before the Amer Declaration of Independence) a resolution nouncing allegiance to the British King and ernment. The vote was almost unanimous.

It was in Pawtucket that Samuel Slater, working for a time in the cotton spinning m Moses Brown, designed new machines and b the first real cotton manufacturing plant in United States (1790). Old Slater Mill, restor its original appearance, is a point of tourist i est.

South Carolina

CAPITAL, Columbia—Palmetto State—ST FLOWER, Yellow Jessamine—MOTTO: Dum S Spero (While I breathe, I hope); also An

Opibusque Parati (Prepared in Spirit and Wealth, or Ready With Minds and Resources)—AREA, 31,055 sq. mi.—POPULATION (Est. 1948), 1,991,000—RANK: Area, 39th; Population (1940 census), 26th; 8th of the Original 13 States.

South Carolina, in the South Atlantic group, is bounded on the north by North Carolina, on the southeast by the Atlantic Ocean, on the southwest by Georgia. Its topography is, like that of North Carolina, mountainous in the western part (maximum 3,548 ft.), a plateau in the central strip and low-lying and sandy toward the 200-mile sea front.

The climate westward is comparatively cool, in the central part medium, and nearer the coast subtropical and humid. Winters are short and mild.

The State ranks high in production of cotton, tobacco and peaches. Other chief crops are corn, oats, sweet potatoes, wheat, and peanuts.

The forests, which occupy 58 percent of the State's area, supply lumber to the East and South, principally yellow pine. Turpentine is an abundant product.

The principal mineral products are stone, raw clay, clay products, sand and gravel; also gold, silver, manganese, iron ore and monazite.

Still basically agricultural, the State is becoming heavily industrialized. Principal industrial cities are Spartanburg, Greenville, Anderson, Columbia, Charleston, Rock Hill, Sumter and Greenwood. Seventy percent of its manufactures is in textiles; others are paper and pulp and allied products, clothing and electric power. Charleston is the port of entry.

There are 33 institutions of higher learning—15 colleges and universities, three professional schools, four junior colleges and 11 Negro colleges.

There are 18 State Parks with an area of 38,000 acres and six State forests comprising 148,000 acres. South Carolina has the longest open hunting season of all the States and is one of the few States in which there is no closed season on fishing.

The first permanent English settlement was made near the present city of Charleston in 1670. South Carolina protested British repressions in 1774 and on March 26, 1776, set up an independent government.

South Carolina played an active part in achieving the independence of the United States. Its representatives in the Continental Congress, particularly Charles Pinckney, were vigorous in their efforts to bring about the convention of 1787, which framed the Constitution of the United States. Pinckney was one of the delegates to the Constitutional Convention, one of the leaders in debate on the proposed Constitution and the proposer of more than 30 of the provisions adopted into the Constitution. Seventy-two years later (Dec. 28, 1860) South Carolina seceded from the Union and joined the Confederate States of America in the Civil War.

Charleston has the Charleston Library Society with a collection of newspapers dating back to 1732; the Chamber of Commerce (founded 1773 at Swallows Tavern), the oldest Chamber of Commerce organization in the United States with the building erected in 1784; the College of Charleston (chartered 1785 and cornerstone of present building erected in 1828); Middleton Place Gardens, the oldest formal gardens in the United States dating back to 1740; the Charleston Museum (founded 1773) and "dictator" John Rutledge's House (built about 1760). The Old Exchange Building houses the first independent government set up in the United States (1774) and a submarine marker in Battery Park commemorates the deeds of the crews of the first submarine ever used in warfare, "Hunley's Boat," used by the Confederates (1863-1865) in Charleston Harbor.

South Dakota

CAPITAL, Pierre—Sunshine State, Coyote State—STATE FLOWER, American Pasque, Anemone, or Mayflower—MOTTO: Under God the People Rule—AREA, 77,047 sq. mi.—POPULATION (Est. 1949), 623,000—RANK: Area, 15th; Population (1940 census), 38th; Admission, 40th.

South Dakota is bounded on the north by North Dakota, on the east by Minnesota and Iowa, on the south by Nebraska, and on the west by Wyoming and Montana. Its climate is that of the temperate zone northern latitudes, cold in winter and hot in summer. The state is divided into nearly equal parts by the Missouri River, which drains all except the extreme northeast corner of the State. The Missouri River's western tributaries, the Grand, Moreau, Cheyenne, Bad and White Rivers are the scene of new irrigation development.

Development of the Missouri Basin for power, irrigation and navigation is in progress. Fort Randall is the site of the first large dam in the project.

The Black Hills are in the west southwest. Harney Peak (7,242 feet) is the highest point in the United States east of the Rockies. The rest of the area is mostly rolling prairie, falling to lower levels in the northeast. Near the Black Hills are the Bad Lands, covering one million acres and containing the most important fossil deposits of prehistoric life. Big Stone Lake in the northeast corner (967 feet above sea level) is the lowest point.

The State is second only to North Dakota in production of spring wheat. Other important crops are corn, cane, oats, rye, barley, flaxseed and the hardier fruits. The production and processing of livestock is an important industry, followed by butter, cheese and flour production, and grist milling.

Gold and silver are mined in quantities in the Black Hills and at Lead is the largest gold producing mine in the United States. The principal mineral products in order of value are gold, stone, cement, sand and gravel. Other minerals are feldspar, mica, lithium and bentonite.

South Dakota has 8,400 square miles in Indian Reservations—the Rosebud, Cheyenne River, Pine Ridge, Standing Rock and Crow Creek-Lower Brule.

South Dakota has 16 institutions of higher learning—seven colleges and universities, one professional school, four teachers' colleges and four junior colleges.

There are 34 State parks, 4000 acres; and four State forests, 84,000 acres (U. S. Forest Service, June 30, 1948).

Recent progressive legislation includes measures permitting jury service for women, increased workmen's compensation and unemployment compensation, county aid to cities for hospital construction, establishment of Rural Electric Associations to provide more electricity for farmers, and increased grants to dependent children and the old age assistance program.

Mount Rushmore in the Black Hills has an altitude of 6,200 feet. Sculptured on the granite face of this mountain are the heads of Washington, Jefferson, Lincoln and Theodore Roosevelt. The busts of these figures are proportionate to men 465 feet tall.

The main tourist attractions are the Black Hills, the site of Wind Cave National Park; two National Forests, South Dakota State Park, largest State Park in the nation; the Stratosphere Bowl where the highest ascent ever made by man originated. Slim Buttes and Cave Hills in the northwestern area; and the Badlands. In the northeastern part of the state a group of lakes afford recreation in swimming, fishing and boating. The Black Hills draw more than a million visitors each year.

Historically, the State dates back to 1743 when the first white men, the Verendrye brothers, Frenchmen, came to the area in search of a route to the Pacific. It was the center of the fur trade during the last century, and historic places of importance dot the area. South Dakota was admitted to Statehood (1889), together with its twin State, North Dakota, after 28 years as a part of the Dakota Territory.

Tennessee

CAPITAL, Nashville—Volunteer State—STATE FLOWER, Iris—MOTTO: Agriculture and Commerce—AREA, 42,246 sq. mi.—POPULATION (Est. 1948), 3,149,000—RANK: Area, 33rd; Population (1940 census), 15th; Admission, 16th.

Tennessee, in the East South Central group, is bounded on the north by Kentucky and Virginia, on the east by North Carolina, on the south by Mississippi, Alabama and Georgia, and on the west by Arkansas and Missouri.

The eastern parts are in the Great Smoky Mountains, the surface sloping toward the west, first to an elevated tableland, then to the bottoms of the Mississippi River, which skirts the western border. Other rivers are the Cumberland and the Tennessee.

The forests cover nearly one-half the State's area and yield half a billion feet of lumber—oak, yellow pine, gum, yellow poplar, hemlock and chestnut.

The principal mineral products are coal, backbone of the State's industrial economy; cement, stone and phosphate rock; others include iron ore, copper, zinc, gold, silver, clay products.

The State contains 3,482 miles of steam railway, 7,653 miles of surfaced highways and 80 airports.

The four largest cities—Knoxville, Memphis, Chattanooga and Nashville—are the chief commercial centers.

Chemicals and textiles and their allied products are the two major industrial groups.

Agriculture is important, the climate and soil permitting a diversity of crops. Important crops are corn, winter wheat, tobacco, cotton, oats, hay, white and sweet potatoes, peanuts and peas.

Tennessee has 49 institutions of higher learning, including eight for Negroes—28 colleges and universities, seven professional schools, five teachers' colleges, and nine junior colleges. Schools for

Negroes include six universities and colleges and two junior colleges.

Recent progressive legislation includes a retirement system for State employees (effectiv July 1, 1947), a strengthened unemployment compensation system, increased State aid to public schools, increased hospital facilities, reduction of working hours for women and minors.

There are 15 State Parks covering 56,590 acres, 11 State forests totaling 163,774 acres, and 20 State-owned lakes, hatcheries and game preserves totaling 315,864 acres.

Norris Dam, 27 miles north of Knoxville on the Clinch river, creates a large and beautiful lake covering more than 80 square miles, with a shore line in excess of 800 miles. The TVA system of dams has provided a series of lakes 650 miles long, which, with tributary projects, comprise around 600,000 acres of water in the Tennessee Valley area, greatly increasing the economic recreational potentialities of the State.

Tennessee has at least three of the nation's outstanding wonders—Reelfoot Lake, the reservoir basin of the Mississippi River formed by an earthquake (1811); Lookout Mountain, a rock-faced promontory carved by the currents of the Tennessee River and overlooking Moccasin Bend, at Chattanooga; and the Great Smoky Mountains National Park which is about equally divided between North Carolina and Tennessee.

Other points of tourist interest include the Fall Creek Falls with a water-drop of 256 ft. (highest east of the Rockies); Rock House Creek Falls, 125 ft.; and Cove Creek Falls, 85 ft.—all in the Fall Creek Falls Recreational Area, 13 miles west of Pikeville.

Explored by DeSoto in 1541, Tennessee was first settled in 1757. Originally a part of North Carolina, the area now comprising this State was ceded to the United States (1784) as part of the Territory South of the Ohio. Uncertainty of federal acceptance of the cession led the inhabitants to form their own government under John Sevier and Landon Carter following a convention in Jonesboro (Aug. 23, 1784). The region existed as the State of Franklin (or Frankland) until March, 1788, when Sevier's term as President expired, but the State continued to exist informally until February, 1789, when Sevier took an oath of allegiance to North Carolina. Tennessee was a territory of the United States (1790-1796) and was admitted into the Union (June 1, 1796) as the 16th State.

Texas

CAPITAL, Austin—Lone Star State—STATE FLOWER, Bluebonnet—MOTTO: Friendship—AREA, 267,339 sq. mi.—POPULATION (Est. 1948), 7,230,000—RANK: Area, 1st; Population (1940 census), 6th; Admission, 28th.

Texas, of the West South Central group, is bounded on the north by New Mexico and Oklahoma, on the east by Oklahoma, Arkansas, Louisiana and the Gulf of Mexico, on the south by the Gulf and Mexico, and on the west by Mexico and New Mexico. It is the largest State, its length and breadth at the most extreme points measuring approximately 775 by 800 miles (airline distance).

In the western part it is mountainous, the "Staked Plains" lying in the northwest, a great prairie in the central portion, and a lower-lying region nearer to the Gulf.

The most notable canyon is the Santa Elena on the Rio Grande in Brewster County, with a 1600-foot vertical wall.

The "Panhandle" is the northern tip of Texas, and is so called because it appears on the map to form the handle of a giant pan. Its chief forestation is in the eastern part, and its native trees are in great variety. Texas has a great diversity of climate, ranging from temperate to subtropical. Irrigation has produced a man-made Paradise in the "Magic Valley" of the Lower Rio Grande, where citrus fruits and vegetables are grown.

Houston, Beaumont, Port Arthur, Texas City, Corpus Christi, Port Aransas and Galveston are leading deepwater ports.

The State has more than 600 airports and in excess of 7,000 licensed civilian aircraft. Brownsville is an important commercial air terminal as well as a growing deepwater port.

Texas is the leading cotton growing State; ranks second in peanut production and citrus fruits. Other large crops, of the approximately 50 produced on a commercial scale, are: corn, winter wheat, oats, sorghum, potatoes, rice, tomatoes, pecans and onions. The fruits, in addition to the citrus group, include peaches, apples, cantaloupes, dates, figs, strawberries and blackberries. The largest rose-growing center in the world is near Tyler.

The Texas cotton crop is the most valuable crop grown in a single political subdivision in the world, and represents about 53 per cent of the total crop value of the State. Its average annual value approaches the total value of the production of the gold, silver, zinc, lead and copper mines of the United States.

The State leads in petroleum production with a huge output, and leads also in production of helium, beside yielding an immense amount of natural gas, sulphur and coal. There are also quantities of gypsum, granite, sandstone, limestone, silver and potash.

Texas ranks first in beef cattle, sheep, mules and average wool and mohair production, and ranks high in the value of all livestock, including horses and turkeys.

Texas has 78 listed institutions of higher education, including 10 for Negroes—32 colleges and universities, five professional schools, seven teachers' colleges, and 34 junior colleges.

Recent progressive legislation includes provision for increased educational opportunities for Negroes (1948), creation of the Good Neighbor Commission of Texas (1943), designed to further inter-American good will; a bill providing for a construction program of farm-to-market roads (1949).

There are 37 State Parks, five State Forests, 500 Roadside Parks maintained by the State for the traveling public, and the State has deeded 691,978 acres to the U. S. Government for a National Park to be situated in the Big Bend Country of Southwest Texas. Mexico will cooperate by creating a corresponding national park on its side of the Rio Grande River.

Texas revolted from Mexico (1836) and became a Republic. Six flags have flown over the State in the following order: Spanish, 1519-1685; French, 1685-1690; Spanish, 1690-1821; Mexican, 1821-1836; Republic of Texas, 1836-1845; United States, 1845-1861; The Confederacy, 1861-1865; the United States from 1865.

About 20 missions, of which a handful are still standing, were built in Texas (1690-1791) by the Spanish for the double purpose of converting the savages and holding the territory for Spain. They were the first outposts of European civilization and contributed materially to the conversion of Texas from a wilderness to a civilized country.

The Alamo (founded in 1718) by the Franciscan monks, in the heart of San Antonio, is a Texas shrine. There 187 Texans lost their lives (Mar. 6, 1836) in a vain effort to prevent the Mexicans from invading Texas.

The San Jacinto Monument on San Jacinto battlefield, 18 miles from Houston, commemorates the victory of the Texans under Sam Houston over the Mexicans under Santa Anna. The shaft, rising 570.4 feet, is the tallest in the world. The base of the monument houses the San Jacinto Museum.

Utah

CAPITAL, Salt Lake City—Beehive State—STATE FLOWER, Sego Lily—MOTTO: Industry—AREA, 84,916 sq. mi.—POPULATION (Est. 1948), 655,000—RANK: Area, 10th; Population (1940 census), 41st; Admission, 45th.

Utah, of the Mountain group of the Far West, is bounded on the north by Idaho and Wyoming, on the east by Wyoming and Colorado, on the south by Arizona, and on the west by Nevada. The State's most prominent topographical feature is the Wasatch Mountain Range trending north and south between the Great Basin and the Colorado River drainage area. The highest peak is Kings Mountain (13,498 feet). Otherwise the greater part of the State is a plateau 6,000 feet above sea level. The rivers are useful only for irrigation, more than 1,300,000 acres being under water. The Great Salt Lake, salt being 25-27% of the fluid content, is in the northwest part, altitude 4,218 ft., and has no known outlet. Its area is estimated at 1500-1750 square miles. The "Great American Desert" lies in the northwestern corner of Utah, reaching over into Nevada.

The climate is dry, stimulating and wholesome, warm in summer, rather cold in winter, and the sky is clear and cloudless 300 days a year.

The State's income from agriculture has increased greatly in recent years. The principal livestock items are dairy products, turkeys and poultry products, lambs and wool. Alfalfa, wheat, sugar beets, barley and potatoes are the chief crops.

Utah's principal mineral products are copper, coal, zinc and lead, gold, petroleum, sulphur and salt; also uranium, vanadium, semi-precious stones, marble, and onyx.

Since World War II, Utah has become an important factor in the steel market. The giant Geneva Steel Mills has a current capacity of 1,250,000 tons per year.

The State has no bonded indebtedness.

There are 10 institutions of higher learning—five colleges and universities, one professional school and four junior colleges.

Recent social legislation includes a retirement system for all city, county and State employees.

The Latter Day Saints number three-fourths of all church membership. The Mormons reached Utah (July 24, 1847) from the Midwest, being

driven out by persecution. Salt Lake City, the capital, has several structures built by the church, among them the Tabernacle, seating 12,000, and the Temple.

For coloring and unusual erosional formations the canyon country of southwestern Utah and northern Arizona has no equal. The canyons themselves are stupendous in size and formation, and of brilliant hues. It is in this country that Zion and Bryce Canyon National Parks and Cedar Breaks National Monument are situated. Zion National Park was, prior to its reservation, a national monument, called by the Indian name of the river, Mukuntuweap. The monument was enlarged (March 18, 1918) by President Wilson and the name changed to Zion. Geological history of a billion years is exposed in the rocks of these parks.

In Bryce Canyon the rim road is on the highest tread of a giant rock stairway that, as viewed from Rainbow Point, leads downward in steps 30 to 400 feet high to the flat lands 3,000 feet below.

Vermont

CAPITAL, Montpelier—Green Mountain State—STATE FLOWER, Red Clover—MOTTO: Vermont; Freedom and Unity—AREA, 9,609 sq. mi.—POPULATION (Est. 1948), 374,000—RANK: Area, 42nd; Population (1940 census), 46th; Admission, 14th.

Vermont, New England's only inland State, is bounded on the north by Canada, on the east by New Hampshire, on the south by Massachusetts, and on the west by New York. The Green Mountains run north and south through the State. Lake Champlain, which forms most of the Western boundary, more than 100 miles long and in places 12 miles wide, is the largest body of fresh water east of the Great Lakes. The boundary on the east was officially decided (1937) to run for 200 miles along the Connecticut River, the New Hampshire line extending to the original low water line on the west bank.

The climate is cool and the atmosphere dry. The summer season, between frosts, is from 110 to 160 days, according to location and altitude.

In the State there are more than 900 peaks with an altitude of 2,000 feet or more above sea level, Mt. Mansfield (4,393 feet), is the highest point. There are more than 400 lakes in the State.

Preeminently a dairy state, it is as well suited to diversified farming and fruit growing. Its ratio of dairy cows per capita is among the highest in the nation. Both in quantity and quality Vermont leads the maple-production states (nine) with a normal yield of about 40% of the production. The apple crop is of notable quality with more than 382,000 bearing trees in the orchards.

The principal mineral products are stone, slate, copper and talc, and the State is a heavy producer of asbestos.

Vermont has 14 institutions of higher learning—eight colleges and universities, including the University of Vermont, chartered in 1791; three teachers' colleges and three junior colleges.

Forty-four State Forests and Forest Parks cover about 77,951 acres, and the National Forest will contain about 500,000 acres. The recreational activities of Vermont extend through the four seasons. The Long Trail is famous for hiking, and there are 1,000 miles of bridle trails and abundant hotel facilities.

The romantic history of the State's early days hinges on the activities of the Green Mountain Boys, a force of militia organized about 1764.

When the Revolutionary War broke out and news of Lexington and Concord was received, many of these militiamen started at once and joined the Colonial forces around Boston. Those who remained at home joined the forces of Ethan Allen and (May 10, 1775) captured Fort Ticonderoga—a most important victory to the army of the Colonies. At a convention in Westminster (Jan. 1777) Vermont was declared an independent State and the name of New Connecticut was adopted. The following June the name was changed to Vermont. Bennington Monument (302 feet), commemorates the battle of Bennington (Aug. 16, 1777), the turning point of the Revolution.

Thomas Chittenden was elected Governor (March 3, 1778) in the first election under the Constitution. The first session of the Legislature was held (March 12, 1778). The State existed as a republic for 14 years until its difficulties in regard to boundaries and sovereignty were solved. The State was admitted to the Union (March 4, 1791) being the first after the original thirteen. Montpelier was chosen as the capital (1805), and the first session of legislature was held there (1808).

Virginia

CAPITAL, Richmond—Old Dominion—STATE FLOWER, American Dogwood—MOTTO: Sic Semper Tyrranus (Thus Always to Tyrants)—AREA, 40,815 sq. mi.—POPULATION (Est. 1948), 3,029,000—RANK: Area, 35th; Population (1940 census), 19th; 10th of the Original 13 States.

The Commonwealth of Virginia is bounded on the north by West Virginia and Maryland, on the east by Maryland and the Atlantic Ocean, on the South by North Carolina and Tennessee, and on the west by West Virginia and Kentucky. The territory, which once included Illinois, Indiana, Ohio and Kentucky, was further reduced by the establishment of West Virginia (1863) in the Civil War.

The State's topography is varied. The Coastal Plain, known as the Tidewater, consists of four peninsulas averaging 70 miles in length and 10 to 15 miles wide, formed by Chesapeake Bay and the Potomac, Rappahannock, York and James Rivers. The central part of the State, known as the Piedmont, rises to the Blue Ridge Mountains. Between this range to the north and the Alleghenies lies the Shenandoah Valley, an excellent farming region. Extending far to the west of the body of the State is Southwest Virginia which includes mountains 5,000 feet high and many fertile valleys. Highest point in the Commonwealth is Mt. Rogers (5,719 ft.)

The climate varies, being generally warm in the eastern coastal region with ordinarily mild winters, and much colder in the high lands in the west.

Virginia is one of the leading tobacco and apple producing States. Other important crops are corn, winter wheat, cotton and peanuts. Smithfield hams, from peanut-fed hogs, are world famous.

Livestock, dairying and turkey-raising are important industries and the Piedmont is noted for its thoroughbred horses.

Virginia's principal mineral products are coal, stone, sand, gravel and zinc; also titanium, cement, clay, feldspar, gypsum, lead, manganese, mica, pyrite, and salt.

Leading manufacturing centers are Richmond, Hopewell, Norfolk, Roanoke and Lynchburg. Leading industrial activities are cigarette making (Richmond is the world's largest center of that activity); chemical plants, furniture, lumbering, cotton textiles and shipbuilding. At Newport News, at the mouth of the James River, is one of the largest shipbuilding plants in the country, and the city also has great coal piers. Hampton Roads is the major port of entry.

The State lists 42 institutions of higher education, including six for Negroes—19 colleges and universities, seven professional schools, three teachers' colleges, and 13 junior colleges.

There are eight State Parks with a combined area of approximately 26,150 acres. The State also has six State forests, 7,010 acres, and 50 community forests, 45,482 acres (U. S. Forest Service, June 30, 1948). Other recreational facilities include the Shenandoah National Park in the Blue Ridge Mountains through which runs the Skyline Drive of 107 miles, and many seashore resorts. Best known of the latter is Virginia Beach, on the Atlantic Ocean near Norfolk.

Virginia is proud of its history. The first permanent English settlement was at Jamestown (1607). At Yorktown the American Revolution actually ended (1781) with the surrender of a British army. The Commonwealth was the scene of many campaigns in the Civil War and the war closed with the surrender of Lee's army (April, 1865) at Appomattox Court House near Lynchburg.

Virginia has been the birthplace of eight presidents (including Harrison, Taylor and Wilson elected from other States). Its principal shrines are Mount Vernon, Washington's home; Monticello, Jefferson's home near Charlottesville; Arlington National Cemetery, and a number of National Military Parks. The restoration of Williamsburg as the colonial capital of Virginia, by John D. Rockefeller, Jr., reproduces Colonial life.

Washington

CAPITAL, Olympia—Evergreen State, Chinook State—STATE FLOWER, Rhododendron—MOTTO: Al-ki (Bye and Bye)—AREA, 68,192 sq. mi.—POPULATION (Est. 1948), 2,487,000—RANK: Area, 19th; Population (1940 census), 30th; Admission, 42nd.

Washington, of the Pacific group, is bounded on the north by British Columbia, on the east by Idaho, on the south by Oregon, and on the west by the Pacific Ocean. It has the Columbia River as southern boundary line for 300 miles from the west, and many streams of importance, mostly for irrigation uses, with the Snake River in its eastern reaches.

The Cascade Mountains cut through the western third of the State, extending north and south. Averaging 6,000 feet at the crest, there are a number of snowcapped peaks, of which Mt. Rainier (14,408 ft.) is the highest. The rugged Olympic Mountains, rising to 8,000 feet, occupy the Olympic Peninsula between the Pacific and Puget Sound.

The geology is the same as that of Oregon—arid and semi-arid lands in the east, interspersed

with fertile portions, and west of the Cascades the rainfall ranges from 20 to 80 inches with a resultant profusion of vegetation.

In the northwestern third of the State the great Puget Sound, with tortuous shores and innumerable harbors, on which Seattle, Tacoma, Everett, Olympia and other important cities are situated, is a great commercial center. It is the nearest American gateway to the ports of Asia, handles the bulk of the shipping to and from Alaska and has a heavy trade via the Panama Canal. Seattle is the largest city and chief port.

Agriculture is the chief occupation. The State leads by far in the production of apples. Other important crops are wheat, barley, oats, corn, potatoes, pears, peaches, peas and hops. Huge herds of cattle and sheep graze throughout the State.

Principal mineral products in order of value are cement, coal, sand and gravel, stone. Gold, silver, lead, mercury and zinc also are mined. Also found are clays, antimony, arsenic, tungsten and platinum. Aluminum refining has become an important industrial activity.

Washington's fisheries rank high among the States, exceeded only by California and Massachusetts in quantity and value of the annual catch. Landings average between 150-200,000,000 pounds annually, including salmon, halibut, crab, albacore tuna, rock cod and others.

Standing timber includes Douglas fir, yellow pine, white pine, spruce, larch, cedar and many others. Washington is a leader in lumber output, shipping the product all over the world, much going to the North Atlantic States via the Panama Canal and going by rail to the Central West.

There are 23 institutions of higher education—12 colleges and universities, four teachers' colleges and seven junior colleges.

The Grand Coulee Dam, on the Columbia River, is a part of the Columbia River Reclamation Project and ultimately will irrigate 1,200,000 acres of land and regulate the flow of the river and develop electrical power for use on the project and elsewhere. Another, Bonneville Dam, is situated at the head of tidewater on the Columbia River and provides deep water transportation as far as The Dalles. A third, the McNary, is under construction at Umatilla.

The State has two national parks, Mt. Rainier, one of the principal tourist attractions, and Olympic National Park. Washington also has 75 State parks, 54,594 acres; two State forests, 290,000 acres, and 13 community forests, 90,016 acres (U. S. Forest Service, June 30, 1948).

Mt. Rainier, named after the British Admiral, Peter Rainier, who figured in the American Revolution, is the third highest mountain in the continental United States. This inactive volcano covers 100 square miles, approximately one-fourth of the area of the National park in which it is located. Its glacier system, 28 in all, comprises 40 square miles of ice from 50 to 500 feet thick.

West Virginia

CAPITAL, Charleston—Mountain State, Panhandle State—STATE FLOWER, Rhododendron—MOTTO: Montani Semper Liberi (Mountaineers Always Free)—AREA, 24,181 sq. mi.—POPULATION (Est. 1948), 1,915,000—RANK: Area, 40th; Population (1940 census), 25th; Admission, 35th.

West Virginia became the 35th State in the Union (June 20, 1863) formed of the western counties of Virginia. It is bounded on the north by Ohio, Pennsylvania, and Maryland; on the south by Virginia and Kentucky; and on the west by Kentucky and Ohio.

It is essentially mountainous, the Appalachian Range having several spurs therein. Its western parts drain into the Ohio River, and its eastern portions down the Potomac River to the Atlantic Ocean. The climate is moderate, and between the north and south extremes.

The State is a heavy producer of soft coal, natural gas, petroleum and stone. Industrial manufactures include iron and steel products, glass and glassware, chemicals and chemical products. There are large chemical plants in the Kanawka and Ohio River valleys, based on salt brines.

West Virginia produces more hardwood than any other State, excepting Arkansas, and has vast timber wealth, including yellow poplar, birch, ash, oak, spruce, hemlock and walnut.

The chief agricultural products are corn, oats, wheat, hay, potatoes, tobacco, apples, peaches, plums and grapes. Recent years have seen the development of grazing with the introduction of much purebred stock.

West Virginia has 19 institutions of higher education—nine colleges and universities, five teachers' colleges, two junior colleges and three Negro colleges.

Recent acts of the West Virginia Legislature include consideration of an amendment to the State Constitution granting cash bonuses to veterans of World Wars I and II, substitution of the electric chair for hanging as the method of capital punishment, secondary road improvement, liberalization of Workmen's Compensation and Unemployment Compensation laws, and increased financial support for the State's mental and other institutions.

There are 13 State Parks and six State Forests providing all types of recreational and vacation facilities. Camping sites and trails are available in the Monongahela National Forest. State-inspected tourist camps and hotels are contiguous to all recreational areas.

White Sulphur Springs, in Greenbrier County, for years has been world famous as a spa.

The crisis of the American Revolution found the pioneers forced to wage war against the British from the sea and the Indians from beyond the Ohio. The settlers took part in the Indian war which ended at the battle of Fallen Timbers (Aug. 20, 1794) where Gen. Anthony Wayne broke the power of the savage.

With the opening of the Civil War (1861) the first engagement of the war took place at Philippi (June 3, 1861). Battles and skirmishes took place almost continuously thereafter in West Virginia until 1865.

Wisconsin

CAPITAL, Madison—Badger State—STATE FLOWER, Violet—MOTTO, Forward—AREA, 56,154 sq. mi.—POPULATION (Est. 1948), 3,309,000—RANK: Area, 25th; Population (1940 census), 13th; Admission, 30th.

Wisconsin, of the East North Central group, is bounded on the north by Lake Superior and Michigan, on the east by Lake Michigan, on the south by Illinois, and on the west by Iowa and Minnesota. The western boundary includes also the Mississippi and St. Croix rivers. It has the characteristic climate of the northern tier of States, cold in winter and pleasant in summer, dry and stimulating.

The principal mineral products are stone, sand and gravel, iron ore and zinc.

Agriculture is a leading industry in Wisconsin and is well diversified. The State is first in the production of dairy cattle, milk, manufactured milk products, including cheese and condensed products; hemp, tame hay, peas, sweet corn and beets for canning. It produces large crops of corn, oats, barley, cucumbers for pickles, cabbage, sugar beets, potatoes, onions, and cigar wrapper tobacco. There are large crops of cranberries, cherries, apples, strawberries, and plums.

Principal manufactures include motor vehicle parts and accessories, paper and paperboard mills, tractors, footwear, textiles; generating, distribution and industrial apparatus; saw mills, veneer mills and cooperage stock mills. Chief industrial centers are in the southeastern corner of the State. Milwaukee, one of the chief ports of entry; West Allis, Racine, Kenosha, Janesville, Beloit and Madison.

Superior, at the head of Lake Superior, opposite Duluth, Minn., is the main terminus of the Great Northern Railway, and has great ore, lumber, wheat and coal dockage, with considerable manufacturing of iron products.

The State has 39 institutions of higher education—15 colleges and universities, seven professional schools, 13 teachers' colleges and normal schools and four junior colleges.

There are 12 State Parks, eight State Forests and a number of roadside parks and State historical and memorial sites totaling 273,000 acres. The scenic and recreational resources of Wisconsin are accessible over 85,000 miles of highways and nearly 7,000 miles of railroads, plus growing airport facilities.

The Wisconsin Unemployment Compensation Act (1934) was the first adopted by any State.

Wisconsin was the first State to set up (1917) a cooperative crop reporting organization jointly with the Federal Government—a system which has since been adopted by many States.

The 1945 Legislature set up a segregated highway fund to receive all funds from registration and other highway operations. It also enacted a fair employment practices act. The Legislature passed the "Youth Service Act" (1947) to combat delinquency, with the emphasis on prevention, created a veterans' housing authority; establishing a bureau to survey the problems and aids in alcoholism; and consolidated municipal and state retirement systems.

Jean Nicolet was the first white man known to set foot on Wisconsin soil. He arrived at the mouth of the Fox River (1634) and landed either at Red Banks or at Dotys Island up the river near Neenah, according to Jesuit missionary reports.

Wyoming

CAPITAL, Cheyenne, Equality State—STATE FLOWER, Indian Paint Brush—MOTTO: Cedant Arma Togae (Let Arms Yield to the Gown)—AREA, 97,914 sq. mi.—POPULATION (Est. 1948

301,000—RANK: Area, 8th; Population (1940 census), 48th; Admission, 44th.

Wyoming, a Mountain Group State, is bounded on the north by Montana, on the east by South Dakota and Nebraska, on the south by Colorado and Utah, and on the west by Utah, Idaho and Montana. It is a lofty region, its mean elevation about 6,000 ft.—a broad plateau traversed by the Rocky Mountains, highest point of which is Mt Gannett, 13,785 ft. The Teton Range, 40 miles in length, constitute a practically insuperable barrier and were noted landmarks to early 19th Century explorers and trappers. The Tetons have 11 peaks of major rank.

Its waters flow in all directions, drainage by the Green River to the southwest, by the Yellowstone and Snake Rivers to the northwest, by the Big Horn to the north, and by the North Platte, Sweetwater and Laramie Rivers to the southeast, none of them navigable.

The climate is typical of the rarefied air of high elevations, with rather severe winters and pleasant summers. Annual mean precipitation 12-15 inches.

Great mineral resources, not fully developed, include coal, petroleum, bentonite, gold, silver, iron and copper. The State's coal resources are several times greater than those of any other State and it is estimated that the known deposits are sufficient to supply the present world demand for centuries. The principal mineral products in order of present value are petroleum, coal, natural gas and natural gasoline. Casper is the headquarters for more oil compnies than any other city in the United States with the exception of Tulsa.

Sixty-five percent of Wyoming's people gain their livelihood directly or indirectly from farm or ranch. The crops, produced by dry land and irrigated farming, include beans, corn, wheat, oats, potatoes, sugar beets, hay, alfalfa and fruit. Since the days of the cattle kings the State has been recognized as one of the greatest of livestock States; 1,500,000 head of fine beef cattle and 3,500,000 head of sheep and lambs graze on the prairies, ranches and farms. The wool clip is of great value. Dairying is important in several sections.

The largest reclamation project in the nation's history, development of the Missouri River Basin which includes half the State of Wyoming, is under way and will continue for several years. The development includes construction of some 20 major dams, reservoirs and power plants, which will double the State's irrigated acreage.

The University of Wyoming is in Laramie, and there is one junior college.

The first guaranty of equal suffrage to women in the United States was contained in the Act of 1869 of the Territorial Legislature of Wyoming.

There are two National Parks, famous Yellowstone National Park (3,472 sq. mi.), the oldest and best known (set aside in 1872); and Grand Teton National Park. There are 11 National Forests, 9,000,000 acres of which are within the State; and a number of national monuments and hot springs. Jackson Hole Wildlife Park, stocked by fish and game experts in cooperation with the New York Zoological Society, is an unusual wildlife preserve and zoological garden.

The Yellowstone region was discovered by John Colter (1807). The first white settlement (established about 1834) was old Fort Laramie, now a national monument. Up to the beginning of the last century, Indians held undisputed sway over the Jackson Hole basin, literally a "happy hunting ground" in the Toris Teton region.

District of Columbia

City of Washington is co-extensive with District of Columbia—OFFICIAL FLOWER, American Beauty Rose—MOTTO: Justitia Omnibus (Justice to All)—AREA, 69 sq. mi.; rank 49th—POPULATION (1940 census), 663,091; rank, 37th; (Census Est. 1947), 861,000.

The District of Columbia is the seat of the Federal Government of the United States. Its area was originally 100 square miles taken from the sovereignty of Maryland and Virginia. Virginia's portion south from the Potomac was ceded (1846) back to that State. It lies on the west central edge of Maryland on the Potomac River, opposite Virginia. The District is co-terminus with the City of Washington.

Almost the entire activity is governmental. Industrial activity is output for governmental or local consumption. Navigation is carried on via the Potomac River, a branch of Chesapeake Bay.

To insure that the national capital should be free from local control, the Constitution provides that Congress shall exercise exclusive legislation therein. After various experiments, Congress (in 1878) created the present form of government, which consists of a commission of three members, two residents of the District appointed by the President and confirmed by the Senate, and one detailed from the corps of engineers of the Army. Each House of the Congress has a Committee on District of Columbia, and taxation current and for improvements is chiefly borne by the residents.

Residents of the District of Columbia, as such, do not vote on either national or municipal matters. Persons residing in the District of Columbia appointed to governmental positions do not give up their voting residence in the States. The laws of the various States permit them to vote as residents of such States.

Proposals for a "federal town" for the deliberations of the Continental Congress were made in 1783, four years before the adoption of the Constitution that gave the Confederation a national government. Rivalry between northern and southern delegates over the town appeared in the First Congress, meeting in New York in 1789. John Adams, presiding officer of the Senate, cast the deciding vote of that body for Germantown, Pa. In 1790 Congress compromised by making Philadelphia the temporary capital for ten years. The Virginia members of the House wanted a capital on the eastern bank of the Potomac; they were defeated by the Northerners, while the Southerners defeated the Northern attempt to have the nation assume the war debts of the 13 original states, the Assumption bill fathered by Alexander Hamilton. It is recorded that by diplomatic methods Hamilton and Jefferson arranged a compromise; the Virginia men voted for the Assumption bill, and the Northerners conceded the capital to the Potomac. President Washington chose the exact site after visiting many others in October, 1790, and personally persuaded landowners to sell their holdings to the government at £25, then about $66, an acre.

Washington appointed Pierre Charles L'Enfant, a French engineer who had come over with Lafayette, to plan the capital on an area not over 10 miles square. The L'Enfant plan was considered grandiose, for streets 100 to 110 feet wide and one avenue 400 feet wide and a mile long on the Potomac pastures seemed foolhardy. But Washington endorsed his plans. When L'Enfant ordered a wealthy landowner to remove his new manor house because it obstructed his vista, and demolished it when the owner refused, Washington had to step in and dismiss L'Enfant.

On Sept. 18, 1793, the corner stone of the north wing of the Capitol was laid by President Washington. The occasion was expected to drum up sales of city lots, but there were few purchasers. Washington bought several lots. In the next few years Robert Morris and others invested. By 1799 the Senate wing of the Capitol had been roofed, the walls of the President's house were up and the Treasury building was ordered. On June 3, 1800, President John Adams moved to Washington and on June 10, Philadelphia ceased to be the temporary capital. Here in half-finished public buildings, a scattering of houses, huts and workers' shantles, along weedy paths and muddy river flats, the young government developed the capital that is today one of the world's great cities.

For details of buildings see section on Washington, D. C.

The Mount Vernon Memorial Highway begins at the Arlington Memorial Bridge, on Columbia Island, and extends approximately 15 miles along the Virginia shore of the Potomac to Washington's home, Mount Vernon.

Winding through Virginia countryside and affording vistas of the Potomac, this highway passes many places of historic interest. The ruins of Abingdon, originally the home of the Alexander family, for whom the city of Alexandria was named, and also the birthplace of Nelly Custis, Martha Washington's grand-daughter, overlook the other famous sites.

In Alexandria the highway passes Christ Church, where Washington and Lee worshipped, and many other places of historic and patriotic interest. Below Alexandria the highway passes Wellington, the former home of Tobias Lear, secretary to the first President, and Fort Hunt, one of the Civil War defenses of the National Capital. Across the Potomac is Fort Washington, designed by L'Enfant and still an active military reservation.

The District of Columbia has 25 institutions of higher learning—10 colleges and universities, including George Washington University, Georgetown University; six professional schools; one teachers college, six junior colleges and two institutions for Negroes.

ORGANIZED TERRITORIES OF THE UNITED STATES

Alaska

CAPITAL, Juneau—Territorial Flower, Forget-me-not—AREA, 586,400 square miles—POPULATION, (Est. 1948), 92,000.

Alaska, an Organized Territory of the United States, occupies the northwestern part of the North American continent, with all the islands near its coast, including the Aleutian Islands, Kodiak, St. Lawrence, Nunivak and the Pribilofs. It is bounded on the north by the Arctic Ocean, the east by the Yukon Territory of Canada and British Columbia, the southwest by the Pacific Ocean and on the west by Bering Sea and the Arctic Ocean.

Southeast Alaska is a narrow strip between Canada and the Pacific Ocean, and includes the Alexander Archipelago. The Yukon (1,800 miles) is the principal river. Its chief tributaries are the Tanana, Porcupine and Koyukuk.

Affected by the warm Japanese current, the coastal temperature rarely falls below zero and rises to 80 degrees in the summer. The section has abundant rainfall. In the interior there is a difference of 150 degrees between winter and summer temperatures; in some parts 70 below in winter and 100 above in summer.

There are 27 incorporated towns in Alaska. Those of 1,000 or more population include: Anchorage (20,000), Fairbanks (12,000), Juneau (7,000), Ketchikan (7,000), Sitka (2,000), Nome (1,600), Palmer (1,500), Cordova (1,500), Petersburg (1,500), Wrangell (1,500), Seward (1,500), Kodiak (1,200).

By race, the 1939 census figures show 39,170 white population, and 32,458 native stock, composed of Eskimos, Indians and Aleuts.

Alaska has vast forests along the coasts, of which more than 21,000,000 acres are in forest reservations, from which the total annual cut is approximately 75,000,000 board feet. The total estimated timber volume is 84,700,000,000 board feet.

Alaska is served by the Alaska Railroad, river boat services, four steamship companies and 35 airline carriers.

Alaska's fisheries comprise a leading industry, producing salmon, halibut, herring and shellfish. Fur farming and seal killing are important, and the Pribilof Islands are world famous for seal skins. Coal and petroleum production is increasing.

Gold is mined in southeast Alaska, along the Yukon River and at Nome.

Trade is almost entirely with the United States. Alaska's imports being chiefly food and manufactures, and exports gold and silver, fishery products and furs.

Alaska's eduational system includes the University of Alaska, near Fairbanks; over 100 elementary day schools, 37 rural and 18 city high schools, and several vocational schools.

Alaska is governed by a legislative assembly of 16 senators, elected for four-year terms, and 24 representatives, elected for two-year terms, and the Congress of the United States which has reserved to itself the right to legislate on certain subjects. Alaska has one Delegate in Congress, elected biennially, but he has no vote. The Governor is appointed by the President.

Alaskans expressed their desire for statehood in the 1946 elections, voting 9,630 for, 6,822 against. A bill to grant statehood was reported out unanimously to the 80th and 81st Congresses.

The Territorial Legislature enacted (1949) a system of basic tax legislation consisting of income, property and license taxes, set up a number of Eskimo scout units under the National Guard system, created a department of fisheries, and enacted model social legislation, including child labor regulation and provision for hospital care of tuberculosis patients.

Mt. McKinley National Park 3,030 square miles, (established 1917) was created primarily to protect the great herds of mountain sheep and caribou on this part of the Alaska Range. Mt. McKinley (20,300 feet above sea level) is the highest mountain in North America and one of the loftiest in the world. The park also contains Mt. Foraker (17,000 feet), Mt. Russell (11,500 feet), and four large glaciers.

Located on the Alaska Peninsula near Katmai is the Valley of 10,000 Smokes, so named because of the constant discharge of vapor from lands thick with volcanic formations.

Alaska is a hunter's paradise. Rivers and lakes afford excellent fishing and deepsea "strip-fishing" for salmon has become a favorite sport in Southeastern Alaska.

As early as 1855 Russia offered to sell the territory to the United States, but the offer was declined. During President Buchanan's administration negotiations for purchase were opened, but were called off by Russia after an offer of $5,000,000 had been made. Credit for the final purchase of Alaska is given William H. Seward, Secretary of State under President Johnson. The treaty of purchase was signed at 4:00 a.m., March 30, 1867 and sent to the Senate for ratification. Articles were exchanged and the treaty proclaimed by President Johnson, June 20, 1867. Formal transfer of the territory took place at Sitka (Oct. 18, 1867). The purchase price was $7,200,000. At first a district (or unorganized territory), by an act of Congress (approved August 24, 1912) Alaska was made a Territory.

Hawaii

CAPITAL, Honolulu—AREA, 6,435 sq. mi.—POPULATION (Est. 1948), 540,500.

Hawaii—the crossroads of the Pacific—consists of 20 islands, nine of them inhabited, lying in the North Pacific Ocean in longitude 154° 40'—160° 30' west, latitude 22° 16'—18° 55' north, and more than 2,000 miles from the nearest mainland. The group extends for 390 miles from northwest to southeast, comprising 6,454 square miles of which 6,441 are land and of which 4,021 are in Hawaii. Principal islands in the Hawaiian group are **Hawaii, Oahu, Kahoolawe, Lanai, Maui, Molokai, Kauai** and **Niihau.** The outlying islands of **Kure** and **Palmyra** are included in the Territory. Others, including **Baker, Canton, Enderbury, Howland, Jarvis, Johnston** and **Midway,** with an area of 28 square miles, are not under the jurisdiction of the Territory, but often included for census purposes.

The islands are mountainous and volcanic in origin, filled with extinct craters, Haleakala on Maui being one of the largest in the world. Largest of the active group is Kilauea (altitude 4,090 ft.) with its "pit of eternal fire;" a wonderful feature of the Hawaiian National Park. The two highest peaks are Mauna Kea (13,784 feet) and Mauna Loa (13,680 feet) on Hawaii.

Honolulu, on the Island of Oahu, is the capital, and chief port and commercial city of the islands. It has never been hotter than 90 degrees or colder than 52 degrees in the history of the U. S. weather bureau.

The mean monthly average temperatures at Honolulu are 71.4 degrees for January, and 78.3 degrees for August, with a mean annual average temperature of 74.9 degrees. Rainfall ranges from 25.28 inches annually on the dry leeward side of Oahu, to over 230 inches at higher elevations. The world's greatest average annual rainfall, 444 inches, occurs near the summit of Mt. Waialeale on Kauai.

There are more than 1,000,000 acres in the forest reserves, and the total area of public lands exceeds 1,500,000 acres. The soil nourishes all tropical and sub-tropical fruits.

Oahu continues as the population center of the islands with 371,649 or 68.8 percent in 1948, Honolulu alone having more than 215,000. Of the various ethnic groups the Hawaiians, third largest group, show the most rapid rate of increase, but the pure Hawaiian strain is disappearing. The largest single racial group is the Caucasian with 33.4 percent of the total. Others include citizens and residents of Japanese descent (32.6%), Filipinos, Chinese, Puerto Ricans and Koreans.

The chief industries are production of sugar, pineapples, the tourist business, livestock, and fishing. The bulk of Hawaii's trade is with the mainland, only a fraction being with foreign countries. Its livestock, poultry and truck garden production is for home consumption.

The University of Hawaii (founded 1907) is in Honolulu. There are 16 airfields on the islands.

The islands expressed their desire for statehood at the elections (1940) with 39,413 voting in favor and 19,911 against and bills were introduced in the 80th and 81st Congresses.

The chief executive officer of the Territory of Hawaii is the Governor, who is appointed by the President with the approval of the Senate for a four-year-term, and who must be a resident of the islands for three years to be eligible.

The Legislature consists of the Senate of 15 members, elected for four-year terms; and the House of Representatives, of 30 members, elected for two-year terms. The Delegate to Congress is elected every two years, and has floor privileges in the house, but no vote.

The Hawaiian Islands were discovered by Capt. Cook (1778). Second visit (1779). Hawaii became a constitutional monarchy in 1840. A revolution drove Queen Liluokalani from the throne (1893), and a republic was proclaimed July 4, 1894. Hawaii was formally annexed to the United States, Aug. 12, 1898 and organized as a Territory June 14, 1900.

DEPENDENCIES OF THE UNITED STATES

Canal Zone and Panama Canal

The Canal Zone is a Government reservation administered by the organization known as The Panama Canal. This is an independent organization in the Government service whose head is the Governor, directly under the President. As a matter of executive arrangement, the Secretary of the Army represents the President in the administration of Canal affairs. The Zone is fortified and occupied by a garrison in addition to the civilian employees of the Canal and railroad. The Governor is Brig. Gen. Francis K. Newcomer.

The Canal Zone is a strip of land extending five miles on either side of the axis of the Panama Canal but not including the cities of Panama or Colon, which remain in the Republic of Panama, but are under United States jurisdiction in the matter of sanitation and quarantine. The port at the Caribbean entrance, formerly a part of Colon, is Cristobal; and at the Pacific entrance Balboa, with adjoining and contiguous communities of Balboa Heights and Ancon.

The land was granted to the United States by Panama by treaty (Feb. 26, 1904), the compensation being $10,000,000, and annual payments of $250,000, increased to $430,000 in 1936. No private individuals are allowed to acquire land.

The total area of the Canal Zone is 648 square miles, of which 372 are land. Gatun Lake, with the water at its normal level of 85 feet above sea level, has an area of 163.4 square miles. The zone has a civil population (1948 census) of 47,462.

Commercial air activities are centered on the Pacific side of the Isthmus at the Canal Zone Air Terminal.

THE PANAMA CANAL

The Panama Canal is a lock and lake type canal, traversing the Isthmus of Panama between the Atlantic Ocean (Caribbean Sea) and the Pacific Ocean (Gulf of Panama) with headquarters in Balboa Heights, Canal Zone.

On the Atlantic slope the Canal follows the former valley of the Chagres River; on the Pacific, that of the Rio Grande. Dams were built across these valleys to form lakes on which the ships are floated, and connection between the two valleys, through the intervening divide, was made by excavating Culebra Cut (officially named Gaillard Cut).

The summit elevation, i. e., the surface of Gatun Lake and of Gaillard Cut, which is an artificial arm of the lake, is normally 85 feet above sea level, and the bottom of the Cut was excavated to 40 feet above sea level, giving normal depth of 45 feet. The channel through Gatun Lake is 23¾ miles long, and the Cut is 8 miles long

The locks serve to raise ships from the sea to the summit level, or to lower them to sea after they have crossed the Isthmus. On the Atlantic side the lift is made at Gatun Locks, which have 3 steps or chambers, called lower, middle, and upper. On the Pacific side, one step is made at Pedro Miguel Lock, at the Pacific end of Gaillard Cut, and two at Miraflores Locks, about a mile to the south.

The line of the Canal is northwest-southeast, and the Pacific end is 27 miles east of the Atlantic end.

The Canal is 50.52 statute miles in length, at least 300 feet wide at the bottom of excavated channels, 110 feet wide in the lock chambers, which have a usable length of 1,000 feet. Depth varies but is not less than 41 feet in sea level sections or with surface of Gatun Lake.

American occupation of the Canal Zone began May 4, 1904 and the Canal was opened to traffic Aug. 15, 1914. Traffic in the early years was hampered by slides and reduced by war conditions, and the Canal was declared officially opened on July 12, 1920.

Legislation was enacted (Dec. 28, 1945) directing that the Panama Canal be re-evaluated in relation to future interoceanic commerce and national defense. The Governor has recommended that the Canal be converted to a sea-level waterway.

Puerto Rico

CAPITAL, San Juan—AREA, 3,435 square miles—POPULATION (Est. 1947), 2,149,000.

Puerto Rico with the Atlantic Ocean on the north and the Caribbean Sea on the south, is the easternmost island of the West Indies Group known as the Greater Antilles, of which Cuba, Haiti and Jamaica are the larger units. Santo Domingo i sabout 45 miles to the west, and St. Thomas 40 miles to the east. The islands of Culebra and Vieques, to the east, and Mona to the west form part of the territory. Puerto Rico is 95 miles long and 35 miles wide, with a coast line of approximately 311 miles.

The soil is extremely fertile and largely under cultivation. The lower lands to the north are well watered, but irrigation is needed in the south: an extensive system has been constructed by the Government. The climate is mild, with a mean winter temperature of 73.4 degrees and a summer temperature only 5.5 degrees higher.

Puerto Rico is administered under the Organic Act of Puerto Rico (March 2, 1917), which with its amendments granted Puerto Ricans American citizenship and unrestricted suffrage.

President Truman signed (Aug. 5, 1947) a bill giving Puerto Rico the right to choose its chief executive by popular vote. The Legislature—a Senate of 19 members and a House of Representatives of 39—is elected for four years by direct vote. There are seven executive departments: Justice, Finance, Interior, Education, Agriculture and Commerce, Labor, and Health. The seven heads of departments and an Executive Secretary form the Executive Council. The island elects a Resident Commissioner at Washington with a voice but no vote in the House of Representatives, for a term of four years.

The Governor is Luis Muñoz-Marin (elected Nov. 2, 1948), the first Governor of Puerto Rico to be chosen in a general election.

The island makes its own tax laws and derives further revenue by converting customs levies, income tax receipts and internal revenue collections into the Insular Treasury. United States currency is used exclusively.

Sugar, citrus fruits, coconuts, tobacco, coffee, rum, molasses and needlework are the chief exports. Distilling of alcohol and the canning of fruits and vegetables are important industries.

Puerto Rico began (1940) a program of hydroelectric power expansion and other measures to provide employment and to attract industry from the United States. Completion of Caonillas Dam (1948) brought power installations to 18 and assured production of 400,000,000 kilowatt hours of electricity per year.

The Industrial Development Company, established by law (1942), set up a number of typical factories to promote industrialization. The Insular Government has established a bank to grant loans on liberal terms to persons desirous of investing in approved industries, and the 1948 Legislature passed a measure granting tax exemption until 1960 to new industries established in Puerto Rico.

About one-third of the population resides in the cities and towns. There are 544.2 inhabitants to the square mile. To meet this over-population menace the Insular Legislature (1937) removed the dissemination of birth control information from the penalties of the penal code. San Juan has a population of 169,247; Ponce, 65,182 and Mayaguez, 50,376. About three quarters of the population are white, the remaining quarter Negro.

Although Spanish is the popular language, most of the people speak English, and the Insular Government fosters intensive instruction in English in the public schools, credited with being the most efficient and up-to-date school system in Latin America.

Education is free and compulsory. In 1946 there was an enrollment of 364,944 in both public and private day schools. The University of Puerto Rico is in Rio Piedras; the Polytechnic Institute of Puerto Rico, in San German.

The Roman Catholic religion is dominant.

Puerto Rico's climate, beaches and scenery are a growing attraction for winter tourists from the United States. Modern hotel facilities are under construction in San Juan.

Puerto Rico (or Boriquen as it was called by its original native Indians) was discovered by Columbus (Nov. 19, 1493). Ponce de Leon conquered it for Spain (1509) and established the first settlement at Caparra, across the bay from the present site of the capital city. He was the island's first governor general. Ruled by Spain until 1898, it was seized by Major Gen. Miles in the Spanish-American war and ceded to the United States by the Treaty of Paris (Dec. 10, 1898).

Virgin Islands

CAPITAL, Charlotte Amalie, formerly St. Thomas—AREA, 132 square miles—POPULATION (Est. 1947), 30,000.

The Virgin Islands form the most easterly United States territory, and are comprised of approximately 50 islands. The three largest, St. Thomas, St. John and St. Croix are inhabited. Formerly known as the Danish West Indies they were purchased from Denmark for $25,000,000 (proclaimed Jan. 35, 1917.) Approximately 80 percent of the population is of Negro descent.

The climate is consistently warm and comfortable, with a mean winter temperature of 78 degrees, summer 82.

St. Thomas has the principal harbor, and the seat of Government. It is situated 40 miles east

of Puerto Rico, about the same distance from the Northern shore line of the group's largest island, St. Croix, and 1,442 miles southeast of New York.

Congress (1927) conferred citizenship upon the natives and, under the Organic Act (June 22, 1936) universal suffrage was granted to all who could read and write the English language. Education is compulsory and there are 31 schools in the three main islands. English is universally spoken.

The islands are comprised of two municipalities, that of St. Thomas-St. John with a Municipal (legislative) Council of seven members, and that of St. Croix with a membership of nine. Elections are biennial. Meeting jointly at least once each year, the two bodies form a Legislative Assembly for the primary purpose of enacting legislation for the Virgin Islands as a whole. The Governor, appointed by the President, has certain veto powers. The Islands are under the jurisdiction of the Department of the Interior.

Rum and bay rum are the chief exports. Several steamship and air lines serve the Virgin Islands and they are becoming a potentially important American resort area.

The islands have a workmen's compensation law, minimum wage and hour act, a full employment act and one of the strongest anti-discrimination laws in force in any American State or Territory.

Guam

CAPITAL, Agana—AREA, 206 square miles—POPULATION (1947 census) 24,268.

The Island of Guam, the largest of the **Marianne**s, classified as an unorganized United States possession, was ceded to the United States by Spain by Article Two of the Treaty of Paris (Dec. 10, 1898). It is 30 miles long and four to eight and one-half miles wide. Distance from Manila, 1,499 miles; from San Francisco, 5,053 miles, in the typhoon belt of the Western Pacific. The inhabitants are called Chamorros, a mixed race, with the Malay strain predominating. Guam is under the Navy Department, as a naval station with a powerful Government radio station. The port of entry is Apra.

The United States has developed harbor facilities, airfields and other installations to make Guam one of the most important of the chain of bases in the Pacific.

The Governor of the Island is a military officer appointed by the President. He is also military Commander of the Island and Commandant of the naval station. The Guamanian Congress functions only as an advisory body.

The Congress, meeting (May 3, 1946) urged the United States to grant citizenship to the Guamanians.

The native language is Chamorro but Spanish and English also are spoken with English the official language. The Catholic church predominates. Elementary education is compulsory.

Exports include copra and cocoanut oil. All manufactured products are imported from the States and imports exceed exports by about four to one.

Magellan discovered the group of islands (March 6, 1521) while on his voyage around the world and named the group "Ladrones." The islands were colonized (1668) by Spanish missionaries who renamed them the Marianne Islands, in honor of Maria Ana of Austria, Queen of Spain.

American Samoa

CAPITAL, Pago Pago, Island of Tutuila—AREA, 76 square miles—POPULATION (Est. 1947), 17,550.

American Samoa, comprising the islands of **Tutuila, Aunu'n, Ofu, Olosega** and **Ta'u**, the **Manua Islands** and the uninhabited coral atoll of **Rose Island** became a possession of the United States by virtue of a tripartite treaty with Great Britain and Germany (Nov. 1889). Another, **Swain's Island**, was annexed in 1925. It is under control of the Navy Department as a naval station and the Commandant acts as Governor by commission of the President of the United States, appoints officers and draws up local laws. The United States maintains a high powered radio station on Tutuila which reaches the United States, New Zealand, Australia, Honolulu and other islands in the Pacific. The station is open for commercial traffic.

Pago Pago, in Tutuila, is a valuable harbor and a United States Navy coaling station. It was ceded (1872) to the United States by the native king.

American Samoa is 4,150 miles from San Francisco, 2,276 from Hawaii, 1,565 from Auckland and 4,519 from Manila via San Bernardino Strait.

Tutuila has an area of 40.2 square miles and a population (1946) of 14,402, including Aunu'u. Tau has an area of 14 square miles and the islets of Ofu and Olosega four square miles with a population (1946) of 2,532. Swain's Island has a diameter approaching two square miles and a population (1946) of 143.

The natives are of a high type of the Polynes race. Local laws prohibit foreigners from buy their lands.

There are 47 public schools with an enrollm close to 4,000. The entire population is under medical care of the United States Navy.

The chief product and export is copra. Tr breadfruit, yams, cocoanuts, pineapples, oran and bananas also are produced for commercial p poses. The Government handles the crop the natives. Other fruits grown are not export About 70 per cent of the land is forest.

Wake and Midway Islands

The United States flag was hoisted over Wi Island (July 4, 1898) by Gen. F. V. Greene, co manding Second Detachment Philippine expediti With its two sister islands, Wilkes and Peale, i in the direct route from Hawaii to Hong Ko about 2,000 miles from the first and 3,000 m from the second; and 1,290 miles from Guam. T group is four and one-half miles long and one a one-half miles wide and has 2,600 acres.

The Midway Islands, owned by the United Sta are a group in the North Pacific, 1,200 miles nor west of the Hawaiian Islands. The area of group is 28 square miles, and population (Cens 1936) was 118; both are included in the totals Hawaii.

Wake Island was occupied by Japanese for (Dec. 24, 1941) after 14 days of fighting.

The United States flag was hoisted over Wa Island (Sept. 4, 1945) after the Japanese s rendered it.

Wake and the Midway Islands assumed n importance (1935) as landing stages for tra Pacific airplanes.

Kure Island, on the westerly edge of Hawaiian group, of value as an air base, placed under control of the Navy by President order (Feb. 21, 1936).

Johnson, Palmyra and **Kingman's**, in the Paci also are under control of the Navy.

Howland, Jarvis and **Baker Islands**, south the Hawaiian group, also of value as air ba and owned by the United States, were settled a equipped as aerological stations (1936) by you Hawaiians acting under the Federal Division Territories and Insular Possessions.

Canton and Enderbury Islan

The United States and Great Britain agr (April 6, 1939) on a system of joint control a administration of Canton and Enderbury Islai of the Phoenix group in the Central Pacific, ab half way between Hawaii and Australia. T formula applies for fifty years and thereaf indefinitely unless modified or terminated. Ea government is represented by an administra official and the islands are "available for co munications and for use as airports for int national aviation, but only civil aviation co panies, incorporated in the United States America or in any part of the British Comm wealth of Nations for the purpose of schedu air services." The United States is permitted build and operate an airport on Canton that be open to use by British aircraft and civil av tion companies on equal terms. The agreem was arranged after it was discovered that islands had great potential value as air commu cation bases.

Islands Under Trusteeship

By unaminous action of the United Nations curity Council (April 2, 1947) the trusteeship the 625 islands in the west Pacific, formerly H by the Japanese, was awarded to the United St with authority to fortify the islands if such act was considered essential to their security.

The islands include Caroline, Marshall and Ma anne chains (except Guam). Most of the islands these groups were captured by United States fo during World War II and their retention was manded by the Joint Chiefs of Staff in Washing

Germany seized many of the islands (18 while the others were under Spanish rule u the Spanish-American War (1898) when Sp sold them to Germany. After the outbreak World War I (1914), Japan took over administ tion of the islands "to protect the interests of Western Allies" and later the mandates over th were awarded to Japan. In the period betw the two wars, Japan fortified all of the lar islands in violation of her mandates and it from there that she launched the attack on P Harbor (Dec. 7, 1941).

The total population of the Islands is estima at 85,000, with only a small percentage of wi settlers. Most of the islands are volcanic picturesque, with luxuriant vegetation, but onl few of them are self-sustaining. The others pend on the United States for their sustenance

*First permanent settlement.

Land and water areas from Bureau of the Census —Total area Continental United States (1940), 3,022,387 square miles (including 45,259 square miles of inland water area and the District of Columbia—69 sq. mi., of which 8 are water). Total area (square miles) previous years—(1790, 1800) 892,135; (1810) 1,720,122; (1820, 1830, 1840) 1,792,-223; (1850) 2,997,110; (1860–1930) 3,026,789; (1940) 3,022,387.

Land area is defined to include: Dry land and land temporarily or partially covered by water. Inland water is defined to include: Permanent inland water surface, such as lakes, reservoirs and ponds.

Total water area 1940 other than inland water 74,364 square miles.

Lake Michigan water area (figures in square miles) total 22,178, by States. Illinois 1,526; Indiana 228; Michigan 13,037; Wisconsin 7,387. Lake Superior total 21,118, by States, Michigan 16,231; Minnesota 2,212; Wisconsin 2,675. Lake Huron 8,975. State of Michigan. Lake Ontario 3,033. State of New York. Lake Erie total 5,002, by States, Michigan 216; New York 594; Ohio 3,457; Pennsylvania 735.

Chronological List of Territories

Name of Territory	Date of Organic Act	Organic Act Effective	Admission as State	Yrs. T'ri-tory	No. Gov-'nors
Territory northwest of River Ohio	July 13, 1787	No fixed date	Mar. 1, 1803*a*	15	1
Territory south of River Ohio	May 26, 1790	No fixed date	June 1, 1796*b*	6	1

Idaho	Mar. 3, 1863	Date of act	July 3, 1890	27	12
Montana	May 26, 1864	Date of act	Nov. 8, 1889	25	9
Wyoming	July 25, 1868	When officers were qualified	July 10, 1890	22	7
Oklahoma	May 2, 1890	Date of act	Nov. 16, 1907	17	7

(*a*) As the State of Ohio; (*b*) as the State of Tennessee; (*c*) as the State of Louisiana; (*d*) the organic act for Missouri Territory of June 4, 1812, became effective the first Monday in December (7th), 1812.

Territorial Expansion Since 1790

The Thirteen Original States, comprising the United States of America, as constituted (1790) were—New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia. These States had a gross area of 892,135 square miles, of which 24,155 square miles were water.

The present gross (land and water) area of these thirteen States is 322,343 square miles, inasmuch as Maine, Vermont, Kentucky, West Virginia, Tennessee, Mississippi, Alabama, Ohio, Indiana, Illinois, Michigan, Wisconsin, and part of Minnesota have been carved from the original boundaries of the Thirteen, which extended from Canada to Florida, and from the Atlantic Ocean to the Mississippi River, exclusive of a portion of the southeastern part of Louisiana.

Congress (Oct. 30, 1779) asked the States to cede to the General Government the vast areas of unsettled lands lying between the Appalachian Mountain ranges and the Mississippi River, to end conflicting boundary claims inherited from royal charters. This was the Ohio Country over which the British and French fought (1754-1763).

The General Government welded the ceded areas into two great tracts—the territory northwest of the Ohio River (1787); and the territory south of the Ohio River.

The territory embracing Michigan was governed by the French from the time of its first discovery (about 1610-1763). It was ceded to Great Britain. This land came into actual possession of the United States (July 11, 1796), and until 1802 was attached to the Northwest Territory, when that portion west of the east line of Indiana became a part of the Territory of Indiana by an act of Congress.

Indiana Territory was divided (1805) into two separate governments, and provision was made for the constitution of Michigan Territory.

Louisiana Purchase

The first accession to the territory of the United States as it was constituted (1790) came through the Louisiana Purchase. This vast region, bought by the United States (in the administration of President Jefferson, April 30, 1803) from France, in the reign of Napoleon Bonaparte, for 60,000,000 francs ($11,250,000), plus payment of the "French Spoliation Claims," comprised the Mississippi River's west side drainage basin, except that part held by Spain. It extended from Canada to the Gulf of Mexico, and included the areas now occupied by Louisiana, Arkansas, Oklahoma, Kansas, Missouri, Nebraska, Iowa, the Dakotas, Montana, most of Minnesota, and portions of Colorado and Wyoming. In New Orleans (at noon on Dec. 20, 1803) the French and American flags passed each other as the one was lowered and the other raised. There was no other ceremony to mark the event.

The United States took formal possession of the Louisiana Purchase regions (March 10, 1804), and Congress divided it into two parts—the Territory of Orleans (later the State of Louisiana); and the Territory of Louisiana.

Settlement of the French Spoliation Claims was effected with France for $3,750,000. Interest accruals raised the final total cost of the Louisiana Purchase to $27,267,622—about 4 cents an acre.

Florida from Spain

The second accession was the Floridas, which the United States bought (1819) from Spain.

No money payment was made to Spain in connection with the acquisition of the Floridas, but the United States assumed and paid the sum of $5,000,000 in satisfaction of claims of citizens of the United States against Spain.

The Oregon Territory, the northern limits of which were settled in the Webster-Ashburton Treaty (1846) between the United States and Great Britain, is not classed as an accession, because the Government at Washington claimed it (1848) on three grounds—(1), discovery a occupation; (2), the Louisiana Purchase; (3), t Florida Purchase.

As constituted at its organization (1848) t Territory of Oregon extended from the Pacific the crest of the Rocky Mountains, north of t forty-second parallel of latitude, and compris the areas now covered by Oregon, Washingto Idaho and part of Montana and Wyoming.

Annexation of Texas

The third accession came (Dec. 29, 1845) wh the Republic of Texas was admitted to the Uni as a State. The area now comprises Texas, a parts of New Mexico, Colorado and Wyomi The joint resolution of Congress (March 1, 184 for the annexation of Texas expressly gave that State when admitted the right to divide itself into as many as five States "of convenie size," "and having sufficient population" witho further permission of Congress. Texas was admitt to the Union Dec. 29, 1845.

The Guadalupe-Hidalgo Treaty (1848) wh ended the Mexican War gave the United Sta its fourth accession of national territory. Seri disagreement as to the exact extent of the new gained region in what is now Southern Arizo and Southwestern New Mexico developed, wh was resolved (1853) by the Gadsden Purch for the United States of the area in dispute. T 1848 Mexican cession price of $15,000,000 w raised to $16,800,000 by interest accruals. T Gadsden Purchase cost the United States $1 000,000.

The Mexican cessions added to this country area of California, Nevada, Utah, Arizona, N Mexico and part of Colorado.

Purchase of Alaska

The treaty with Russia conveying Alaska signed March 30, 1867. The Senate agreement signed by President Johnson on May 28, 1867; ra fications were exchanged on June 20, 1867, and proclamation issued on that date. Transfer Alaska to the United States took place at Sitka Oct. 18, 1867. Payment of $7,200,000 in gold made in Washington on Aug. 1, 1868.

The sixth accession brought in the Hawai Islands, which voluntarily joined the United Sta (1898), the Hawaiian national debt of $4,000, being assumed by this country.

Territory from Spain

The victory of the United States over Sp (1898) brought into the American national a the seventh accession. Under the treaty (Dec. 1898), the United States paid to Spain $20,000, for all claims to Puerto Rico, Guam and the Phil pine Islands; and, under a later treaty (Nov. 1900) a further payment of $100,000 was made Spain for cession to the United States of any all islands (Cagayan Jolo) of the Philippine Arc pelago lying outside of the lines described in Art III, of the treaty.

The Samoan Islands by agreement of the Un States, Great Britain and Germany (1899) w recognized as independent, neutral territory, w Malietoa as King, under the joint protection of three powers named. The United States accep (1898) Pago Pago (ceded in 1872) in Tutuila a coal and naval base. Swain's Island, two squ miles, used as a naval station, was annexed (19

Panama Canal Zone

The Panama Canal Zone was granted to United States by the Republic of Panama by tre (Feb. 26, 1904), the compensation being $10,000 outright, plus annual payments of $250,000 (ra to $430,000 by a subsequent treaty (1936), re active to 1934).

The Virgin Islands (formerly the Danish W Indies), consisting of the Islands of St. Croix, Thomas and St. John, were acquired (March 1917) for $25,000,000. The islands then had 32 population.

Division	Yr.	Added Square Miles	Division	Yr.	Added Square Miles	Division	Yr.	Added Squ Mile

*Became the Republic of the Philippines July 4, 1946.

Origin of the Names of the States and Territories

Source: State Librarians and other officials

Alabama—Alibama was the Indian name of a tribe in Southern Alabama—a Mushhogean tribe of the Creek Confederacy. Alibamu is from the Choctaw words alba aya mule, meaning "I open or clear the thicket."

Alaska—From "Al-ay-es-ka," or Alakh-Skhak a native Eskimo or Innuit (Aleut) word, meaning Great Country.

Arizona—From "Arizonac" ("Ari," small and "Zonac," spring) so-called by the Papago and Pima Indians, says State Historian George H. Kelly (1927); and adds: "This state was called Arizona by the Spaniards as early as 1736." A simpler derivation is that given by Prof. John C. Van Dyke in "The Desert," page 208—clipped from "Arida-Zona," meaning the "dry belt."

Arkansas—(Official pronunciation is ar-kan-saw). Algonkin name of the Quapaw Indians.

California—Bestowed by the Spanish Conquistadores, being the name of an imaginary island, near the earthly paradise, in "Las Serges de Esplandian," a romance of chivalry written in the first decade of the 16th century. Another explanation is that the Catalan explorers and missionaries (1769) after long marches in summer near the coast called it the land of oven's heat—"Aixo es calor de fornî de fornalla."

Colorado—Spanish, meaning red.

Connecticut—Indian. "Quonecktacut," or Long River.

Delaware—Named after Lord De La Warr, of England, Governor of Virginia, who entered the Bay (1610).

District of Columbia—A poetical adoption of the name of Columbus; applied to the territory in 1791 by the Federal Commissioners who laid it out.

Florida—Spanish words, "Pascua Florida," Feast of Flowers (Easter Sunday), on which day it is said to have been named (1513) by Juan Ponce de Leon.

Georgia—Named after King George II, of England.

Hawaii—English spelling of Owhyhee, where Capt. Cook was killed by the natives (1779).

Idaho—Indian words, "Edah hoe," or Light on the Mountains.

Illinois—Indian word, by some translated "The River of Men." A form of the word Iliniwek. "Ilini" meant "man," "iw" meant "is," and "ek" was a plural signification.

Indiana—Named after Indians, State of Indians.

Iowa—The Ioways, or Alaouez, or Alaouas were a Sioux tribe. The word means "sleepy ones." They called themselves "Pahoja," gray snow.

Kansas—Name of a tribe of the Sioux, the "People of the South Wind."

Kentucky—From Wyandot (Iroquoian) name "Ken-tah-ten," meaning to-morrow, or Land of To-morrow.

Louisiana—Named by the Mississippi River navigator Robert de la Salle (1682) after King Louis XIV, of France.

Maine—From Maine, an ancient province of France, south of Normandy, owned by Queen Henrietta Maria of England, wife of King Charles I.

Maryland—Named in honor of Queen Henrietta Maria.

Massachusetts—An Algonquin Indian name from Massadchu-es-et, meaning "great - hill - small-place," indicating a place at or about the big little hills.

Michigan—The Mishigamaw or Mishawiguma were Indians. The word means "big lake" and was applied to Lake Michigan. "Michi" meant "great," and "gama" meant "water."

Minnesota—Two Sioux words—"sky-colored water."

Mississippi—Indian words "Sipu," Algonquin word for river; "Maesi," fish—Fish-River.

Missouri—The Missouri were Sioux of that name.

Montana—Spanish for mountainous; used now by Peruvians as a name for their Andean districts.

Nebraska—From an Otoe Indian word meaning "Flat River"—for the Platte River.

Nevada—A Spanish word, meaning "snow clad."

New Hampshire—Named (1629) after the County of Hampshire, England, by the patentee, Capt. John Mason of the Plymouth Council.

New Jersey—The Duke of York of England, granted (1664) to Lord John Berkley and Sir George Carteret a patent or deed to the present boundaries to be called Nova Caesaria, or New Jersey. Caesarea, or Caesaria, was the ancient name of the Island of Jersey of which Carteret had been administrator.

New Mexico—Mexico is a word derived from the Aztec word "mexitli," title of their national war god.

New York—So called in honor of the Duke of York (1664), who got the patent from his brother, King Charles II, of England and sent an expedition and took possession of New Netherlands.

North Carolina—The patent granted by King Charles I, of England (Oct. 30, 1629), to Sir Robert Heath, his Attorney-General, of the territory between the 31st and the 36th parallels of north latitude from the Atlantic Ocean to the South Seas, decreed its name to be "Carolana or Province of Carolana" from the Latin version "Carolus" of his own name. Under the name of Carolina this territory was under a new patent (dated March 24, 1662-3) granted by King Charles II, of England to the Earl of Clarendon and others.

North Dakota—"Dakota" means "alliance of friends," and is a Sioux Indian word. "Koda" in Santee dialect and "Kola" in Teton dialect are the root words.

Ohio—Iroquois name, denoting great.

Oklahoma—Choctaw word for "red people."

Oregon—The Oregon State Librarian says various origins of the name have been suggested as follows: Origanum, a wild sage found on the coast; Orejon, or Oregones, a Spanish name for big-eared (Indian) men; Orgon; a river in Chinese Tartary; Oyerun-gen, a Shoshone Indian word for "place of plenty"; Aura agua, Spanish word meaning gently falling waters; Ouragan, a French word for hurricane; Wau-re-gan, an Algonquin word for "beautiful water."

Pennsylvania—Was named in honor of Admiral William Penn, the father of William Penn, the founder of the province, William Penn, the Friend, received a charter (1681) from Charles II, of Great Britain for land in America that was given the name of "Pennsylvania" (Penn's Woods) by the King. The name "Pensilvania" was used for many years by William Penn and his sons, Thomas and Richard, to designate the province. The grant was made in settlement of a debt of 16,000 pounds which King Charles and the British Government owed Admiral Penn. The charter was granted March 4, 1681.

Puerto Rico—From the Spanish "Puerto Rico," Rich Port.

Rhode Island—"Isles of Rhodes" was the name, chosen by the General Court of the colony (1644). The name of one of the islands had been Aquedneck. The name of Providence Plantations then gradually lapsed.

South Carolina—(See North Carolina).

South Dakota—(See North Dakota).

Tennessee—Called (from 1784 to 1788) the State of Franklin, or Frankland. "Tennese" was the Indian name for the chief town of the Cherokees, which was on the Little Tennessee River.

Texas—According to Elizabeth H. West, State Librarian, "Texas is from the Indian word, Tejas, meaning Friends or Allies. So far as is known, it has not an Aztec origin. It applied, originally, in the Indian usage to the Indian tribes about the early Spanish missions around Eastern Texas."

Utah—Named after the Utes, an Indian tribe.

Vermont—From Verd and Mont, two French words meaning Green Mountains. The name is said to have been bestowed by Samuel de Champlain.

Virginia—Named in honor of Elizabeth, daughter of Henry VIII, sometimes called by the courtiers the "Virgin Queen" of England. The name was bestowed by one of the courtiers, Sir Walter Raleigh, who fitted out the expedition of discovery (1584).

Washington—Named after George Washington. When the bill creating the Territory of Columbia was introduced in the 32nd Congress, the name was changed to Washington because of the existence of the District of Columbia.

West Virginia—(See Virginia).

Wisconsin—An Indian name which, according to Reuben Gold Thwaites, was originally spelled "Ouiscousin" by the French missionaries and in old French-American documents; also was spelled "Misconsing," "Ouisconching," "Ouiskensing," meaning meeting of the rivers. Congress changed it to "Wisconsin."

Wyoming—The word was taken from Wyoming Valley, Pennsylvania, rendered famous from Campbell's poem, "Gertrude of Wyoming." The word means, "mountains and valleys alternating."

Coastline of the United States and Possessions

Source: United States Coast and Geodetic Survey; all measurements in statute miles

General coastline.—The figures under this heading are lengths of the general outline of the seacoast. The measurements were made with a unit measure of 30 minutes of latitude on charts as near the scale of 1:1,200,000 as possible. The shoreline of bays and sounds is included to a point where such waters narrow to the width of the unit measure, and the distance across at such point is included.

Tidal shoreline, general.—Measurements under this heading were made with a unit measure of 3 statute miles on charts of 1:200,000 and 1:400,000 scale when available. The shoreline of bays, sounds, and other bodies of water is included to a point where such waters narrow to a width of 3 statute miles, and the distance across at such point is included.

Tidal shoreline, detailed.—The figures under this heading were obtained in 1939-40 with a recording measure on the largest scale maps and charts then available. Shoreline of bays, sounds, and other bodies of water is included to the head of tide-water, or to a point where such waters narrow to a width of 100 feet.

Locality	Lengths in statute miles

Geographic Centers, United States and States

Source: The U. S. Geological Survey, Department of the Interior

State	County	Locality
United States	Kansas, Smith County, Latitude 39°50', Longitude 98°35'.	
STATES		
Alabama		Chilton, 12 miles southwest of Clanton.
Arizona		Yavapai, 55 miles southeast of Prescott.
Arkansas		Pulaski, 12 miles north of west of Little Rock.
California		Madera, 35 miles northeast of Madera.
Colorado		Park, 30 miles northwest of Pikes Peak.
Connecticut		Hartford, at East Berlin.
Delaware		Kent, 11 miles south of Dover.
District of Columbia		Washington, near Corner of Fourth and "L" Streets, N. W.
Florida		Citrus Co., 12 miles west of north of Brooksville.
Georgia		Twiggs, 18 miles southeast of Macon.
Idaho		Custer, 24 miles south of west of Challis.
Illinois		Logan, 28 miles northeast of Springfield.
Indiana		Boone, 14 miles west of north of Indianapolis.
Iowa		Story, 5 miles northeast of Ames.
Kansas		Barton, 15 miles northeast of Great Bend.
Kentucky		Marion, 3 miles west of north of Labanon.
Louisiana		Avoyelle, 3 miles southeast of Marksville.
Maine		Piscataquis, 18 miles north of Dover.
Maryland		Anne Arundel, 3 miles east of Collington.
Massachusetts		Worcester, in northern part of city of Worcester.
Michigan		Wexford, 5 miles west of north of Cadillac.
Minnesota		Crow Wing, 10 miles southwest of Brainerd.
Mississippi		Leake, 9 miles north of west of Carthage.
Missouri		Miller, 20 miles southwest of Jefferson City.
Montana		Fergus, 12 miles west of Lewistown.
Nebraska		Custer, 10 miles northwest of Broken Bow.
Nevada		Lander, 23 miles southeast of Austin.
New Hampshire		Belknap, 3 miles east of Ashland.
New Jersey		Mercer, 5 miles southeast of the State Capital, Trenton.
New Mexico		Torrance, 12 miles west of south of Willard.
New York		Madison, 6 miles east of south of Oneida.
North Carolina		Chatham, 10 miles northwest of Sanford.
North Dakota		Sheridan, 5 miles southwest of McClusky.
Ohio		Delaware, 25 miles east of north of Columbus.
Oklahoma		Oklahoma, 8 miles north of Oklahoma City.
Oregon		Crook, 25 miles east of south of Prineville.
Pennsylvania		Centre, 2½ miles southwest of Bellefonte.
Rhode Island		Kent, 1 mile west of south of Compton.
South Carolina		Richland, 13 miles southeast of Columbia.
South Dakota		Hughes, 8 miles northeast of Pierre.
Tennessee		Rutherford, 5 miles northeast of Murfreesboro.
Texas		McCulloch, 15 miles northeast of Brady.
Utah		Sanpete, 3 miles north of Manti.
Vermont		Washington, 3 miles east of Roxbury.
Virginia		Appomattox, 11 miles south of east of Amherst.
Washington		Chelan, 10 miles south of west of Wenatchee.
West Virginia		Braxton, 4 miles east of Sutton.
Wisconsin		Wood, 9 miles southeast of Marshfield.
Wyoming		Fremont, 58 miles north of east of Lander.
Alaska		The geographic center is difficult to determine, for the outline of the Territory is very irregular, but if the outlying islands are included in the determination it is not far from a point 9 miles south of Fort Gibbon, in latitude 63°46' longitude 152°20'.
North American Continent		The geographic center is in Pierce County, North Dakota, a few miles west of Devils Lake, latitude 48°10'N, longitude 100°10'W.

Mason and Dixon's Line

The Mason and Dixon's line actually was surveyed by two Englishmen, Charles Mason and Jeremiah Dixon (Nov. 15, 1763, and Dec. 26, 1767) to settle constant dissensions between the Lords Baltimore and the Penn family, the lords proprietors of Maryland and Pennsylvania respectively. The line runs along the parallel in latitude 39° 43' 26.3" and was originally marked by milestones every fifth one bearing on one side the coat of arms of Penn and on the other those of Lord Baltimore.

Public Lands of the United States

Source: Bureau of Land Management, Department of the Interior

The term "original public domain" embraces all the area title to which was vested in the United States Government by virtue of its sovereignty. In continental United States, the "original public domain" involved 1,442,200,320 acres of land and 20,232,320 acres of water area, which included the States of Alabama, Florida, Mississippi, and every State north and west of the Ohio and Mississippi Rivers except Texas. In addition, it included 378,165,760 acres in the Territory of Alaska. It was acquired in the following manner:

Treaty with Great Britain and State cessions following Revolution	Acres 266,427,520
Louisiana purchase (1803)	529,911,680
Oregon territory (by discovery)	183,386,240
Purchased from Spain (1819):	
Florida	37,546,240
West of Mississippi River	8,598,400
Mexican cession (1848)	338,680,960
Purchased from Texas (1850)	78,892,800
Gadsden purchase (1853)	18,988,800
Total (United States)	**1,462,432,640**
Less water area	20,232,320
Land area of public domain (U. S.)	**1,442,200,320**
Alaska purchase (1867)	**378,165,760**

Note: The above areas were determined in 1912 by calculations made by a committee representing the General Land Office and the Geological Survey, Department of the Interior, and the Bureaus of Statistics and the Census, Department of Commerce and Labor. They have not been corrected to conform with the new computations of the land and inland water area of the United States and its Territories made by the Bureau of the Census, the General Land Office, and the WPA for the Census of 1940.

GRANTS TO STATES

Total Area Granted through Fiscal Year 1948

State	Acres	State	Acres	State	Acres	State	Acres
Alabama	5,005,992	Kansas	7,794,668	New Hamp.	150,000	Tennessee	300,000
Arizona	10,543,753	Kentucky	354,606	New Jersey	210,000	Texas	180,000
Arkansas	11,936,794	Louisiana	11,427,446	New Mexico	12,794,659	Utah	7,501,737
California	8,822,447	Maine	210,000	New York	990,000	Vermont	150,000
Colorado	4,471,604	Maryland	210,000	No. Carolina	270,000	Virginia	300,000
Connecticut	180,000	Massachusetts	360,000	No. Dakota	3,163,552	Washington	3,044,471
Delaware	90,000	Michigan	12,143,804	Ohio	2,758,822	W. Virginia	150,000
Florida	24,205,515	Minnesota	16,421,963	Oklahoma	3,095,760	Wisconsin	10,178,728
Georgia	270,000	Mississippi	6,096,904	Oregon	7,032,847	Wyoming	4,337,740
Idaho	4,269,279	Missouri	7,416,982	Pennsylvania	780,000		
Illinois	6,234,575	Montana	5,963,338	Rhode Island	120,000	**Total**	**223,839,036**
Indiana	4,040,478	Nebraska	3,458,711	So. Carolina	180,000		
Iowa	8,061,262	Nevada	2,725,226	South Dakota	3,435,373		

Swamp and overflow lands, 64,890,356 acres; for common schools, 77,523,220 acres; for higher education and other institutions, 12,758,996 acres; agricultural college scrip, 7,830,000 acres; for internal improvements (general items), 7,806,555 acres; for canals and river improvements, 6,103,749 acres; for railroads, 37,128,531 acres; for wagon roads, 3,359,188 acres; and for miscellaneous purposes, 6,438,441 acres. In addition, an estimated 21,447,459 acres have been reserved for and in Alaska for educational purposes.

The disposition of the "original public domain" in continental United States to June 30, 1948, has been approximately as follows:

Title passed from the United States:	**Acres**
Homesteads	285,000,000
Grants to States	224,000,000
Military bounties and private land claims	95,000,000
Grants to railroad corporations	91,000,000
Cash sales and other disposals	334,000,000
Total area disposed of	**1,029,000,000**
Unperfected entries	500,000
Title remaining in the United States:	
National forests	139,000,000
Grazing districts	135,000,000
Indian reservations	55,000,000
National parks and monuments	12,000,000
Military reservations	14,000,000
Miscellaneous	57,000,000
Total remaining and unentered	**412,000,000**
Grand total (computed area)	**1,442,167,520**

Does not include 49,000,000 acres of Federal mineral rights in patented lands.

AREAS OF PERFECTED HOMESTEAD ENTRIES 1868-1948 ENDING JUNE 30

National Parks and Other Units of the National Park System

Source: National Park Service

NATIONAL PARKS

(The year is that of creation of the park: figures in parentheses show area, in acres.)

Acadia, 1919, Maine (28,310)—The group of granite mountains upon Mount Desert Island, also Schoodic Point on mainland.

Big Bend, 1944, Texas (691,979) on bend of Rio Grande.

Bryce Canyon, 1928, Southwestern Utah (36,010)—Box canyon filled with countless array of fantastically eroded pinnacles of vivid coloring.

Carlsbad Caverns, 1930, Southeastern New Mexico (45,527)—Stupendous caverns, not yet wholly explored, limestone decorations.

Crater Lake, 1902, Southwestern Oregon (160,290)—Lake of extraordinary blue in crater of extinct volcano. Sides 500 to 2,000 feet high. Interesting lava formations. Fine fishing.

Everglades, 1947, Southern Florida (271,008)—Portion of only subtropical area in the United States; extensive watercourses; abundant bird life.

Glacier, 1910, Northwestern Montana (997,248)—Rugged mountain region of great beauty; more than 200 glacier-fed lakes, 60 small glaciers. Precipices thousands of feet deep.

Grand Canyon, 1919, North Central Arizona (645,296)—The greatest example of erosion and the most sublime spectacle in the world.

Grand Teton, 1929, Northwestern Wyoming (94,893)—Includes most spectacular portion of Teton Mountains, an uplift of unusual grandeur.

Great Smoky Mountains, 1930, North Carolina and Tennessee (461,064)—Massive mountain uplift; magnificent forests.

Hawaii, 1916, Hawaii (173,405)—Interesting volcanic areas—Kilauea and Mauna Loa, active volcanoes in the island of Hawaii; Haleakala, a huge extinct volcano on the island of Maui.

Hot Springs, 1921, Middle Arkansas (1,019)—Hot Springs said to have therapeutic value. Bathhouses under Government supervision.

Isle Royale, 1940, Michigan (133,839)—Largest island in Lake Superior; an area of rugged forested wilderness.

Kings Canyon, 1940, Middle Eastern California (452,905)—Sierra wilderness with numerous peaks 13,000 to 14,000 feet high; park also contains groves of giant sequoias.

Lassen Volcanic, 1916, Northern California (103,429)—Only recently active volcano in United States proper. Lassen Peak, 10,453 feet; Cinder Cone, 6,913 feet; hot springs; mud geysers.

Mammoth Cave, 1936, Southwestern Kentucky (50,696)—Series of caverns including spectacular onyx cave formation. Became nationally known in the war of 1812 when saltpeter from the cave was used in making gunpowder.

Mesa Verde, 1906, Southwestern Colorado (51,018)—Most notable and best preserved prehistoric cliff dwellings in the United States.

Mount McKinley, 1917, South Central Alaska (1,939,319)—Highest mountain in North America; caribou, Dall sheep, and other spectacular wildlife.

Mount Rainier, 1899, West Central Washington (241,525)—Greatest single-peak glacial system in the United States, radiating from the summit and slopes of an ancient volcano; dense forests.

Olympic, 1938, Northwest Washington (846,742)—Notable as finest remnant of the Pacific Northwest forests, including the famous "rain forests." and for its numerous glaciers; also as the summer feeding ground for the rare Roosevelt Elk.

Platt, 1906, Southern Oklahoma (912)—Numerous cold mineral springs.

Rocky Mountain, 1915. North Middle Colorado (252,788)—Heart of the Rockies, snowy range, peaks 11,000 to 14,255 feet altitude. Remarkable records of glacial period.

Sequoia, 1890, Middle Eastern California (385,100)—Great groves of giant sequoias, world's largest and probably oldest living things; magnificent High Sierra scenery, including Mount Whitney, highest mountain in United States proper.

Shenandoah, 1935, in Northern Virginia (193,47—Outstanding scenic section of the Blue Rid Mountains.

Wind Cave, 1903, Southwestern South Dako (26,576). Limestone caverns having several miles galleries and numerous chambers containing p culiar formations. Buffalo herd.

Yellowstone, 1872, Northwestern Wyomin Southwestern Montana, and Northeastern Ida (2,213,207)—More geysers than in all rest of wor together. Boiling springs; mud volcanoes; petrifi forests. Grand Canyon of the Yellowstone, remar able for gorgeous coloring. Large lakes; ma large streams and waterfalls. Great wild anim herds.

Yosemite, 1890, Middle Eastern California (756441)—Mountainous region of unusual beauty; Yos mite and other inspiring gorges; many waterfa of extraordinary height; 3 groves of giant sequoi

Zion, 1919, Southwestern Utah (94,241)—Ma nificent gorge (Zion Canyon), depth from 1,500 2,500 feet, with precipitous walls.

NATIONAL HISTORICAL PARKS

Figures in parentheses, area in acres.

Abraham Lincoln, 1939, Kentucky (117)—Co tains memorial building covering log cabin thoug to be that in which Lincoln was born.

Chalmette, 1939, Louisiana (33)—Part of t ground on which the Battle of New Orleans w fought, Jan. 8, 1815.

Colonial, 1936, Virginia (7,129). Includes mc of Jamestown Island, site of the first permane English settlement in America; historic Yorktow the parkway connecting these and other Coloni sites with Colonial Williamsburg, Cape Henry M morial.

Morristown, 1933, New Jersey (958)—Sites important military encampments during the Rev lution; Washington's Headquarters, 1779-80.

Saratoga, 1948, New York (2,087). Scene of t American victory over the British General Bu goyne, 1777; turning point of the Revolution a recognized as one of the decisive battles of wo history.

NATIONAL MILITARY PARKS

Chickamauga and Chattanooga (8,127), Georg Tenn. **Fort Donelson** (103), Dover, Tenn. **Fre ericksburg and Spotsylvania County Battlefie Memorial** (2,421), Fredericksburg, Va. **Gettysbu** (2,463), Gettysburg, Pa. **Guilford Courthouse** (14 Greensboro, N. C. **Kings Mountain** (4,012), Kin Creek, S. NATIONAL CEMETERIES

Administered by the National Park Service because of their historical interest.

The Department of the Army has jurisdiction over other National Cemeteries, including those in Europe and contemplated burial grounds in other foreign places.)

(Figures in parentheses indicate acreage)

Antietam (11.36), Sharpsburg, Md.
Battleground (1.03), Washington, D. C.
Fort Donelson (15.34), Dover, Tenn.
Fredericksburg (12.00), Fredericksburg, Va.
Gettysburg (15.55), Gettysburg, Pa.
Poplar Grove (8.72), Petersburg, Va.
Shiloh (10.25), Pittsburg Landing, Tenn.
Stones River (20.09), Murfreesboro, Tenn.
Vicksburg (119.76), Vicksburg, Miss.
Yorktown (2.91), Yorktown, Va.

NATIONAL PARKWAYS

(Figures in parentheses indicate acreage)

Blue Ridge (44,823) follows Blue Ridge Mountains. Estimated length when completed, 477 miles.

Natchez Trace (13,648.87), follows old Indian trail between Nashville, Tenn., and Natchez, Miss. Estimated length when completed: 447 miles.

George Washington (2,897.79), along Maryland and Virginia shores of the Potomac River. Estimated length when completed: 57 miles.

NATIONAL CAPITAL PARKS

Nation Capital Parks (29,023), District of Columbia, Virgina and Maryland. The park system of the Nation's Capital comprises nearly 750 units in the District of Columbia and vicinity.

NATIONAL HISTORIC SITES

Name of area	Acres	State	Characteristics
Adams Mansion	4.05	Mass.	Home of Presidents John Adams and John Quincy Adams
Atlanta Campaign	20.96	Ga.	Sherman's march from Chattanooga to Atlanta
Federal Hall Memorial	.49	N. Y.	First seat new Federal Govern. in U. S.
Fort Raleigh	16.45	N. C.	First attempted English settlement within confines of the U. S.
Hampton	43.30	Md.	Georgian mansion built between 1783 and 1790
Home of Franklin D. Roosevelt	33.23	N. Y.	
Hopewell Village	848.06	Pa.	Early iron-making village
Jefferson National Expansion Memorial	82.58	Mo.	Commemorates territorial expansion
Manassas National Battlefield	1,604.57	Va.	Battles of Manassas
Old Philadelphia Custom House	.79	Pa.	Greek revival architecture
Salem Maritime	8.61	Mass.	Early maritime history
San Juan	40.0	Puerto Rico	Ancient Spanish defenses of San Juan
Vanderbilt Mansion	211.65	N. Y.	American residence of period 1880-1900

NATIONAL MEMORIALS

House where Lincoln died	.05	Wash., D. C.	
Kill Devil Hill	314.40	N. C.	Wright Brothers' flights
Lee Mansion	2.71	Va.	Antebellum Home, Robert E. Lee
Lincoln Memorial	.61	Wash., D. C.	Classical structure
Lincoln Museum	.18	Wash., D. C.	Ford theater where Lincoln was shot by John Wilkes Booth
Mount Rushmore	1,668.27	S. D.	Colossal presidential figures carved on mountain
New Echota Marker	.92	Ga.	Last capital of Cherokee Indians in Ga.
Thomas Jefferson	1.2	Wash., D. C.	Circular colonnaded structure
Washington Monument	.37	Wash., D. C.	

Area of National Forests in United States

State Forests—Units 938; Acreage, 11,604,320.

State Parks—Units 1,769; Acreage, 4,228,458.

Community Forests (Including municipal, county, school, and public organization forests)—U 3,113; acreage 4,413,950.

For data on individual States see 1949 Almanac, Page 300.

REGIONAL OFFICES OF THE U. S. FOREST SERVICE

Northern Region: Federal Building, Missoula, Montana.

Rocky Mountain Region: Post Office Building, Denver, Colorado.

Southwestern Region: Post Office Building, Albuquerque, New Mexico.

Intermountain Region: Forest Service Building, Ogden, Utah.

California Region: 630 Sansome Street, San Francisco, California.

Pacific Northwest Region: Post Office Building, Portland, Oregon.

Eastern Region: Bankers Securities Build Philadelphia, Pa.

Southern Region: Glenn Building, Atla Georgia.

North Central Region: 623 N. 2nd Street, waukee, Wisconsin.

Alaska Region: Federal and Territorial Bu ing, Juneau, Alaska.

Tropical Unit: Rio Piedras, Puerto Rico.

Forest Products Laboratory: Madison, Wis sin.

Principal Waterways in the United States

Source: Lewis A. Pick, Major General, Office of the Chief of Engineers.

The Intracoastal Waterways

The Atlantic and Gulf Intracoastal Waterways provide a protected channel for barge and other light-draft navigation following coastal sounds, bays, rivers, and artificial channels. This canal system, extending for more than 2,500 miles along the Atlantic and Gulf Coasts, affords a channel 12 feet or more in depth throughout the Atlantic coastal section from Trenton, N. J., to Jacksonville, Fla., 1,062 miles, and on the Gulf coastal section from Carrabelle, Fla., to Corpus Christi, Tex., 939 miles. In the section between Jacksonville and Miami, Fla., 372 miles, on the Atlantic coast, depths of eight feet are available throughout, and dredging of a 12-foot channel is in progress (1949) in the 152-mile section on the Gulf coast between Corpus Christi and Brownsville, Tex. Connecting with the Atlantic and Gulf Intracoastal Waterways are many miles of navigable waterways which serve as feeding and distributing mediums for an extensive commerce. Important coastal canals, which are maintained and operated in the interest of ocean-going vessels, include the Cape Cod Canal, Mass., 17.5 miles in length, and the Chesapeake and Delaware Canal, the canal proper of which is 14 miles in length and the waterway project, 46 miles in length.

Inland Waterways

The principal inland navigable waterways of the United States include the Mississippi River, the Illinois Waterway, the New York State Barge Canal System, the San Joaquin-Sacramento River System in California, and the Columbia River System in the northwest. The Mississippi River Waterway embraces the river proper, the Illinois, Ohio, Missouri, Tennessee, Monongahela, Allegheny, and Kanawha Rivers and other streams. The Mississippi River has a channel suitable for ocean-going vessels upstream to Baton Rouge, La., 253 miles above the mouth, and thence a channel for modern barge navigation to Minneapolis, Minn., 1,688 miles, and its principal tributaries. The Illinois River and Waterway to Lake Michigan a barge channel 327.3 miles in length wwhich nects the Great Lakes with the Mississippi R System. The San Joaquin River, with an outl the sea through Suisun Bay and San Francisco provides a deep-draft channel to Stockton, C 41 miles above its mouth. The Sacramento R also emptying into Suisun Bay, has a channe light-draft navigation aggregating 246 miles. Columbia and Lower Willamette rivers have a d draft channel from the mouth of the Colu River to Vancouver, Wash., and Portland, O 104 and 113 miles respectively, and thence de in the Columbia River suitable for comme vessel traffic to the head of the pool formed by Bonneville Dam, located 144 miles above mouth, and thence depths for barge naviga upstream to and including the Snake River. Washington Ship Canal, Wash., provides a cha for ocean-going vessels within the City of Se extending from Puget Sound to Lake Washingt distance of approximately 8 miles.

Great Lakes Connecting Channels.

The Great Lakes, which consist of Lakes Su ior, Michigan, Huron, Erie, and Ontario, have tural deep water except in the connecting char which have been artificially deepened where n sary to accommodate deep-draft vessels. They an outlet to the Atlantic Ocean via the St. L ence Waterway and via Oswego and Erie bran of the New York State Barge Canal System Hudson River. The connecting channels are Ke naw Waterway, Lake Superior to Keweenaw St. Marys Canal, Michigan, between Lake Sup and Lake Huron; channels in the Straits of Ma nac, connecting Lakes Michigan and Huron; S geon Bay and Lake Michigan Ship Canal, bet Green Bay and Lake Michigan; St. Clair River tween Lakes Huron and St. Clair; and De River, connecting Lake St. Clair and Lake Eri addition, the Welland Canal in Canada con Lake Erie and Lake Ontario.

The Alaska Highway

The Alaska Highway, originally known as the Alcan Highway, stretches 1,523 miles from Dawson Creek, B. C., through Canada and the Yukon Territory to Fairbanks, Alaska. Planned as a military supply route for the defense of Alaska against a possible Japanese invasion, it was constructed by U. S. Army engineers during World War II at a cost of $138,000,000. Work on the 24-foot highway was started (March 12, 1942) and completed (Dec. 1, 1942) four months ahead of schedule.

Under an agreement with Canada, the United States maintained the entire highway during the war and for six months thereafter, but turned the Canadian section over to the Dominion gov ment (April 2, 1946). On this section of the h way U. S. citizens are entitled to the same vileges as Canadians.

Re-design during construction permitted re tion of the highway from its original lengt approximately 1,670 miles to its present miles, of which 1,221 miles are in Canada, an in Alaska.

The Alaska Highway was opened to to travel (summer 1948). Public camping grou service stations and other facilities are lo throughout the Yukon Territory.

Dams in the United States—Volume and Purpose

(1) Under construction, data subject to revision.
(2) Data not available.
Height—Difference in elevation, in feet, between lowest point in foundation and top of dam, exclus of parapet or other projections.
Length—Overall length of barrier in feet; main dam and its integral features as located betw natural abutments.
Volume—Total volume in cubic yards of all material in main dam and its appurtenant works.
Year—Date structure was originally completed for use.
River—Main stream.
Purpose: Irr—Irrigation; FC—Flood Control; P—Power Production; N—Navigation; WS—Wa Supply; RR—River Regulation; DC—Debris Control.

Purpose—Irr-Irrigation; FC-Flood Control; P-Power Production; N-Navigation; WS-Water Supply; RR-River Regulation; DC-Debris Control.

Descriptions of American Dams

Source: Department of the Interior, Bureau of Reclamation

BONNEVILLE DAM, OREGON

Improvement of the Columbia River, between Oregon and Washington, was undertaken at Bonneville Sept. 30, 1933, under the provisions of the National Industrial Recovery Act. The project was formally authorized by Congress in the Rivers and Harbors Act approved Aug. 30, 1935. It is situated on the Columbia River about 40 miles east of Portland, Ore., and may be reached by railroad and highway. The main features of the work are a dam, a powerhouse, ship locks, and fishways. The total estimated cost of the project with an installation of ten power units is $85,611,000 of which $58,621,000 will be charged to power and the remainder to navigation.

The dam, locks, existing power plant, with its present installation of ten units and appurtenant works at Bonneville were constructed and are being operated and maintained by the Corps of Engineers, U. S. Army. Present installed capacity is 518,400 kilowatts. The transmission and sale of electric energy generated at Bonneville as well as that generated at Grand Coulee Dam are under the supervision of the Secretary of the Interior, through the Bonneville Power Administration, Portland, Ore. Revenues from sales of Bonneville and Grand Coulee power to 89 wholesale customers for the fiscal year 1947 amounted to $21,890,929.

HOOVER (BOULDER) DAM (BOULDER CANYON) PROJECT

Hoover Dam, completed in 1936, by the Bureau of Reclamation on the Colorado River, Arizona-Nevada, was authorized by Congress, Dec. 21, 1928. It is 726 feet tall, and contains 4,400,000 cubic yards of concrete. Its reservoir, Lake Mead, is 115 miles long, stores 31,141,755 acre-feet of water, and is the largest artificial lake in the world.

The Boulder Power Plant as of April, 1949, had an installed capacity of 1,034,800 kilowatts and 165,000 kilowatts of additional capacity under contract. The ultimate capacity of the plant is 1,332,300 kilowatts. From 1936, when the plant went into operation through May 31, 1949, more than 50 billion kwp. of energy has been generated. From 1936, when Hoover Dam began operating, to May 31, 1949, approximately $59 million in net revenue had been aid into the United States Treasury from receipts for power generated at Hoover Dam. This amount has been applied toward repayment of funds advanced by the Federal Government for construction of the project. The Bureau of Reclamation operates the dam, and under the provisions of the Boulder Canyon Project Adjustment Act of 1940, the power plant is operated by the City of Los Angeles and the Southern California-Edison Co., as agents of the United States, under the supervision of the Bureau of Reclamation acting for the Secretary of the Interior. Hoover Dam supplies about half of the power required in southern California.

Hoover Dam is the principal engineering structure of the Boulder Canyon Project, which provides multiple benefits through regulation of the Colorado River—flood control, irrigation, navigation improvement, water for domestic, industrial, and municipal purposes, and power.

PARKER DAM

Parker Dam, about 150 miles downstream, was built by the Bureau of Reclamation with funds furnished by the Metropolitan Water District of California. The dam diverts water through a cross-state aqueduct for the domestic uses of Los Angeles and 13 neighboring cities. The 71-mile San Diego Aqueduct of which the initial development has been completed connects with this Colorado River Aqueduct near San Jacinto, California, to furnish water to the city of San Diego. A power plant was completed by the Bureau of Reclamation at Parker Dam in 1943 with an installed capacity of 120,000 kilowatts. Imperial Dam, 300 miles downstream from Boulder, is the diversion structure for the All-American Canal, California, and for the Gila project, Arizona. The 80-mile All-American Canal provides an irrigation supply of water to the Imperial Valley, and the 125-mile Coachella branch of the Canal will furnish water to the Coachella Valley. The Gila project is designed to irrigate a large area of desert land in Arizona.

Construction is progressing on the Coachella Canal and predevelopment work on the Gila project is continuing.

The ultimate cost of Hoover Dam and power plant is $165,000,000. The All-American Canal including the Coachella Main Canal with distribution and drainage facilities will cost approximately $70,000,000 estimated on present day prices.

DAVIS DAM

Construction is well under way of Davis Dam Power Plant, fourth of the great structures signed by the Bureau of Reclamation for reg tion of the Colorado River, is located in Pyra Canyon, 67 miles downstream from Hoover and 35 miles west of Kingman, Arizona. The D Dam project estimated to cost $104,000,000 is largest construction project undertaken by Bureau of Reclamation in the southwest Hoover Dam was built.

It will be an earth- and rock-fill struc creating a reservoir with a capacity of 1,820 acre-feet. Five 45,000 kilowatt generators will vide an installed capacity of 225,000 kilowatts the power plant, and a switchyard will be loc adjacent to the plant. Its principal purpose generate electrical energy and to regulate the of the Colorado River at the international bo dary.

GRAND COULEE DAM, WASHINGTON

Grand Coulee Dam, on the Columbia R Washington, constructed and operated by Bureau of Reclamation, was accepted by the Un States from the contractor (Jan. 1942). It is largest concrete dam in the world. In the power plant of the dam two generators, of 10, kilowatt capacity each, began operation in Ma 1941, two years ahead of schedule. By the sp of 1943, three 108,000-kilowatt rated capacity eration. The two 75,000 kilowatt genera which were borrowed from Shasta Dam for em gency service during the war, have been dismar and returned to Shasta. Additional units now stalled brought the operating capacity of the power plant to 992,000 kilowatts by May, The right power house structure which will h nine generators of 108,000 kw. rated capacity. was completed in the fall of 1942. All nine erators are now under contract. When inst these machines will bring the project to its ultir rated capacity of 1,974,000 kilowatts. The p from Grand Coulee Dam serves the industrie the Pacific Northwest. Power from the Gr Coulee plant is distributed over the transmis system of the Bonneville Power Administration

The purpose of the dam is twofold, to pro irrigation water and power. Behind Grand Co is a 127-square mile reservoir, the Franklin Roosevelt Lake, which will ultimately irrigate vast project, embracing over one million a Today this land is fertile but arid and as a sult only a small part of it is dry farmed. major portion of the proposed development largely sagebrush. When the entire projec completed, it is estimated homes will be prov for more than 350,000 persons living on the gated farms and in towns and cities depen upon them.

Work is going forward on the construction of irrigation works at this time. The first 5400 was irrigated in 1948, partly in demonstra and development farms. Large scale irrigation not start until 1952, when construction will reached a stage to permit reclamation of a 200,000 acres. The land to be irrigated, muc which is now in large individual holdings, wi broken up into family sized farms for resal veterans and others.

The project is ideally situated from a tr portation point of view, an inestimable asse connection with a development of this na Three transcontinental main railroad lines cro the Northern Pacific, Great Northern, and Chic Milwaukee, St. Paul, and Pacific. In additio these, a branch line of the Union Pacific ei the project, and both Federal and State high are easily accessible.

The ultimate development cost of all irrig works and power facilities is estimated to be a $610,000,000.

MISSOURI RIVER BASIN

The master plan for controlling the water the Missouri river for purposes of irrigation electric power and eliminating the disas floods is the Reclamation Program, 1948-1954 was drawn up by the Bureau of Reclamation, Dept. of the Interior, for the Committee on P Lands of the House of Representatives of 81st Congress.

The plan sets forth that while a great pa the West is the land of little or no rain flood waters of the rivers have been allowe escape without being properly used, causing damage annually. Only one-fifth of the available in streams has been put to use in gating 17 western states, and only three o every 100 acres of land can be irrigated to duce farm crops under present conditions.

arms already equipped with irrigation have only artial supplies of water.

The Reclamation Plan proposes the development of water resources to irrigate 2,036,000 acres n seven years, creating about 24,000 new farms, nd supplying additional water to 3,607,000 acres, r 66,000 farms, now short of water. This would aise the full supply from 2,448,000 acres to ,484,000 acres and the acreage supplied with upplemental water from 2,555,000 acres to ,165,000 acres. The investment would yield verage returns of over $500,000,000 a year, according to the estimate.

According to the plan there were 33 power lants on reclamation projects on June 30, 1947, enerating 2,223,487 kilowatts. The 1948-54 proram visualizes increasing the capacity to 6,547,987 ilowatts. An enormous amount of hydroelectric nergy would still remain undeveloped at the end f 1954, possibly 30,000,000 kilowatts. During 1947 he gross revenue from power plants was 22,472,000; the project proposes to reach 64,000,000 annual gross revenue by 1954.

Flood control projects in the Missouri basin, overing 7 states, authorized 1944, had cost 19,497,720 by June 30, 1947 and were expected to ost $2,131,972,000 before completion.

In 1949 the Corps of Engineers, Dept of the rmy, was building five large dams across the issouri below Fort Peck, Mont., out of six proected. Garrison Dam and Reservoir, 75 miles orthwest of Bismarck, N. D., was described as he key link in the chain of Missouri river lakes, hich will stretch nearly 1,000 miles from Fort eck to Sioux City, Ia. The dam is two miles long, 10 feet high, one-half mile thick at the base. The ake behind it will extend back 200 miles, up to he mouth of the Yellowstone river. In some laces the lake will be 15 to 20 miles wide. Water ill flow through turbines creating electric power nd will supply irrigation. The Oahe dam, six iles above Pierre, S. D., will create a lake about 40 miles long, reaching almost to Bismarck, N. D. t will irrigate 750,000 acres. Big Bend reservoir, 0 miles below Pierre, S. D. will be smaller. Fort andall reservoir in southeastern South Dakota, ill make a lake 140 miles long. Gavin Point eservoir, above Yanktown, S. D., will be used to egulate the supply of water in the river below it.

Levees will be constructed from Sioux City to he mouth of the river, 1,500 miles, to keep the iver in its channels and prevent flooding of low reas. Additional dams will be built on the lower issouri and its tributaries to control floods. The ake of the Ozarks on the Osage river is the result f one of these dams.

CENTRAL VALLEY PROJECT

The Central Valley Project is a multiple-purpose evelopment situated in the central part of Calirnia, stretching from the foot of Mt. Shasta outh to the Tehachapi Range. The primary purose of this project is to provide irrigation for the ich but inadequately watered lands of the Sacramento and the San Joaquin Valleys. Other benefits will include water supply for domestic and ndustrial uses, navigation, flood control and electric power.

The key features of the development are the hasta and Friant Dams, both virtually completed and the Keswick Dam, still under conruction. Behind these dams the artificial reservoirs will store huge quantities of water which will e diverted to more than 1,000,000 acres of land. his diversion will be made possible through a eries of canals. The largest of these is Friant-Kern, 156 miles, on which construction was begun n 1945. By the end of 1947 about 89 miles were ompleted or under construction. In addition to toring water, approximately 454,000 kw. of hydroelectric power will be generated in the plants at hasta and Keswick Dams. A third 75,000 kw. nit plant in operation in March 1948, brought the otal installed capacity in Shasta powerplant as f that date to 225,000 kw.

The project was authorized on Dec. 2, 1935, when he President signed a finding of feasibility subitted by the Secretary of the Interior. It was authorized by the Rivers and Harbors Acts of 937 and 1940.

FORT PECK DAM, MONTANA

Source: Chief of Engineers, War Department

The Fort Peck Dam, constructed by the Corps f Engineers, Department of the Army, at the eadwaters of the Missouri River in northeastern Iontana, is the largest earth-fill dam in the world. onstruction was started in October 1933, and the am was raised to its ultimate height of 250 feet bove stream bed in October 1940. The primary urpose of the dam, expressed in the authorizing cts, is for the improvement of navigation on the issouri River, and for the production of hydroectric power consistent with the primary demands of navigation. Releases from the Fort Peck Reservoir for navigation purposes were started in 1938.

The dam has a total crest length of 4 miles, comprised of the main section across the river valley of 10,578 feet and a large dike section on the west bank 10,448 feet in length. The maximum width of the base of the dam is 4,900 feet, including the upstream and downstream berms while the top, on which an asphalt paved road is to be constructed, will be 100 feet wide on the main dam and 50 feet wide on the dike section. The dam contains 125,627,000 cubic yards of earth, 4,000,000 cubic yards of gravel and more than 1,000,000 cubic yards of rock.

During July 1947 the Fort Peck Reservoir was filled for the first time to its full storage capacity of 19,412,000 acre feet of water. The reservoir created by the dam has a maximum surface area of 245,000 acres, a maximum length of 189 miles, a clear width of 16 miles and a shore line of 1,600 miles.

Power from the initial generating unit of 35,000 kilowatts has been in operation since July 1943, second unit of 15,000 kw. installed in 1948, and is distributed by the Bureau of Reclamation, Department of the Interior. Power produced during 1948 totaled 315,372,000 kw. Planned ultimate installations will increase the plant capacity to 105,000 kilowatts.

DENISON DAM (LAKE TEXOMA), TEXAS AND OKLAHOMA

Source: Office of the District Engineer, Corps of Engineers, Tulsa, Oklahoma

Five miles northwest of Denison, Texas, on Red River is the $60,000,000 Denison Dam, largest rolled earth-fill dam in the world. Purpose of the dam, built under supervision of the Corps of Engineers, Department of the Army, is for flood control and hydroelectric power. Flood protection is afforded to lands in four states, Oklahoma, Texas, Arkansas, and Louisiana.

Authorized by Congress in 1938, the Denison Dam project consists of a rolled earth-fill embankment and concrete spillway, outlet works and powerhouse. All work is essentially complete except addition to power generating facilities. The project is operated by the Corps of Engineers as a part of a comprehensive plan of flood regulation and beneficial uses of water in the Red River Basin.

The main embankment is 15,200 feet long and has a 6,000 foot dike extension. Maximum base width of the embankment is 1,145 feet, maximum height is 165 feet, and the crest, at elevation 670, is 40 feet wide. A total of 18,290,000 cubic yards of earth-fill and 383,000 cubic yards of protection stone and crushed rock were used in construction of the main embankment and dike extension.

The reservoir, when filled to the spillway crest, would extend upstream about 80 miles to the vicinity of Gainesville, Texas. A northern arm of the pool would extend about 65 miles up the tributary Washita River Valley to Ravia, Oklahoma. Greatest depth of the pool would be 130 feet. The surface area would be 142,700 acres, and the total capacity at that elevation would be 5,715,700 acre-feet. Normally, the pool is held near the top of power pool, elevation 617, with a surface area of 93,080 acres, capacity of 3,024,900 acre-feet and a shoreline of 580 miles.

Development and administration of the Lake Texoma area for recreational and related purposes is being accomplished by the National Park Service, U. S. Department of the Interior, under a cooperative agreement between the Army and Interior Departments. Two large wildlife refuges, the 12,650-acre Hagerman National Wildlife Refuge in Texas and the 13,450-acre Tishomingo National Wildlife Refuge in Oklahoma, are located in the reservoir area and are administered by the Fish and Wildlife Service, U. S. Department of the Interior.

Fort Supply, Wolf Creek near Fort Supply, Oklahoma. Completed in 1942 for flood control and conservation. Surface area for conservation 1,550 acres, for flood control 5,750 acres. Capacity for conservation 10,900 acre-feet, for flood control 96,600 acre-feet. Shoreline 15 miles. Cost $7,535,000.

Great Salt Plains, Salt Fork of Arkansas River, about 12 miles east of Cherokee, Oklahoma. Completed in 1941 for flood control and conservation. Surface area for conservation 10,700 acres, for flood control 29,000 acres. Capacity for conservation 58,000 acre-feet, for flood control 259,000 acre-feet. Shoreline 40 miles. Cost $4,842,000.

Canton, Canadian River, Oklahoma

Canton, Canadian River, near Canton, Oklahoma. Completed in 1948 for flood control and conservation. Irrigation features to be developed by the Bureau of Reclamation. Surface area for conservation 3,300 acres, for irrigation 6,700 acres, for flood control 15,500 acres. Capacity for conservation 23,000 acre-feet, irrigation 69,000 acre-feet, flood control 298,000 acre-feet. Shoreline, irrigation pool, 25 miles. Cost, flood-control features, $10,325,000.

RESERVOIRS UNDER CONSTRUCTION

Fall River, Kans.

Flood control and conservation. Surface area, acres—conservation 2,600, flood control 10,400. Capacity, acre-feet—conservation 27,000, flood control 236,000. Shoreline, permanent pool, 40 miles. Cost, $10,980,000. Estimated completion for flood control, summer 1949.

Wister, Poteau River, Okla.

Flood control and conservation. Surface area, acres—conservation 4,000, flood control 23,000. Capacity, acre-feet—conservation 30,000, flood control 400,000. Shoreline, permanent pool, 75 miles. Cost, $10,108,000. Estimated completion for flood control, spring 1949.

Hulah, Caney River, near Bartlesville, Okla.

Flood control and conservation. Surface area, acres—conservation 3,200, flood control 13,000. Capacity, acre-feet—conservation 30,000, flood control 265,000. Shoreline, permanent pool—60 miles. Cost, $12,066,000. Estimated completion for flood control, late fall 1950.

Heyburn, Polecat Creek, near Sapulpa, Ok

Flood control and conservation. Surface acres—conservation 1,070 flood control Capacity, acre-feet—conservation 10,200, flood trol 49,500. Shoreline, permanent pool, 40 Cost, $2,690,000. Estimated completion for control, early sring 1950.

Fort Gibson, Grand (Neosho) River, Okl

Flood control and generation of hydroel power. Surface area, acres—top power pool 1 flood control 51,000. Capacity, acre-feet power pool 365,000, flood control 922,000. Shor top power pool, 225 miles. Cost $46,646,000. mated completion for flood control, spring 195 power, 1953.

Tenkiller Ferry, Illinois River, near Gore,

Flood control and generation of hydroel power. Surface area, acres—top power pool 1 flood control 20,800. Capacity, acre-feet power pool 630,000, flood control 600,000. Shor top power pool, 100 miles. Cost, $24,250,000. mated completion for flood control, 1951, for p 1953.

The Continental Divide

Source—The U. S. Geological Survey, Department of the Interior

Continental Divide: watershed, created by mountain ranges or table-lands of the Rocky Mountains, from which the drainage is easterly or westerly, the easterly flowing waters reaching the Atlantic Ocean chiefly through the Gulf of Mexico, and the westerly flowing waters reaching the Pacific Ocean through the Columbia River, or through the Colorado River, which flows into the Gulf of California.

The location and route of the Continental Divide across the United States may briefly be described as follows:

Beginning at point of crossing the United States-Mexican boundary, near long. 108° 45′ W., the Divide, in a northerly direction, crosses New Mexico along the western edge of the Rio Grande drainage basin, entering Colorado near long. 106° 41′.

Thence by a very irregular route northerly Colorado along the western summits of the Grande and of the Arkansas, the South Platte the North Platte River basins, and across Mountain National Park, entering Wyoming long. 106° 52′.

Thence northwesterly across Wyoming alon western rims of the North Platte, Big Horn Yellowstone River basins, crossing the sout corner of Yellowstone National Park.

Thence in a northwesterly direction, formin common boundary of Idaho and Montana, point on said boundary near long. 114° 00′ W

Thence northeasterly and northwesterly th Montana and the Glacier National Park, en Canada near long. 114° 04′ W.

Figures for mean surface above mean sea level are the average for 49 years—1900-1948.

Maximum and minimum monthly mean elevations since 1900 of the surface of the Great Lakes (above sea level)—Superior, 603.64 (Sept., 1916); 599.94 (April, 1926). Michigan, 582.28 (July, 1929); 577.25 (Jan., 1926). Huron, 582.32 (July, 1929); 577.35 (Feb., 1926). Erie, 574.33 (June, 1947); 569.43 (Feb., 1936). Ontario, 248.97 (July, 1947); 242.68 (Nov., 1934).

The Great Lakes form the largest body of water in the world and with their conne waterways rank as the world's largest inland transportation unit. The Lakes form a chea ready means for the transportation of wheat the Canadian prairies to the East. The di from Duluth, Minn., the western terminus system to eastern outlet on Lake Ontario is miles.

LAKE ST. CLAIR

Lake St. Clair is an expansive shallow basin of the waterway through which Lake Huron discharges into Lake Erie. It has low marshy shores and a natural maximum depth of about 21 feet Its low-water datum is 573.5 feet above mean sea level. Its extreme length is 26 miles and ex width 24 miles. The improved steamer chan 18½ miles long, with least width of 700 fee depth of 25 feet. Of the 460 square miles of surface 180 is in the United States and Canada.

Lake With the Longest Name

The longest place-name in the United States is the 14-syllable transliteration of an Indian (Mol phrase for a lake near Webster, Mass., 3 miles from the Connecticut line, on State Route 193.

C h a r g o g a g o g m a n c h a u g a g o g c h a u b u n a g u n g a m a u g

and is said to mean "you fish-on-your-side, we-fish-on-our-side, nobody-fish-in-the-middle." A of the Nipmuck praying Indians was settled here by John Eliot and Daniel Gookin in 1674. The described in Holdfast Gaines, an historical novel by Odell and Willard Shepard, as part of the g domain that the Mohegans asked to be restored to them, by petitioning the Connecticut legis Locally it is called Lake Webster.

Principal Rivers of the United States

White (Ark.-Mo.)	Madison County, Ark.	Mississippi River	
Willamette	Junction of Coast and Middle Forks, near Eugene, Ore.	Columbia River	
Wisconsin	Le Vieux Desert, Vilas County, Wis.	Mississippi River	
Yazoo	Junction of Tallahatchie and Yalobusha Rivers, Leflore County, Miss.	Mississippi River	
Yellowstone	Park County, Wyo.	Missouri River	
Yukon	Junction of Lewes and Pelly Rivers, Yukon Province	Bering Sea	1,

WASHINGTON, THE NATION'S CAPITAL

Washington, D. C., the Nation's Capital, occupies all of the 70 square miles allocated to the istrict of Columbia. It was designed solely for the use of the Federal Government, which has ccupied it since June, 1800, when the site consisted of mud flats, pastures, woods and cypress swamps. opulation, July 1, 1948, was 898,000, including 31,000 troops, etc., not counted as civilians; this was n increase of 235,000 over the 1940 figure of 663,000.

Washington entertains over 1,500,000 visitors annually, who come to transact business, attend nventions or pass their vacations. It is served by the Pennsylvania, Chesapeake & Ohio, Baltimore & hio, Richmond, Fredericksburg & Potomac and Southern Railways through the monumental Union tation, and by the Old Dominion line; it is the center of a network of bus and airplane lines. Its est seasons are early Spring and late Fall; the famous cherry trees, in bloom April-May, attract many sitors. The summer months are hot and muggy and Washingtonians not compelled to be at their esks usually take to the hills and the seashore.

Externally Washington provides a panorama of neo-classical architecture which, having been adopted the early 19th century, when the republics of Greece and Rome were on the minds of the Founding athers, has challenged the ingenuity of architects with modern ideas in recent decades. Thus the uildings, equipped with fluted columns and pediments, run all the way from the impressive marble mple of the United States Supreme Court to the plainer box-like 6-story buildings of the Depart- ents of Commerce, Labor and Post office. From the relatively simple Lincoln Memorial the visitor ay turn to the extraordinary "piles" of the Smithsonian Institution, the Pension office building and he State, Navy and War building, all mementoes of attempts at architectural styles, the last being escribed by the Washington guide of the American Guides Series as "close to a universal compendium architectural errors."

Buildings and Monuments

The central composition extends from the Capi- l through the green stretches of the elm-bor- ered Mall to the Washington Monument, and ience over the reflecting basin to the Lincoln emorial—thus placing the founder and the sav- r of the nation on the axis of the Capitol. The oss-axis is formed by the White House, the Wash- gton Monument and the memorial to Thomas fferson.

From the Lincoln Memorial as a focal point e Rock Creek Parkway traverses the entire city, d also the Arlington Memorial Bridge, which nnects with the Mount Vernon Highway to the me of Washington, and as well forms the en- ance to the Arlington National Cemetery where e the tomb of the Unknown Soldier and the rlington Mansion of the Custis-Lee families.

The Lincoln Memorial, designed by Henry Bacon, closes a colossal statue of Lincoln by Daniel C. rench, murals of Emancipation and Reunion by les Guerin and on its walls are inscribed the ettysburg Address and the Second Inaugural. It as built by a commission with President Taft as hairman. Under the Chairmanship of Chief Jus- e Taft the Supreme Court building was con- ructed by Cass Gilbert, architect.

Along the south side of Pennsylvania Avenue om the Treasury to the Capitol are the Depart- ents of Commerce, Labor, Post Office and Justice, e Archives, Interstate Commerce, Internal Rev- ue and the Federal Trade Commission. These ildings have a uniform cornice line and an laptation of classical exteriors. On the south ey face Constitution Avenue, a monumental oroughfare extending two-and-a-half miles from e Capitol to the Lincoln Memorial. A frame for is memorial is formed on the north side of the enue by five white marble buildings set back deep gardens— buildings of the Pan-American nion, Public Health Service, Federal Reserve oard, National Academy of Sciences and American harmaceutical Association. The Interior Depart- ent occupies three squares between C and F, 18th d 19th Streets. Framing the grounds south of e White House are the Corcoran Gallery of Art, e Red Cross group, the Daughters of the Amer- an Revolution Continental Memorial Hall and uditorium, and the Pan-American. These activi- es are supplemented by the Freer Gallery of Far astern Art and the Folger Shakespeare Library. Across the Potomac, reached by the Key and the w Memorial Bridge (2,138 ft. long), is the rlington National Cemetery.

Ford's Theater, in which President Lincoln was assassinated by John Wilkes Booth April 14, 1865, as immediately taken over by the government d is now a Lincoln Museum. Across Tenth Street the house in which Lincoln died, now used as a emorial. It and the old theater contain the Old- yd collection of Lincoln memorabilia.

The Capitol

The Capitol building in Washington, D. C., is tuated on a plateau 88 ft. above the level of the Potomac River and covers an area of 153,112 sq. ft., or approximately 3½ acres. Its length, from north to south, is 751 ft., 4 ins.; its width, including approaches, is 350 ft., and its location is described as being in latitude 38° 53′ 20.4″ north and longitude 77° 00′ 35.7″ west from Greenwich. Its height above the base line on the east front to the top of the Statue of Freedom is 287 ft., 5½ ins. The dome is built of iron, and the aggregate weight of material used in its construction is 8,909,200 pounds.

The Statue of Freedom surmounting the dome is of bronze and weighs 14,985 pounds. It was modeled by Thomas Crawford, father of Francis Marion Crawford, the novelist, in Rome, and the plaster model shipped to this country. It was cast in bronze at the shops of Clark Mills, on the Bladensburg Road, near Washington. The cost of the casting and the expenses in connection were $20,796.82, and the sculptor was paid $3,000 for the plaster model. It was erected and placed in its present position Dec. 2, 1863.

The Rotunda is 94 ft. 9 ins. in diameter, and its height from the floor to the top of the canopy is 180 ft. 3 ins.

Reconstruction Begins, 1949

The Senate chamber, 84 by 51 ft., 36 ft. high, has galleries for 682. The Senate left it July 5, 1949, to permit repairs to structure; it reoccupied the original chamber used by the Senate until 1859, then used by the Supreme Court until 1935. The Hall of Representatives (House) is 139 by 93 ft., 36 ft. high. The House likewise moved to its Office Building pending reconstruction.

The Capitol has a floor area of 14 acres, and 430 rooms are devoted to office, committee, and storage purposes. There are 17,376 sq. ft. of skylights, 679 windows, and 550 doorways.

The dome receives light through 108 windows, and from the architect's office to the dome there are 365 steps, one for each day of the year.

The southeast corner stone of the original building was laid Sept. 18, 1793, by President Washington, with Masonic ceremonies. It is constructed of sandstone from quarries on Aquia Creek, Va. The orignial designs were prepared by Dr. William Thornton, and the work was done under the direction of Stephen H. Hallet, James Hoban, George Hadfield, and B. H. Latrobe, architects.

The north wing was finished in 1800 and the south wing in 1811. A wooden passageway connected them. The interior of both wings was destroyed Aug. 24, 1814 by fire, set by the British. It was restored by 1819.

The central portion of the building was commenced 1818 under the architectural superintendence of Charles Bullfinch. The original building was finally completed in 1829. Its cost, including the grading of the grounds, alterations, and repairs, up to 1827, was $2,433,844.13.

The corner stone of the extensions was laid July 4, 1851, by President Fillmore, Daniel Webster officiating as orator. This work was prosecuted under the architectural direction of Thomas U. Walter till 1865, when he resigned, and it was completed under the supervision of Edward Clark. The material used in the walls is white marble from the quarries at Lee, Mass., and that in the columns from the quarries at Cockeysville, Md. The House extension was first occupied for legislative purpose Dec. 16, 1857 and the Senate Jan. 4, 1859.

The House office building was begun 1905 and occupied Jan. 10, 1908; later another story was added. The Senate Office building was started 1906 and occupied March 5, 1909. The House building cost, with site, $4,860,155; the Senate structure, $5,019,251.

Inaugurations of Presidents are held on a platform erected over the great steps on the East front. The oath of office is administered by the Chief Justice of the United States. Inauguration Day formerly March 4, was usually rainy, and it was here that William Henry Harrison, in 1841, caught the fever that killed him a month later. On account of the weather William Howard Taft was inaugurated in the Senate chamber in 1909. The ceremony now takes place on Jan. 20.

NATIONAL STATUARY HALL

The National Statuary Hall, formerly the Hall of the United States House of Representatives in the Capitol in Washington, was established by Congress July 2, 1864 and contains the following:

Alabama — Gen. Joe Wheeler.
Arkansas — Uriah M. Rose.
Arizona—John Campbell Greenway.
California — Junipero Serra.
Connecticut — Roger Sherman.
Delaware—Caesar Rodney.
Florida—John Gorrie.
Georgia—Alexander H. Stephens.
Idaho — George L. Shoup.
Illinois — Frances E. Willard.
Indiana — Gen. Lew Wallace.
Iowa—S. J. Kirkwood.
Kansas — John J. Ingalls.
Kentucky—Henry Clay.
Louisiana—Huey Pierce Long.
Maine — Hannibal Hamlin.
Maryland — Charles Carroll.
Massachusetts — Samuel Adams.
Michigan—Lewis Cass.
Minnesota—Henry M. Rice.
Mississippi — Jefferson Davis.
Missouri—Thomas H. Benton.
Nebraska — William Jennings Bryan.
New Hampshire—Daniel Webster.
New Jersey—Richard Stockton.
New York—Robert R. Livingston.
North Carolina—Zebulon B. Vance.
Ohio—William Allen.
Oklahoma—Sequoyah.
Pennsylvania — Robert Fulton.
Rhode Island — Roger Williams.
South Dakota — General Wm. Henry Harrison Beadle.
South Carolina—John C. Calhoun.
Tennessee — John Sevier.
Texas—Sam Houston.
Vermont—Ethan Allen.
Virginia — Robert E. Lee.
West Virginia—Francis H. Pierpont.
Wisconsin—Robert M. LaFollette.

Other statues in the Capitol:

In the Hall of Columbus (Street Floor, House Wing), **Alabama**—J. L. M. Curry. **Arkansas**—James P. Clarke. **California**—Thomas Starr King. **Florida**—E. Kirby Smith. **Illinois**—James Shields. **Indiana**—Oliver P. Morton. **Iowa**—James Harlan. **Kansas**—George W. Glick. **Massachusetts**—John Winthrop. **Michigan**—Zachariah Chandler. **Mississippi**—James Z. George. **Missouri**—Francis P. Blair. **Nebraska**—J. Sterling Morton. **New Jersey**—Philip Kearny. **North Carolina**—Charles B. Aycock. **Vermont**—Jacob Collamer. **West Virginia**—John E. Kenna.

In the Rotunda are: **Idaho**—William E. Borah (temporary location). **Ohio**—James A. Garfield. **Tennessee**—Andrew Jackson. **Virginia**—George Washington.

In the Small Vestibule North of Statuary Hall are: **New York**—George Clinton. **Pennsylvania**—J. P. G. Muhlenberg. **Texas**—Stephen F. Austin.

In the Vestibule Fronting the old Supreme Court Room are: **New Hampshire**—John Stark. **Rhode Island**—Nathanael Greene.

In the Senate Connection are: **Delaware**—John M. Clayton. **Georgia**—Dr. Crawford W. Long. **Kentucky**—Ephraim McDowell. **Maryland**—John Hanson.

In the House Connection are: **Connecticut**—Jonathan Trumbull. **Maine**—William King. **South Carolina**—Wade Hampton. **Oklahoma**—Will Rogers. **Wisconsin**—James Marquette.

The White House

The White House, Washington, D. C., is the official residence and office of the Presidents of the United States, and the most highly esteemed building in Washington in the eyes of Ameri citizens. Its association with the home life of the Presidents since John and Abigail Adams mo into the uncompleted building in 1800 gives special historic importance.

The White House was first called the Presider Palace, then the President's House, and for m of the 19th century was officially called the Exe tive Mansion. It became known as the White Ho in popular usage, and finally this name was des nated by Congress at the request of Presid Theodore Roosevelt in 1902. It has been pain white since 1817.

It is situated on the south side of Pennsylva Ave., between the Treasury and State Departm buildings, and its buildings and grounds cover ab 16 acres. It includes the main building, 170 85 ft., four stories high, with an East Terra 215 by 35 ft., leading to the East Wing, a thr story building, 156 by 82 ft., built in 1942 provide offices, and to serve as the entrance official functions, the cloak rooms being in East Terrace. At the west end of the West Terra 165 by 35 ft., which contains offices for the hou hold staff and a swimming pool, is the Execut Office, three stories high, 140 by 100 ft., erec in 1902 and rebuilt twice since.

Closed for Reconstruction

Under ordinary conditions, the principal roo on the first floor of the White House have b open to the public from 10 a.m. to 12 noon, exc Sundays and Mondays. This included the East roo the Red, Blue and Green rooms, and the St Dining room. When, in 1948, President Trum initiated a survey of the building for repairs reconstruction, the weaknesses of the origi mansion were so apparent that the President a his family moved to the Blair House and Blair-Lee House on Pennsylvania Ave., the Wh House furniture was removed and stored, and building closed until repairs have been complet These are expected to take several years.

The original survey cost $50,000 and disclo threats to the safety of household and visito In a report to the President of the Senate on F 16, 1949, President Truman urged the appropriat of $5,400,000 for the Federal Works Agency the reconstruction work. He said in his messa "It will be no small task to renovate and m ernize the structure. It perhaps would be m economical from a purely financial standpoint raze the building and to rebuild completely. doing so, however, there would be destroyed building of tremendous historical significance the growth of the Nation. I am in favor of p serving our outstanding historical structures. scope of the work now proposed will not alter architectural or cultural features of the mansio

In a second message to the President the Senate and the Speaker of the House of Rep sentatives President Truman argued against mi repairs as insufficient, declaring: "I feel sure t the people of this country expect this major unc taking to be accomplished by the best quali architects, engineers and craftsmen," and as Congress to establish a commission for this p pose. This was done, Congress naming as mem Senators Kenneth McKellar (Tenn.), Edw Martin (Pa.), Representatives Frank B. K (Wis.), Louis C. Rabaut (Mich.), R. E. Dough past president of the American Society of C Engineers and Douglas William Orr, past presi of the American Institute of Architects. The c mission appointed Maj. Gen. Glen E. Edger USA ret., director. Congress appropriated the sired sum ($5,400,000) and the President sig the bill June 23.

This will not be the first change in the c struction of the White House. When Presi Truman built a second-floor porch in the s portico he was following a long line of precede The White House was the first public buil started in the new "Federal Town," the co stone being laid Oct. 13, 1792, on a site ch by Major L'Enfant, designer of the original W ington plan. President Washington was not pre on this occasion. The architect was James Ho who won a competition for $500 for the plans, who apparently drew on his memories of the l of Leinster's palace in Dublin. The walls ar gray sandstone from quarries at Aquia Creek.

When John Adams moved in in June, 1800, plaster was wet and some of the rooms were partially finished. Mrs. Adams hung her was in the East room.

Thomas Jefferson developed east and west

races and built one-story offices in front of them, which included a wine cellar, coal and wood sheds and privies. On Aug. 24, 1814, when President Madison lived there, the British set the house afire, after Dolly Madison had rescued the Stuart portrait of Washington and other relics. Only the blackened walls remained, but James Hoban rebuilt the House, which was completed by Dec. 1817, when President Monroe moved in. Hoban also rebuilt Jefferson's terraces. He planned the south portico in 1824 and the north colonnade and porch in 1829. Water was first piped into the White house from a well in 1833, and city water was introduced in 1853. Gas pipes were installed in 1848, electric light in the early 1890s. Bathrooms were built in the late 1870s, and the first telephone was installed then. Theodore Roosevelt obtained an appropriation of $500,000 for overhauling in 1902, rebuilt the East Terrace entrance, enlarged the State Dining room and built the Executive Office. This was enlarged in 1909 by President Taft, repaired after a fire in 1929, and rebuilt by President Franklin D. Roosevelt in 1934. Under the latter President air conditioning was installed, 1932, electric wiring was renewed, a ramp was built in the White House for the President's wheelchair and an air raid shelter, 40 by 40 ft., constructed, with a tunnel to the Treasury building.

Presidents have exercised their own taste (and so have their wives) in the matter of furniture, china and silverware, and these have been changed in different periods. Some of the mid-Victorian furniture of Lincoln's day, including his 9-foot bed, remain. Franklin D. Roosevelt's desk is preserved. President Monroe's gold service plates are sometimes used at formal dinners. Various mementoes of early Presidents have been exhibited at the White House, including Andrew Jackson's coffee cup (bumper size) and Zachary Taylor's candlestick. The White House has many famous portraits of former Presidents.

Library of Congress

The Library of Congress, located opposite the Capitol on Capitol Hill, Washington, D. C., was established April 24, 1800, burned by the British troops Aug. 24, 1814, and re-established in 1815, when Thomas Jefferson sold his private library of 6,487 vols. to the Government for $23,950. Two-thirds of this collection was lost in a fire in 1851. The Library occupies two immense buildings, one of ornate Italian Renaissance completed 1897, the other a modern, utilitarian, white marble Annex, erected 1939 and capable of housing 10,000,000 vols.

The Library of Congress, Luther H. Evans, Librarian, is today an important cultural force in Washington and the Nation, conducting forums, musical programs and poetry readings to commemorate great works and encourage living authors and composers. Some of its programs are broadcast nationally. It has weekly exhibitions of original books, manuscripts and documents of importance to schools and public, and provides countless facilities for scholars and research workers.

During 1949 its exhibitions included the Fifty Books of the Year, with addresses by Donald S. Klopfer, Merle Armitage, Clifton Fadiman and William Benton; The Berlin Story, in photographs; the Houdini collection of books on magic; books and phonograph records from Brazil; a Walt Whitman exhibit to commemorate his 130th birthday; a Patrick Henry exhibit on the 150th anniversary of his death; photographs and documents about the State of Israel, to mark the founding of this State; the literary productions of Enrique Jose Varona, Cuban patriot and philosopher; a Goethe bi-centennial exhibit, with an address by Thomas Mann; an exhibit of National Geographic maps to mark the 50th anniversary of Dr. Gilbert Grosvenor's association with that organization; an exhibit of Arabic manuscripts, Swiss books, songs by Schubert and Brahms and manuscripts of Mendelssohn; books to commemorate the 400th anniversary of the Book of Common Prayer; a Minnesota exhibit, and many others, attesting the richness of the collections in the Library.

The diaries, notebooks and correspondence of Wilbur and Orville Wright, covering 67 years and all their experiments, were given to the Library of Congress by Harold S. Miller and Harold W. Steeper, executors of the estate of Orville Wright, who reserved the right to grant permission for their use until Jan. 1, 1960. The papers include Orville Wright's accounts of the Kitty Hawk flights of 1903.

A collection of 600 vols. of classical and modern Burmese literature, including the Hinayana Buddhist scriptures, the Tripitaka, was given the Library on behalf of the people of Burma by the Burmese ambassador June 7.

Original musical manuscripts—Brahms' violin concerto in D major and Chausson's Poeme—were presented to the Library by Fritz Kreisler and exhibited as "two of the richest treasures in violin literature."

On July 1, 1948, the Library contained 8,387,385 volumes and pamphlets, 124,619 bound newspaper volumes, 8,896,597 manuscripts, 1,868,911 maps and views, 71,060 reels and strips of microfilms, 64,451 motion picture reels, 1,788,449 volumes and pieces of music, 287,414 phonograph records, 1,708,247, photographic negatives, prints and slides, 578,765 fine prints, and 624,163 other miscellaneous items, including broadsides, photostats, posters, etc.

The collection, covering every branch of human knowledge and culture, is especially strong in United States and Hispano-American history. American and foreign newspapers (over 124,000 bound volumes), government documents (federal, state, municipal and foreign), maps and atlases. The law collection, one of the largest and finest in the world, comprises approximately 700,000 books and pamphlets. The library's other collections, which are particularly strong in Anglo-American, Latin American, and Russian material include a large working library in the Capitol, the United States Supreme Court Library, and smaller collections in the House and Senate Office Buildings; the aeronautics library is the largest in the world: the collection of Chinese and Japanese books is unequalled outside of China or Japan; the Russian books outnumber those in any other library outside of Russia and the Semitic collection is of outstanding importance.

The collections of the Division of Manuscripts relate chiefly to American history and civilization; they include the original records of the Continental Congress, many colonial and Revolutionary documents and the papers of nearly all the Presidents of the United States, as well as many leaders in political, industrial and cultural life. They contain also photographic reproductions of over two million pages of manuscripts in European libraries and archives.

The rare book collection includes over 175,000 volumes, among them 5,262 incunabula, 25,000 early Americana, many rare editions and fine bindings and one of the three perfect vellum copies of the Gutenberg Bible and the Lessing J. Rosenwald Collection of rare books, chiefly illustrated works. The Prints and Photographs Division comprises, in addition to books, a notable collection of old masters and modern prints, the Pictorial Archives of Early American Architecture including the Historic American Buildings (38,935 photographs and 25,605 sheets of measured drawings), an archive of Hispanic culture and a collection of originals of published drawings by American artists. In addition a collection of over 1,000,000 photographs illustrates the American past.

The 9,000 books in the library of the late President Woodrow Wilson were added to the Library of Congress (1946) by Mrs. Wilson and they are now on public view in a special room near the rare book collection.

The Music Division, besides possessing what is probably the largest collection of music in the world, administers the Archive of American Folk-Song.

The Copyright Office, administered by the Register of Copyrights, forms part of the Library of Congress. It receives annually over 350,000 books. pamphlets, prints, maps, etc., as deposits which for the most part become part of the permanent collections of the Library.

National Gallery of Art

The National Gallery of Art, situated on the area bounded by Seventh Street, Constitution Avenue, Fourth Street, and Madison Drive on the Mall in Washington, D. C., was established March 24, 1937, as a bureau of the Smithsonian Institution.

The building, costing about $15,000,000, was erected with funds given by the late Andrew W. Mellon. It was completed under the direction of Paul Mellon, Donald D. Shepard, and David K. E. Bruce, trustees of the A. W. Mellon Educational and Charitable Trust. The architects were John Russell Pope and associates, Otto R. Eggers and Daniel Paul Higgins.

The building is one of the largest marble structures in the world, 785 feet in length and built in a dignified and simple classical style. The exterior walls are of rose-white marble.

The central architectural feature of the Gallery is the rotunda, covered with a coffered dome supported by 24 columns of dark green marble. The diameter of the rotunda and the height of the dome from the marble floor both measure 100 feet. Flanking the rotunda on either side are two long galleries for larger pieces of sculpture. At the end of each of these galleries is a garden court, with a colonnade of 16 monoliths of Indiana limestone. In the center of each court has been installed a 17th Century fountain from the Park of Versailles. Exhibits of plants and flowers are rotated during the year.

The style of the exhibition galleries is varied according to the type or school of art shown. Plaster walls with travertine trim are used for the early Italian rooms. Damask wall coverings with travertine trim are used for the later Italian paintings. Later Flemish and Dutch masters are shown against oak panelling. Eighteenth Century French, English, and American paintings are shown against wood panelling painted in colors ranging from light ash green to white.

The principal collections now comprise over 16,000 works of art, including paintings, sculpture, prints and drawings, and examples of decorative arts.

Famous Paintings Exhibited

In addition to providing the building, Mr. Mellon also gave his collection, consisting of 126 paintings and 26 pieces of sculpture, the latter largely from the Dreyfus Collection. These paintings cover the various European schools from the 13th Century to the 18th, and include such masterpieces as Raphael's "Alba Madonna," "The Niccolini-Cowper, Madonna," and "Saint George and the Dragon"; Van Eyck's "Annunciation"; Botticelli's "Adoration of the Magi"; nine Rembrandts, and three Vermeers. Twenty-one paintings in the Mellon Collection came from the famous Hermitage Gallery in Leningrad.

The first great collection to come to the Gallery after Mr. Mellon's death was that of Samuel H. Kress of New York. This collection of Italian art, one of the most complete ever amassed by a single individual, contains 551 paintings and 54 pieces of sculpture. Included in the Kress Collection are such masterpieces as "The Calling of Peter and Andrew" from Duccio's "Maesta"; a Madonna by Giotto, formerly in the Goldman Collection, and Giorgione's "Adoration of the Shepherds," from the collection of Viscount Allendale. Other famous paintings in the Kress Collection are Raphael's portrait of Bindo Altoviti, and nine pictures by Giovanni Bellini.

The Trustees of The A. W. Mellon Educational and Charitable Trust presented (1940-42) to the Gallery 63 American paintings, including the famous Vaughan "Washington" by Gilbert Stuart and "The Washington Family" by Edward Savage. They also presented to the Gallery (1947) 113 paintings, chiefly of the American School. A group of American paintings from the Chester Dale Collection has also been given to the National Gallery of Art. Other paintings given by Chester Dale include notable masterpieces by Tintoretto, El Greco, Rubens, Zurbaran, Boucher Drouais and Chardin. Loaned from the same collection are works by David, Delacroix, Courbet, Manet, Degas, Cezanne, Renoir and other masters of nineteenth-century French painting.

Joseph E. Widener gave (1942) the famous Widener Collection in memory of his father, Peter A. B. Widener. The collection contains more than one hundred paintings, including fourteen Rembrandts, two Vermeers, seven Van Dycks, Bellini's "Feast of the Gods," and Raphael's "Small Cowper Madonna." The gift also includes outstanding Renaissance and French sculpture and examples of the decorative arts.

Lessing J. Rosenwald in 1943 gave his celebrated collection of over 10,000 prints and drawings. The print collection has also been supplemented by gifts of prints from Miss Ellen T. Bullard, Miss Elisabeth Achelis, Mr. and Mrs. J. Watson Webb, Mrs. Walter B. James, Mrs. Addie Bur Clark, George Matthew Adams and heirs of Frank Crowinshield.

The print collection now contains more than 15,000 items. Among the artists represented are Altdorfer, Baldung, Blake, Jacopo de' Barbari, Brueghel, Canaletto, Durer, Duvet, Goya, Ingres, Lucas van Leyden, Mantegna, Meryon, Nanteuil, Piranesi, Raimondi, Rembrandt, Schongauer, Turner, Whistler, and the Hausbunchmeister.

Arlington National Cemetery

Arlington National Cemetery, administered by Department of the Army, is located at Fort M Va., on the south bank of the Potomac River posite Washington. It was established June 1864, on land which originally was the estate George Washington Parke Custis, adopted son George Washington and which, before the C War, became the home of Gen. Robert E. Lee.

The original tract was 200 acres, but the cemet now embraces more than 440 acres, not all of wh has as yet been prepared for burial purposes. La official figures (as of March 31, 1949) gave number of military and naval leaders and memb of the armed forces buried there as 66,707, whom 4717 are unidentified. Among the unkno dead are 2,211 who died in the Civil War on battlefields of Virginia and 167 who lost their li when the battleship Maine was blown up in Hav Harbor Feb. 15, 1898.

Nine gates lead into the cemetery, five on east, two on the south and two on the west. addition to the monuments and marble he stones marking the individual graves, there several large memorial structures, including Temple of Fame, built in the 1880s; the Confe erate Monument (1914); the Maine Memor (1915), and the Arlington Memorial Amphithea dedicated May 15, 1920.

Among famous Americans buried in Arling National Cemetery are Pierre Charles L'Enfa who planned the City of Washington; Gen. P Sheridan, Gen. Philip Kearney, Adm. W. T. San son, Gen. Walter W. Gresham, Gen. Tasker Bliss, Robert Todd Lincoln, William Jenni Bryan, Adm. Robert E. Peary, discoverer of North Pole, Adm. Horatio G. Wright, former Pre dent William Howard Taft, Major Walter Re Admiral Marc Mitscher, General John J. Persh and James W. Forrestal.

Arlington House, or Lee Mansion, where Custis and Lee families lived before the Civil W is within the grounds. It was restored as nea as possible to its original condition and furnish in keeping with the period by authority of Congress, and is now a National Memorial, ministered by the National Parks Service.

The Unknown Soldier

The Tomb of the Unknown Soldier of Wo War I is situated on the east front of the Arling Memorial Amphitheater facing Washington ac the Potomac. It is a simple monument of wh marble bearing the inscription, "Here rests honored glory an American soldier known but God."

The Unknown Soldier was one of four unide fied American soldiers whose bodies, by Congi sional resolution, were disinterred from four U Army cemeteries in France (October, 1921). bodies were placed in caskets and taken to Chalo sur-Marne where a wounded and decorated vete Sgt. Edward F. Younger, selected one casket placing on it a spray of white roses. The ca arrived in Washington Nov. 9, 1921, on cruiser Olympia, Adm. Dewey's flagship in Battle of Manila Bay, and was placed in the tunda of the Capitol on the same catafalque which had rested the bodies of the three marty Presidents—Lincoln, Garfield and McKinley.

On Armistice Day, Nov. 11, 1921, Presid Harding and other high officials, ranking offi of the Army and Navy and Allied diplom followed the caisson bearing the flag-dra casket through Washington's streets to Arling National Cemetery where, after solemn ceremon it was placed in the Tomb of the Unkn Soldier.

Army Institute of Pathology

The Army Institute of Pathology, 7th St and Independence Avenue, SW, Washington, D is the central laboratory of pathology for United States Army (including the United St Air Force) and the Veterans Administration (18 the original purpose was to make it a museum the study of war wounds and diseases. The e specimens were collected from the battlefield the Civil War, and by 1863 there were sev thousand on display. Today the extraordi amount and wide variety of material at the stitute is unmatched in the world. The Insti serves as the central agency for diagnosis, sultation, research, and advanced training in pathology of diseases of medico-military im tance to the United States. The Army Institu

thology is composed of the following departents:

Department of Pathology—Here diagnoses are ade or confirmed. There is available a total of 9,000 specimens and 2,500,000 histopathologic des for microscopic study. Both Army and civilian thologists conduct experimental, statistical, and orphologic research on diseases and injuries.

Army Medical Illustration Service—This departent is charged with the collection of medical ilstrative material and the supervision of clinical otography and medical arts for the United States my. It maintains a library of photographic marial, supplementing the pathologic specimens, and oduces prints, enlargements, lantern slides, phostats, offset printing, medical training aids, inuding motion pictures, Medical Department aveling exhibits, etc. The present collection conts of 400,000 negatives, 150,000 prints, 39,000 ntern slides, and 30,000 color prints and transrencies.

American Registry of Pathology—The Army Initute of Pathology houses and acts as custodian the American Registry of Pathology for the ational Research Council. The Registry includes collection of pathological specimens and records sembled in cooperation with various national cieties and is available for use by all qualified vestigators. Approximately 270 pathology study ts are loaned to medical institutions and quali-d individuals each month.

Army Medical Museum—The Museum houses disays illustrating normal and abnormal structures the human body and collections of historic imrtance, including one of the world's largest exbits of microscopes, stethoscopes, ophthalmoopes, and similar medical instruments. The monstrations of wounds range from those inicted by arrows and tomahawks from the Indian ars to those caused by atomic explosions. The splays are arranged for post-graduate studies by ysicians and allied scientists and for the interted layman. Visitors from every state and fifteen reign countries, totaling approximately 125,000, sited the Museum in 1948.

Army Medical Library

The Army Medical Library, Washington, D. C., the library of the Surgeon General's Office, nited States Army, and is the largest medical brary in the country. It began with a collection books in the office of the Surgeon General of e Army, an office created in 1818. Surgeon Gen. seph Lovell in 1840 compiled a short catalogue the books in his office, out of which the present llection has evolved. Its real growth as a library gan in 1865 with the assignment of Surgeon John aw Billings.

The Library secures practically everything printd in the field of the medical sciences, including ntal and veterinary medicine. It has more than ,000 works of the 15th, 16th, 17th and 18th nturies, including 513 medical incunabula. The llection consists of over 1,000,000 items, includg some 500,000 books, about 600,000 pamphlets, 500 current journals, 15,000 portraits and photoaphs, and in addition, autographs, clippings, agravings, manuscripts and periodicals. Of the rrent periodicals received, about 2,500 are in reign languages. The Army Medical Library pubshes the Current List of Medical Literature, a eekly index of articles of medical interest conined in current journals received by the library nd The Index-Catalogue. Basic bibliography of edicine since 1880, the Index-Catalogue has orld-wide distribution. Its most recent volume ntains a total of 76,000 references.

Corcoran Gallery of Art

The Corcoran Gallery of Art in Washington, . C., has a collection of paintings particularly presentative of American artists. The sculptures clude original works in marble and bronze by merican and foreign sculptors. There are over 100 iginal bronzes by Antoine Barye, sculptor of imals.

The W. A. Clark Collection contains paintings Andrea Vanni, Van Dyck, Rembrandt, Hobma, Van Goyen, Chadrin, the Barbizon School, gas and other masters; a splendid collection of gs, mostly Persian and including an outstanding llection of Gothics and later tapestries, laces; ience, antiquities; furniture; stained glass winws, etc. The gallery conducts special exhibitions, including the nationally famous Biennial Exhibition of Contemporary American Oil Painting.

Library of the D.A.R.

The Library of the National Society, Daughters of the American Revolution, Washington, D. C. has more than 35,000 volumes and pamphlets and many thousands of manuscripts, which are available to those who wish to consult them. Microfilms of many state census records, from 1850 through 1880, have been received. Two Recordaks to service these make them available for the use of members and visitors. The Library is for reference only and books are not loaned. The Library does not maintain a genealogical service.

Folger Shakespeare Library

The Folger Shakespeare Library, in Washington, D. C., has a collection of original and early editions of Shakespeare, including 79 copies of the First Folio and 239 copies of the quartos, and is both the largest and the richest ever assembled. Its collection of books on all subjects printed in England between the years 1475 and 1640 is the most extensive in America, and is surpassed only by that in the British Museum. Its collection of manuscripts exceeds 20,000; of playbills, 250,000; of prompt-books, 3,000. Its collection of material relating to Shakespeare on the stage and in modern scholarship is unsurpassed. Its museum material includes 200 oil paintings, 100,000 water colors and prints, various examples of Elizabethan musical instruments, Elizabethan furniture, and numerous objects of art.

The library—designed as a memorial to Shakespeare—is housed in a marble building on Capitol Hill, erected at a cost of more than $2,000,000. The library was endowed by Henry Clay Folger, former president of the Standard Oil Company of New York, and his wife, Emily C. J. Folger. It was left in trust to the trustees of Amherst College as a gift to the nation.

Thomas Jefferson Memorial

The Thomas Jefferson Memorial is a tribute to the author of the Declaration of Independence and Virginia Statute for Religious Freedom, First Secretary of State and third President of the United States. It stands on the south shore of East Potomac Park, Washington, D. C., and was dedicated by President Franklin Delano Roosevelt, April 13, 1943, the 200th anniversary of Thomas Jefferson's birth. The Pantheon scheme for the memorial is in itself a tribute to Jefferson's taste and a mark of respect for his architectural and artistic preference. It consists of a marble-lined central circular chamber 80 feet in diameter beneath a great domed ceiling. The center of this room is dominated by an heroic standing figure of Jefferson by the American sculptor, Rudolph Evans. On the frieze of the main entablature which encircles the hall is the inscription:

"I have sworn upon the altar of God eternal hostility against every form of tyranny over the mind of man."

On the four panels within the memorial room have been inscribed inspirational quotations chosen from the Declaration of Independence and other immortal writings of Jefferson expressing his philosophies of religious and personal freedom and the obligations of government to keep pace with human progress.

The exterior of the structure is surrounded by a peristyle of Ionic columns, each 41 feet high. The flat dome which surmounts the Memorial is 95 feet 8 inches above the floor at its apex. A portico eight columns wide and two bays deep, surmounted by a low pediment, dominates the principal facade of the Memorial. A sculptural group depicting Jefferson reading a draft of the Declaration of Independence to a committee of the Continental Congress, by Adolph A. Weinman, occupies the center of the tympanum. The complete composition is posed on a circular stylobate consisting of steps and broad terraces.

The memorial architecture is a modification of the original design by the eminent American architect, John Russell Pope and his associates, Otto R. Eggers and Daniel Paul Higgins, who were influenced by Jefferson's admiration for the Pantheon type of structure. To insure adequate interest from every direction the circular colonnade was added, the main approach accented by the portico and treatment of the interior was made to conform with the simpler tastes of Jefferson.

The exterior of the Memorial is constructed of Imperial Danby Vermont marble. Georgia white marble is used for the interior. The entire structure is 183 feet 10 inches in diameter to exterior of stylobate and 151 feet 10 inches in diameter to exterior of peristyle. Height from floor of Memorial Room to top of dome, exterior 95 feet 8 inches; interior, 91 feet 8 inches. The 26 Ionic columns are each 5 feet 3 inches in diameter and 41 feet high. The portico is 92 feet 8 inches wide, 38 feet 4 inches deep and 62 feet 2 inches high. The interior columns are 5 feet in diameter and 39 feet 2 inches high. Congress appropriated $3,000,000 to build the memorial.

Lincoln Memorial

The Lincoln Memorial, in Potomac Park, Washington, D. C., on the axis of the Capitol and Washington Monument, was designed by Henry Bacon, architect of New York City, and dedicated May 30, 1922. It cost $2,940,000.

The exterior of the Memorial symbolizes the Union of the United States of America. Surrounding the walls of the Memorial Hall is a colonnade of the States of the Union, the frieze above it bearing the names of the 36 States existing at the time of Lincoln's death. On the attic walls above the colonnade are inscribed the names of the 48 States existing today. These walls and columns enclose the sanctuary containing three memorials to Abraham Lincoln. The place of honor is occupied by a colossal marble statue of the man himself, facing the Washington Monument and Capitol. On the north wall is inscribed Lincoln's Second Inaugural Address; on the south wall is the Gettysburg Address.

The columns are not vertical, but are slightly tilted inward toward the building, and the tilt of the four corner columns is even more exaggerated. The outside face above the columns is also inclined inward, but less than the columns. The wall of the Memorial Hall inclines inward least of all. This was done to avoid the optical illusion of bulging at the top.

The foundations of the Memorial rest upon bedrock from 44 to 65 feet below the original grade. The superstructure of white Colorado-Yule marble is approximately 80 feet high and rests on a base composed of three immense marble steps. Masonry approaches from the direction of the Washington Monument and the Capitol ascend a terrace retained by a 14-foot granite wall. This wall on the east and west sides is 256 feet, 10 inches long and 187 feet long on the north and south sides. The walls of the Memorial are enclosed by a continuous colonnade 188 feet, 4 inches long and 118 feet, 6 inches wide. The 38 columns in the colonnade, including the two standing in the entrance, are 44 feet high, 7 feet 5 inches in diameter at the base, and the shafts are composed of 11 drums each.

Greek Ionic columns 50 feet high and 5 feet, 6 inches in diameter at the base divide the interior of the Memorial into three chambers. The walls of the interior are Indiana limestone, and the ceiling, which is 60 feet above the finished floor, is designed with bronze girders ornamented with laurel and pine leaves. The panels between the girders are of Alabama marble saturated with paraffin to produce translucency.

The outstanding feature of the Memorial is the statue of Abraham Lincoln, designed and modeled by Daniel Chester French. It represents Lincoln as the war President seated in a great armchair 12½ feet high, over the back of which a flag has been draped; 28 blocks of Georgia white marble compose the statue, which is 19 feet high from head to foot. The extreme width, including the drapery over the chair, is 19 feet. The statue rests upon an oblong pedestal of Tennessee marble 10 feet high, 16 feet wide, and 17 feet deep, which in turn rests upon a platform of Tennessee marble.

The two murals by Jules Guerin typify allegorically the principles which were evident in the life of Lincoln. Each is 60 feet long and 12 feet high. In front of the Memorial is the Reflecting Pool, about 2,000 ft. long, ending in a Rainbow Pool, with a fountain of 200 jets.

Mount Vernon

Mount Vernon, on the west shore of the Potomac, 16 miles below Washington, D. C., is part of a large tract of land in Northern Virginia which was originally included in a royal grant made to Lord Culpepper, who in 1674 granted 5,000 acres to Nicholas Spencer and John Washington. The division between Spencer and Washington put John Washington's son Lawrence in possession of Washington half in 1690. Later it became property of Lawrence Washington's son Augus the father of George Washington.

The present house is an enlargement of one parently built by Augustine Washington's Lawrence on the site of an earlier house. Lawr came there in 1743, when he renamed the pla tion Mount Vernon in honor of Admiral Ve under whom he had served in the West In Lawrence Washington died in 1752 and was ceeded as proprietor of Mount Vernon by his h brother, George Washington.

To Mount Vernon (1759) George Washin took his wife, who was Martha Dandridge Cu widow of Daniel Parke Custis, and here he l the life of a southern planter during the y preceding the American Revolution. From Mo Vernon he went forth to become Commander Chief of the revolutionary forces, and to Mo Vernon he returned (1783). At this time the modeling of the mansion, which had been plan before the Revolution, was completed. The bu ings, gardens and grounds were enlarged developed in accordance with General Washingt own plans. The mansion and thirteen other bu ings can still be seen today, and much of original furniture has been restored. From Mo Vernon General Washington again went f (April 14, 1789) by highway, ferry and barge become the first president of the United States, returned to it after eight years of service. years later (1799), he died and was buried th

The Mount Vernon mansion and surround plantation were left to Gen. Washingt nephew, Judge Bushrod Washington, and by bequeathed to his nephew John A. Washing whose son, John Augustine Washington, became last private owner of Mount Vernon. Two hund acres, including the Mansion and Tomb, were quired (1859) by the Mount Vernon Ladies' A ciation of the Union, after both the governm of the United States and the Commonwealth Virginia had declined to purchase the estate. Association, founded by Miss Ann Pamela C ningham of South Carolina, is the oldest patri association of women in America.

The Association is pledged to restore the Man and its surroundings as far as possible to t appearance in Washington's time, and to pres the home and tomb of Washington for fu generations. The income derived from the entr fee of 42 cents maintains the estate. The or ization consists of a regent and vice regents resenting the various states, who serve with remuneration. The regent is Mrs. Thomas Hare Powel.

National Academy of Sciences

The National Academy of Sciences in Washington, D. C., was established by Congress, appr by President Abraham Lincoln March 3, 1863. act of incorporation specifies that " . . . the Ac my shall, whenever called upon by any departm of the Government, investigate, examine, exp ment, and report upon any subject of scienc art, the actual expense of such investigati examinations, experiments, and reports to be from appropriations which may be made for purpose, but the Academy shall receive no pensation whatever for any services to the Gov ment of the United States." Since the time c establishment the Academy has acted as of adviser of the Government on a wide variet questions.

The National Research Council was orga 1916 by the National Academy of Sciences organization was requested by President W as a measure of national preparedness. The C cil helps to integrate the work of individual s tists and assists in coordinating scientific inq

The National Science Fund was establishe the Academy in April, 1941, to advise dono science so that as far as possible their funds be conserved and expended wisely and fruitful

The Carnegie Corporation of New York all in 1919 an endowment of $5,000,000 for a sui building and general maintenance of the Aca and the Research Council.

National Archives

The National Archives in Washington is the ords office of the Federal Government. It advice and assistance to Federal agencies on records problems, appraises their noncurrent

rds, reports to Congress those that should be isposed of as of no further use, and preserves and ervices those of enduring value so that this re-orded experience of the Nation may be available o the Government and the people.

There are now about 875,000 cubic feet of ecords in the National Archives Building, which s near the apex of the "Federal Triangle." These ecords range in date from the Revolutionary War hrough World War II and include nearly 250,000 isks of sound recordings, 540,000 maps and charts, 5,300,000 photographic items and 1,425,000 run-ing feet of motion picture film. Selected docu-nents, such as the surrender papers that marked he close of World War II, are always on display n the Exhibition Hall, and, with very few ex-eptions, all the records are available for use by fficials, scholars, and the general public. A com-rehensive Guide to the Records in the National Archives was published in 1948.

The National Archives also acts as the registry ffice of the Government. Current proclamations, rders, and regulations are filed with the Division f the Federal Register and those having general pplicability and legal effect are published in the laily Federal Register.

The Pentagon

The Pentagon, the world's largest office building, uggests by its design a huge, massive fortress. situated on the Virginia side of the Potomac River, t is only two miles from the cluster of federal uildings on Constitution Ave. in Washington. It overs 34 acres and during the last years of the war 32,000 military and civilian workers in the War Department were employed there daily.

The Navy moved into the building in 1948, bring-ng the top officials of the Army, Navy and Air Force under one roof as a part of the unification program.

During the first half of 1941 the rapidly expand-ng national army caused a corresponding increase n War Department personnel who, for lack of pace, were scattered among 17 buildings in Wash-ington, with other groups stationed in Fort Myer nd Alexandria. The late President Roosevelt sked Congress for additional buildings. As a esult the Pentagon was completed Jan. 15, 1943, with as many as 15,000 men being employed at one ime and much of the work being done at night nder floodlights. The approximate cost of the Pentagon was $64,000,000.

The structure, five stories high, consists of five ings of buildings connected by 10 corridors and vith a five-acre pentagonal court in the center. Each of the outermost sides of the building is 921 eet long and the perimeter is seven-eighths of a nile. The distance from any of the five main en-rances to the court is 396 feet. The gross floor rea is more than 6,000,000 feet, which is three imes that of the Empire State Building and 50 per cent more than that of the Chicago Merchan-dise Mart.

During the war, as many as 760 buses an hour arrived in the bus and taxi terminal situated under the southeast side of the Pentagon, whence broad stairways lead up to the Concourse on the second floor. The Concourse is 680 feet long and 150 feet wide, larger than that of the Pennsylvania Station in New York City.

The private branch telephone exchange in the Pentagon is the largest of its kind in the world and contains approximately 68,600 miles of trunk lines.

Smithsonian Institution

The Smithsonian Institution in Washington, D. C., was established in 1846 under the terms of the will of James Smithson, an Englishman, who bequeathed his fortune in 1826 to the United States to found an institution for the "increase and diffusion of knowledge among men."

The Institution throughout its history has con-ducted and encouraged important scientific re-searches, explorations, and investigations, and its Secretaries—Joseph Henry, Spencer F. Baird, S. P. Langley, Charles D. Walcott, C. G. Abbot, and Alexander Wetmore have contributed largely to the advancement of knowledge.

The Smithsonian issues 13 series of scientific publications which are distributed free to libraries, learned societies, and educational institutions throughout the world. It also maintains a library of more than 900,000 volumes which consists mainly of transactions of learned societies, and scientific periodicals.

Branches of the Institution are the National Museum, the National Gallery of Art, the National Collection of Fine Arts, including the Freer Gallery of Art; the International Exchange Service, the Bureau of American Ethnology, the National Zoo-logical Park, the Astrophysical Observatory (with field stations at Table Mt., Calif., Montezuma, Chile, and Miami, Fla.) including the Division of Radiation and Organisms, the National Air Mu-seum, and the Canal Zone Biological Area.

The United States National Museum is the depos-itory of the national collections. It is rich in the natural history, geology, paleontology, archeology and ethnology of America, and has large and im-portant collections illustrating American history, including military and naval material, as well as valuable series relating to engineering and indus-tries. It is an educational and research museum, and issues scientific publications. The National Air Museum will incorporate the present aero-nautical collection.

The National Collection of Fine Arts contains numerous important art works, including a valu-able collection of etchings and engravings from George P. Marsh; the Harriet Lane Johnston bequest, comprising numerous portraits and other works by British, Flemish, Dutch, and Italian masters; the Ralph Cross Johnson collection of rare paintings by Italian, English, French, Flemish, and Dutch masters; the William T. Evans col-lection, comprising 150 examples of the works of contemporary American artists, the Gellatly col-lection of paintings, glassware, and other objects. A unit of the National Collection of Fine Arts is the Freer Gallery of Art, the gift of Charles L. Freer, comprising rich collections of Chinese and Japanese art in every branch, with many paint-ings and etchings by Whistler, and the famous "Peacock Room," besides works by Thayer, Dew-ing, Homer, and Tryon.

Washington National Monument

The Washington National Monument in Wash-ington, D. C., is a tapering shaft or obelisk of white marble, 555 feet, 5⅛ inches in height and 55 feet, 1⅛ inches square at the base. Eight small windows, two on each side, are located at the 500 foot level.

The erection of the monument by the Washing-ton National Monument Society with funds ob-tained by popular subscription was authorized by Congress in 1948. The cornerstone was laid July 4 of the same year. Work progressed slowly until 1854 when $300,000 had been subscribed and 156 feet of the shaft erected. In this year a block of marble from the Temple of Concord in Rome, con-tributed by the Pope, was stolen. Mainly because of the popular indignation caused by this incident, no further funds were forthcoming from the public and construction work ceased. Work was resumed 1878 at Government expense by the Corps of Engi-neers, U. S. Army.

The capstone, which weighs 3,300 pounds, was set in place Dec. 6, 1884, marking the completion of the work. The monument was dedicated Feb. 21, 1885, and was opened to the public on Oct. 9, 1888.

The monument is faced with dressed white marble in 2-foot courses. All of the marble was obtained from a nearby source in Maryland. For the first 150 feet, the marble is backed by rubble masonry of Potomac River gneiss or bluestone. From this point to the 452-foot level cut New England granite was used, above which the walls are entirely of marble.

Set into the interior walls are 188 memorial stones bearing inscriptions and contributed by for-eign countries, the 48 states, cities and organiza-tions.

The capstone is crowned by a small right pyra-mid of pure aluminum 5.6 inches at its base and 8.9 inches high, weighing 100 ounces.

The computed weight of the monument is 81,-120 tons, divided as follows: foundation, 36,912 tons; lower portion of shaft, erected prior to 1854, 22,373 tons; upper portion of shaft, 21,260 tons; pyramidion, 300 tons; iron framework, 275 tons.

Descriptive views were installed 1945 above the windows at the 500 foot level, locating the principal historic points of interest.

Since the monument was opened, more than 22,850,000 persons have visited it (through Feb., 1949) and of these almost 4,000,000 have climbed the 898 steps to the observation platform at the 500 foot level. The elevator makes the trip in one minute.

Structure of the British Commonwealth

The British Commonwealth of Nations covers 12,979,144 square miles (one-fourth of the world's land surface). Its population in the aggregate according to the latest census and official estimates 581,722,969—is more than one-fourth of the inhabitants of the world.

Note: The term "British Commonwealth of Nations" includes British Colonies and their subdivisions, and British Dominions.

The term "Colony" is an abbreviation of the official designation "Colony not possessing responsible Government" and includes all such colonies whether or not they possess elective legislatures. The British Colonial Empire includes in addition to the Colonies proper a number of Protectorates, Protected States and Trust Territories.

The term "Dominion" is an abbreviation of the complete official designation "self-governing Dominion." The Dominions are sovereign and independent nations associated with Great Britain and its Empire in the British Commonwealth of Nations.

The Capital of this vast empire is London. The census (1931) returned the population of the metropolitan district of London as 8,203,942, an increase of 9.7% since 1921, and the County of London (registration and administrative district) contained in it as 4,080,002. The area of the City of London is 675 acres; the County of London 74,350 acres; Greater London 443,455 acres. Greater London had an estimated population of 8,379,948 in 1943.

The Ruling Sovereign is George VI, third of the House of Windsor, whose title is "George VI, by the Grace of God, of Great Britain, Ireland and the British Dominions beyond the Seas King, Defender of the Faith." The phrase "Emperor of India" was dropped by a Royal decree (June 22, 1948). He was born (Dec. 14, 1895), son of the late King George V., who died (Jan. 20, 1936) and Queen Mary, daughter of the late H. S. H. Duke of Teck and H. R. H. Princess Mary of Cambridge. He succeeded to the throne on the abdication of his brother, Edward VIII (Dec. 11, 1936).

The King, as Prince Albert, Duke of York, married in Westminster Abbey (April 26, 1923), Lady Elizabeth Bowes-Lyon (born Aug. 4, 1900), daughter of the Earl of Strathmore and Kinghorne. They have two children: (1) Princess Elizabeth Alexandra Mary (born April 21, 1926), heir presumptive, married (Nov. 20, 1947) to Lt. Philip Mountbatten (born June 10, 1921), former Prince of Greece, created Duke of Edinburgh (Nov. 19, 1947) and H. R. H. Prince Philip (Nov. 20, 1947)—issue: Prince Charles Philip Arthur George (born Nov. 14, 1948); (2) Princess Margaret Rose (born Aug. 21, 1930).

King George VI has two living brothers and a sister. They are: H. R. H. Prince Edward Albert (born June 23, 1894), formerly King Edward VIII (Jan. 20, 1936 to Dec. 10, 1936), created Duke of Windsor (Dec. 12, 1936), married (June 3, 1937) Mrs. Wallis Warfield; H. R. H. Prince Henry William (born March 31, 1900), created Baron Culloden, Earl of Ulster and Duke of Gloucester (March 31, 1928), married (Nov. 6, 1935) Lady Alice Montagu-Douglas-Scott (born Dec. 25, 1901), daughter of the Duke and Duchess of Buccleuch and Queensbury—issue: William Henry Andrew Frederick (born Dec. 18, 1941), Richard Alexander Walter George (born Aug. 26, 1944); Princess (Victoria Alexandra Alice) Mary, Princess Royal (born April 25, 1897), married (Feb. 28, 1922) Viscount Lascelles, later Earl of Harewood—issue: George Henry Hubert, Earl of Harewood (born Feb. 7, 1923), Gerald David (born Aug. 21, 1924).

The King's third brother, the Duke of Kent, was killed in an airplane accident in Scotland (Aug. 25, 1942). He was H. R. H. Prince George (born Dec. 20, 1902), married (Nov. 29, 1934) Princess Marina of Greece (born Nov. 30, 1906)—issue: Edward George Nicholas Patrick, Duke of Kent (born Oct. 9, 1935), Alexandra Helen Elizabeth Olga Christabel (born Dec. 25, 1936), Michael George Charles Franklin (born July 4, 1942).

The United Kingdom

Capital, London—Area, 94,279 square miles—Population (estimated June 1948), 50,033,000.

Parliament is the legislative governing body for the United Kingdom, with certain powers over the dependent Empire but none over the Dominions. It consists of two Houses. The **House of Lords** is made up of the peers of the United Kingdom: the Royal Dukes, the Archbishops, the Dukes, the Marquesses, the Earls, the Viscounts, 24 Bishops, and the Barons; also eight Irish peers elected for life; and 16 Scottish peers elected for the duration of Parliament. The full membership of the House of Lords consists of 848 members (Feb. 1949) of whom 23 are minors.

The House of Commons numbers 640 members elected by direct ballot and divided as follows: England, 517; Wales and Monmouth, 36; Scotland, 74; Northern Ireland, 13.

Clergymen of the Church of England, ministers of the Church in Scotland and Roman Catholic clergymen are disqualified from sitting as members, also certain government officers, sheriffs and government contractors. Women have had the right to vote since 1918 and are eligible to sit in Parliament.

In the last general election (July, 1945) the Labor party was victorious. There follows the strength of the parties:

Government		Opposition	
Labour	393	Conservative	189
Liberal	12	Ulster Unionist	9
Independent Labor	3	National	2
Communist	2	Liberal National	13
Common Wealth	1	Total	213
Irish Nationalist	2	Independents	14
Total	413	Grand Total	640

The Bank of England was nationalized (March 1, 1946) as the first major measure of the Labor Government's campaign pledged program of socialization. It was announced that nationalization would be applied to industry and the following industries subsequently have been nationalized (1946-1949): Coal mining, telecommunications (cable and wireless), electricity, inland transportation, civil aviation. Development of the land is governed (since July 1948) by the Town and Country Planning Act of 1947.

Social welfare legislation is well advanced in Great Britain. A comprehensive social-security program, National Insurance was inaugurated (effective July 5, 1948). It supersedes previously existing social legislation, making provision for practically universal compulsory insurance against sickness, maternity, unemployment, and industrial accidents; and pensions for widows, orphans and the aged. Under the Family Allowance Act of 1945 (effective August 1946) the Government pays five shillings a week for each child of compulsory school age. A National Assistance Scheme went into effect simultaneously to care for those not fully protected by National Insurance. Contributions are made by purchase of National Insurance stamps, in amounts varying according to sex and classification (employed, self-employed, non-employed). In the case of employed persons, the employer pays an amount equal to nearly half of the payment.

The Statute of Westminster passed by the House of Commons (Nov. 24, 1931) gave formal ratification to the declarations of the Imperial Conferences (1926 and 1930), which were participated in by the United Kingdom of Great Britain and Northern Ireland, and the Prime Ministers of the Dominion of Canada, the Commonwealth of Australia, the Dominion of New Zealand, the Union of South Africa, the Irish Free State and the Dominion of Newfoundland.

The Conference (1926) defined the Dominions as "autonomous Communities within the British Empire, equal in status, in no way subordinate one to another in any aspect of their domestic or foreign affairs, though united by a common allegiance to the Crown, and freely associated as members of the British Commonwealth of Nations. . . . Every self-governing member of the Empire is master of its destiny. In fact, if not always in form, it is subject to no more compulsion whatever."

Descriptive. The United Kingdom, or British Isles, comprising England, Wales, Scotland, Northern Ireland, Isle of Man, and the Channel Islands, lie off the northwest corner of Europe, with the North Atlantic Ocean on the north and west, the North Sea on the east and the English Channel separating it from the mainland on the south. The Straits of Dover, 21 miles wide, divide it from France. The northern end of Scotland lies due west from the southern end of Norway.

England has an area of 50,874 square miles and a population (1931 census) of 37,794,003, including Monmouthshire. Wales has an area of 7,466 square miles and a population (1931 census) of 2,158,374.

The climate of the British Isles is equable, mild and somewhat warmer than that of the continent opposite, because of the Gulf Stream modifying the temperature, which is mean at 48 degrees. Rainfall is abundant, averaging 41 inches annually, but is seldom heavy at a given time, so that the precipitation covers longer periods, and fogs often prevail.

Cabinet

(as of April 1, 1949)

Prime Minister and First Lord of the Treasury—Rt. Hon. Clement Richard Attlee, C.H.

Lord President of the Council and Leader of the House of Commons—Rt. Hon. Herbert Stanley Morrison.

Secretary of State for Foreign Affairs—Rt. Hon. Ernest Bevin.

Chancellor of the Exchequer—Rt. Hon. Sir (Richard) Stafford Cripps, K. C.

Minister of Defense—Rt. Hon. Albert Victor Alexander, C.H.

Lord Chancellor—Rt. Hon. Viscount Jowitt, K.C.

Secretary of State for the Home Department—Rt. Hon. James Chuter Ede.

Secretary of State for Commonwealth Relations—Rt. Hon. Philip Noel-Baker.

Secretary of State for Scotland—Rt. Hon. Arthur Woodburn.

Secretary of State for the Colonies—Rt. Hon. Arthur Creech Jones.

Minister of Labor and National Service—Rt. Hon. George Alfred Isaacs.

Minister of Health—Rt. Hon. Aneurin Bevan.

Minister of Agriculture and Fisheries—Rt. Hon. Thomas Williams.

Minister of Education—Rt. Hon. George Tomlinson.

Lord Privy Seal and Leader of the House of Lords—Rt. Hon. Viscount Addison, K.G.

Chancellor of the Duchy of Lancaster—Rt. Hon. Edward Hugh John Neale Dalton.

President of the Board of Trade—Rt. Hon. James Harold Wilson, O.B.E.

DEPARTMENTS OF STATE AND MINISTERS

Admiralty—First Lord—Rt. Hon. Viscount Hall.

Agriculture and Fisheries—Minister—Rt. Hon. Thomas Williams.

Air—Secretary of State—Rt. Hon. Arthur Henderson, K.C.

Civil Aviation—Rt. Hon. Lord Pakenham

Colonies—Secretary of State—Rt. Hon. Arthur Creech Jones. **Minister**—Rt. Hon. Earl Listowel.

Defense—Rt. Hon. Albert Victor Alexander, C.H.

Commonwealth Relations—Secretary of State—Rt. Hon. Philip Noel-Baker.

Duchy of Lancaster—Chancellor—Rt. Hon. Edward Hugh John Neale Dalton.

Education—Minister—Rt. Hon. George Tomlinson.

Food—Minister—Rt. Hon. John Strachey.

Foreign Affairs—Secretary of State—Rt. Hon. Ernest Bevin.

Fuel and Power—Minister—Rt. Hon. Hugh Taylor Gaitskell, C. B. E.

Health—Minister—Rt. Hon. Aneurin Bevan.

Home Department—Secretary of State—Rt. Hon. James Chuter Ede.

Labor and National Service—Minister—Rt. Hon. George Alfred Isaacs.

Law Officers—Attorney-General, Rt. Hon. Hartley William Shawcross, K. C.; **Lord Advocate**, Rt. Hon. John Wheatley, K.C.; **Solicitor-General**, Sir Frank Soskice, K.C.; **Solicitor-General for Scotland**, Douglas Harold Johnston.

Lord Chancellor—Rt. Hon. Viscount Jowitt, K.C.

Lord President of the Council—Rt. Hon. Herbert Stanley Morrison.

Lord Privy Seal—Rt. Hon. Viscount Addison, K.G.

Minister of State—Rt. Hon. Hector McNeil.

National Insurance—Minister—Rt. Hon. James Griffiths.

Paymaster-General—Rt. Hon. Sir Gordon Macdonald.

Pensions—Minister—Hilary Adair Marquand.

Post Office—Postmaster-General—Rt. Hon. Wilfred Paling.

Prime Minister and First Lord of the Treasury—Rt. Hon. Clement Richard Attlee, C.H.

Scotland—Secretary of State—Rt. Hon. Arthur Woodburn.

Supply—Minister—Rt. Hon. George Russell Strauss.

Town and Country Planning—Minister—Rt. Hon. Lewis Silkin.

Trade, Board of—President—Rt. Hon. James Harold Wilson, O.B.E.

Transport—Minister—Rt. Hon. Alfred Barnes.

Treasury—Chancellor of the Exchequer—Rt. Hon. Sir (Richard) Stafford Cripps, K. C.

War—Secretary of State—Rt. Hon. Emanuel Shinwell.

Works—Minister—Rt. Hon. Charles William Key.

BRITISH PRIME MINISTERS SINCE 1835

Viscount Melbourne	1835	Earl of Beaconsfield (Disraeli)	1874	David Lloyd George	
Sir Robert Peel	1841	Mr. Gladstone	1880	Andrew Bonar Law	
Lord John Russell	1846	Marquess of Salisbury	1885	Stanley Baldwin	
Earl of Derby	1852	Mr. Gladstone	1886	J. Ramsay MacDonald	
Earl of Aberdeen	1852	Marquess of Salisbury	1886	Stanley Baldwin	
Viscount Palmerston	1855	Mr. Gladstone	1892	J. Ramsay MacDonald	
Earl of Derby	1858	Earl of Rosebery	1894	Stanley Baldwin	
Viscount Palmerston	1859	Marquess of Salisbury	1895	Neville Chamberlain	
Earl Russell	1865	Arthur James Balfour	1902	Winston Churchill	
Earl of Derby	1866	Sir H. Campbell-Bannerman	1905	Clement R. Attlee	
Benjamin Disraeli	1868	Herbert Henry Asquith	1908		
William Ewart Gladstone	1868	H. H. Asquith (Coalition)	1915		

The coastline is tortuous, giving very many harbors for shipping, and numerous rivers up which deep sea craft may go.

The soil is of varied natural fertility. It is more sterile in the north, notwithstanding the figures show that the Scots have attained a relatively high acre production by intensive cultivation. However, centuries of tillage have made necessary elaborate and large use of artificial fertilizers.

The prevalent precipitation of moisture, with the mild climate, has induced profuse growth of vegetation of all sorts. The Isles were naturally covered with forests, which have been largely cut off to accommodate so large a population on so small an area with an average of 504.7 to the square mile.

The United Kingdom is a fascinating country, with its varied topography; its hills and valleys, moors and heaths; buzzing industries and quiet countrysides; narrow winding streets and modern motor parkways; quaint fishing villages leaning back against steep cliffs. Its history may be read in ancient castles, towers, battle sites and monuments. Traces of every important period in its life may still be seen in cities or in isolated sections of the country.

LONDON

London, for years the chief metropolis of the world, retains its ancient atmosphere—its historic Houses of Parliament—its famous Tower begun by William the Conqueror in the eleventh century, where noted figures in English history were tortured and put to death. In London, also, is St. Paul's Cathedral on Ludgate Hill, "the parish church of the British Empire"; and Westminster Abbey, where every English monarch has been crowned since William the Conqueror in 1066 and where lie buried kings and queens and many persons notable in English history or letters. The chapel of Henry VII is the finest example in England of Tudor Gothic and contains the tomb of Mary Queen of Scots. The House of Lords—in which may be seen the double royal throne (the King's chair is slightly higher than the Queen's)—and the House of Commons, are open to visitors without charge on Saturdays from 10 A. M. to 3:30 P. M. Many of these landmarks were damaged by German bombings during the war. The foundation stone of a new House of Commons was laid (May 26, 1948) to replace the former building, destroyed in a bombing raid (May, 1941). It is expected to be ready for occupancy in autumn, 1950.

Although Buckingham Palace is designated the town residence of the King, it is at St. James's Palace (built by Henry VIII) that a new King is proclaimed and foreign ambassadors are still "accredited to the Court of Saint James."

In the center of London are five parks—St. James's, Green Park, Hyde Park, Kensington Gardens and Regent's Park; the first four adjoin each other. In Regent's Park there is an open-air theater. St. James's Park was made by Henry VIII as a private deer park, so were Kensington Gardens and Hyde Park.

There are more traditional ceremonies alive in London than in any other city in the world; and clothes of every period from the fifteenth century to the present day are worn as regular costume.

The "Yeomen of the Guard" at the Tower of London are in Tudor dress; the band of the Life Guards wears the uniform of Stuart days; the learned judges in the neighborhood of the Law Courts or the Inns of Court wear full-bottomed wigs and gowns of the late seventeenth century, while "learned counsel" who plead before them are in the fashion of the eighteenth. The green livery and black top-hats of the bank messengers are only one of many examples of the nineteenth century.

A famous military ceremony known as "Trooping the Colors" is performed on the Horse Guards' Parade. The State Opening of Parliament, usually in the beginning of November, when the King rides in his gilded state coach preceded by an escort of Life Guards and Royal Horse Guards along streets lined with guardsmen, from Buckingham Palace to the Houses of Parliament, is a notable display of pageantry.

Despite the lack of plan London is a city of great beauty, not only for its parks, river and monuments but for the peculiar effect of the Portland stone, its most characteristic building material. This stone where beaten by the weather turns almost as white as marble, while on the other surfaces its coat is black with smoke. Thus London is a city of light and shade; and there are few more beautiful city vistas in the world than Whitehall on an afternoon in spring.

The whole of England abounds in sites of historic interest. The "Shakespeare Country" is about 100 miles from London in the county of Warwickshire. It lies at the very gates of the industrial Midlands. Here is Birmingham, England's "Second City," where the automobile and the jewelry come from. The city library boasts the biggest Shakespearean collection in the world. At Stratford-on-Avon one can still see the house where Shakespeare was born, the house to which he retired, his burial place in the parish church, and innumerable other records and relics of his life. The Shakespeare Memorial Theater, built by funds subscribed from Britain and the United States, is an interesting example of modern architecture. Only a few miles from Stratford is Leamington Spa, which rose on the fame of its saline springs to become one of the best-known and most attractive spas in the country. Nathaniel Hawthorne lived here; George Eliot laid the scenes of many of her novels in the neighborhood. Suigrave Manor, the home of Washington's ancestors, is within easy reach.

Canterbury, 53 miles southeast of London, where St. Augustine founded a Benedictine monastery (597), is the ecclesiastical capital of England, famous all the world over for its magnificent cathedral, and as the See of the Church of England's spiritual head, the Archbishop of Canterbury, the Rt. Rev. Geoffrey Francis Fisher. The stone steps leading to the shrine have grooves in them, made by praying knees of thousands upon thousands of pilgrims who have visited the church since long before the time of Chaucer, whose Canterbury Tales form one of the masterpieces of literature.

POPULATION OF CITIES OF OVER 100,000 IN THE UNITED KINGDOM, 1931 CENSUS

Cities	Population	Cities	Population	Cities	Population
London (Greater)	8,203,942	Portsmouth	249,283	Oldham	140,399
City and Administrative County of London	4,080,814	Leicester	239,169	Middlesborough	138,274
		Croydon	233,032	Wolverhampton	133,212
		Cardiff	223,589	Walthamstow	132,965
		Salford	223,442	Ilford	131,046
Glasgow	1,088,417	Plymouth	208,182	Leyton	128,317
Birmingham	1,002,603	Sunderland	185,870	Norwich	126,207
Liverpool	855,688	Willesden	184,410	Stockport	125,505
Manchester	766,278	Bolton	177,235	Blackburn	122,695
Sheffield	511,742	Southampton	176,025	Gateshead	122,379
Leeds	482,809	Dundee	175,583	Southend-on-Sea	120,093
Edinburgh	439,010	Aberdeen	167,259	Preston	119,001
Belfast (1926)	425,156	Coventry	167,046	Ealing	117,688
Bristol	397,012	Swansea	164,797	Bournemouth	116,780

Bradford	298,041	Birkenhead	147,803	Huddersfield	113,475
West Ham	294,278	Brighton	147,426	South Shields	113,452
Newcastle-on-Tyne	283,156	East Ham	142,394	St. Helen's	106,793
Stoke-on-Trent	276,639	Derby	142,406	Walsall	103,059
Nottingham	268,801	Rhondda	141,344	Blackpool	101,543

Greater London had an estimated 1943 population of 8,379,948, with 2,487,100 in the city and administrative county and 5,892,848 in the "outer ring."

The total number of emigrants of British origin to places other than Europe from (1853-1938) was 16,710,072.

The net excess of emigrants from the United Kingdom and Northern Ireland over immigrants (1930) was 25,955. The balance was reversed (1931), when there was an excess of immigrants of 37,072. Emigration for four years to non-European countries was:

	1935	1936	1937	1938
United States	1,590	1,639	2,423	1,992
Canada	2,175	2,281	2,850	3,367
Australia	4,552	4,096	4,122	5,427
New Zealand	1,440	1,462	1,981	2,425
South Africa	4,994	5,010	5,577	6,003
India and Ceylon	5,940	6,160	5,632	5,540

England, Wales, Scotland, the Isle of Man and the Channel Islands have a total land area of

56,343,000 agricultural acres, divided (1946) as follows:

	Grazing	Pasture	Arable
England	2,661,000	8,574,000	13,199,000
Wales	1,494,000	1,373,000	1,170,000
Scotland	10,956,000	1,115,000	3,305,000
Isle of Man	45,000	11,000	63,000

The aggregate number of agricultural holdings in Great Britain (1947) is: Under five acres, 84,717; five to 50 acres, 189,110; 50 to 300 acres, 147,175; over 300 acres, 14,681.

Resources and Industries. The principal agricultural products are wheat, barley, oats, sugar beets, rye, beans, peas, potatoes, turnips, swedes, mangold and hay.

Great Britain imports about four-fifths of the breadstuffs and fruits she consumes; one half of the meat, eggs and dairy products, and one third of the fish and vegetables.

The country is rich in mineral resources. There are huge deposits of coal, the annual output approximates $900,000,000 in value. The yearly production of limestone, igneous rock and iron ore is valued in the neighborhood of $15,000,000 each. Other important minerals, in the order of their value, are—gravel and sand; clay and shale; slate; sandstone; salt; China clay; fireclay; chalk; gypsum; oil shale; lead ore; tin, ore; ganister and silica rock; Potters' clay; moulding and Pig-bed sand; barytes and witherite; and dolomite.

Great Britain's strength is largely in manufacturing, mining and trade. The key industries with their approximate annual peace time output in American dollars are—food, drink and tobacco, $3,163,815,000; engineering, shipbuilding and vehicles, $2,366,195,000; textiles, $2,220,000,000; public utilities, $1,700,000,000; iron and steel, $1,400,000,000; chemicals, $950,000,000; building and contracting, $935,000,000; paper and printing, $900,000,000; clothing, $860,000,000; non-ferrous metals, $520,000,000; clay and building materials, $425,000,000; timber, $340,000,000; leather, $165,000,000. Textiles, woolen and worsted tissues, iron and steel, machinery and vehicles (including locomotives and shipping) are the key industries supplying the bulk of the exports.

The monthly average value of exports of produce and manufactures of the United Kingdom (1938) was £39,229,607, compared with £164,323,000 (Jan. 1949).

Net tonnage at ports of entry (1947) was 54,358,000 with clearances of 54,700,000 net tons. Entered foreign tonnage, 17,605,000 tons, was divided mainly: United States, 5,502,000; Norway, 2,266,000; Netherlands, 2,054,000; Sweden, 1,958,000; Denmark, 1,181,000.

Tonnage of merchant shipping registered under the British flag (Jan. 1949) was 16,394,000. There were under construction 1,246 merchant ships of 1,600 tons and over.

Imports and exports for the last nine years follow:

	Imports	Exports
1940	£1,152,121,200	£437,143,152
1941	1,145,107,779	378,095,857
1942	996,700,000	276,000,000
1943	1,233,000,000	234,000,000
1944	1,309,000,000	280,714,000
1945	1,103,700,000	450,000,000
1946	1,301,000,000	965,000,000
1947	1,794,000,000	1,196,250,000
1948	2,079,500,000	1,647,900,000

Great Britain's principal peace time imports in the order of their monetary value are—food and drink; wood and timber; non-ferrous metals and manufactures; wool and woolen rags; raw cotton and cotton waste; oils, fats and resins; hides and skins; machinery; iron and steel manufactures; non-ferrous ores and scrap; tobacco; paper and cardboard; chemicals, drugs, dyes and colors; iron ore and scrap; rubber.

The chief domestic exports are—cotton yarns, manufactures and other textiles; machinery; iron and steel manufactures; vehicles including ships and aircraft; coal; food and drink; chemicals, drugs, dyes and colors; electrical goods and apparatus; wearing apparel; china, earthenware and glass; cutlery, hardware, implements; wool and woolen rags.

The most important colonial re-exports (that is materials imported from the colonies and dominions and re-exported from Great Britain) are, in the order of their monetary value—wool and woolen rags; non-ferrous metals and manufactures; hides and skins; food and drink; rubber; oil, fat, resin manufactures; raw cotton and cotton waste; leather, machinery, cutlery, hardware, implements; non-ferrous ores and scrap; woolen, worsted yarns and manufactures.

Since nationalization the railway system is divided into six regions, five in England and Wales and one in Scotland, with a total single-track mileage of 53,000. Public highways extend 183,475 miles in Great Britain, divided into 157,089 for England and Wales and 26,388 miles for Scotland.

Telephone service is a part of the postal system. The number of telephones in Great Britain (1947) was 4,500,000. The exchange area in London 1,207,762 telephones.

Postal authorities reported 11,599,900 radio ceiver licenses issued in Great Britain and North Ireland by the end of January, 1949. There w 111,850 television licenses.

Education and Religion. The Church of Engl is Protestant Episcopal. The King is the supr governor, possessing the right to appoint to vacant archbishoprics and bishoprics. There two archbishops (of Canterbury and York), bishops and 40 suffragan bishops.

The Church of Scotland is Presbyterian.

There are about 400,000 Jews in the United Ki dom with approximately 200 synagogues.

A summary of the active membership of cert churches (1947) follows:

Episcopalians		Total 3,692,
Church of England	3,388,859	
Church in Wales	196,389	
Church of Ireland	49,504	
Episcopal Church in Scotland	57,971	
Methodists		767,
Congregationalists		416,
Baptists		382,
Calvinistic Methodists (Presbyterian Church of Wales)		174,
Presbyterians		Total 1,456,
England	74,575	
Ireland	118,126	
Church of Scotland	1,264,125	
Quakers		20,
Wesleyan Reform Union		11,
Independent Methodists		9,
Moravians		3,
Roman Catholics		Total 3,577,
England and Wales	2,528,200	
Scotland (estimated 1942)	621,400	
Northern Ireland (census 1937)	428,290	

Primary and secondary education is free a compulsory from five to 15 years of age.

Under the British Education Act compuls part-time attendance in County Colleges is plan for boys and girls between the ages of 15 and

The most celebrated of British universities Oxford and Cambridge, each with colleges foun in the thirteenth century, and inextricably int twined in the fabric of English history. But th are many others in England: London, Durh Manchester, Birmingham, Liverpool, Leeds, Sh field, Bristol, Nottingham and Reading; in Sc land: St. Andrews, Edinburgh, Glasgow and Ab deen; and one in Wales.

Defense. Administration of the three branc of the armed forces was reorganized by the Minis of Defense Act, 1946. Problems of defense are c sidered by the Defense Committee, presided o by the Prime Minister and consisting of a num of Ministers of the Government, including Minister of Defense who is responsible to Par ment for carrying out decisions of the Committ and the First Lord of the Admiralty and the Se taries of State for War and Air. Each of the th Service ministers is responsible to Parliament the administration of his own Service.

The National Service Act of 1948, as amen Dec. 16, 1948, provides for 18 months' service in regular forces and for four years' part-time ser and training in the Territorial Army or one of three Reserve forces. The Territorial Army responds to the National Guard in the United St and serves only at home in peacetime, whe the regular forces may serve abroad or in Empire. The Women's Services were integra into the three regular branches of the armed fo on a volunteer basis (February 1949).

Maximum peacetime strengths of the ar forces estimated for 1949-1950 are: Army, 555, Navy, 153,000; Air Force Service, 255,000.

In the active fleet (1949) are two battleships, fleet carrier, four light fleet carriers, 15 cruis 33 destroyers, 25 frigates, 30 submarines and minesweepers. Fifty-four vessels, including t battleships are being used on special assignme while 287 are in reserve.

Currency. The monetary unit is the Bri pound sterling.

SCOTLAND

The Kingdom of Scotland occupies the nort portion of the main island of Great Britain includes among many others, the islands of Ir and Outer Hebrides, Orkney and Shetland. Atlantic Ocean lies on the north and west, the North Sea on the east. The greatest ler of the mainland is 275 miles and the grea breadth approximately 150 miles. Total area the Kingdom is 30,405 square miles; popula (estimated 1948), 5,169,000.

The topography of Scotland falls into t natural divisions. The Lowlands is a belt land approximately 60 miles wide which northeast from the Firth of Clyde to the Firt Forth and divides the farming region of

Southern Uplands from the granite Highlands of the north, which occupy the largest portion of Scotland's area and are its main attraction for the visitor, providing grouse, deer, hare, ptarmigan hunting and salmon and trout fishing. The Lowlands, comprising one-tenth of the Scottish land, contains three-quarters of the population and most of the industry.

Glasgow, second largest city in Great Britain, is a world famous shipbuilding and engineering center.

A vast hydroelectric expansion program is under way in the Highlands, which is expected eventually to add one-seventh to the electricity output of the British Isles.

Scotland has been the home of many distinctive strains of dogs and cattle, fabrics and other products.

The lakes and highlands of Scotland are noted for their beauty and have been made the subject of poetry and song. Edinburgh, the capital and seat of Scottish culture, is an attractive city of gray old streets, wide classic squares; spires, pinnacles and turrets contesting with one another in a sort of confusion. Points of interest to the tourist include Edinburgh castle overlooking the city; the house where John Knox lived; Holyrood Palace where the Stuart kings and queens lived out their ill-fated lives, and Princes Street. Not far from Edinburgh are Loch Lomond and Loch Katrine in the Trossach country, made famous by Sir Walter Scott.

The border country is a loose term describing the 60-mile strip which separates Edinburgh from the English border line. It is a land soft green and brown in color, of rounded hills, a land of shepherds with huge flocks. The border has had the stormiest history in all Britain, expressed today in the terms of castles. The abbeys of Melrose, Jedburgh and Dryburgh are roofless and ruined because of battles long ago. Here the English and Scots fought their battles, the great Border clans fought both sides and filled their stables and barns with their neighbors' cattle and horses. This is the country of Sir Walter Scott, a "Borderer" himself, whose house in Abbotsford still stands and who is buried in Dryburgh Abbey.

On the east coast of Scotland about half-way between Edinburgh and Dundee is situated the city of St. Andrews, the birthplace of golf.

Northern Ireland

(ULSTER)

Descriptive. Six of the nine counties of Ulster, the northeast corner of Ireland, constitute Northern Ireland, with the parliamentary boroughs of Belfast and Londonderry; they are Antrim, Armagh, Down, Londonderry, Fermanagh and Tyrone. The country has a population (estimated 1948) of 1,362,000 and an area of 5,238 square miles. Belfast is the capital and chief industrial center.

The finest scenery in Northern Ireland is to be found on or close to the coast line. From Belfast there runs northward along the coast of the county of Antrim a perfectly engineered road running for nearly 100 miles, walled off by sheer green and white cliffs.

The Antrim road takes the visitor to the most famous of the sights of Northern Ireland, the Giant's Causeway, which consists of a perfect honeycomb of stone columns, 40,000 in all, each having the shape of a polygon or hexagon. How these stones came to be cut to such exact mathematical shapes is still a mystery unsolved by geologists. Along the north coast, at the head of a long inlet of the sea, Lough Foyle, is the city of Londonderry. Lough Erne, studded with islands, is one of the most famous of lakes, and Lough Neagh the largest in the British Isles.

Resources and Industries. Agriculture—particularly the raising of livestock and poultry—is the largest single industry. The principal crops include oats, potatoes, flax, turnips, vegetables, fruit and hay. Mineral wealth includes chalk, clay, gypsum, coal lignite, bauxite and iron ore, basalt, felspar, limestone, fireclay, flint, gravel, sand, granite, grit, rock salt, sandstone and diatomite.

Apart from agriculture, linen manufacture and shipbuilding are the chief industries. The manufacturing and making up of linen gives direct employment to about 90,000 people operating 800,000 spindles. Ropes and twines, rayon, clothing, aircraft, engineering products, tobacco, soaps, aerated waters, hosiery and underwear are other important manufactures.

Although it has its own Parliament, Northern Ireland is politically a part of the United Kingdom. The Prime Minister is Sir Basil Brooke (effective May 1, 1943). The Governor is Vice Admiral Earl Granville (appointed 1945).

A separate parliamentary and executive government for Northern Ireland was established (1920). The Parliament consists of a Senate of 26, and House of Commons of 52, both elected with power to legislate in local matters except such as are of Imperial concern or specifically reserved to the Imperial Parliament. Northern Ireland returns 13 members to the House of Commons in Westminster.

The bulk of the taxation is imposed and collected by the United Kingdom authorities, which makes certain deductions and remits the remainder to the local exchequer.

Education and Religion. Northern Ireland is preponderantly Protestant. Elementary education is compulsory. The Queens University of Belfast (founded in 1845) is a well-known institution of higher learning.

Currency. The British pound is the monetary unit.

Channel Islands

The Channel Islands, off the northwest coast of France, are the only portions of the Dukedom of Normandy belonging to England to which they have been attached since the conquest. The islands consist of Jersey, Guernsey and these dependencies of Guernsey: Alderney, Brechou, Great Sark, Little Sark, Herm, Jethou and Lihou. The islands have an area of 75 square miles and an estimated population of 94,000. They have their own laws and own customs. Jersey has a separate legal existence and a Lieutenant Governor named by the Crown. The islands are not bound by acts of Parliament unless named in the legislation. The Channel Islands were the only British soil occupied by German troops in World War II. The German garrison surrendered May 9, 1945.

Isle of Man

The Isle of Man, in the Irish Sea, has an area of 221 square miles and an estimated population of 51,000. The island is equidistant from England, Scotland and Ireland and rich in minerals, lead, iron and slate. The island has its own laws and a Governor appointed by the Crown. The island is not bound by acts of Parliament unless named in the legislation. The main industry is catering to vacationists from the British Isles, approximately 500,000 a year.

British European Possessions

Gibraltar, the rock at the southernmost point of the Iberian Peninsula, guards the entrance to the Mediterranean. The width of the strait dividing Europe from Africa varies from 7.75 miles at the narrowest part to 23.75 at the widest. The Rock has been in British possession since 1713. It has been elaborated, tunneled and armed until it is considered impregnable. A large and secure harbor has been constructed at its foot. As a naval base its position is of the greatest strategic importance. The Rock is 2¾ miles long, ¾ of a mile wide and 1,396 ft. in height; the area is nearly two square miles; a narrow isthmus connects it with the Spanish mainland; population, civil (estimated 1947), 22,532.

The monetary unit is the pound sterling, but Spanish money circulates freely.

Gibraltar is a Crown Colony.

Malta, an island 58 miles due south of Sicily in the Mediterranean Sea and about 180 miles from the African coast, has had centuries of stormy history. It was annexed to the British Empire (1814) following the Napoleonic wars and has been greatly strengthened and made into a base for repair and refitment for the British fleet. The area is 95 square miles and its width is about nine miles. The neighboring island of **Gozo** has an area of 26 square miles which with **Comino** one square mile brings the total for the group to 122 square miles. The population, civil, (estimated 1949) is 307,000.

Farming is the prime industry, chief crops being wheat, barley, potatoes, onions, beans, vegetables and fruits.

India (Sub-continent)

The name India describes the central peninsula of southern Asia, south of the Himalaya Mountains, with an area of more than 1,580,000 square miles and a population (1941) of 388,997,955. The subcontinent is bounded on the north by Afghanistan and China; on the east by Thailand (Siam), French Indo-China and the Bay of Bengal; on the south by the Indian Ocean, and on the west by Iran, Afghanistan and the Arabian Sea.

Burma, bordering Bengal and Assam provinces on the east, was separated from India politically and became independent on April 1, 1937. (See Index, Burma)

The remainder of India was partitioned into two self-governing full Dominions, Union of India and Pakistan Aug. 15, 1947, following nearly two centuries of British rule.

PROVINCES AND NATIVE STATES IN INDIA (1941 CENSUS)

Provinces	Area (Sq. M.) 865,446	Population 295,808,722
Madras	126,166	49,341,810
Bombay	76,443	20,849,840
Bengal	77,442	60,306,525
United Provinces	106,247	55,020,617

Western India	37,894	4,904,156
Total	**1,581,410**	**388,997,955**

Union of India

DOMINION OF INDIA

Capital, New Delhi—Area, 1,246,880 square miles—Population (estimated 1948), 337,211,000.

Descriptive. The new Dominion of India embraces the larger geographical and population division of the sub-continent of India. It consists of the predominantly Hindu provinces and the vast majority of the 562 former independent princely (native) states. Included in India's territory are the provinces of Bombay, Madras, United Provinces, Central Provinces, Bihar, Orissa, eastern half of the Punjab, western half of Bengal, Assam (minus Sylhet district), and the Chief Commissioner's provinces of Delhi, Ajmer and Coorg. All of the Princely states except Hyderabad, Kashmir and Mysore have been merged into less than a dozen administrative units (July 1, 1949).

Andaman Islands. 204 in number, are in the Bay of Bengal, 120 miles from the mainland, with an area of 2,508 square miles and a population (estimated 1947) of 16,000 (exclusive of aborigines). Timber wealth is large.

Nicobar Islands. 75 miles from Andaman Islands, have an area of 635 square miles and a population (1947) of 11,000.

Population of main communities living in India after Aug. 15, 1947 is as follows:

Hindus (including scheduled castes)	272,153,365
Moslems	41,568,797
Sikh	3,973,916

India's climate varies from the tropical heat of Rajputana in Central India to the nearly arctic cold of the Himalayas. Approximately 20 percent of the area is forested, including sandalwood, teak ironwood, deodar, satinwood, date palm, cocoanut, sago, banyan and acacia.

Cities with more than 200,000 inhabitants with their 1941 census population are:

City	Pop.	City	Pop.
Calcutta	2,108,891	Delhi	521,849
Bombay	1,489,883	Kanpur	487,324
Madras	777,481	Amritsar	391,010
Hyderabad	739,159	Lucknow	387,177
Ahmedabad	591,267	Howrah	379,292
Nagpur	301,957	Bangalore	248
Agra	284,149	Madura	239
Banaras	263,100	Sholapur	212
Allahabad	260,630	Srinagar	207
Poona	258,197	Indore	203

Resources and Industries. The country is do nantly agricultural, 70 percent of the people pending on it for their living, but a vast indust program is under way, including more than a do hydro-electric systems similar to the T.V.A. in United States. After agriculture the chief indust of India are textiles, steel, cement and jute ma facture. India produces a large variety of miner including coal, petroleum, lac, chromite, cop iron, mica, magnesite and manganese. In the India has yielded much gold, silver, diamonds rubies to the Western world.

India's coal resources are estimated at 60,0 000,000 tons, reckoned to last 2,000 years at present rate of digging. Annual steel productio about 1,250,000 tons, ranking seventh in the wo The Tata Iron and Steel Works in Jamshed (West Bengal) is the largest factory of its kinc Asia.

There are 857 textile mills (1948) with an proximate production of 4,500,000,000 yards fabrics annually and 111 jute mills which pro more than 90 percent of the world's jute.

Principal agricultural products are millet, r corn, wheat, gram and barley. Their annual p duction (1948) is 40,419,000 tons. Other import products include tea, sugar cane, cotton, gro nuts, jute, linseed, coffee and rubber.

Transportation in India, April 1, 1948, consis of 33,984 miles of railroad and 296,438 miles roads, of which 95,054 miles are metalled. A pla under way to construct an additional 400,000 m of roads. Twenty-four air routes were in ope tion Jan., 1949, covering 15,020 miles within Dominion, and agreements have been reached open direct air services between India and ot countries.

Main items of export from India are agricult produce and raw materials. United States, G Britain, France, Russia and Middle East count are her principal markets. India chiefly imp food grains and capital goods, the former from United States, Australia and Canada, and the ter from the United States and United Kingdom

History and Government. India has one of oldest civilizations in the world. Excavations Harappa and Mohenjodaro trace the Indus Va civilization back for at least 5,000 years. Beaut paintings in the mountain caves of Ajanta in So India, richly carved temples, the Taj Mahal Agra, and the Kutab Minar are a few relics the glorious past.

The first British venture in India was conduc by Sir John Mildenhall in 1599 when, on or from Queen Elizabeth he persuaded the Mog emperor, Akbar, to grant trading rights to British. The fortress at Surat, built by the Bri in 1612 by one of James I's sea captains, was starting point from which the famed East In Company spread out, eventually enabling G Britain to control all of India. Warren Hasti first governor-general of British India (1774-17 set up the empire's civil government system.

Following more than 40 years' active struggle freedom by both Hindus and Moslems, the Br government announced Feb. 20, 1947, its inten to partition India into two Dominions and set J 1948, as the deadline for complete British w drawal from India. Announcement on June 3, designated Aug. 15 as Indian Independence The Union of India on that date became a governing member of the British Commonwe of Nations. The new Dominion automatically over the charter membership India under Br rule had held in the United Nations.

Pending India's becoming a republic, the non head of the government is a governor-general, nically appointed by the King of England. present governor-general is C. Rajagopalachari replaced Lord Louis Mountbatten, last British roy and governor-general in India, June 21, The cabinet consists of Prime Minister Jawah Nehru and 16 colleagues. Similar responsible ernments function in the provinces.

Under India's proposed constitution, the Do ion will be a democratic secular state. Elec were scheduled to be held in early 1950, wit persons 21 years old on Jan. 1, 1949, eligib vote. The draft constitution is modeled after of the United States and contains a similar b rights. It provides for a president, el for a five-year term by an electoral college co ing of members of both houses of Parlia (Council of States and House of the People), elected members of the legislatures of the fed ing states. A vice-president elected by membe both houses will preside over the upper house Council of States. A Council of Ministers (cabi headed by a prime minister, will aid and advis president. The various federating states will

governors, apointed by the president, at the head of state organizations similar to the federal system.

Nearly all utilities are state-owned and state-managed.

Untouchability, the age-old stigma imposed by India's caste system, will be abolished under the proposed constitution.

The few large viable native states which have elected to remain independent of India have separate representation in the Indian Constituent Assembly.

Education and Religion. Nearly 85 percent of the Indian people are illiterate. Plans are under way to make education free and compulsory between the ages of six and 11 (possibly 14 later). Emphasis is being laid on technical education to train personnel for management of new industrial works in the country. In 1945 there were 196,000 recognized institutions of learning with 16,352,698 students and 1,564 unrecognized institutions with 467,253 students. There were 24 universities in 1948.

There are 15 main languages, 12 originating from Sanskrit, with more than 200 different variations in dialect. The Constituent Assembly has recommended the adoption of Hindi as the national language.

More than 85 percent of the population follow the Vedas (Hindu) religion, but the proposed constitution guarantees complete freedom of worship to all. The remainder are Moslems, Christians, Jains, Buddhists, Sikhs and Parsees.

India has more than 100,000 telephones with a population density of 0.03 percent, and 300,000 licensed radio sets. All India Radio, in New Delhi, broadcasts in 31 languages, 17 of which are foreign.

Defense. All recruitment for India's armed forces is voluntary. The army's strength (Jan. 1, 1948) was 300,000; navy, 11,850 ratings and officers; air force, 8,700. The navy consists of one cruiser, four sloops, 12 minesweepers and a number of small vessels. Six fighter squadrons and one transport squadron make up the air force.

Currency. The monetary unit is the rupee, divided into 16 annas.

Pakistan

DOMINION OF PAKISTAN

Capital, Karachi—Area, 350,000 square miles—Population (estimated 1948), 75,000,000.

Descriptive. The Dominion of Pakistan, one of the largest countries in the world, comprises two zones in the northeast and northwest corners of India, separated by a thousand miles of Dominion of India territory. Pakistan was formed by the partition of the sub-continent of India, Aug. 15, 1947, on the basis of Islamic faith of the majority of the population. Western Pakistan includes the provinces of West Punjab, North West Frontier Province, Baluchistan, and Sind; Eastern Pakistan includes the eastern three-fourths of Bengal and the large Sylhet district of Assam. A small number of the princely (native) states have acceded to Pakistan. The two zones are linked by sea, air and radio-telephone communication.

Karachi, the capital, is a seaport in Sind province in the western zone and also is an important airline junction, with the largest airport in Asia. The city is the seat of Sind University.

The rivers in Western Pakistan flow parallel to and nearly equidistant from each other until they ultimately join the Indus which empties into the Arabian Sea. Their peculiar features have aided the development of the oldest and second largest irrigation canal system in the world.

Lying between 20 degrees and 40 degrees north latitude, the two zones have three well divided periods of winter, summer and rainy seasons. Both partake of the generally tropical climate of the remainder of the continent, with less variation between winter and summer in Eastern Pakistan which is generally warm and humid, and has a heavier rainfall, averaging more than 100 inches during the monsoon season which occurs between July and September.

Communications are well developed and the country possesses all transportation facilities—rail, road and air. The internal road transportation in Western Pakistan is a network of first-class metalled roads, and even the smaller rivers are bridged. The rail-cum-road two-tier suspension bridge over the Indus at Sukkur is an outstanding feat of engineering. In Eastern Pakistan, although the main towns are also connected by railway and road, the vast system of internal waterways provide one of the most useful and cheapest methods of transport.

Although 80 percent of Pakistan's population lives on farms, there are a dozen cities which have populations in excess of 100,000.

Resources and Industries. Pakistan essentially is an agricultural country and one of the largest granaries in the Far East. Wheat and rice staple foods of the country, are the two main food crops and cover 36,000,000 acres. Jute, grown only in Eastern Pakistan, is the most important of the major cash crops. Pakistan is the largest producer of jute in the world, the 1,500,000 acres devoted to it producing an average yield of 7,500,000 bales annually, accounting for 73 percent of the output of the entire continent. Next in importance is cotton which comprises 3,000,000 acres and produces an annual output of 1,500,000 bales. Tea and oil seeds also are exported in quantity.

A geological survey has revealed rich deposits of sulphur, chromite, petroleum and coal. Also found are salt, lime, asbestos, antimony, gypsum and steatite.

In Pakistan, as in India, nearly all utilities are state-owned and state-managed, but private industry is being encouraged by tax allowances and other incentives.

The most important industries of the eastern zone are cotton spinning and weaving, flour milling and other food processing. The western zone contains more than a score of iron and steel foundries and a like number of railway shops. Pakistan plans first to enlarge the manufacture of products utilizing its agricultural raw materials, particularly jute, cotton, hides and skins, with later efforts to be devoted to development of the heavy industries.

History and Government. Antecedents of the Moslem League had existed side by side with those of the Hindu Congress in India for more than 1,000 years since the Moslems first began their incursions along the route of Alexander the Great and from Central Asia, establishing an empire under the Moghul rulers of India, which reached its zenith under Moghul Emperor Shah Jehan during the 17th century.

Following more than 40 years' struggle for independence, Pakistan and the Indian Union simultaneously became independent sovereign Dominions in the British Commowealth of Nations Aug. 15, 1947. The opening meeting of Pakistan's Constituent Assembly was held in Karachi Aug. 10, 1947. Pakistan was accepted as the 57th member of the United Nations Sept. 30, 1947.

The Dominion's Constituent Assembly consisting of members elected by the legislatures of the provinces, plans the drafting of a republican constitution, under which Moslems will be enabled to live in individual and collective spheres in accord with the teachings of the Quran and the Sunna, with adequate provision for the development of the religions and cultures of minorities.

The governor-general is Sir Khwaja Nazimuddin who succeeded the late Mohammed Ali Jinnah, former leader of the Moslem League (died Sept. 11, 1948). The prime minister is Liaqat Ali Khan.

Education and Religion. Culturally the Moslems form the most homogeneous and predominant group in Pakistan, constituting about 70 percent of the total population. The remainder are Hindus of various classes and castes, Christians and Parsees. The principal language is Urdu, with a number of dialects in the various Provinces. Among the important seats of learning are the University in Lahore and Sind University in Karachi.

British Malaya

FEDERATION OF MALAYA; SINGAPORE

The Federation of Malaya which became effective Feb. 1, 1948, consists of the four former Federated Malay States of Perak, Selangor, Negri Sembilan and Pahang, the five former Unfederated States and the two British settlements of Penang and Malacca. Singapore became a separate Crown colony April 1, 1946, when the former colony of the Straits Settlements was dissolved and the interim Malayan Union formed. Each state in the Federation is governed by its native ruler subject to the advice of the British High Commissioner, except in religious matters.

Area of the Federation is about 50,580 square miles; population (estimated 1949), 4,908,000.

FORMER FEDERATED MALAY STATES

The four former Federated Malay States situated on the Malay Peninsula, with their areas and populations (1941) follow:

State	Area (Sq. M.)	Population
Perak	7,980	992,691
Selangor	3,160	701,552
Negri Sembilan	2,580	296,009
Pahang	13,820	221,800
Total	**27,540**	**2,212,052**

FORMER UNFEDERATED MALAY STATES

State	Area (Sq. M.)	Population
Johore	7,330	737,590
Kedah	3,660	515,758
Perlis	310	57,776
Kalantan	5,720	390,332
Trengganu	5,050	211,041
Total	**22,070**	**1,912,497**

Rubber and tin are the chief products, others being cocoanuts, rice, tapioca, sugar, pepper, copra camphor and nepah and oil palm.

One of the richest tin deposits is in the Kinta valley in the state of Perak. The Malay States are the greatest source of tin in the world. The British introduced rubber trees about fifty years ago from seed smuggled out of Brazil and rubber trees practically cover the Malay States.

The area of Penang is 400 square miles, population (1941), 419,047; Malacca's area is 640 square miles, population (1941), 236,087.

Johore has been a protectorate of Great Britain (since 1885), the other unfederated states were transferred from Siam to Great Britain by treaty (1909).

FORMER STRAITS SETTLEMENTS

The Straits Settlements, a Crown Colony, comprised the settlements of Singapore, including the Cocos Islands and Christmas Island; Penang, Malacca and Labuan. The area was 1,356 square miles, population (1941), 1,435,895.

Singapore, an island 27 miles long and 14 miles wide, with an area of 225 square miles, was the capital and chief port of the Settlements.

Singapore just misses being the southernmost point of Asia by a half-mile water channel. The Johore Causeway joins it with the mainland and affords through train service between Bangkok and Singapore. It is at the funnel point of the Strait of Malacca, which extends between the Malay Peninsula and the island of Sumatra, the great water highway between India and China.

Singapore has a polyglot population of which 80 per cent is Chinese. The population (preliminary 1947 census) is 940,756. The port was served by 80 steamship lines and annually was host to 30,000 ships. The city has magnificent banks, modern office buildings and stately Government palaces.

Ceylon

(DOMINION OF CEYLON)

Capital, Colombo—Area, 25,332 square miles—Population (estimated 1947) 6,879,000.

Descriptive. Ceylon is an island in the Indian Ocean 60 miles off the southern tip of India. Its greatest length is from north to south, 270 miles, and its greatest width, 140 miles. The northern part of the island is flat, but the southern and eastern parts are mountainous, with several peaks rising to more than 7,000 feet and the highest, Pedrotallagalla, reaching 8,291 feet. The climate is hot but dry and healthy except in the low-lying jungle regions. There are many mountain streams, which are navigable only by canoe.

Resources and Industries. Minerals and metals found on the island include gneiss, limestone, iron, manganese, gold, platinum, nickel, cobalt, copper and tin. Industrial production took rapid strides after the end of World War II, and factories were established for the manufacture of textiles, extraction of refined coconut oil, hydrogenation of oils, steel, caustic soda, writing paper, D. D. T., cigarets, rubber goods, soap, potable spirits and glass. The principal agricultural products, and also exports, are tea, rubber, coconuts, rice, cacao, cinnamon, citronella and tobacco.

History and Government. Ceylon was known to the ancient Romans as Taprobane (Island of Dusky Leaves). It was first settled by Sinhales, colonists from the valley of the Ganges in India who immigrated about 543 B.C. and whose descendants still form three-fourths of the population. In later periods there was a wave of Tamil immigrants from Southern India whose descendants account for one-tenth of the population. The island was settled by the Portuguese (1505), but captured from them by the Dutch (1658). The British annexed the island to the presidency of Madras, India (1796), and it became a Crown colony under the Treaty of Amiens (1802). A commission under Lord Soulberry proposed (1945) a new constitution for Ceylon on the British model. This constitution was promulgated by Order in Council (1946), and the island was granted full Dominion status by Royal Assent (1947), and became effective Feb. 4, 1948.

The constitution provides for universal suffrage and a Parliament composed of a Senate, with 30 members, and a House of Representatives, with 95 members. The administration of the island is in the hands of the Governor, Sir Henry Monck-Mason Moore, who is aided by a State Council. A Cabinet, elected (Sept. 26, 1947) by the State Council, is headed by Stephen Senanayake, Prime Minister and Minister of Agriculture.

Education and Religion. All education is free in government schools from kindergarten to university, under a postwar plan (Oct. 1, 1945) which was also adopted by 203 Assisted Schools. All types of schools, including English, bi-lingual, Sinhal and Tamil, are included in the plan. The major of the population belong to the Buddhist faith.

Currency. The monetary unit is the Ind rupee, valued at 15 rupees to £1.

The **Maldive Islands,** a British Protectorate f merly a dependency of Ceylon 400 miles to southwest, consists of 12 coral atolls with an a of 115 square miles and a population of 93, (1946). The islands produce coconuts, fruit a edible nuts, and millet. Under the constitut (1932) a People's Assembly composed of 33 memb and a Cabinet of four members were establish The Sultan of the islands is Amir Abdul Majid D

Other Asiatic Possessions

British North Borneo has 29,500 square mi area, with a population (estimated 1947) of 312,3 chiefly Mohammedans on the seacoast, and abor inal tribes inland. The island of Labuan, 35 squ miles, was re-united with Borneo (1946) when former Straits Settlements was dissolved. Its po lation (estimated) is 20,000.

Exports are mainly timber, sago, rice, gum, a the tropical products.

The British governor of North Borneo, Bru and Sarawak is the High Commissioner of Brit Malaya.

Brunei has been since 1888 a protected sultan on the north side of the Island of Borneo, betw Sarawak and British North Borneo. Its area about 2,226 square miles, and population (estima 1949), 41,000.

Sarawak, a Crown Colony, the land of the wh Rajah, is along the northwest coast of Borneo, tween the mountains and the China Sea. Its co line is 400 miles long and its area 50,000 squ miles. Its population is estimated (1947) at 550,0 The capital is Kuching. The chief exports are sa pepper, gold, plantation rubber, petroleum.

Aden, a Crown Colony, occupies a peninsula the Arabian coast at the southern end of the R Sea with 75 square miles of area in Aden pro and 115,080 square miles including protector areas. The population of the Colony proper (19 was 82,359; for the entire Protectorate, 730,8 It is the principal commercial center for Arabian peninsula.

Manufacturing is chiefly of cigarettes and s Aden is a free port, an important coaling s tion, and has an excellent harbor.

Bahrein Islands, a Protectorate. (*See Index*

Socotra is an island off the African coast un British protection, attached to Aden. Area in is 1,400 square miles, and population 12,000, mos engaged in livestock husbandry.

British **Hong Kong** is a Crown Colony (acqui in 1841) lying at the mouth of the Canton Ri 90 miles south of Canton, China. The island is miles long, with an area of 32 square miles. T area of the colony, including the peninsula of K loon, on the mainland, is 391 square miles. population (estimated 1949) is 1,800,000.

Hong Kong is an important British naval sta in addition to its commercial value. It is the g way between the East and the West and one of greatest trans-shipment ports in the world.

Cyprus is an island, third largest in the M terranean Sea, 40 miles south of Asia Minor an miles west of Syria, and 240 miles north of Eg Its area is 3,572 sq. m., and population (estim 1949) of 460,000. It has been administered by B land since 1878; first under an agreement Turkey, then annexed (Nov. 5, 1914).

The legislative council was suspended (1931) legislative powers conferred on the Governor Council. A new constitution, restoring the Le lative Council is under discussion (1949).

Four-fifths of the inhabitants are Greek Ch tians, and nearly all the remainder are Tur Mohammedans. More than half are illite Turkish customs and laws prevail.

The island is mainly agricultural, with wh barley, vetches, fruits, olives, and cotton as c products. Thirty per cent of the land is cultiva Mineral production, including iron pyrites asbestos, also is important.

Nicosia is the capital. The chief ports are Lim sol, Larnaca and Famagusta.

Union of South Africa

Capital, Pretoria—Area, 472,550 square mi Population (estimated 1947), 11,391,950.

Descriptive. The Union of South Africa Dominion within the British Commonwealt Nations, occupying the southern portion of Af includes the former Colonies of the **Cape of Hope, Natal, the Transvaal** and the **Orange State.** The former German territory of S

Vest Africa is administered by the Union under nandate from the League of Nations.

The population (1946) and area in square miles of the four provinces comprising the Union of South Africa follow:

Province	Pop.	Area Sq. Mi.	Capital
Transvaal	4,271,631	110,450	Pretoria
C. of Good Hope	4,045,805	277,113	Cape Town
Orange Fr. State	876,634	49,647	Bloemfontein
Natal	2,197,879	35,284	Pietermaritzburg

The capital of the Union is Pretoria although the Union's Legislature meets in Cape Town.

Resources and Industries. The Transvaal and Natal have land suitable for growing cotton. Corn s an important crop, and its export due to great variations in production is handled on a quota system. Merino wool also is exported on a very large scale. Wheat and fruit are also grown.

South Africa is the richest gold and diamond country in the world. Nearly 35% of the world's supply of gold originates there, the gold industry providing work for 361,459 persons, or 81.99% of the employed population.

Coal, copper and tin are also important. Other minerals are iron, lead, lime, manganese, platinum, salt, talc, chrome, mica, graphite, beryl.

Production of gold, by fine ounces, was (1935), 2,603,000; (1936), 11,378,000; (1937), 14,002,000; (1938), 12,161,392; (1939), 12,821,507; (1940). 14,046,502; (1946). 11,917,914; (1947), 11,197,638.

Production of diamonds, by carats, (1935), 676,722 (1936), 623,923; (1937), 1,030,434; (1938), 1,238,608; (1939), 1,249,828; (1940), 543,463; (1946), 1,349,000.

History and Government. The Union is constituted under the South Africa Act passed by the Parliament of the United Kingdom (Sept. 20, 1909), and came into actual existence (May 31, 1910).

The legislative power of the Union is vested in the Parliament of the Union, consisting of the King, the Senate and the House of Assembly. There is an elected Provincial Council in each of the four Provinces.

In the national elections (May 26, 1948), the Nationalist party and its ally, the Afrikaner, won a majority of five votes over Field Marshal Jan Christiaan Smuts' United party and its allied Labor party. Field Marshal Smuts, veteran world statesman, lost his seat in Parliament. The Prime Minister is Dr. Daniel Francois Malan, Nationalist party leader.

Education and Religion. There are six universities—Cape Town, Stellenbosch, South Africa, Witwatersrand, Pretoria and Natal, with an average enrollment exceeding 20,000 students. Primary education is free to all citizens and compulsory for European children over seven years of age.

Defense. The defense system makes every European citizen between 17 and 60 years of age eligible for military duty in time of war. Those between 17 and 25 are obligated to undergo training in the Coast Garrison Force, the Active Citizen Force, the Royal Naval Volunteer Force, or a Rifle Association, over a period of four years. The Rifle Association provides for training in the handling of a rifle for those between 21 and 25 years.

The Naval Service comprises more than 60 minesweepers and patrol craft and some of which have served with the British Mediterranean Fleet. The personnel numbers 6,000.

The air force maintains contact with the Royal Air Force.

Currency. The monetary unit is the South Africa pound.

South-West Africa, formerly German territory (annexed 1884), occupies the Atlantic Coast from the Orange River to Angola. It covers an area of 317,725 square miles and has a population (estimated, 1947), of 341,450. It was conquered by the armed forces of the Union in the World War (July 9, 1915).

It is now administered by the Union under a Mandate from the League of Nations (dated Dec. 17, 1920).

SUDAN, ANGLO-EGYPTIAN

(See Index)

British East Africa

Kenya, Crown Colony and Protectorate, extends from the Indian Ocean northeast to Italian Somaliland, north to Ethiopia, west to Uganda, and south to Tanganyika. Its area is 224,960 square miles, and population (estimated 1949) of 5,180,000, largely native.

The northern part of the country, three-fifths of the whole, is arid and comparatively waterless. Most economic production is centered in the south, a low coastal area and a plateau varying from 3,000 to 10,000 feet. Five million acres in the Highlands are reserved to Europeans. The main products are coffee, tea, cereals, sisal, dairy products and minerals.

Nairobi, a famous center for big game hunting, is the capital.

The Uganda Protectorate lies to the west of Kenya with the Anglo-Egyptian Sudan on the north, Belgian Congo on the west, and Tanganyika on the south. Its territory includes part of the Victoria Nyanza, Lake Kioga and Lake George and part of Lake Albert, also the Nile from Victoria Nyanza to the Sudan.

Its area is 93,972 square miles, including 13,680 square miles of water. The population (estimated 1948) is 5,000,000, largely native. The country is well advanced in civilization.

Tanganyika, a Trust Territory administered by a Governor, with Executive and Legislative Councils, formerly was German East Africa, and was taken by the British (1918), the Urundi and Ruanda districts going to Belgium, and the "Kionga Triangle" to Mozambique (Portuguese East Africa). It reaches from the coast to Lake Tanganyika and Lake Nyasa to Victoria Nyanza.

The area is 362,706 square miles, and population (estimated 1948), 7,080,000.

Many parts of Tanganyika are excellent for big game hunting. There are many huge extinct volcanos; such as Kilimanjaro, Mount Meru and Ngoro.

The principal products are sisal, cotton, coffee, ground nuts, hides and skin, beeswax and ivory.

Nyasaland Protectorate (until 1907 British Central Africa) is situated on the southern and western shores of Lake Nyasa and extends nearly as far as the Zambesi river. Its area is 47,404 square miles, including 10,575 of water, with a population (estimated 1949) of 2,200,000. Tea, wheat, cotton, rubber and tobacco are cultivated.

British South Africa

Southern Rhodesia lies in the central part of Southern Africa, extending from the Transvaal Province northward to the Zambesi River, with Portuguese East Africa on the east and Portuguese West Africa and Bechuanaland on the west. It has an area of 150,333 square miles. Population as estimated (1948) was 1,764,000 and includes 82,382 Europeans. The country is rich in gold reefs and other minerals, but has proved to be an ideal agricultural country, especially adapted to European settlers. Salisbury is the capital.

The Victoria Falls in Southern Rhodesia on the Zambesi River are the greatest natural spectacle in Southern Africa. The chasm itself has the form of a long, narrow box, one mile long and 420 feet high by 200 to 300 feet wide—the distance between the two parallel and perpendicular walls.

Southern Rhodesia was under the administration of the British South Africa Company from 1889 to 1923 when the country was annexed to the British Dominions. A new form of Government was established with a Governor, assisted by a Legislature which has full control over internal affairs. The Legislative Assembly consists of 30 members and sessions must be held at least once a year.

Corn, cotton, tobacco are grown. The output of gold, coal, chrome and asbestos is considerable.

Northern Rhodesia was under the administration of the South Africa Company (1889-1924) when the office of Governor was established with an Executive Council and subsequently a Legislative Council.

Its area is 287,640 square miles extending north from the Zambesi river to the Belgian Congo and Tanganyika Territory. The country is mostly high plateau covered with thin forest and suitable for farming and grazing. The population was estimated (1949), at 1,700,000, including more than 21,000 Europeans.

The country is rich in minerals, particularly copper, zinc, cobalt, gold, vanadium and manganese.

Basutoland, with 11,716 square miles, and a population (1948) of 556,390, lies in South Africa northeast from the Cape Province on an elevated plateau. Stock raising is most important. Products are wool, wheat, cereals. The territory is governed by a Resident Commissioner under the High Commissioner for South Africa.

It is a reservation set apart for the natives of the country. White people are not permitted to own land.

Bechuanaland, area, 275,000 square miles, population (census 1946), 284,129, including 2,325 Europeans and 1,804 Asiatics and colored persons; is in the middle of Southern Africa, between Southwest Africa and the Union of South Africa and Rhodesia. It is undeveloped, but cattle raising and agriculture have gained momentum, and the livestock totals more than 1,600,000 head.

Swaziland, with 6,704 square miles, and a population (estimated 1948) of 185,210, lies at the southeast side of the Transvaal in South Africa, and produces chiefly tobacco, corn, asbestos, tin, butter and livestock. Some gold is exported. The country is largely undeveloped.

British West Africa

Nigeria lies in Western Africa, between Cameroon and Dahomey (French) on the Gulf of Guinea. The hinterland stretches back 600 miles to French West Africa. The tin and lead industries are old and valuable. Railroad development has been rapid because of the mines. The chief exports are, besides tin, palm oil, palm kernels, cotton lint, cocoa, hides and skins, rubber and peanuts.

Nigeria is a Colony and Protectorate with a Governor. It has an area of 338,593 square miles and a population, including the Cameroons (estimated 1949), of 25,000,000.

British Cameroons, 34,081 square miles and an estimated 1,000,000 population, lies between British Nigeria and the French Cameroons in Western Africa. It is part of the former German colony Kamerun, the eastern and larger part of which went to France after World War I. It is a region of fertile soils, and progress is rapid toward building up valuable agricultural production—cloves, vanilla, ginger, pepper and palm oil. Ivory is an important product.

It is a Trust Territory, administered with Nigeria.

Gambia is a British Colony and Protectorate in western Africa consisting of the island of St. Mary at the mouth of the Gambia River which flows through the French colony, Senegal. It consists of a 10-mile wide strip of territory on each side of the river, and extends northeast for 300 miles from the coast. The river is navigable for ocean-going steamers for a considerable distance at all seasons. The colony and protectorate have a total area of 3,964 square miles and a population (estimated 1949), 250,000. Bathurst, on St. Mary's Island, is the capital.

Sierra Leone lies on the west coast of Africa for 210 miles, between French Guinea and Liberia. In its capital, Freetown, it has one of the finest seaports in West Africa, with an excellent harbor and a naval coaling station. The colony has been in British possession since 1788. The hinterland forms the British protectorate of Sierra Leone, which extends inland about 180 miles. The area of the colony and protectorate is 27,925 square miles; the population (estimated 1949) is 2,000,000.

The principal products are iron ore, hides, rice, piassava and kola-nuts, palm kernels, chrome ore, gold and diamonds.

The Gold Coast, a Colony and Protectorate, lies along the Gulf of Guinea for 334 miles. Its area is 78,802 square miles (including Ashanti and the Northern Territories). The population (estimated 1947) was 3,571,000. The French Ivory Coast is on the west and on the east is **Togoland**, formerly a German Colony, divided by mandate of the League of Nations between Great Britain and France, and now held under trusteeship from the United Nations. The French portion, 21,100 square miles, is attached for administrative purposes to Dahomey in the east, and the British, 13,041 square miles, 391,520 population, to the Gold Coast. Accra is the capital.

Ashanti is due north of the Gold Coast, and the **Northern Territories** are north of Ashanti. These countries have enormous wealth in their forests, and the cultivation of cacao and rubber is being fostered. The chief exports are cacao, gold and diamonds. The area of Ashanti is 24,379 square miles and population 737,072. The area of Northern Territories is 30,486 square miles, population 890,170.

Minor African Possessions

Zanzibar, a Protectorate, is an island of 640 square miles, 23 miles off the eastern coast of Africa, having 150,000 population (estimated 1946). The British protectorate was established (1890) by agreement with Germany and France. Heligoland was ceded to Germany and Britain waived claims to Madagascar in favor of France.

It is governed by a Sultan, Seyyid Khalifa Ibn Harub, but is administered by a British resident. The island of **Pemba**, 25 miles to the northeast, area 380 square miles, is included in the government. The population of the Protectorate is estimated at 250,000 (Zanzibar, 150,000, Pemba, 100,000). The people are mostly Mohammedans.

The chief industry is the production of cloves, the islands of Zanzibar and Pemba yielding the bulk of the world's supply. It is estimated that there are on both islands 48,000 acres, with 4,750,000 trees devoted to that product. Coconuts and copra are important exports. Pottery, coir fiber, rope, soap, oil, jewelry and mats are the principal manufactures.

Mauritius, an island in the Indian Ocean, 500 miles east from Madagascar, has 720 square miles, and a population (estimated 1949) of 450,000. Port Louis is the capital and chief seaport.

The one industry is sugar. Aloe fiber and r are also exported. Trade is principally with Gr Britain, Canada, India, Hong Kong, Union South Africa, France, Madagascar and Reun Islands.

Seychelles and tributary dependencies inclu 92 islands of 156 square miles, and a populati (estimated, 1948) of 35,020, lying in the Indi Ocean near Mauritius. The capital is Victoria, port with a coaling station. Coconuts are t chief product, followed by cinnamon, patchou mangrove bark, vanilla and tortoise shell.

Somaliland, a Protectorate, with 68,000 squ miles, and 700,000 population, mostly Mohamm dans, is in Northeast Africa, on the Gulf of Ad with Ethiopia to the south and west and Itali Somaliland on the east. The chief town is Berbe and the products skins, resin, gum, goats a sheep.

St. Helena, the island made famous by the ex of the Emperor Napoleon, is 1,200 miles off t west coast of Africa, has 47 square miles and pop lation (estimated, 1948) of 4,750. Flax, lace maki and the export of lily bulbs to England are t chief industries. It is an important naval coali station, and, although volcanic and small, h great strategic value.

Ascension, an island of volcanic origin, 34 squ miles in area, 700 miles northwest of St. Hele is noted for its sea turtles. Population (1941) w 169.

Tristan da Cunha, the principal of a group islands of volcanic origin, 12 square miles in ar half way between the Cape and South Ameri difficult for boats to reach because of its rugg shores, forms one of the loneliest places on t globe. About 230 persons, descendants of sh wrecked sailors, and soldiers from St. Helena, a rude livelihood there. Sheep, geese and bullo are reared and there are plenty of fish. The isla is an important meteorological and radio stati

Australia

COMMONWEALTH OF AUSTRALIA

Capital, Canberra—Area, 2,974,581 square mi —Population (estimated 1948), 7,710,229.

Descriptive. The continent of Australia is si ated between 10° 41′ and 39° 8′, (or including T mania, 43° 39′) south latitude and 113° 9′ 153° 39′ east longitude in the Pacific Ocean, w the Indian Ocean on the west, and the South Ocean on the south.

The states and territories of the Commonwea with their areas and populations (estimated 19 are:

	Area sq. mi.	Populat
New South Wales	309,433	3,025
Victoria	87,884	2,090
Queensland	670,500	1,127
South Australia	380,070	658
Western Australia	975,920	515
Tasmania	26,215	262
Northern Territory	523,620	12
Australian Capital Territory	939	18
Total		7,710

The state capitals are: New South Wales, Sydn Victoria, Melbourne; Queensland, Brisbane; So Australia, Adelaide; Western Australia, Per Tasmania, Hobart.

In eastern Australia the height of the mo tains varies from approximately 2,000 feet 7,000 feet. The highest point is Mt. Kosciu 7,328 feet high. The central portion extends w ward in rolling plains until the higher el tions are reached on the west coast. The clim is temperate in the south and tropical in north.

Australia is the habitat of strange flora fauna. The koala, or living Teddy Bear, be seen in parks near the cities and in the "bu He is a soft bundle of fur of up to 26 inche length when fully grown. He never drinks, taining enough moisture from the young eucaly leaves on which he lives.

The platypus, a combination of fish, bird animal which is equally at home in the w or on land, is one of only two creatures kn to science which lay eggs and nourish young with milk. The other is the Austra echidna or ant-eating porcupine.

There are many other strange creatures— wombat, which burrows deeply; the Tasma devil and the Tasmanian wolf; the dingo and spotted native cat; the mole that is blind, deaf dumb; barking and cycling lizards; house-buil rodents and fish that breathe, having a lun well as gills. Birds of brilliant plumage numerous. Parrots, red, green and yellow in flocks.

In the far north, wild buffalo roam where white men live; and wild ducks and geese s

over lagoons and lakes in flocks of almost unbelievable size.

In the north, too, are to be seen the best specimens of the aboriginal tribes. They are the most primitive of all peoples, entirely nomadic, making fire with sticks, throwing boomerangs, and killing kangaroos and other game with spears. Except in the far region of the "Never Never" land, the aborigines are quite harmless.

Resources and Industries. Australia is the greatest wool-producing country in the world. Important crops are wheat, oats, barley, corn, hay, potatoes, sugar cane, sugar beets, grapes and fruits.

The country yields gold, silver, lead, copper, iron ore, tin and coal. In 1946-1947 there were 34,767 factories, with an output valued at £1,011,026,206, and employment of 804,929 workers.

History and Government. Australia has been settled since 1788. The Commonwealth, proclaimed Jan. 1, 1901, enjoys Dominion status and is governed on the Federal plan with a Parliament consisting of a Senate and a House of Representatives.

The Governor-General is William J. McKell (appointed Jan. 31, 1947). The British High Commissioner is Edward J. Williams. The Prime Minister is Joseph B. Chifley of the Labor party. He is also Treasurer. In the general elections (1946) Labor was returned to power.

Pension acts provide for payments of old age and invalid pensions, including the blind, the unemployed, victims of tuberculosis and in some cases to dependents of former soldiers.

A Maternity Act provides for the payment of a bonus for every child born in Australia. Social security measures include Child Endowment for every child under 16 years of age in excess of one in each family.

The Australian Government Trade Commissioner in the United States is Rupert R. Ellen, 630 Fifth Ave., New York City. An Australian Information Bureau is maintained at 630 Fifth Avenue, New York City.

Education and Religion. Education is free and compulsory. There are seven universities plus two University Colleges: New England University College and Canberra University College. Church of England claims 44.4% of the population, the remainder being distributed as follows—Roman Catholic, 22.3%; Presbyterian, 12.3%; and Methodist, 11.8%.

Defense. Military training is on a voluntary basis during peacetime.

The Australian Navy was established (1911) and it has been the policy to maintain a force adequate in the Empire Naval Defense. The present personnel is almost entirely Australian recruited and trained. The fleet (1946) included three cruisers, eight destroyers, two sloops, 33 minesweepers, 12 frigates, a depot ship and 40 minor vessels. A repair base and store depot, with a graving dock large enough to accommodate battleships, was opened in Sydney (1945) and there is an additional cruiser dock available at Brisbane.

The strength of the Royal Australian Air Force was 1,729 officers and 8,564 airmen as of Dec. 1, 1947.

Currency. The monetary unit is the Australian pound.

AUSTRALIAN TERRITORIES

Papua, or British New Guinea, is the southeastern part of the Island of New Guinea north from Australia. Its area is estimated at 90,540 square miles with an estimated native population of 300,000 (1947).

The British Government annexed the territory (1884) and it was administered until 1906 by the Government of Queensland; it was transferred (1945) to the Provisional Administration of Papua-New Guinea.

The chief exports are copra, gold, rubber and desiccated coconut.

Territory of New Guinea, formerly German New Guinea, occupies the northeast quarter of the island. It was a League of Nations mandate to Australia, and now is under U. N. Trusteeship. It includes the **Bismarck Archipelago,** 19,200 square miles, and the former **German Solomon Islands,** 4,100 square miles. The principal islands in the group are **Bougainville,** area 3,800 square miles; **Buka,** 190 square miles, and smaller islands with an area of 30 square miles. The total area of the mandated territory is about 93,000 square miles, with a native population estimated roughly at 1,000,000, including outlying areas where no count has been made. The non-indigenous population (estimated June 1947) was approximately 7,000.

Norfolk Island was taken over by the Government of the Commonwealth of Australia (1914). It has an area of 13.5 square miles and a population of 800. The soil is very fertile and is suitable for the cultivation of citrus fruits, bananas and coffee.

Nauru Island, formerly German, was mandated by the League of Nations to the British Empire. The Trusteeship Committee of the United Nations General Assembly voted to place Nauru under its jurisdiction as a trust territory (Oct. 22, 1947), administered by Australia, New Zealand and Great Britain. Its area is about eight square miles; its population is 2,700. It has valuable phosphate deposits.

Territory of Ashmore and Cartier Islands came under the authority of the Commonwealth of Australia (May, 1934).

Australian Antarctic Territory came under the authority of the Commonwealth of Australia in 1933.

New Zealand

(DOMINION OF NEW ZEALAND)

Capital, Wellington—Area, 103,935 square miles—Population (estimated 1948), 1,841,424.

Descriptive. The main islands of New Zealand, a self-governing British Dominion of the South Pacific Ocean, lie between the parallels of 34° and 48° and the meridians of 166° and 179° east longitude, about 1,200 miles to the eastward of Australia. Including the remote islands in the north and the Ross Dependency in the far south, the reach of New Zealand is from the tropics to Antarctica.

New Zealand comprises **North Island,** 44,281 square miles; **South Island,** 58,093 square miles; **Stewart Island,** 670 square miles; **Chatham Islands,** 372 square miles. Both the North and South Islands slightly exceed 500 miles in length. Cook Strait, separating the two islands, is only 16 miles in width at its narrowest part.

Additional islands within the geographical boundaries of New Zealand are **Campbell Island, Solander Island,** the **Three Kings, Auckland, Antipodes, Bounty,** and **Snares Islands** (a total area of 307 square miles). Islands annexed to New Zealand are the **Cook Islands, Kermadec Islands, Niue Island,** and certain other small islands in the Pacific (a total area of 212 square miles), so that the actual New Zealand aggregate is 103,935 square miles.

New Zealand has a remarkable diversity of landscape—plains, downs and broad valleys, extensive tracts of hills and mountains, numerous rivers and many lakes. The Sutherland Waterfalls, with a drop of 1,900 ft., is one of the tallest and most beautiful in the world. The climate ranges from the sub-tropical in the north to the mildly temperate in the south. The country has one of the lowest death rates, and the lowest infant mortality rate, in the world.

The central plateau of the North Island possesses thermal attractions renowned for their scenic and healing properties, while the surrounding streams and lakes provide trout fishing of world fame. Off the northern peninsula rod and reel sea fishing has resulted in several world records.

The South Island of New Zealand presents scenery of a totally different nature from that of the North. The great range of the Southern Alps (highest point, Mt. Cook, 12,349 ft.) stretches from end to end of the Island. On the eastern side rich river-formed plains stretch toward the sea, while on the western side towering mountain slopes crowd in upon the coastline, their glaciers and snow-fields being easily accessible from the densely forested foothills.

Resources and Industries. New Zealand is primarily a farming country. For decades the sheep held supremacy in value of exports (wool, meat, tallow, pelts, etc.) by a large margin, but during recent years dairy products, butter and cheese have taken first place on occasions. Two-thirds of the surface of the country is suitable for farming.

History and Government. New Zealand was discovered (1642) by Abel Janszoon Tasman, a Dutch navigator, and its coasts were explored by Capt. James Cook (1769-1770). British sovereignty was proclaimed (1840) with organized settlement commencing in the same year. Representative institutions were granted (1853) and (1907) the Colony became a Dominion.

The Maoris (the native race) are Polynesians of high intelligence, their forebears having migrated from the Eastern Pacific several centuries ago. Their number (estimated 1948) is 111,627.

The Government of New Zealand consists of a Governor-General, representing the King of Great Britain and the British Dominions, and a General Assembly consisting of a Legislative Council and a House of Representatives. The Governor-General is Lieut. Gen. Sir Bernard C. Freyberg (appointed Sept. 5, 1945). Membership of the Legislative Council is achieved by nomination for a seven-year term, and of the House of Representatives by election on a universal franchise for a three-year term. The Prime Minister is Peter Fraser.

In the Parliamentary elections (Nov. 1946) the Labor party won 42 seats, the Nationalists 38.

A general social insurance law, modifying and extending the former pension laws, became effective (April, 1939). The act provided for superannua-

tion and old age and invalidity benefits, widows' and orphans' benefits, family allowances, sickness and accident benefits, unemployment benefits, and a national health service. All persons 16 years of age and more are required to pay a charge on salaries, wages and other income. The Government and New Zealand Corporations also contribute to the general operating fund. A national free medicine plan went into effect (May, 1941).

Education and Religion. Education is free, and compulsory between the ages of seven and 15. The University of New Zealand consists of universities in Dunedin, Christchurch, Wellington and Auckland. Church of England is the dominant faith.

Defense. There are regular forces representing Army, Navy and Air Force, and a Naval Volunteer Reserve, Territorial Army and Air Force. Expansion of the reserve forces is contemplated (1948).

Currency: Monetary unit is New Zealand pound.

Western Samoa was German Samoa, which included **Savaii** and **Upolu**, the two largest of the Samoan Islands in the western Pacific, and was occupied by the New Zealand forces (Aug. 29, 1914). This territory was assigned as a mandate from the League of Nations to New Zealand (1920), but now is administered by New Zealand under United Nations Trusteeship.

Savaii is 48 miles by 25 miles and has an area of about 703 square miles. Upolu has an area of about 430 square miles. Both are mountainous, fertile and well watered. The population of the two (Sept. 30, 1948) aggregated 74,451. The chief exports are copra, bananas and cocoa.

The Union or Tokelau Islands, formerly part of the Gilbert and Ellice Islands Colony, were transferred to the jurisdiction of New Zealand (1926), and became a part of New Zealand Jan. 1, 1949. The area of the three clusters of islets is four square miles, and population (1947), 1,416.

British Oceania

Fiji Islands are from 200 to 250 in number, with an area of 7,083 square miles, and a population (estimated 1948), of 270,000, including more than 5,000 Europeans. They are situated in the South Pacific Ocean, due east of northern Australia.

The larger islands are mountainous, reaching altitudes of 4,000 ft. The highest peak, Mt. Victoria, is 4,341 ft. The southern islands contain dense forests with many valuable woods. The inlands are very fertile and well watered. The climate is for the tropics comparatively cool; the temperature seldom rising above 90°, or falling below 60°, and the rainfall is abundant.

The islands form a British Crown Colony. The capital is Suva.

Bananas, coconuts, sugar cane, gold and tobacco are the principal products.

Tonga Islands, or **Friendly Islands,** form a Protectorate, with an area of 250 square miles, and a population (1948) 45,000. The native Queen is Salote Tupou.

The British Solomon Islands, a Protectorate, number 10 large islands and four groups of small islands with a total area of 12,400 square miles and a population (1948) of 95,000. The chief islands in the group are **Guadalcanal, Malaita, San Cristobal, New Georgia, Ysabel, Choiseul, Shortland, Mono** or **Treasury, Vella Lavella, Ganongga, Gizo, Rendova, Russell, Florida** and **Rennell.** Among the groups of islands are the **Lord Howe, Santa Cruz, Tucopia** and **Mitre** and the **Duff** or **Wilson.**

Exports: copra, ivory, nuts, and trochus shell.

Gilbert and Ellice Islands Colony. The group islands in the Colony was proclaimed a Protect ate (1892) and, at the request of the native Gove ments, was annexed (Nov. 10, 1915) as the Gilb and Ellice Islands Colony. The Colony includes **Ellice Islands, Fanning, Washington** and **Oc Islands, Christmas Islands** (annexed by Great B ain, 1888, and included in the Colony, Nov. 19 which is the largest atoll in the Pacific, the **Ph nix Group** and the **Gilbert Islands.** The total a is 375 square miles and the population (19 36,000. Exports: chiefly copra and phosphates.

Pitcairn Island is situated in the Pacific, eq distant from America and Australia. The Isla was discovered (1767) by Carteret but was not habited until 23 years later when the mutineers the Bounty landed there. Their existence beca known (1808) when ships visited the islands gave assistance to the mutineers and their Otahe women. The population became too large for resources of the Island and the mutineers and th women, 192 in all, moved (1856) to Norfolk Isla Forty returned later to Pitcairn and the popu tion increased (1879) to 90. The area is square miles and population (1944) 200. It i British Colony by settlement and was brou (1898) within the jurisdiction of the High Co missioner of the Western Pacific. The islands **Henderson, Ducie** and **Oeno** (annexed 1902) are the Pitcairn group.

New Hebrides, a Condominium jointly admir tered by Great Britain and France, is a group 11 main islands lying 250 miles northeast of N Caledonia and 500 miles west of Fiji, with aggregate area of approximately 5,700 square mi Population: native, 50,000 (estimated); wh (1946): British, 183; French, 758. Chief produ are copra, cotton, cacao and coffee.

Banks (309 square miles) and **Torres** (40 squ miles) Islands are attached to the New Hebrides.

British S. A. Possessions

GUIANA

British Guiana is on the north shore of So America, with Venezuela on the west, Dutch Guia on the east, and Brazil on the south. It is a Cro Colony administered by a governor and a sm partially elected legislative body. The area is 83, square miles; the population (estimated 19 390,000. Georgetown is the capital.

There are many beautiful waterfalls in Brit Guiana, including Kaietur, generally conceded be the tallest in the world with a drop of 2,000

Much of British Guiana is jungle land, but th are extensive deposits of gold, diamonds, m ganese, mica and bauxite. Timber is also an portant export, besides sugar, rice, rum, molas balata; charcoal and copra.

A site on the Demarara River, 25 miles from sea, was leased (1940) to the United States fo defense base.

The **Falkland Islands** lie 300 miles east of Strait of Magellan at the southern end of So America. Their main value is in their strat location, although there are large sheep farms whaling interests.

There are more than 100 islands in the gro The area is 4,618 square miles, the popula (estimated 1948) is 2,250. Wool is exported.

Although Great Britain has held possession the Islands since 1834. Argentina and Chile re (1949) to renounce claims of ownership.

South Georgia is a whaling station. Its are 1,450 square miles. The population (estim 1946) consists of 700. Whale produce is principal export.

Canada

(DOMINION OF CANADA)

Capital, Ottawa—Area, 3,843,144 square miles—Population (estimated 1949), 13,209,707. (Figu include Newfoundland and Labrador.)

Descriptive. The boundaries of Canada are: On the east, Baffin Bay, the Gulf of St. Lawrence and the Atlantic: on the south, the Atlantic, Maine, New Hampshire, Vermont, New York, the St. Lawrence and the Great Lakes, Minnesota, North Dakota, Montana, Idaho, Washington and the Juan de Fuca Strait; and on the west, Alaska and the Pacific Ocean. Canada includes all the Arctic islands in an area beginning half-way between Greenland and Baffin and extending westward to 141° longitude, which coincides approximately with the Alaskan border. The sea coast of Canada, one of the longest of any country in the world, comprises 14,820 miles of mainland and 34,650 miles of islands. The 4,000-mile boundary between Canada and the United States has been unfortified for more than one hundred years.

The country has an extremely varied topography —mountains in the West, then foothills and prairies, the barrens north of Lake Superior, the open lands of Ontario, the rocky Laurentian district in Quebec, with the fertile Eastern Township the south of it, and then plains sloping down to level in the East; the mountains of New Engl extend north into Canada, where they attain practically the same height as in the United Sta

to that of the northern States. The mean annual temperature is 49° at Victoria; 35° at Winnipeg; 45° at Toronto; 41° at Fredericton; and 44° Fahrenheit at Halifax. These figures show only slight variations from West to East, but the extremes are much greater in the prairie and eastern provinces than in British Columbia.

Canada As Vacation-land

Ontario's attractions include its great variety of developed summer resorts, its extensive fishing and hunting areas and its multitude of lakes and rivers. Quebec has its old-world atmosphere, its historical traditions and its diversified scenery. Nova Scotia and New Brunswick offer moose hunting and salmon fishing, sailing and surf bathing. In the Bay of Chaleur, which New Brunswick shares with Quebec's famous Gaspe Peninsula, the tourist finds the warmest sea water north of New York.

Western Alberta and Eastern British Columbia have the Rockies, which means mountain climbing, canoe and pack trail trips and matchless scenery. The Yukon has the midnight sun and unexcelled sport for the hunter of big game and game fish. The Northwest Territories have become popular among Americans.

Among Canada's greatest tourist attractions are her national parks, consisting of approximately 29,170 square miles of outstanding scenic beauty. They conserve wild life under natural conditions, preserve in its primitive state the grandeur of scenic regions and commemorate persons and events of especial importance in the nation's history. They may be divided into three groups: the scenic and recreational parks of the Rockies, Selkirks and prairies and Eastern Canada; the animal parks and reserves; and the national historic parks.

The first group includes Banff, Jasper and Waterton Lakes Parks in Alberta; Kootenay, Yoho, Glacier and Mount Revelstoke Parks in British Columbia; Prince Albert Park in Saskatchewan; and Riding Mountain Park in Manitoba. In Ontario there are three smaller recreational parks, Point Pelee, Georgian Bay Islands and the St. Lawrence Islands Park. In the Maritime Provinces two remarkable areas have been established as national parks—Cape Breton Highlands Park in Nova Scotia and the shore-line park of Prince Edward Island.

The wild animal parks include Elk Island Park in Alberta, noted for its large herd of buffalo, and Wood Buffalo Park, between Alberta and the Northwest Territories, which is a sanctuary for buffalo and other species of wildlife. Fort Anne Park in Nova Scotia and Fort Beausejour in New Brunswick are the outstanding historic parks.

In Historic Acadia

In Nova Scotia is the Evangeline country, the land of Acadian memories. Here are found the

Five distinct white races are represented in Nova Scotia: English, Scottish, French-Canadian, Irish and Hanoverian, all holding to many traits of their forefathers. The Acadians, first white settlers, from Normandy and Brittany, cling to their own customs and traditions. The Hanoverians settled largely in Lunenburg and today their descendants, skilled sailors and fishermen, possess one of the finest fishing fleets in the world. The Highland Scots settled in Cape Breton Island, Pictou and Antigonish counties, and their descendants reserve the kilt and plaid for ceremonial occasions and cherish the Gaelic language of their forebears.

Ancient Quebec, only walled city in North America, sitting in a gigantic amphitheater of hills, former capital of the Dominion, is one of the oldest cities in America (founded in 1608), with elongated, crooked streets, turreted battlements, casemented windows and other medieval aspects. Some points of interest to the tourist are: the Fortifications, comprising the Citadel, on a promontory 350 ft. high; the Enclosing Wall, two miles long; the three City Gates, part of the city's old defense system; the Battlefields Park, site of the Battle of the Plains of Abraham (1759); Wolfe's Cove, with its goat-path up the cliff, scaled by British soldiers for the Battle of the Plains; Dufferin Terrace, world-famed boardwalk overlooking the St. Lawrence; Montmorency Park, location of Canada's first House of Parliament; the Ramparts, with their ancient cannon; Avenue des Braves, Ste. Foy Park, where the last clash between the British and the French occurred; Notre Dame des Victoires Church, built in 1688.

Two miles outside of the village of Beaupre, on Highway 15, stands the shrine of Ste. Anne de Beaupre, founded 1650 by storm-wearied Breton sailors and today one of the most famous places in the world. It is the home of countless miracles and is annually visited by thousands of pilgrims. A chapel erected by the sailors to Ste. Anne in thanksgiving for their deliverance is still carefully preserved.

Population Figures

The population of the chief Canadian cities, 1941 census, follows:

Montreal	903,007	Calgary	88,904
Toronto	667,457	London	78,264
Vancouver	275,353	Halifax	70,488
Winnipeg	221,960	Verdun	67,349
Hamilton	166,337	Regina	58,245
Ottawa	154,951	Saint John	51,741
Quebec	150,757	Victoria	44,068
Windsor	105,311	Saskatoon	43,027
Edmonton	93,817	Three Rivers	42,007

The population of Greater Montreal was 1,139,-921; Greater Toronto, 900,491; Greater Vancouver, 351,491, and Greater Winnipeg, 290,540, all based on the 1941 census.

The total urban population of Canada, based

on the 1941 census, was 6,252,416 compared with 5,572,058, based on the 1931 census.

Births, deaths and marriages are compiled on a uniform system by the Dominion Bureau of Statistics although the registration continues under provincial control. In 1947 there were in the nine provinces 359,094 live births with a rate of 28.6 per 1,000 population. There were for the same year 127,311 marriages at the rate of 10.1 for each 1,000 of population. Deaths were 117,725 for the same year at the rate of 9.4 for each 1,000 of population.

Quebec was the leader in births with 115,553, with a rate of 31.1 for each 1,000 population. In marriages Ontario held the lead with a rate of 10.5 for each 1,000 population. Ontario had the most deaths, 41,619, a rate of 9.9 for each 1,000 population.

Of the population (1941) there were 5,900,536 males and 5,606,119 females; population per square mile 3.32. Of the males, 3,322,827 were single, 2,363,528 were married, 170,743 were widowed, 6,569 were divorced, 36,201 were separated and 668 were not given. Of the females, 2,907,741 were single, 2,292,478 were married, 354,378 were widowed, 7,463 were divorced, 43,936 were separated and 123 were not given.

In 1947 there were 8,199 divorces in Canada, a rate of 65.3 per 100,000 population.

Of the total population (1941) of 11,506,655, 5,715,904 were of British and 3,483,038 of French origin. There remain 2,307,713 comprehending the following main classes: German, 464,682; Ukrainian, 305,929; Scandinavians, 244,603; Netherlander, 212,863; Hebrew, 170,241; Polish, 167,485; Indian and Eskimo, 125,521; Italian, 112,625; Russian, 83,708; Hungarian, 54,598; Czechoslovakian, 42,912; Finnish, 41,683; Austrian, 37,715; Chinese, 34,627; Belgian, 29,711.

Resources and Industries. Canada is largely agricultural, although manufacturing industries now dominate the economic life of the nation. The principal crops are wheat, oats, barley, rye, flaxseed, potatoes, roots, tobacco, and corn. Dairy and fruit products are enormous. The wool yield is considerable. Fishing is a huge commercial enterprise, and fresh and canned varieties are an important export. The chief kinds of fish marketed are salmon, lobsters, cod, herring, halibut, white fish, sardines, haddock, pickerel, trout and pilchards. Furs are a prolific source of income and the fox, mink, muskrat, beaver, raccoon, marten, fisher and nutria are raised commercially on large farms. Hydroelectric power is extensive.

The country is rich in minerals, particularly gold, although deposits of copper, lead, nickel, platinum, silver, zinc, coal, natural gas and petroleum are mined. Canada leads the world in production of asbestos and nickel.

The most important manufactures and their gross value (1947 preliminary) were:

Wood and paper products	$1,953,379,226
Vegetable products	1,768,919,287
Iron and its products	1,779,718,604
Animal products	1,267,858,388
Textiles and textile products	1,056,868,520
Non-ferrous metal products	1,041,041,126
Non-metallic mineral products	550,847,000
Chemicals and chemical products	446,015,000
Miscellaneous industries	111,850,338

The St. Lawrence River is navigable to ocean-going vessels for 600 miles, as far as Montreal, which is by virtue of its Great Lakes connections and its proximity to London and Liverpool, one of the greatest grain exporting harbors on the continent. The Port of Montreal has nine miles of deep-draft wharf, capable of accommodating 100 large ocean steamers.

Canada (Jan. 1, 1948) had 2,230,597 telephones in use. There were 17.7 telephones to every 100 persons, the total representing approximately 3.7 percent of the world's telephones (Source: AT&T). The number of licensed radio sets (March 31, 1949) was 2,051,553.

There was completed (1941) a highway from Halifax to Vancouver, a distance of 4,190 miles, at a cost estimated between $75,000,000 and $100,000,000. The highway provides a motorist a means of travel from Halifax to Vancouver without passing through the United States on a road that has no grade in excess of five per cent and no curve in excess of four degrees

Civil aviation continued to increase (1948), total revenue passenger traffic increasing from 802,811 to 836,047 or by 4.1 percent. Revenue miles flown (1948) were 33,186,617. Revenue freight carried increased from 23,656,502 pounds to 31,633,437 or by 33.72 percent.

Figures of capital expenditure for the last twelve years include cost of constructing Government-operated lines, exclusive of the Canadian National Railway. Advances to the Canadian National Railway for operating expenses, interest charges and stock acquired by Dominion Government are included under expenditures for Government Own Enterprises.

Of the 42,322 miles of single track operated the steam railroads of Canada (1947), 16,616 we part of the Canadian Pacific Railway. The oth principal railways are now, in pursuance of t government policy of nationalization, included the Canadian National Railway System, which h a trackage (1947) of 21,543 miles.

The amount of gold produced in Canada (194 from all primary sources totaled 3,495,403 fi ounces valued at $122,339,105, compared wi 3,070,221 valued at $107,457,735 (1947). Virtual all Canada's newly mined bullion is sold to t Dominion Government through the Royal Can dian Mint in Ottawa or the Assay Office in Va couver.

History and Government. Canada is an indepen ent and sovereign member of the British Commo wealth of Nations. Like the United States it is federation with provincial governments similar the whole to the State governments of the Unit States, and with Ottawa corresponding to Was ington, D. C., as the chief legislative, executive a judicial seat of the country. The members of t Senate are nominated for life by summons of t Governor-General. The House of Commons elected directly by the people for terms of fi years, but the House may be dissolved before term has expired.

An increase in membership of the House Commons by a general redistribution raised it 255 during the 1947 session. Due to the admissi of Newfoundland to the Confederation of Canad membership of Commons was increased to 2 members after the general election of June 2 1949. Newfoundland will be entitled to send seve members in all to Ottawa.

The party membership of the House of Commo (elected June 27, 1949) follows: Liberals, 192; Pr gressive Conservatives, 42; Cooperative Commo wealth Federation, 12; Social Credit, 10; Ind pendents, 5; Independent Laborites, 1. Total, 26

The Communist party and the National Uni (Fascist) party were outlawed with 14 other orga izations (June 5, 1940) under the Defense Canada regulations.

The Governor General is Field Marshal Viscou Alexander of Tunis (born Dec. 10, 1891). He w appointed (Aug. 1, 1945) and sworn in (April 1946).

DOMINION CABINET

The Dominion Cabinet, as of April 1, 194 follows:

Prime Minister and President of the Privy Cou cil—Louis Stephen St. Laurent.
Minister of Trade and Commerce—Clarence D catur Howe.
Minister of Agriculture—James Garfield Gar iner.
Minister without Portfolio—James Angus Ma Kinnon.
Minister of Mines and Resources—Colin Willi George Gibson.
Minister of Labor—Humphrey Mitchell.
Minister of Public Works—Alphonse Fournier.
Postmaster General—Ernest Bertrand.
Minister of National Defense—Brooke Claxton.
Solicitor General—Joseph Arthur Jean.
Minister of Transport—Lionel Chevrier.
Minister of National Health and Welfare—P Joseph James Martin.
Minister of Finance—Douglas Charles Abbott.
Minister of National Revenue—James Jose McCann.
Member of the Administration and Minister wi out Portfolio—Wishart McLea Robertson.
Minister of Veterans Affairs—Milton Fow Gregg.
Minister of Fisheries—Robert Wellington Mi hew.
Secretary of State for External Affairs—Les Bowles Pearson.
Minister of Justice and Attorney General—Stu Sinclair Garson.
Minister of Reconstruction and Supply—Rob Henry Winters.
Secretary of State—F. Gordon Bradley.

The British High Commissioner to Canada Hon. Sir Alexander Clutterbuck.

Newfoundland chose by a national referend held (July 22, 1948) confederation with Canada a vote of 78,408, against a vote of 71,464 for fut self-government. Accordingly, Newfoundland gether with Labrador, its dependency, became 10th province of Canada on March 31, 1949.

Family Allowances Act and Social Security—T Family Allowances Act (1944) was introduced a basic social security measure designed to assist providing equal opportunity for all Canadian c dren. Allowances are payable in respect of ev child in Canada below the age of 16 years, was born in Canada, or has been a resident one year, or who has one parent who was do

ciled in Canada for three years immediately prior to birth of the child. The allowances, ranging from $5 to $8 monthly, are paid to mothers who must use them exclusively for the care, education and advancement of the child. On March 31, 1949, 1,729,150 families were receiving family allowances and the amount paid during the fiscal year ended March 31, 1949, was $271,270,066.

A national system of unemployment insurance was established in 1940. Both employers and employees contribute to the fund, the total paid by each group being approximately equal. The Dominion Government contributes an amount equal to one-fifth of the combined employer-employee contributions, and also assumes the cost of administration. Employers' and employees' contributions (up to Dec. 31, 1948) amounted to $513,067,763, and the Dominion added $102,603,224. From Jan. 27, 1942, to Dec. 31, 1948, benefits payments amounting to $142,377,695 were paid out.

Old Age Pensions were established in 1927 and Pensions for the Blind in 1937. Since amendments to the Act (1947), maximum pension is $360 per year, with Federal Government paying 75 percent of cost. Provinces are free to pay more as supplemental allowance. Age requirement is 70 years for the aged and 21 years for the blind. Blind pensioners are allowed higher maximum income than old age pensioners.

Education and Religion. Enrollment in all educational institutions in Canada (which include four types—provincially controlled schools, private schools, universities and colleges, and Dominion Indian schools) was 2,513,528 in the 1946 school year. The census (1941) gave the religious population as follows:

Roman Catholics	4,800,895
United Church	2,204,875
Anglicans	1,751,188
Presbyterians	829,147
Baptists	483,592
Lutherans	401,153
Greek Catholics	185,657
Jews	168,367
Greek Orthodox	139,629
Others, and religion not stated	542,152
Total	**11,506,655**

DEPARTMENT OF NATIONAL DEFENSE

The Department of National Defense was consolidated under a single Minister (Nov., 1946) and the work of the Navy, Army and Air Force is coordinated at all possible levels.

Army—The Canadian Army includes all the ground forces of Canada and provides for six component parts as follows:—

(a) The Active Force is made up of full time, professional soldiers.

(b) The Reserve Force serves on a part-time basis and is subject to annual military training.

(c) The Supplementary Reserve is comprised of units and individuals required in the event of mobilization to complete the organization of the army.

(d) The Canadian Officers Training Corps is responsible for training officer candidates during peace and war; the personnel are subject to the same obligations in respect of military service as apply to other parts of the Army.

(e) The Cadet Services of Canada consist of commissioned officers of the Canadian Army, serving on a basis comparable to officers of the Reserve Force who are provided for the purpose of administering and training the authorized Cadet Corps of the Royal Canadian Army Cadets across Canada.

(f) The Reserve Militia includes units for home security duties.

Additional to but not an integral part of the Canadian Army as educational and training establishments are:—

(a) Officially organized Cadet Corps,

(b) Officially authorized rifle associations and clubs,

(c) Such training centers as may be authorized from time to time,

(d) Royal Military College.

Service in the Canadian Army is on a voluntary basis.

The strength of the Canadian Army in World War II at wartime peak was 481,500, while at March 31, 1949 enlistments numbered 18,970.

Royal Canadian Air Force. The Royal Canadian Air Force was rapidly demobilized after the Second World War. The strength of the Force at peak was 215,200 while (at Dec. 31, 1947), the personnel was reduced to 11,569.

In October, 1947, the R.C.A.F. ceased to be on active service. The peacetime Royal Canadian Air Force is organized in three components, Regular, Auxiliary and Reserve. Regular force strength at March 31, 1949 was 14,552.

The total appointments and enlistments in the Royal Canadian Air Force (including the Women's Division) numbered 251,482 in the Second World War. The total war casualties were 17,026 fatal and 1,402 non-fatal.

Navy—The Royal Canadian Navy was established (1910). In the past it has comprised the Royal Canadian Navy (permanent force), the Royal Canadian Naval Reserve and the Royal Canadian Naval Volunteer Reserve. The Royal Canadian Navy (Reserve) has now replaced the separate Reserve forces.

While a great reduction has been made with the return of peace, the new fleet is many times more powerful than any peacetime navy Canada had previously possessed. The largest units of the post-war Royal Canadian Navy are the light fleet aircraft carrier "Magnificent" of 18,000 tons, two 8,000 ton cruisers, seven Tribal class destroyers and four light destroyers. Six frigates and nine Algerine type minesweepers are also maintained.

Strength of the Royal Canadian Navy permanent force as of Feb. 28, 1949, was 7,981.

Recruits, on enlistment, sign a five-year agreement, with succeeding periods of the same length where a man wishes to continue to the point where he is pensionable (25 years' service).

Royal Canadian Mounted Police

The **Royal Canadian Mounted Police** is a Civil Force maintained by the Dominion Government. It was organized (1873) as the North West Mounted Police. Its name was changed (1904) to Royal North West Mounted Police and (1920) to Royal Canadian Mounted Police. It has the responsibility for enforcing Dominion laws throughout Canada, and is specially powered to deal with infractions against smuggling by sea, land and air; it enforces provisions of the Excise Act and is responsible for the suppression of traffic in narcotic drugs. The Force has responsibility in almost 50 Dominion Acts including the Indian Act, the Ticket-of-Leave Act and the Migratory Birds Convention Act. It assists the Mines and Resources, Fisheries and numerous other Dominion Departments in administrative duties, and is responsible for the protection of government buildings and dock-yards and is the sole police force in Yukon and the Northwest Territories. It undertakes secret and security services for the Dominion Government. In addition to its Dominion duties, the Force has agreements with the Provinces of Alberta, Saskatchewan, Manitoba, New Brunswick, Nova Scotia and Prince Edward Island, whereby the services of the Police can be secured to enforce provincial laws and the Criminal Code in rural districts upon payment for such services. From a total of 300 (1873) the Force has grown to a strength of approximately 3,400 in 1949. Its means of transport consist of 192 horses, 754 motor vehicles, 6 aeroplanes, 264 sleigh dogs and 7 trained police dogs (for tracking). Its Marine Section at present consists of 219 officers and men and 19 vessels of various sizes. The R.C.M. Police Aviation Section has a personnel of 17.

The Force is divided into 14 Divisions, including the Marine Section, distributed over the entire country. The term of engagement for recruits is five years and the minimum age for a third-class constable is 21 years.

Recruits are trained at Regina, Sask., and Rockcliffe, Ont. Police Colleges are also maintained at these centers, where courses of training and instruction are given to keep the Force abreast of the latest developments in criminology.

Currency. The monetary unit of Canada is the dollar. As from Sept. 16, 1939, to July 6, 1946, buying and selling rates for the U. S. dollar, as set by the Foreign Exchange Control Board, were $1.10-$1.11, respectively. Subsequently, the corresponding rates have been $1.000-$1.005.

The Bank of Canada was incorporated as a central bank by Act of Parliament (1934). Its capital stock then fixed at $500,000 was increased (June 18, 1936) to $10,000,000 of which $100,000 Class B shares were issued to the Dominion of Canada at par. The rest (Class A shares of $50 each) were sold to the public and the maximum holding permitted to one person is 50 shares. Directors, officers or employees of the chartered banks may not hold shares of the Bank. Shares may be held only by British subjects ordinarily resident in Canada, or by corporations controlled by such persons. The Bank became (Aug. 15, 1938) a wholly government-owned institution, the capital being reduced to $5,000,000.

The statement of March 31, 1949, showed assets and liabilities of $2,052,042,063.

NEWFOUNDLAND AND LABRADOR

Newfoundland, the oldest English colony and a former Dominion, is a triangular-shaped island in the Atlantic Ocean at the eastern end of British America, separated from Canada proper by the Strait of Belle Isle, the Gulf of St. Lawrence and the Cabot Strait. The coast is rugged, especially on the southwest, where the coast range reaches an elevation of nearly 2,000 feet. It has an area of

42,734 square miles and a population (1945 census) of 321,177. The capital is St. John's.

Labrador, confirmed as a dependency of Newfoundland by a decision of the Privy Council in 1927, lies northeast of the Province of Quebec and forms the most easterly point of the North American continent. Its area is approximately 110,000 square miles, extending from Blanc Sablon at the southwest entrance of the Strait of Belle Isle to Cape Chidley at the eastern entrance of Hudson's Strait. The population (estimated 1946) is 5,530. Labrador's capital is Battle Harbour.

The chief industry of Newfoundland and Labrador is the valuable herring, trout and salmon fisheries, which accounted for exports of $29,022,000 in the year ending March 31, 1948. Other important industries are the production of newsprint, iron ore, lead, zinc, copper concentrates, fluorspar and limestone. Asbestos and coal are found in the Bay St. George region. At least 24 rich iron-ore deposits have been discovered in the Grand River area of Labrador.

Newfoundland's external trade has been mainly with the United States, Canada and the United Kingdom. Total exports from Newfoundland in 1948 were valued at $80,468,000; total imports, $105,055,000.

Newfoundland was discovered by John Cabot, June 24, 1497, and formally claimed for England by Sir Humphrey Gilbert in August, 1583. The colony was acknowledged to be British by the Treaty of Utrecht (1713), but the French held exclusive fishing rights on the north and west coasts from 1713 to 1904.

Although Newfoundland had enjoyed the status of a dominion since World War I, a Royal Commission of Inquiry, investigating the Dominion's poor financial state in 1933, recommended that Dominion rights be relinquished until it again became self-supporting. The commission's recommendations were approved Dec. 2, 1933 by the Newfoundland Parliament. Parliament was suspended during the emergency and full legislative and executive power was vested in the governor and a commission of six members appointed by the United Kingdom, which took office Feb. 16, 1934.

In a national referendum held July 22, 1948, to decide between future self-government and confederation with Canada, the voters chose confederation by a vote of 78,408 to 71,464.

The Commission Government held office until March 31, 1949, when Newfoundland became the tenth Province of Canada on terms accepted by Canada and confirmed by an act of the United Kingdom Parliament.

Members of the Newfoundland Ministry in office as of April 5, 1949, were:

Prime Minister and Minister of Development—Joseph R. Smallwood.
Minister of Health—H. W. Quinton.
Minister of Finance—Gordon A. Winter.
Minister of Justice—Leslie R. Curtis.
Minister of Social Welfare—Herbert L. Pottle, M.D.
Minister of Labor—Charles H. Ballam.
Minister of Education—S. J. Hefferton.
Minister of Home Affairs—Philip Forsey.
Minister of Public Works—Michael J. Sinnott.
Minister of National Resources—W. H. Keough.

One of the world's most important airports is Gander, operated by the government for trans-Atlantic airplanes flying the North Atlantic route. The airport has an area of one square mile and 10,000,000 square feet of paved runways. Gander has a normal population of 3,000.

There were 520 Post Offices in Newfoundland in 1948 of which 155 were telegraph offices. Total telegrah and telephone line mileage in 1948 was 6,405. There are 705 miles of railway and 2,040 miles of road suitable for motor vehicles.

The monetary unit is the Newfoundland dollar, with a value equal to the Canadian dollar.

British West Indies and Other Possessions

JAMAICA

Jamaica is situated in the Caribbean Sea, 90 miles south of Cuba, and is the largest and most valuable of the British West Indies. It has an area of 4,411 square miles and population (estimated, 1948) 1,340,000 (about 15,000 whites). Attached to Jamaica for administrative purposes are the **Turks and Caicos Islands** (population, 6,500; area, 169 square miles), and **Cayman Island** (population, 7,000; area, 104 square miles). The capital is Kingston. The Governor is Sir John Huggins (appointed July 6, 1943).

The climate, ranging from 80 to 84 on the coast to 40 degrees in the mountains has attractions for winter tourists. It is estimated 65 to 75 per cent of the peace-time tourists are American. The island figures largely in the history of the Buccaneers of the West Indies before and during the time of Sir Henry Morgan, once its Governor. The old haunt the pirate, Port Royal, at the entrance of t harbor, was destroyed and sunk (1692) under t sea by an earthquake.

The principal products are sugar-cane, coff bananas, rum, coconuts, ginger, cocoa, pimen citrus fruits and cigars.

A site on Portland Bight was leased (1940) to t United States for a naval base.

Barbados is the most eastern of the Windwa Islands, in the West Indies, lying out in the Atlan at 13° north latitude. Its area is 166 square mil the population (estimated 1948), 198,000. Brid town is the capital.

The chief products are sugar and cotton. M lasses and rum are manufactured. Imports heaviest from United States and exports heavi to Canada.

Trinidad, with an area of 1,864 square miles a a population (estimated 1947), 558,610, is the m southerly of the West Indies. It lies off the nor coast of South America. Attached to it for a ministrative purposes is the island of **Tobago**, t population and area of which are 27,208 and square miles respectively. The capital is Port Spain. Import trade is heaviest with Canada, e port trade with Britain. Products are mos asphalt, oil, with derivatives therefrom. T great asphalt lake, 114 acres in extent, on t island is immensely valuable and seems ine haustible.

Sites on the island were leased to the Unit States (1940) for a naval base.

The Governor is Sir John Shaw (appointed No 3, 1946).

The **Bahama Islands** comprise nearly 700 islan and over 2,000 cays and rocks, part of the uninhabited, and are in the Atlantic Ocean, off t coast of America. Nassau, on the Island of N Providence, near the Florida coast, is an attracti winter resort for Americans. The land area of t group is 4,404 square miles; the population (es mated 1948), 75,000. Nassau is the capital.

A site on the island of Mayaguana was leas (1940) to the United States for use as a naval ba

Sponges, crawfish, salt, tomatoes, shell, sis strawwork, hardwoods and lumber are the ch sources of revenue. Fruit growing is being d veloped. Trade is heaviest with the United Stat

The Governor General is Sir William L. Murph

The **Windward Islands** lie at the eastern side the Caribbean Sea, between Trinidad and Ma tinique. They are **Grenada** and the **Grenadin Dominica, St. Vincent** and **St. Lucia.** Each has own local Government. The total area is 810 squa miles (Grenada, 133; St. Vincent, 150; St. Luc 233; Dominica, 305). The population (estimat 1948) is 256,000. St. George's on Grenada Island the capital.

The chief products are arrowroot, cotton, cop sugar, molasses, rum, cocoa, peanuts, cassa limes, fruit, vegetables and spices. Sea Isla cotton grown on St. Vincent is considered the b in the world. St. Vincent also is famous for arrowroot.

Dominica was transferred (Jan. 1, 1940) fr the Leeward to the Windward Islands and sin has been governed as a separate colony.

The **Leeward Islands**, of the West Indies, situat southeast of Puerto Rico, are part of the Less Antilles. They comprise the islands of **Antigu Barbuda, Redonda, St. Christopher (St. Kitt Nevis, Anguilla, Montserrat, Sombrero,** and t **British Virgin Islands.** The area is 412 squa miles, population (census 1946) is 108,850.

The principal products are sugar and molas (Antigua and St. Kitts), cotton (Montserrat, Kitts, Nevis and Virgin Islands), limes and frui tomatoes and onions (Montserrat), cocoan (Nevis), tobacco and cigars (Virgin Islands), a salt (Anguilla and St. Kitts).

BERMUDA

Bermuda is a group of 360 small islands of co formation, about 20 inhabited, in the Atlan Ocean, 677 miles southeast of New York and miles east of North Carolina. It was settl (1609) by a party of colonists under Sir Geor Somers, who were headed for Virginia, but w wrecked on the islands. The area is 21 squa miles; the population (estimated 1948), 36,0 Hamilton is the capital.

A perennial garden, with a dozen winter hot and famous beaches, Bermuda is a favorite win resort for Americans.

The soil is prolific, large quantities of lily bul bananas, onions, potatoes and green vegetab being grown. Fish are plentiful around the coasts

Bermuda is a colony with representative gover ment: its parliament dates from Aug. 1, 1620. T assembly of 36 members is elected. There is a an Executive Council of seven members and Legislative Council of nine members, both counc appointed by the Crown. The governor is Admi Sir Ralph Leatham (appointed 1946).

The right to vote in parliamentary elections and he right to hold public office was granted to vomen (1944) by the Legislative Council.

There are no taxes on real estate, incomes or inheritance. The currency, weights and measures are British.

Once autoless, the island now permits the use f cars. The law (enacted 1946) permits the peration of 10-horsepower private cars and taxis vith a speed limit of 15 miles an hour in the city nd 20 miles in the country areas. The importation f second hand cars is forbidden.

British Honduras is situated in Central America, n the Caribbean Sea, south of Yucatan, and produces chiefly tropical fruits, mahogany, logwood, hicle, and cedar, much of which comes to the Jnited States.

Its area is 8,867 square miles, and population estimated 1948), 62,000. Belize is the capital.

Afghanistan

Capital, Kabul—Area, 250,000 square miles—Population (estimated 1948), 10,000,000.

Descriptive. Afghanistan occupies a mountainous ountry in Asia between 61° and 75° east longitude nd 29° and 38° 20′ north latitude. Its extreme readth northeast to southwest is about 700 miles, nd from the Herat frontier on the west to the Khyber Pass on the east it is 600 miles. It is ounded on the north by the U.S.S.R., on the east nd south by parts of the Dominions of India and akistan, and on the west by Iran. The elevation is enerally over 4,000 ft. There are three great river asins, the Oxus and the Kabul in the northeast, nd the Helmund, which runs southwest through he middle of the country.

Towering above Kabul are the Hindo-Kush Mountains, 15,000 and 16,000 ft. high and reaching 5,425 ft. 100 or 200 miles to the east. Trade to ndia flows through the famous Khyber Pass from Kabul to Peshawar.

Resources and Industries. It is almost exclusively n agricultural country, producing with the aid of rrigation sizable quantities of fruits, cereals and egetables. The fat-tailed sheep is native to the ountry, furnishing the Afghans their chief meat iet while the fat of its immense tail is a substitute or butter. The casteroil plant, madder, and the safoetida plant abound. Wool and skins are the nain articles of export, together with fruits, nuts nd ghi. The imports are cotton, textiles, metals nd hardware, leather goods, tea and sugar. Copper, lead and iron are found in the country.

There are no railroads in the country. Merhandise is transported on camel or pony back long the seven important trade routes. The hief trade route is through Khyber Pass. There s a university in Kabul (established 1932).

History and Government. Afghanistan has been alled "the land of rocks and stones and sanguinary euds." Its people are nearly all Mohammedans. The Durani have been the dominant race for 200 ears, the Tajiks, aborigines, being cultivators and raders. Along the frontier are warlike and indeendent tribes of Pathans. The languages spoken re Pushtu, Turki and Persian. The predominant eligion is Islam.

The government is a constitutional monarchy. Legislative power is vested in a Parliament consisting of the King; a Senate of 40 members appointed for life by the King; and a National Assembly of 170 elected members. The reigning King s Mohammed Zahir Shah (born 1914). He married (Nov. 7, 1931) his cousin, Umairah, daughter f Sirdar Ahmed Shah Khan; and ascended the hrone (Nov. 8, 1933) on the assassination of his ather, Mohammed Nadir Shah. King Zahir proclaimed a new constitution (1932) under which lavery and forced labor are forbidden and a Council of State is created. All Afghan men over 20 nay vote.

Defense. Military service is compulsory between he ages of 18 to 40.

Currency. The monetary unit is the silver Afghani.

Albania

(SHQIPERIA)

Capital, Tirana—Area, 10,629 square miles—Population (estimated 1946), 1,120,000.

Descriptive. Albania is a mountainous country, bounded by Yugoslavia on the north and east, Greece on the east and south, and the Adriatic Sea on the west. It is an exclusively agricultural and stock raising state.

Resources and Industries. There are important forest resources and some mineral wealth, both undeveloped because of lack of transport facilities. Chief products of the country are tobacco, timber, wool, hides, furs, cheese, and dairy products, fish, olive oil, corn, cattle and bitumen. The principal peacetime imports are cotton and cotton textiles, sugar, coffee, benzine and petroleum. A one-year plan was inaugurated (1947) to develop farming, light industry, build new roads and power stations and to modernize mines.

There are four seaports, Durazzo being fully equipped. Ten regular air routes serve the country.

History and Government. Racially the Albanians are mainly Ghegs in the north and Tosks in the south. Tosk men wear gold-embroidered jackets and wide sashes over plaited knee-length white skirts almost as full as a ballet dancer's.

Albania, after centuries of Turkish domination and of contention between the Balkan neighbors and Italy, declared its independence (Nov. 28, 1912). It fell into a state of anarchy during World War I, but (June 3, 1917) Gen. Ferrero, then in charge of the Italian forces there, proclaimed Albania an independent country and a provisional government was set up. Albania had its independence assured under a treaty with Italy (Aug. 2, 1920).

The country was proclaimed (Dec., 1924) a republic, which continued until 1928 when a constituent assembly amended the constitution to change the government into a monarchy and (Sept. 1, 1928) proclaimed Ahmed Zogu, a Moslem, who had been President (since Sept. 29, 1925) King of the Albanians under the title of Zog and as such reigned until April, 1939.

A treaty (of Tirana) between Italy and Albania, a compact of mutual support and cooperation, was signed (Nov. 27, 1926). It disturbed Europe and especially Yugoslavia. A diplomatic break between the two Balkan countries (June, 1927) was referred to and settled by the League of Nations. A defensive 20-year alliance with Italy was signed (Nov. 22, 1927).

Albania was overrun by Italian and German military forces from 1939 until they were driven out by guerrilla defenders in 1944.

The first free election in the country was held (Dec. 2, 1945) and Enver Hoxha was elected Premier. The Constituent Assembly proclaimed the country a Republic (Jan. 11, 1946).

Education and Religion. There is no state religion and there are few schools. Primary education is nominally compulsory and free under the constitution.

Currency. The monetary unit is the Albanian franc.

Andorra

Capital, Andorra—Area, 191 square miles—Population, 5,231, scattered in six villages.

Andorra is a republic in a valley of the Pyrenees under the suzerainty of France and the Spanish Bishop of Urgel. It has enjoyed undisturbed sovereignty (since 1278) and was granted a constitution as a republic by Napoleon (1806). It pays an annual tribute of 960 francs to France, and 460 pesetas to the Bishop. It is governed by a Council-General of 24 elected members. The judiciary is appointed in equal numbers by the Bishop and the French government.

The inhabitants speak Catalan and are chiefly Roman Catholics. Sheep raising is the principal industry.

Universal suffrage was abolished (1941) and election through the heads of families restored.

The Arab League

The Arab States formed a union by a pact signed in Cairo (March 22, 1945). The League consists of Egypt, Iraq, Transjordan, Saudi-Arabia, Syria, the Lebanon and Yemen. Provision was made for admission of the Arab portion of Palestine. The League lost much of its significance following the defeat of Arab armies by the Israelis in 1948-1949 during the creation of the new Republic of Israel.

Arabia

Area (estimated), 1,000,000 square miles—Population (estimated), 10,000,000.

The Arabians occupy a peninsula in the southwest corner of Asia which is bounded on the north by Iraq and Jordan and enclosed on the other three sides by the sea—the Red Sea on the west, the Arabian Sea on the south and the Persian Gulf and Gulf of Oman on the east. Nearly one-half of Arabia is desert. Rainfall is negligible except in Yemen and Oman, but there are numerous oases or oases-groups scattered throughout the land.

The political, economic and social life of Arabia varies from the unplanned roving of nomadic Bedouins to a simple civic life in towns in the interior like Ansaiza or Buraida and the more highly developed civilization of Mecca, Medina and Jedda. The patriarchal, tribal organization of the Bedouin is gradually giving way to the communal organization of states and principalities.

SAUDI-ARABIA
(Al-Mamlaka Al-'Arabiya As-Sa'udiya)

Descriptive. The kingdom of Saudi-Arabia comprises the former Sultanate of **Nejd** and the kingdom of **Hejaz** and its dependencies. The total area is 350,000 square miles; the estimated population (1948) is 6,500,000.

The Hejaz lies on the southwestern part of Arabia from the Egyptian line to Asir along the Red Sea. Its area is about 150,000 square miles; its population (estimated), 3,500,000. The Nejd now includes about 170,000 square miles of the interior and an estimated population of 3,000,000, almost entirely nomad. The dependencies include El Hasa, Katif, Jabal, Shammar, El Jauf and the greater part of Asir.

There are two capitals—Mecca (population, 120,000) and Riyadh (population, 60,000).

No Christians are permitted to stay in Mecca and foreign diplomats credited to Saudi-Arabia live in the port city of Jedda.

Resources and Industries. The products are dates, wheat, barley, fruit, hides, wool, and Arab clocks, besides camels, horses, donkeys and sheep. Some hides, wool and gum are exported.

The petroleum resources of the country are being developed by the Standard Oil Company of California, which has a concession covering the entire kingdom.

History and Government. The king of Saudi-Arabia is Abdul-Aziz Ibn Abdul-Rahman Al-Feisal Al Sa'ud (born in 1880), proclaimed King of Hejaz and Sultan of Nejd (Jan. 11, 1926). The dual character of the kingdom is provisionally maintained. There are four ministers. The king's eldest son, the Emir Sa'ud acts as Viceroy and commander-in-chief of the armed forces of Nejd. His second son, the Emir Feisal, substitutes in his father's absence as Viceroy of the Hejaz, and also is the Foreign Minister.

The **Kingdom of the Hejaz** was a creation of World War I. Husein Ibn Ali, Grand Sheriff of Mecca, cast off his allegiance to the Sultan and proclaimed himself King of the Hejaz (1916) joining the Allies in the war. The Hejaz was represented at the Peace Conference by Emir Feisal, son of Husein, who became King of Iraq. Husein's second son, Emir Abdullah, became ruler of the Transjordan (now Hashemite Jordan) when the Arab state was set up within the Palestine Mandate.

King Husein had himself proclaimed Caliph of Islam (March, 1924). This did not suit Abdul Aziz es-Saud Ibn Saud, then Sultan of Nejd, war-like leader of the Wahabis, extreme Moslem zealots, who had been extending his rule by force of arms over the Arabian desert. He marched against the Hejaz (1925). Husein abdicated, his son King Ali was driven out and Mecca was captured. Abdul Aziz was proclaimed King of the Hejaz and Sultan of Nejd (Jan. 11, 1926).

The importance of the Hejaz is due to its possession of the holy cities of Islam—Medina, where the Mosque of the Prophet enshrines the tomb of Mahomet, who died in the city (June 7, 632) and Mecca, his birthplace, containing a great mosque sheltering the sacred shrine, the Kaaba, in which is the black stone given by Gabriel to Abraham. As many as 150,000 of the faithful make the pilgrimage annually. Medina is 820 miles from Damascus, and is the terminus of the Hejaz railroad. Mecca, the capital, is 200 miles farther south, and is 55 miles from Jedda, the chief port on the Red Sea.

The United States completed at Dhahran on the Persian Gulf coast (1946) an airfield which was to remain an American airport for three years after which it would revert to Saudi-Arabia, but continue to be operated by American civilian personnel. The field is capable of handling the largest aircraft known.

Asir, a principality on the Red Sea (area about 30,000 sq. mi., population about 750,000) had accepted the suzerainty of Ibn Saud (1926) and was formally taken over (1933) after an abortive uprising.

Defense. Saudi-Arabia's defense force consists of a regular army maintained by levies, now in process of expansion and modernization.

Currency. The English gold sovereign is the basis of currency.

YEMEN

The Imamate of Yemen, an ancient Kingdom, is in the southwest part of the peninsula between Asir and the British protectorate, Aden. Its area is estimated at 75,000 square miles and population at 3,500,000. The capital is Sana, a walled city with eight gates. The chief port is Hodeida. On the plateau of El Jebel, the most fertile part of Arabia, coffee and grain are grown. Hides, charcoal and coffee are exported. The Maria Theresa dollar is the common medium of exchange. The ruler of Yemen is Seif el-Islam Ahmed, who captured Sanaa, from the forces of Sayed Abdullah el Wazir claimant to the throne following the assassination of Ahmed's father, the Imam Yahy (January 1948). Yemen came into the Saudi-Arab orbit (May 13, 1934) following an uprising.

The United States formally established relatio with Yemen (May 11, 1947). The Kingdom w admitted to the United Nations (Sept. 30, 1947).

KUWAIT

The Sultanate of Kuwait, with an area of 1,9 square miles, and population estimated at 100,00 extends along the Persian Gulf from Mesopotam to Nejd. Its capital, Kuwait, is an important po on the Persian Gulf. Horses, wool, dates and pea are exported.

Trade is almost wholly with India, Iraq, Ir and the Arab coast and amounts to 5,000,000 r pees annually.

The American Independent Oil Company won oil concession (1948) in the neutral zone betwe Kuwait and Saudi-Arabia.

The ruler is Sheikh Sir Ahmed al Jabir al-Sub (born 1885).

MUSCAT AND OMAN

The Sultanate of Muscat and Oman occupies th southeast portion of the Arabian peninsula with coast line about 1,000 miles long, extending from Katar on the Persian Gulf to Ras Sajir on t Arabian Sea. It has an estimated area of 82,0 square miles and a population estimated at 500,00 chiefly Arabs except for the towns of Muscat a Matruh. The nomadic tribes of the interior aff seven years of rebellion have completely throv off the control of the Sultan and by an agreeme (Oct., 1920) have entire home rule and freedom trade. The capital is Muscat. The best camels Arabia are bred in the interior of Muscat a Oman. The chief exports are dates, pomegranate limes and dried fish.

Food supplies and textiles are imported. Tra is mostly with India. The Maria Theresa doll and Indian rupee are mediums of exchange. Mu cat is the only seaport.

The Sultan of Muscat and Oman is Saiyid Sa bin Taimur (born Aug. 13, 1910).

BAHRAIN ISLANDS

The Bahrain Islands lie off the Arabian Coast the Persian Gulf and have an area of 250 squa miles and a Mohammedan population of 120,00 Pearl fishing is the chief industry, the avera value being taken each year exceeding $5,000,00 The petroleum resources are being developed wi American companies participating in the oper tions.

Bahrain is an independent Arab State und British protection. The capital and commerci center is Manamah. The ruler is H. H. Shaik Sulman bin Hamad al Khalifah (born 1895).

Argentina
(REPUBLICA ARGENTINA)

Capital, Buenos Aires—Area, 1,078,769 squa miles—Population (census 1947), 16,107,936.

Descriptive. Argentina extends from Bolivia 2,3 miles to Cape Horn and from the ridge of the And to the South Atlantic, occupying the greater pa of southern South America. Its greatest bread is about 930 miles. It is bounded by Bolivia on t north, Paraguay on the northeast, Brazil, Urugu and the South Atlantic Ocean on the east a Chile on the west.

There are five great river systems in Argentin the River Plata, Central, Cordillera, Pampa a Patagonia Systems. The Plata System is seco only to the Amazon system, largest in the world

The mountains of the Republic are grouped in four isolated and perfectly defined systems: t Andean, Central, Misiones and Southern. Acc cagua is the highest peak (altitude 23,081 fee The southern part of the Andes is a beautiful la district. There are glaciers, trout and salm streams and skiing.

East of the Andes are great plains, heav wooded and called the Gran Chaco in the nor and vast treeless pampas, given over to wheat a cattle raising, stretching south down to the pla of Patagonia.

The climate in the center and most thic settled part is temperate, with slight variatio The northern tip of the republic is within t tropics and therefore hot, and the southern e tremity is very cold. Rainfall is heaviest in t northeast and slightest in central west and sou

Buenos Aires, the capital, is the largest city Latin America and the second largest Latin city the world. It lies on the banks of the Rio de Plata, which is here 28 miles wide, 170 miles fr the Atlantic Ocean. It is a city of broad, strai streets. There are 157 parks and plazas. In Jan ary, February and March the heat in Buenos Ai is oppressive. The winter months—the ideal ti for tourists—are June, July and August.

Ushuaia, capital of the Argentine Territory Tierra del Fuego, is situated almost on the 3

arallel and is the southernmost location of organized government in the world.

Resources and Industries. The mountains of Argentina contain deposits of silver. copper and gold. etroleum is exploited by the government and by rivate companies; the wells in the Comodoro ivadavia region stand first among the country's roducers.

Wheat, maize, linseed, and oats are the principal rops. The sugar, wine, cotton and fruit industries are making great progress. Alfalfa is ultivated in huge quantities. Sheep, cattle, horses, oats and pigs form the chief wealth on the anches. Packing houses have been established on large scale and meat refrigeration has become he country's chief industry. Flour milling ranks econd. The largest refrigerating plant in the orld is in Buenos Aires.

Textiles, oils and chemicals, iron, agricultural mplements and machinery, glassware and crockery, re the principal imports. Civil aviation has deeloped rapidly.

A five-year plan for economic and social development was inaugurated (1947) to include development of domestic industries, transportation, public orks and natural resources. Other aspects include eorganization of the import tariff and customs adinistration, education, labor legislation, social nsurance, immigration and Government reorganization. The cost of the plan was estimated at ,663,000,000 pesos (approximately $1,665,000,000). oals for 1951 include a 43 per cent increase over he 1943 levels in the value of goods processed, an xpansion of 52 per cent in wages paid, an increase f 34 percent in employment and a 50 per cent ncrease in installed motive power. All foreign-wned railway lines in Argentina were purchased nd taken over by the government (1947-1948).

The nation's entire banking system including rivate deposits, was put under government conrol by decree (April 24, 1946). Four mixed-company irlines were nationalized by decree, May 5, 1949.

An important rail link was opened (Feb. 20, 948) between Argentina and Chile, called the ransandine of the North, stretching 543 miles etween Salta in Argentina to Antofagasta, Chile, t one point reaching an altitude of 14,282 feet.

History and Government. Discovered (1516) by party of Spanish explorers headed by Juan Diaz e Solis, Argentina remained under Spanish domnation until the provinces, in a successful revolt May 25, 1810), established an independent reublic. The years thereafter until 1852 were years f disturbance and civil war. The first Constituion (adopted 1853) was modeled after that of the Jnited States. The Chamber of Deputies voted Aug. 14, 1948) to reform the Constitution. There re 14 provinces, with a high measure of home rule lecting their own Governors and Legislatures, and ine territories administered by Governors apointed by the President, also a Federal District, Buenos Aires (area 72 square miles), whose Mayor s appointed by the President and who is assisted by deliberate council elected by the tax-paying nhabitants.

The President who must be a Roman Catholic nd an Argentine by birth, normally is elected by 76 electors, appointed from the 14 provinces and he capital, equal to double the combined number f Senators and Deputies, for a six-year term. Congress, under the 1853 Constitution, consisted of Senate of 30 members, chosen by a special body f electors for six years, one-half retiring each hree years; and a House of Deputies, numbering 58, elected by a direct vote for six years, one alf retiring every three years.

The President is Juan Domingo Peron (elected eb. 24, 1946 and inaugurated June 4). He reeived 1,474,447 votes to 1,207,359 for his opponent; 04 electoral votes, the largest number ever reeived by a presidential candidate, against 72 for is opponent. In the Chamber of Deputies Peron as 109 of the 158 seats and in the Senate 26 f the 30 seats.

Voting is compulsory and women have the right f suffrage in presidential and congressional elections.

The population is largely European in origin, hiefly from Spain and Italy.

Education and Religion. The Roman Catholic eligion is supported by the state, but all creeds are olerated. Primary education is free, secular, and ompulsory, but the percentage of illiteracy is still igh in some rural districts. There are national niversities in Cordoba (founded in 1613), Buenos ires, La Plata, Tucuman, Litoral and Cuyo. The anguage is Spanish.

Defense. Service in the Army is compulsory from 0 years to 45. The men belong to the First Line rmy for the first ten years, then pass to the Naional Guard for ten years and close their service ith five years in the Territorial Guard, mobilized nly in case of war. The territorial reserve is 100,000 men. There are enrolled annually 50,000 conscripts for a year of training.

Argentina has a Navy of two battleships, one aircraft carrier, three cruisers, four coast defense ships and 11 destroyers, three submarines, 14 patrol ships and minor craft. The personnel of the Navy is approximately 11,500 men, including 5,000 conscripts who must do two years' service.

Currency. The paper peso is the unit of currency.

Austria

(OESTERREICH)

Capital, Vienna—Area (1937) 32,369 square miles —Population (estimated 1948), 7,057,140.

Descriptive. Austria is a country of Central Europe, bounded on the north by Czechoslovakia, on the east by Hungary, on the south by Italy and Yugoslavia and on the west by Germany.

Resources and Industries. There are rich deposits of iron ore, magnesite, oil, salt, graphite, talc and gypsum. Forests are plentiful and timber forms an important asset, as does a vast hydro-electric potential. The principal agricultural products are wheat, rye, barley, oats, potatoes, and sugar. Austria's economy is predominantly industrial. The chief industries are iron and steel, textiles, paper and pulp, building materials, aluminum, machine tools and chemicals. Much of Austria's industrial expansion after 1938 was for wartime purposes and important segments of her economic holdings were claimed as reparations at the close of World War II.

History and Government. Austria of the present day was re-established as a Republic at the close of World War II when the Allied Control Council assumed supreme authority over Germany and forced that country to disgorge all her territorial conquests obtained by fraud or force. By this action Austria was restored to her borders of 1937, but it was a mere remnant of the former Austrian Empire.

Austria in 1937 was made up of the following provinces with their areas in square miles: Vienna, 107; Burgenland, 1,532; Lower Austria, 7,452; Upper Austria, 4,626; Salzburg, 2,762; Styria, 6,323; Carinthia, 3,630; Tyrol, 4,882; Vorarlberg, 1,005, a total of 32,369 square miles.

In the pre-World War I days of Emperor Francis Joseph of the Hapsburg dynasty the Austro-Hungarian Empire had an area of 261,259 square miles and a population of approximately 51,000,000. The Dual Monarchy included Austria proper, with Vienna, one of the brilliant political, commercial and art centers of the world; Hungary, Transylvania, Czechoslovakia, Polish Galicia, the Trentino, Slavonia, Croatia, Bosnia, Herzegovina, the Banat, territories which gave Austria access to the Adriatic and practically all of the Danube River. Since then Hungary has become a Republic and the other provinces have been lost to Austria, absorbed by other nations or organized by themselves.

Austria was proclaimed a republic (Nov. 12, 1918). More than a decade of economic and political unrest followed. As a result Chancellor Engelbert Dollfuss embarked on an authoritarian course and in May, 1934, the democratic Constitution of Oct. 1, 1920 (revised Dec. 7, 1929) was superseded by a new Constitution along corporative lines. Chancellor Dollfuss was murdered by one of a group of Nazis July 25, 1934.

Chancellor Kurt Schuschnigg who succeeded Dollfuss was forced into an agreement with Chancellor Hitler of Germany, whereby Germany recognized Austria's complete sovereignty, and Austria professed herself to be a German state.

Relations with Germany continued to decline, however, and following an ultimatum from Berlin, Chancellor Schuschnigg resigned (March 11, 1938) and was succeeded by the Austrian Nazi leader, Arthur Seyss-Inquart. Chancellor Hitler of Germany entered Austria the following day and proclaimed the unity of the country with Germany. Schuschnigg was arrested. Austria was formally incorporated into the German Reich (March 13, 1938). President Wilhelm Miklas was forced out of office and Hitler appointed Seyss-Inquart as Statthalter (governor).

Austria continued as a part of Germany throughout World War II and was restored to its 1937 boundaries when the Allied Control Commission began the occupation of Germany.

The Allied Control Commission, composed of the United States, Great Britain, Russia and France, divided Austria into four zones. The control machinery provided that Vienna should be occupied by the forces of the four powers. An Allied Council, consisting of four military commissioners, also was established to govern the country as a whole.

A Provisional Government was established (April 29, 1945) under the leadership of Dr. Karl Renner who restored the Republic under the Con-

stitution of 1920. The new Government declared Austria a democratic Republic, composed of eight provinces and the city of Vienna. Representatives of the provinces (Sept. 1945) approved the Renner Government and the Allied Council also accepted the Government (Oct. 20. 1945).

Elections to the National Assembly, which has 165 members, were held (Nov., 1945) with the following returns: Austrian People's Party, 85; Socialists, 76; Communists, 4. The Provisional Government of Dr. Renner resigned and Dr. Leopold Figl, leader of the People's Party, was chosen Chancellor. The new Government was recognized by the occupying powers and the National Assembly (Dec. 20, 1945) elected Dr. Renner President of the Republic. The Foreign Minister (1949) is Dr. Karl Gruber.

The Allied Council granted to Austria (June 28, 1946) more nearly complete control over its destiny than it had possessed at any time since annexation by Germany. All zones of demarcation were removed, permitting free movement throughout the country of Austrian citizens and Austrian traffic. The country also was permitted to establish frontier and customs administrations.

A number of large industrial concerns, former German property were nationalized by the Austrian Parliament (July 26, 1946).

Education and Religion. The predominant religion is Roman Catholic. Elementary education is free and compulsory between the ages of six and 14. There are universities in Graz, Vienna and Innsbruck. The language of Austria within the boundaries at the date of the country's annexation by Germany was principally German.

Defense. Austria's defense is vested in the four occupying powers, and the country has no armed forces of its own at present. The proposed peace treaty (1949) provides for an Austrian army of 50,000.

Currency. The monetary unit is the schilling, made up of 100 groschen.

Belgium

(ROYAUME DE BELGIQUE—KONINKRIJK BELGIE)

Capital, Brussels—Area 11,775 square miles—Population (estimated 1947), 8,421,000.

Descriptive. Belgium is bounded on the north by the Netherlands and the North Sea; on the east by Germany and Luxemburg, on the south by France, and on the west by France and the North Sea. It has a frontier of 831 miles and a seaboard of 62 miles. The Schelde and the Meuse (Maas) are the principal rivers. Below Antwerp the Schelde flows to the North Sea through the Netherlands and the Belgian Government has dredged the channel as far as Flushing and improved the port of Antwerp. The western part is low, level and fertile; the eastern, the tableland of the Ardennes, has a poor soil. The cities of Bruges, Ghent, Brussels, Liege, and Antwerp are noted for art and architecture.

Belgium is the most densely populated country in Europe with a population of 710 to the square mile.

Resources and Industries. Minerals include coal, iron, zinc, lead and copper. Although Belgium is essentially a manufacturing country, agriculture and forestry are important industries. The principal crops are oats, rye, wheat, potatoes, barley and sugar beets.

History and Government. Belgium formed part of the Low Countries from the readjustment of Europe (1815), after Napoleon's downfall, until it proclaimed its independence (Oct. 16, 1830) (New Style) as a constitutional representative and hereditary monarchy. The National Congress (1831) elected Prince Leopold of Saxe-Coburg King of the Belgians. He died (1865) and was succeded by his son Leopold II, who died (1909). Leopold II was succeeded by his nephew, Albert I. By the Treaty of London (April 19, 1839) the famous "scrap of paper" separation from the Netherlands and the neutrality and inviolability of Belgium were guaranteed by Austria, France, Great Britain, the Netherlands, Prussia and Russia. The Germans invaded the Kingdom (Aug. 2, 1914) and held nearly all of Belgium throughout World War I, evacuating it immediately after the armistice. Under the Treaty of Versailles, Eupen and Malmedy and Moresnet were ceded by Germany, adding 382 square miles and 64,250 inhabitants to the kingdom. These cantons were joined to the province of Liege (March 5, 1925).

Belgium was again invaded by Germany (May 10, 1940), without a declaration of war, and in defiance of solemn engagements which Germany took (1937) and which she renewed a few days before the invasion. The Belgian army, at the side of the British and French armies, defended the national territory until compelled to surrender (May 28, 1940).

When the Germans occupied the country, the King as Commander in Chief of the Army considered himself duty bound to remain with it and w made a prisoner in his palace where he abstain from cooperation with the occupation authoriti Later he was taken to Germany. The cabinet e caped to France and later went to England whe a Government-in-Exile was established. With t liberation of Belgium (Sept., 1944) the Gover ment returned to the homeland.

The King of the Belgians, Leopold III (bo Nov. 3, 1901), succeeded his father, Albert, kil by a fall from a precipice at the Marche les Dam (Feb. 17, 1934) and was crowned (Feb. 23, 1934). married (Nov. 10, 1926) Princess Astrid (born N 17, 1905), daughter of Prince Carl, brother of t King of Sweden. Children of King Leopold by h first marriage are Princess Josephine Charlo (born Oct. 11, 1927); Prince Baudouin (the H Apparent) (born Sept. 7, 1930) and Albert, Prin of Liege (born June 6, 1934). Queen Astrid w killed (Aug. 29, 1935) near Lucerne, Switzerlan when the automobile which her husband was dri ing plunged from the road. The Queen Dowager Elizabeth, Duchess of Bavaria, who married t late King Albert, (Oct. 2, 1900) their other ch dren are Prince Charles Theodore, Count of Fla ders (born Oct. 10, 1903) and Princess Marie Jo (born Aug. 4, 1906) married (Jan. 8, 1930) to Crow Prince Humbert, of Italy. King Leopold III ma ried Mlle. Mary Lelia Baels (Sept. 11, 1941). A s was born (July 20, 1942) and named Alexand Emmanuel Henry Albert Maria Leopold. Accor ing to the King's decision, children of the seco marriage are ineligible to succeed to the thro

Parliament elected Prince Charles regent (Se 21, 1944). The House of Representatives vot 98 to 6 (July 17, 1945) to continue the regen and to bar King Leopold's return to the thro without the consent of Parliament. The Sena voted 77 to 58 the following day.

Parliament consists of a Senate of 167 membe elected for terms of four years, 101 by direct vo 44 by Provincial Councils and 22 by the Sena itself; a House of Representatives of 202 membe also elected for terms of four years.

In the general elections, June 26, 1949, the r turns by parties were: Chamber—Catholics, 10 Socialists, 66; Liberals, 29; Communists, 12. the Senate—Catholics, 54; Socialists, 33; Libera 14; Communists, 5. There remained 46 Senato to be elected by provincial councils and 23 to elected by members already chosen.

The Premier (Aug. 10, 1949) is Gaston Eyske Christian Socialist.

Universal male suffrage is in force and tho who fail to vote are fined. Legislation extendi suffrage to women (effective 1950) was pass (March 1948).

Education and Religion. The population divided into two well defined groups, the Flemi and the Walloons. Roman Catholic is the religi of the great majority but religious toleration p vails. Part of the income of the ministers of t Catholic, Jewish, Church of England and Protesta Evangelical religions is paid from the natio treasury. Belgium has four universities in Ghe Liege, Brussels and Louvain.

Defense. The Belgian Army is maintained calls to colors and voluntary enlistments. Volu tary service begins at 17 years of age with f years of service; under 18 four years and over three years. The Military Law of 1937 establish the period of military obligation at 25 years, 15 be served in the Regular and Reserve and 10 in t Territorial Army. The Navy has been reorganiz since World War II and comprises small warcra

Currency. The unit of currency is the franc w a nominal value of 2.28 cents.

BELGIAN CONGO
(Congo Belge)

Capital, Leopoldville—Area (estimated), 904, square miles—Population (1946), 11,702,859.

The Congo Free State had its origin in the vis of King Leopold II of Belgium, who, roused Stanley's discoveries, realized the great econo possibilities in the development of the vast te tory reached by the Congo. The Internatio Association of the Congo, which he founded largely financed, sent Stanley back (1879). founded the first station, Vivi (Feb., 1880) in all 24 before he returned (1884). The territo founded as a free state (1885), was formally ce to Belgium by treaty (1908). It is administe by the Minister of the Colonies at Brussels, an Colonial Council of 14 members. The Govern General at Leopoldville is M. Jungers. He is assis by a Government Council of nominated memb

Belgian Congo has a short coast line on South Atlantic at the mouth of the Congo, wh is situated the port of Banana on a fine natu harbor. French Equatorial Africa lies to the nc and west and Angola (Portuguese) to the sou beyond which to the east is Northern Rhode to the east Tanganyika, now British, but form

German East Africa, and Uganda (British); to the north it also touches the Soudan. Vast, sunless and well-nigh impenetrable tropical forests fill the upper reaches of the river, covering about 25,000 square miles. The principal products of the Congo are palm-oil, cotton, palm-nuts, coffee, cocoa, rubber, copal gum, sugar and ivory.

Mineral products consist of copper, diamonds, gold, tin, cobalt, tantalum, silver and radium. The Belgian Congo ranks high among copper producing countries. The diamond fields in the southwestern district produce more than 6,000,000 carats a year, mainly industrial diamonds of which the Congo is the world's largest producer. The uranium ore from the Katanga district is of high grade and furnishes about 90 per cent of the world supply of radium. The rich Shinkolobwe mine, 100 miles northwest of Elisabethville, produces uranium ore, chiefly for the United States. No production figures are available, but the Congo's 1945 production was estimated at 10,000 tons. The uranium content of ore varies widely. The Katanga copper belt is 250 miles long by 25 to 50 miles wide.

The unit of currency is the Congo franc in the Belgian monetary area.

Ruanda and Urundi, districts formerly in German East Africa, have been ceded to Belgium as mandatory of the League of Nations. The total area is 20,535 square miles. The population is estimated (1946) at 3,388,259, of whom 2,303 are Europeans, chiefly Belgians. Both districts are united administratively with Belgian Congo, under a vice-governor at Astrida. The Ruanda Plateau is one of Africa's best cattle countries. Several peaks of the Birunga range reach an altitude of 14,000 ft.

Bhutan

Capital, Punakha—Area, 18,000 square miles—Population (estimated) 300,000.

The Kingdom of Bhutan is a semi-independent native state in the Himalayas between Tibet on the north and parts of the Dominions of India and Pakistan on the south, with Sikkim on the west. It is 190 miles long from east to west and 90 miles wide at its widest point. Punakha is a fortress of great natural strength. The inhabitants of Bhutan are Mongolians and adhere to a form of Buddhism. There is a monastery—Tashi-Cho-dzong—containing 300 priests.

Agriculture is the chief industry. The principal products are rice, Indian corn, millet, lac, wax, various kinds of cloth, musk, elephants, ponies and cowries.

The ruler of the kingdom is Maharajah Jig-me Wang-chuk (born 1906). He ascended the throne (Aug. 21, 1926). By a treaty signed with India, Aug. 8, 1949, Bhutan receives an annual cash subsidy of 500,000 rupees and transportation rights through the Dominion, the state's only avenue to the outside world.

Bolivia

(REPUBLICA BOLIVIANA)

Capital, La Paz—Area (estimated), 416,040 square miles—Population (estimated 1948), 3,922,000.

Descriptive. Bolivia is bounded by Peru and Chile on the west, Brazil on the north and east, Paraguay on the east and Argentina on the south. It lies across the Andes, and its chief topographical feature is the great central plateau at an altitude of 12,000 ft., over 500 miles long, lying between two great cordilleras having three of the highest peaks in America. Precise calculations of the area are impossible because of boundary disputes. More than 50% of the population are Indians speaking their own dialects only, and 25% are of mixed blood.

Lake Titicaca, on the Peruvian-Bolivian border, is the highest lake in the world on which steamboats regularly ply (12,500 ft.), and is the largest lake in South America (4,000 sq. mi.).

The legal capital is Sucre, but La Paz, a city more accessible, is the actual seat of Government. La Paz lies in the heart of a gigantic canyon about three miles wide, 10 miles long and 1,500 ft. deep, at an altitude of about 12,700 ft., and framed with high Andean peaks. Its huge cathedral where 12,000 persons can worship (begun in 1835), was dedicated (March 4, 1933).

Bolivia has 3,495 miles of airlines. It is served by Pan American-Grace Airways (Panagra) and Lloyd Aero Bolivia (LAB).

Resources and Industries. Agricultural products include potatoes, cacao, coffee, barley, coca, highland rice, rubber and cinchona bark. The country is a large exporter of rubber.

The most important industry is mining. There are large deposits of tin, silver, copper, lead, zinc, antimony, bismuth, wolfram, gold and borate of lime. More than 15% of the world's output of tin is produced in Bolivia with an American corporation in control. The country ranks high in the mining of antimony and tungsten. The petroleum industry is growing.

The United States and the United Kingdom share the Bolivian tin output almost equally. An agreement between the British Government and the Patino group of mines, provided for the sale to the United Kingdom of all tin produced by these mines for ten years. The output of other producers was contracted for by the United States.

History and Government. Once part of the ancient Incan empire, Bolivia was under Spanish domination for centuries before it gained independence in 1825, naming itself after Simon Bolivar, famed liberator. The Republic's political history has been stormy. By the constitution (1938) the President is elected for four years by direct popular vote. He is not eligible for re-election until four years after his term has ended. Those over 21 who can read and write have suffrage. Women voted for the first time in municipal elections (Dec. 14, 1947). Congress is composed of a Senate of 27 members elected for six years, one-third retiring every two years; and a House of Deputies of 120, elected for four years, one-half retiring every two years.

Under a new constitution adopted in 1945, the presidential term was extended to 6 years, but a revolution (July, 1946) largely overturned the provision and revision is pending.

The President is Enrique Hertzog (elected Jan. 5, 1947).

Education and Religion. Primary education is free and compulsory. Adult illiteracy, estimated at 85%, is being lowered. There are three universities, in Sucre, Cochrabamba and La Paz. Roman Catholic is the recognized State religion but other forms of worship are permitted. Spanish is the language of the country.

Defense. There is compulsory military service from 19 years to 55. There is also "pre-military" instruction for boys and girls between the ages of 14 and 18. The active army is limited to approximately 15,000 men with an additional 12,000 national police or caribneros. An American Air Mission advises the Air Force.

Currency. The unit of currency is the boliviano.

Brazil

(ESTADOS UNIDOS DO BRASIL)

Capital, Rio de Janeiro—Area, 3,286,170 square miles—Population (estimated 1948), 48,450,000.

Descriptive. Brazil is the largest independent nation in South America. It has a coast line on the Atlantic Ocean of 4,889 miles, and extends approximately 2,676 miles from north to south and 2,694 miles east to west. It is bounded on the north by Venezuela and Dutch, British, and French Guianas; on the east by the Atlantic Ocean; on the south by Uruguay, Argentina and Paraguay; on the west by Bolivia, Peru and Colombia. The northern part is the great heavily wooded basin of the Amazon (1,465,637 square miles in Brazil) which rises in the Peruvian Andes and empties into the Atlantic at the Equator.

The Amazon basin has a network of rivers which are navigable for 15,814 miles. The Amazon river by itself is navigable for 1,700 miles, the extent of its course in Brazilian territory. In all its rivers, Brazil possesses 27,318 miles of navigable waterways. Mountain ranges, interspersed with fertile valleys traverse the eastern and southern states. The majestic falls of the Iguassú, one of the natural wonders of the world, are on the border of Parana, a southern state. Brazil's hydroelectric power is estimated at about 19,519,100 horsepower.

Resources and Industries. The mineral wealth of Brazil is vast but comparatively little developed. Manganese ore is now exported exclusively to the United States. The country possesses enormous deposits of monazite, main source of thorium, alternate to uranium as a supplier of fissionable material. Gold production is about 1,000,000 contos ($50,000,000) annually. Other principal minerals are cement, diamonds, iron and coal. Brazil began the production of petroleum (1940) and also developed plans for the manufacture of steel, using domestic ore, and coal.

The cultivated area is about 35,000,000 acres (1946) for the principal crops, cultivation in Brazil being characterized by extensive planting rather than concentrated. Agriculture is being mechanized to a great extent.

Cotton, rubber, coffee, cocoa, pinewood, castor beans, tea and oil, and oiticica oil are important agricultural products. The country is the only producer of Carnaúba wax, used for electric insulation, phonograph records and many other applications.

Stock raising is important as is the export of meat hides and skins, and wool. The wine industry is growing and the silk industry is being revived.

Industrial production in Brazil is two and one-half times as great as the agricultural and animal production. As late as 1940 the exports of manufac-

tured items accounted for 18% of the export sheet; coffee accounted for only 32%.

A five-year program of work and development was proposed (March 15, 1948) by President Dutra to overcome Brazil's recent unfavorable trade balance. He advocated increasing production by improved transportation facilities, increased hydroelectric power and exploration for petroleum coincident with measures to improve health and food supply of the population. Aviation has made tremendous strides.

History and Government. Brazil, discovered (1500) by Pedro Alvares Cabral, a Portuguese navigator, was developed as a colony of Portugal until the royal house of Braganca, fleeing from Lisbon before Napoleon's army (Nov. 1807), transferred the seat of Government to Rio de Janeiro (March, 1808). Brazil was proclaimed a kingdom (1815) by Dom Pedro I who proclaimed the independence of the country (Sept. 7, 1882) and who was chosen as Emperor (Oct. 12, 1822). The last emperor, Dom Pedro II, was driven from the throne (Nov. 15, 1889) by a revolution which established a republic, the United States of Brazil.

There are 20 states, with limited autonomy, a federal district, and five territories: Acre, bought from Bolivia (1902), the territory of Fernando de Noronha, consisting of the island of the same name, Amapa, Rio Branco and Guapore.

The Constitution of 1937 provided that "in the interests of national defense the Union may create Federal territories out of dismembered parts of States whose administration will be regulated by special law." A Presidential decree (1940) created a safety zone around Brazil's frontiers in which aliens may not own property.

Large areas have been detached from several States to form three new territories aggregating almost 150,000 square miles to serve as buffers between Brazil and eight neighboring countries.

The new territories start at the mouth of the Amazon River and extend southwest and then southeast to form a belt around Brazil abutting on eight other countries. Amapa Territory borders on French Guiana and Surinam (Dutch Guiana). Rio Branco Territory borders on Venezuela and reaches almost over to Colombia and northern Peru. Guapore Territory abuts on southern Peru and Bolivia.

A new charter (adopted 1946) renounces aggressive warfare and pledges herself to have recourse to war in settling international disputes only if arbitration and all other peaceful means fail. The charter gives the government wide powers to introduce changes in the economic and social order of the republic "to conform to the principles of social justice, conciliating free enterprise with appreciation for the value of human labor." It also authorizes the government to intervene in the management of private industry if it is in the public interest. In the political field, the government has the power to prohibit any party whose program of action it considers anti-democratic. The new charter reaffirms the principles of universal suffrage and the secret ballot, and grants the right to vote to all citizens, men and women, on reaching the age of 18. The President is elected for a term of five years and may not be elected for a second consecutive term.

The President is Maj. Gen. Eurico Gaspar Dutra (elected Dec. 2, 1945).

There is a bicameral legislature, both houses elected for four-year terms.

A bill cancelling mandates of Communists holding elective offices was passed (Jan. 7, 1948) and upheld by the Supreme Electoral Tribunal (Jan. 10, 1948).

Brazilian import and export trade were placed under emergency Government control by a decree signed by President Dutra (Feb. 24, 1948).

Education and Religion. The country is Catholic, but freedom of worship is guaranteed. The Protestant population, the second most important was 1,074,857 (1940).

Divorces are forbidden.

The world's second largest betatron is in Sao Paulo, where a nuclear energy research institute has been established (1948).

The University of Rio de Janeiro (now University of Brazil) was founded in 1920. Other universities are in Bahia, Parana, Recife, Porto Alegre (state of Rio Grande do Sul), São Paulo (state of São Paulo) and Belo Horizonte (state of Minas Gerais). Many superior schools, although not yet organized into universities, are found in the capitals of the most advanced states. Brazil has approximately 43,000 primary schools, 913 high schools, 217 colleges and 3,283 other schools. Primary education is free and compulsory. The language of the country is Portuguese.

Defense. All males between the ages of 21 and 45 are subject to military duty under a selective service system. There is one year of service in the first line and eight years in the reserve.

The Navy consists of two battleships, one cruiser, three river monitors, one river gunboat, 13 destroyers, four submarines, six corvettes, 16 submari chasers and a submarine depot ship. The Air For independent of the Army and Navy, has a pe sonnel of 5,000.

Currency. The monetary unit is the cruzeiro.

Bulgaria

(BLGARIYA)

Capital, Sofia—Area, 42,796 square miles—Pop lation (estimated 1947), 7,048,000.

Descriptive. The Republic of Bulgaria is bound on the north by Rumania, on the west by Yug slavia, on the south by Greece, on the east by t Black Sea, and on the southeast by Turkey.

Resources and Industries. The principal crops wheat, rye, barley, oats, corn, potatoes and bacco. Fruit is abundant. Agriculture claims percent of the population.

Industrial plants and cultures, fruits, vegetab and dairy products are exported in large quan ties. Coal production is extensive.

The chief seaports are Varna and Burgas (Bou gas), which account for 80 per cent of the fore trade.

History and Government. The Principality Bulgaria was created by the Treaty of Berlin (J 13, 1878) as an autonomous and tributary princip ity under the suzerainty of the Sultan of Turk Bulgaria declared its independence (Oct. 5, 190 Eastern Rumelia joined Bulgaria (Sept. 16, 18 after revolution against the Sultan.

Bulgaria was an ally of the Central Powers World War I. By the Peace Treaty of Neui (Paris) (Nov. 27, 1919), Bulgaria ceded Thrace Greece and the "Strumnitza Line" and a strip territory on the northwest to Serbia. The tre deprived Bulgaria of the Aegean Sea front. T Treaty of Lausanne (1923), giving Thrace to T key, fixes the boundary between Bulgaria a Turkey just west of Adrianople.

Rumania ceded to Bulgaria (1940) all of southe Dobruja, 2,983 square miles, with a population 378,364. The cession restored the boundary line 1912.

After the German invasion of Greece, Bulga occupied (April, 1941) all of Yugoslav Macedon Greek Western Thrace, Eastern Macedonia a the districts of Florina and Castoria.

The armistice in World War II provided for t partial control of the country by the Allied Co trol Commission under the chairmanship of t Soviet representative of the Allied (Soviet) hi command.

In a plebiscite (Sept. 8, 1946) the Bulgari people ousted the King, the monarchial system a voted the establishment of a Republic, which w proclaimed a week later. The Saxe-Coburg-Got dynasty had ruled the country since 1887. Ki Simeon II (born June 16, 1937) who succeed to the throne on the death of his father, Ki Boris (Aug. 23, 1943) was permitted to leave country for Egypt. A Regency had ruled for hi

Elections to the National Assembly were h (Oct. 27, 1946) and the Communist-dominat Fatherland Front won an overwhelming victo The party distribution of seats follows: Comm nists, 277; Fatherland Front wing of the Agraria 69; Social Democrats, 9; Zveno, 8; Radicals, United Opposition (Agrarians led by Nikola P kov and the Pauchev Socialists), 101; Democra none. The elections were by proportional rep sentation. In the popular vote the Fatherla Front coalition received 2,980,175, with the Co munists listed as getting 2,262,321. The t parties of the United Opposition received 1,208,1 or about 28 per cent.

Georgi Dimitrov, premier and veteran Comm nist, died July 2, 1949, in Moscow of diabetic co plications. He was succeeded (July 20, 1949) Vassil Kolarov, Communist.

The constitution of Dec. 4, 1947, modeled af that of the U.S.S.R., provides that the unicame National Assembly shall be the supreme organ government. The National Assembly is elected fo four-year term and chooses the Presidium a Premier. The President of the Presidium is Mincho Neicheff. Private enterprise and belongi earned by labor and savings are protected by State. Much of Bulgaria's industry has been n tionalized.

Education and Religion. Bulgaria's language Slavonic. The state church is Orthdox Gre Elementary education is obligatory from seven 14 years of age. There is a state university in So and the American College is also situated the

Defense. Army service is compulsory between ages of 17 and 65 and usually is for two years.

Currency. The monetary unit is the leva.

Burma

Capital, Rangoon—Area, 261,757 square mile Population (1941), 16,823,798.

Descriptive. The Union of Burma, a Republic

ounded on the north by Tibet and China, on the ast by China, French Indo-China and Siam, on he south by the Bay of Bengal and on the west by he Bay of Bengal and the Indian Provinces of engal and Assam.

The sub-continent of India of which Burma orms a part comprises a series of great river valleys unning approximately north and south, divided rom one another by mountain ranges and plateaus. The Irrawaddy Valley roughly constitutes Burma roper.

The climate is tropical, with a well-defined rainy eason from the middle of May to the middle of October.

The Irrawaddy River is navigable for 900 miles nd its tributary, the Chindwin, for 300.

The 800-mile Burma Road figured prominently in Vorld War II as an Allied supply line.

Resources and Industries. The principal products re teakwood, rice, cotton, maize, tobacco, tin, ilver and petroleum. The rubies, sapphires and ade found in Burma are unsurpassed in quality. A bill providing for nationalization of land and its redistribution to farmers on a rental basis was assed by Parliament Oct. 12, 1948.

History and Government. Under British influnce since about 1612 under the East India Company. Burma was administered as part of British India from the first Burma war (1826).

Under the Government of India Act of 1935, Burma, which had long sought release, was deached from British India (April 1, 1937), made a elf-governing unit of the British Commonwealth, nd received a constitution of her own. Under the ew law, there was a Senate of 36 members and House of Representatives of 132 members.

Burma became an independent nation completely utside the British Commonwealth by a treaty igned in London (Oct. 17, 1947, effective Jan. 4, 948), and became the 58th member of the United Nations (April 19, 1948). A Constituent Assembly, lected April 9, 1947, unanimously passed a Constitution Sept. 24, 1947, which recognizes the pecial position of Buddhism as the faith of the najority of citizens. Private property and enterprise are guaranteed, but monopolies are forbidden nd provision is made for nationalization of ranches of national economy or single enterprises. The Union Parliament, elected for four-year terms, onsists of the Chamber of Deputies, comprising bout 250 members, and a Chamber of Nationalities f 125 members. The President is elected by Parliament for a five-year term and re-election is permitted only once. He lacks power to veto bills. The Shan, Kachin, Karen and Karenni States and the Special Division of the Chins, outlying regions, are epresented in the Union government by ministers rom their own Parliaments and enjoy a large neasure of administrative autonomy.

The Premier is Thakin Nu.

Since gaining independence Burma has been beset y civil strife, chiefly by the Karens who make up bout 6 percent of the population and who have ressed for an autonomous state within the Union.

Education and Religion. The indigenous races f Burma are of Mongoloid stock, allied to the Chinese, Japanese, Koreans, Tibetans, Malays, and thers of eastern Asia. Burmese or one of its ariants is spoken by nearly three-fourths of the opulation. Approximately half of the urban male opulation (1931), a very small percentage of the otal, is literate. Higher education is provided at he University of Rangoon and constituent colleges. A state-controlled and homogenous system f schools was introduced after World War II.

The chief religion is Buddhism, an offshoot of Hinduism. However, caste distinctions are practically unknown to the Burmese.

Currency. The monetary unit is the British Pound.

Chile

(REPUBLICA DE CHILE)

Capital, Santiago—Area, 286,396 square miles—Population (estimated 1948), 5,621,000.

Descriptive: The Republic of Chile lies on the west coast of South America, occupying the strip of land between the Andes and the South Pacific, from Peru to Diego Ramirez Island 55°59′S., having an extreme length of about 2,620 miles, with a coast line of 2,900 miles. The average breadth north of 40° is 100 miles.

The Andes have many lofty peaks, notably Aconcagua (altitude 23,081 feet) in Argentina near the Chilian border the highest peak in the Americas, Tres Cruces (22,162 ft.), El Muerto (21,227 ft.), the Sayo (19,993 ft.), the Guallatiri (19,882 ft.)

Easter Island 2,000 miles west of Chile, with its hundreds of stone figures, and the two Juan Fernandez Islands, less than 500 miles west, are national parks of the Chilean Government.

The population is almost entirely of European origin; there are about 30,000 Araucans (natives) in the Andes and an indeterminate number of nomadic Fuegans in Tierra del Fuego.

Punta Arenas with a population of 30,000 in the Straits of Magellan, is the southernmost city in the world. It is the center of a thriving sheep industry. Ushuaia, the capital of the Argentine Territory of Tierra del Fuego, lies to the south of Punta Arenas but has a population of only 1,100.

Valparaiso, chief seaport, was founded (1543) and Santiago, the capital, three hours inland, is two years older.

Resources and Industries. The land in the north part is arid, but two provinces there, Tarapaca and Antofagasta, produced 95% of the world's nitrate supply until the process of obtaining nitrate from the air was made commercially profitable. There are 152 nitrate works, but only about 25 are in actual operation, producing about 100,000 metric tons a month. About 70% of the world's supply of iodine is a by-product of Chilean nitrate oficinas. Chile is the world's second largest producer of copper. The provinces of Atacama and Coquimbo have enormous iron deposits estimated at a billion tons. South of Valparaiso are large beds of coal, the reserve estimated at two billion tons. Other minerals are gold, silver, cobalt, zinc, manganese, borate, mica, mercury, iodine, salt, sulphur, marble and onyx.

Agriculture is an important industry. There are many large dairy farms. Wheat, barley, oats, beans, lentils, apples, melons, peaches, plums, nectarines, peas and potatoes are grown in abundance. Chile ranks high among wine producing countries with 36,308 producing vineyards covering 250,000 acres.

Manufacturing industries have developed greatly during the last ten years. With the creation (1939) of the Corporacion de Fomento de la Produccion (Corporation for the Promotion of Production) with a capital of $40,000,000, production of agriculture and manufactures has vastly increased.

Chilean imports consist mainly of machinery, petroleum, sugar, newsprint, automobiles, coffee, tea and maté and textiles. Besides minerals and wool the exports are chiefly meats, barley, oats, beans, lentils and fresh fruits.

Chile has about 6,000 miles of railroads, over half being state owned. There are 2,308 miles of airlines and 28,964 miles of roads.

An important rail link was opened (Feb. 20, 1948) between Argentina and Chile, called the Transandine of the North, stretching 543 miles between Salta in Argentina to Antofagasta, Chile, at one point reaching an altitude of 14,282 feet.

History and Government. Chile threw off the Spanish yoke (1810-18).

Under the constitution (1925), the President is elected for six years, the 45 senators for eight, and 147 deputies for four, all by direct popular vote. The President is Gabriel Gonzalez Videla (elected Sept. 4, 1946) for a six-year term. Universal suffrage for all literate persons over 21 was established by law February, 1949. Previously, women could vote only in municipal elections.

Chile has social security under which each worker contributes 2 per cent of his wages the employer a sum equal to 5 per cent of the wages, and the Government 1½ per cent in return for which the worker gets retirement pay, discharge pay equal to one month's pay for each year of service, and "family assistance" payment which aids in equalizing the burdens of large families, and includes health insurance.

Education and Religion. Education is free and (since 1920) compulsory. A National Library, the University of Chile and a Catholic University are in Santiago. There is a university in Concepcion and a technical university in Valparaiso. The Roman Catholic religion is dominant though not maintained by the state (since 1925) and all religions are protected. The language is Spanish.

Defense. All able-bodied citizens from 20 years to 45 are liable for army service. Service in the reserve of active Army is for 12 years and with the second reserve to the end of the 45th year. The Navy consists of one battleship, and two cruisers, eight destroyers, nine submarines and auxiliary vessels. The personnel is 12,000 men in normal times. There is an Air Service of four brigades.

Currency. The monetary unit is the peso.

China

(CHUNG-HUA MIN-KUO, i. e. REPUBLIC OF CHINA)

Capital, Nanking; Provisional Capital (1949), Canton—Area, including outlying territories, 3,760,339; China proper, 2,279,134 square miles—Population (census 1948), 463,493,418.

Descriptive. China occupies a territory in the eastern part of Asia about one-third larger than continental United States. To the north lies Siberia; to the west Russian Turkestan; to the southwest and south the barrier of the Himalayas forms the Tibetan-Indian frontier. French Indo-

China borders it on the south; and the China Sea and Yellow sea on the east separate it from the Philippines, the Japanese Empire and Korea. The country is of rolling topography, rising to high elevation in the north in the Khinghan Mountains, separating Manchuria and Mongolia; the Tarabagatai Mountains in Sinkiang; the Himalayan and Kunlun Mountains in the southwest in Tibet and the Khangai Mountains in Mongolia. Its length from north to south is 1,860 miles and its breadth from east to west more than 2,000 miles.

The country comprises 35 Provinces (counting Formosa and nine Northeastern Provinces of Manchuria), one territory (Tibet) and eight Municipal Cities.

China Proper occupies the fertile southeastern part of the country, an area nearly twice the size of the United States east of the Mississippi. There the population on the generally accepted estimates has a density of 174 to the square mile. China Proper is one of the best watered countries of the world. From the mountains on the west four great rivers run in general course stretching for hundreds of miles along the ocean and inland for 300 miles. These rivers, the Yangtze, the Yellow, the Si-Kiang and the Kwang ho, drain four-fifths of the country.

Resources and Industries. China is essentially agricultural. Wheat, barley, corn, kaoliang, and millet and other cereals, with peas and beans, are produced in the north; rice, sugar and indigo in the south. Rice is the staple food of the Chinese. Fruit is grown in abundance. Fibre crops are important and include abutilon, hemp, jute, ramie and flax. Cotton is produced mostly in the Yangtze and Yellow River valleys and the country ranks as one of the great cotton producers of the world. Tea is cultivated principally in the west and south. One of the most important industries of China is silk culture. It has flourished 4,000 years. Livestock is raised in large numbers. In years before World War II flour and rice milling had become extensive, together with tanning, cement and glass manufacture.

China is one of the foremost coal countries in the world, with reserves estimated at 243,669,000,000 tons. Other minerals are iron ore, tin, antimony, wolfram, molybdenum, bismuth and salt. Oil wells are worked in South Manchuria and Kansu. The oldest iron industry in the world is in Shansi.

Chief exports are animal products, oils, tallow, wax, seeds, raw cotton, raw silk, hides, skin, leather, tea, chemicals, metals, minerals, piece goods, paper, cereals, beans and peas. The imports include cotton, wool, metals, fishery products, tobacco, chemicals, dyes, paints, coal, coke, machinery and armaments. Trade is principally with the United States, Japan, Germany and Great Britain.

Chinese Industrial Cooperatives have more than 2,000 units with a capital investment of 30,000,000 yuan and are producing goods valued at more than 9,000,000 yuan monthly.

Shanghai, China's commercial and industrial capital, is situated on the left bank of the Whangpoo River, 12 miles above its mouth at Woosung in the Yangtze delta. It occupies the most strategic position economically of any city in China. The Province of Kiangsu, in which Shanghai is situated, having about 36,469,321 people in 41,818 square miles, is the most densely populated political unit in the world.

History and Government. One of the oldest of monarchies, with a history reaching back to 2205 B.C., China became a Republic after a revolution (1911).

The United States and Great Britain signed (Jan. 11, 1943) treaties with China abolishing extraterritorial and other special rights enjoyed for approximately 100 years. The treaty ended special rights enjoyed by the United States in the so-called Treaty Ports, in the Diplomatic Quarter in Peiping and in international settlements in Shanghai and Amoy. The United States also gave up rights under the Boxer protocol, signed after the Boxer Rebellion (1901), including the right to station troops in China and special rights enjoyed by American vessels in Chinese waters. The international settlements reverted to the administration and control of the Chinese Government.

A new constitution was adopted by the National Assembly (Dec. 25, 1946), promulgated by President Chiang Kai-shek (Jan. 1, 1947) and became effective (Dec. 25, 1947). It includes many features of the American form of government.

The National Assembly is the supreme organ of the people. Members are elected on the basis of territoral and professional representation. They serve for a six-year term, subject to recall. The Assembly elects the President and Vice President, who likewise serve six-year terms; it also has the power to amend the Constitution.

The National Government is a committee form of government composed of a National Government Council, or State Council, whose chairman is known as President of the National Governme and five Yuan (Councils).

A coalition was formed (April 16-17, 1947) of Kuomintang, dominant political party which ca into power (1925) following the Nationalist Revo tion; the Young China Party, the Democratic cialists and a group of non-partisans. Not part pating in the government are the two larg minority parties—the Communists and the Dem cratic League. The Kuomintang, despite its ab cation of its one-party monopoly, retained its p eminent position in the government.

The five Yuan authorized by the "Law Gove ing the Organization of the National Governm of the Republic of China," commonly but inacc ately known as the Organic Law of China (prom gated Oct. 4, 1928 and amended on eight occasi since) are: Executive, Legislative, Judicial, Exaination and Control Supervisory.

The Executive Yuan, in point of actual portance, by far exceeds that of the other f Yuan. It is often likened to a responsible cabi

The Legislative Yuan is unicameral, its me bers serving three-year terms. It has the po to decide laws, budgets, amnesty, declaration war, conclusion of peace and other internatio affairs. The Legislative Yuan may have from 4 99 members. Ordinarily, it has five committees law codification, foreign relations, finance, e nomic affairs and military affairs.

The Judicial Yuan has four units. They are Ministry of Justice, the Supreme Court, the A ministrative Court and the Commission for Disciplinary Punishment of Public Functionaries

Under the Examination Yuan are the Minis of Personnel and the Examination Commission.

The Control, or Supervisory Yuan may have fr 29 to 49 members, Its principal functions are peachment and auditing. The former is exerci by members of the Yuan, while the latter is ex cised through the Ministry of Audit.

The Japanese extended their power over Ch for 50 years, since the Sino-Japanese war (189 Korea was annexed (1910); Manchuria (1931-1 The border province of Jehol was cut off as buffer state (1933). Kwantung army troops ca through (1935) the Great Wall north of Peip from Jehol into the province of Chahar which between Jehol and Mongolia. The principal Chin officials in Peiping and Tientsin and in Hopei a Chahar provinces were turned out and repla by new men acceptable to the Japanese lead In effect Chahar was made a demilitarized z by June of 1935.

Fighting broke out between China and Ja (July 7, 1937) and later large areas of the coa provinces were occupied by the Japanese invad Japan set up (1937) a so-called independent g ernment in Peiping, called "The Provisional G ernment of the Republic of China" and (19 established a second regime "The New Reform Government of the Republic of China" at Nanking.

Under the terms of surrender in World War Japan returned to China all the seized territor After more than seven years of war with Ja (July 7, 1937-Aug. 5, 1945), internal disturban arose involving the Kuomintang, Communists various other factions. Manchuria was lost to Chiang regime (Oct. 30, 1948) and other la areas of northern China fell to the Chinese Co munist armies in 1949. Chiang Kai-shek, presid since 1943 and virtual ruler of China since 1 retired as active president Jan. 21, 1949, and succeeded by his appointee, Li Tsung-jen, pres Acting President. The premier is Yen Hsi-sh (June 3, 1949).

Education and Religion. China has all the portant religions of the world, but none of its o Confucianism and Taoism are considered by Chinese not as religions, but as political phil phies and teachings. Buddhism was introdu from India and has the most followers, though influence has declined. Mohammedanism Christianity came from Europe. It is estim that there are 48,000,000 Mohammedans with m than 42,000 mosques, and 2,642,166 Catholics 618,600 Protestants.

Since 1922 the education system has been mo led after the American system. The Governm promulgated (1944) a law providing for the es lishment of one public school for every "p (100 to 150 households) in the country in a m to combat illiteracy. Education in the school free and attendance compulsory for children tween the ages of six and 12.

In 1946-1947 there were 290,617 primary sch in China with an enrollment of 23,813,705. Sec ary schools numbered 5,892 (1947) with 1,878 pupils. Universities and colleges totaled 207 (1 with 148,000 students.

Defense. China has a national Army which its recruits through a system of compulsory citi ship service for a period of three years. The also the regular Army with voluntary and ob tory service for six years and with extended se

up to the ages of 20 and 25. The Government and Communist armies each had an estimated strength of 1,500,000 regular troops in 1949. The Nationalist Chinese Navy, in the process of reorganization, includes (1948) three cruisers, five destroyers, one corvette and a number of miscellaneous craft.

Currency. The unit of currency is the gold yuan established Aug. 19, 1948) with a value of 25 American cents. This valuation declined sharply during the civil strife in 1948-1949.

MONGOLIA

Mongolia, although nominally of China, was somewhat shaken loose from Chinese adherence after World War I.

Outer Mongolia is a republic (Mongolian People's Republic). It is bounded on the north by Siberia, on the west by Sinkiang, on the south and east by China Proper and Manchuria. Its area is about 622,744 square miles; the population is about 850,000. The capital is Urga.

At a plebiscite (Oct. 20, 1945) the Republic voted to sever all ties with China and to become an independent nation. Outer Mongolia governs itself on the Soviet principle.

Inner Mongolia consists of three provinces: Suiyuan, Chahar and Ninghsia. Under the pressure of Japanese militarists an autonomous government was set up (April 23, 1934) in Pailingmiao to handle local affairs. An autonomous Republic was set up (May 12, 1947) by Chinese Communists.

SIN-KIANG (Chinese Turkestan)

Sinkiang, known as the New Dominion, comprises Chinese Turkestan, Kulja and Kashgaria. There are Turks, Mohammedans and Chinese residents there. Along the Kashgar and Yarkand Rivers there is much irrigation, and cereals, fruits and vegetables are grown with wool, cotton and silk production. Tihwa is the chief town. The population of Sinkiang (estimated 1948) is 4,047,452 and its area at 633,802 square miles.

It is from Sinkiang that much jade comes. In view of its propinquity to Soviet Russia this province, especially economically, has been under the influence of the Russians for more than a decade. With the opening up of highways and airways Sinkiang is now much closer to the rest of China.

TIBET

Tibet, a country of Asia, is bounded on the north by China and on the south by Nepal, Burma and the Dominions of India and Pakistan. Nominally it is under the rule of China. The country is little known, situated between the Himalaya and Kunlun Mountains and hitherto practically shut to strangers. The trade is with India mostly, being carried on through lofty passes, some of which are 14,000 to 18,000 ft. high, which are impassable in winter. China's hold on Tibet was visibly loosened when the revolution (1911) broke in China. The Tibetans expelled the Chinese garrisons. But since the establishment of the National Government (1927) a great deal has been accomplished to bring Tibet closer under the influence of Chinese Government. The capital is Lhasa. The area of Tibet is 475,000 square miles with wide areas unexplored. Population is estimated 1,000,000 in July, 1948.

The head of the government is the Dalai Lama who acts through a regent.

The religion is Lamaism, a modified form of Buddhism.

The highest grade musk is obtained from the muskdeer, now becoming very scarce in Tsarung mountains in Southeastern Tibet.

MANCHURIA (NORTHEASTERN PROVINCES)

Manchuria, the former Manchu state, with an area of 404,428 square miles; population (1940) including Jehol Province, 43,233,954, is bounded on the north by Siberia (U.S.S.R.), on the east by Siberia and Korea, on the south by the Yellow Sea and China, and on the west by China, Siberia and Mongolia.

Wrested from China by Japan (1931), Manchuria was proclaimed an independent nation (Feb. 18, 1932) and came into existence (Mar. 1, 1932) at Mukden when it was renamed Manchukuo. At the close of the Sino-Japanese war (1945) the territory was returned to China, the area divided into nine provinces and the name changed back to Manchuria.

The soil of Manchuria is one of the richest in the world. The area of land capable of cultivation totals 27,853,640 acres, of which 11,409,585 acres are tilled. The principal crops are soy beans, kaoliang, millet, corn, wheat and rice. Lumber is an important product. The land possesses great mineral wealth, including iron, gold, coal, magnesite, and oil shale.

FORMOSA

Formosa is an island between the Philippines on the south and Japan to the north with the China Sea on the west and the Pacific Ocean on the east. A range of mountains from the north forms the backbone of the island with the highest peak, Mt. Nitaka, 14,500 feet. The eastern half is exceedingly steep and craggy but the western slope is flat, fertile and well cultivated, yielding two rice crops each year. The area is 13,800 square miles and the population (1948) 6,384,019.

The principal crops, besides rice, are tea, sugar, sweet potatoes, ramie, jute, tumeric and camphor. Minerals include gold, silver, copper and coal.

Formosa was ceded by China (1895) to Japan after the Sino-Japanese War and was returned to China as a province (1945) after the surrender of Japan in World War II.

The Pescadores (Pheng-hu) a group of islands with an area of approximately 50 square miles and a population bordering on 60,000, are between Formosa and the coast of China, by whom they were ceded to Japan (1895). The islands remained under Japanese rule until restored to China (1945) after the end of World War II and are administered as a part of Formosa. Sugar cane is the most important agricultural product.

KWANTUNG

Kwantung is the southern part of the Liaotung peninsula, the southernmost portion of Manchuria, bounded on the east by the Bay of Korea, on the south by the Yellow Sea and on the west by the Liaotung Gulf. The capital is Dairen. The area is 1,438 square miles; the population (1935), 1,656,726.

Russia leased Kwantung from China and constructed the strongly fortified city of Port Arthur and the nearby commercial ice-free port of Dalny (Dairen) chief seaport of Manchuria and southern terminus of the South Manchurian Railroad which connects with the Peiping and Korean lines at Mukden and with the Trans-Siberian at Changchun.

Japan seized Port Arthur (1905), and at the close of the Russo-Japanese War took over the lease in the Treaty of Portsmouth (1905). It was restored to the U.S.S.R. by the Yalta Agreement (Feb. 11, 1945), which agreement also internationalized Dairen.

Colombia

(LA REPUBLICA DE COLOMBIA)

Capital, Bogota—Area, 439,830 square miles—Population (estimated 1948), 10,777,000.

Descriptive. The Republic of Colombia, situated in the extreme northwest of South America, extends up the Isthmus of Panama to the Republic of Panama. It has a coast line of 913 miles on the Pacific Ocean, and 1,094 miles on the Caribbean Sea. It has as neighbors Venezuela and Brazil on the east, and Ecuador and Peru on the south.

Three great ranges of the Andes, the Western, Central and Eastern Cordilleras, run through the country from north to south. The eastern range consists mostly of high table lands, cool and healthful, and densely populated. The Magdalena River, in the east, rises in the high Andes and flows north into the Caribbean Sea, 12 miles from Barranquilla. It is navigable for more than 800 miles.

Snow-crested mountains standing almost directly over the equator are one of many examples of scenic splendor in Colombia. Tourists are also attracted by the famous Tequendama Falls, a natural wonder near Bogota.

Bogota, the capital (founded in 1538), is situated in the Andes 8,660 ft. high. To reach it by the Magdalena River and rail requires nearly a week; but a daily airplane service makes it in 2½ hours.

There is tri-weekly airplane service to the United States.

Resources and Industries. The soil of Colombia is fertile and agriculture is a growing industry. Mild coffee is produced extensively. Rice, tobacco and cotton are cultivated, besides cocoa, sugar, tagua, wheat and bananas. Dyewoods are important commercially. Rubber, tolu balsam and copaiba trees are being exploited.

The country is rich in minerals. Seventy-five miles from Bogota are the Muzo emerald mines which have been in operation for four centuries. Near Somondoco are the Chivor emerald mines. Other minerals are gold, silver, copper, lead, mercury, cinnabar, manganese, platinum, coal, iron, limestone, salt and petroleum.

Colombia's principal imports are textiles, metallic products, transport materials, food, chemicals and machinery.

History and Government. The country, conquered and ruled by Spain for 300 years, won its freedom in the revolt of the Spanish-American colonies (1810-1824), the liberator, Simon Bolivar, establishing the Republic of Colombia (1819). Venezuela and Ecuador withdrew (1829-30).

The Congress consists of a Senate of 63 members, elected for a term of four years, and a House of Representatives of 131, elected directly by the peo-

ple every two years. Women are barred from voting and holding elective office. The President is elected by direct vote for four years and is ineligible for the following term. The President is Mariano Ospina Perez, Conservative (elected May 5, 1946).

Education and Religion. The population is mainly whites and half castes with only 105,807 Indians. Education is free but not compulsory. The National University (founded 1572) is in Bogota. There are four other universities. Roman Catholic is the prevailing religion but all are tolerated. Spanish is the language of the country.

Defense. Military service is compulsory between the ages of 21 and 30 with actual service for one year. The Navy consists of two destroyers and small boats. The Air Force comprises fighting and training squadrons.

Currency. The monetary unit is the gold peso.

Costa Rica

(REPUBLICA DE COSTA RICA)

Capital, San Jose—Area, approximately 23,000 square miles—Population (estimated 1948), 813,000.

Descriptive. Costa Rica, a Republic, in the southern part of Central America, has Nicaragua for its neighbor on the north and Panama on the south. The lowlands by the Caribbean have a tropical climate. The interior plateau, with an altitude of about 4,000 ft., has a temperate climate.

San Jose, the capital, situated inland—103 miles by rail from Puerto Limon on the Atlantic Ocean; 72 by rail from Puntarenas on the Pacific Ocean—is a city of great charm with Spanish balconies and patios. The crater atop Poas Volcano is the largest in the world. Puerto Limon occupies the site where Columbus landed on his fourth and last visit to America.

Costa Rica is well served by steamship and airplane services. There are two international airports, one at Santa Anna, about 15 miles due west of San Jose and another at Sabana, only five minutes from the heart of San Jose.

Resources and Industries. Coffee of a high quality is the chief crop and export, followed by bananas and cocoa. Corn, sugar cane, rice, tobacco and potatoes are cultivated. The distillation of spirits is a government monopoly.

The forests are extensive, but the lumber industry is negligible. Gold and silver are mined on the Pacific slope. Other minerals are quartz, alabaster, granite, oil, alum, slate, onyx, mercury, sulphur and copper.

Chief imports are flour, textiles, sugar, rice, industrial machinery, gasoline, leather, hardware and tools.

History and Government. Although once a part of the Confederation of Central America (1824-1829), Costa Rica has been independent since 1821. The Constitution (adopted Dec. 7, 1871) has been many times modified. The legislative power is vested in a Chamber of Deputies, 44 in number, with four-year terms, one-half elected directly every two years by male suffrage. The President, elected for four years, appoints a Ministry of nine. The President cannot be re-elected to an immediately succeeding term. Voting is compulsory. For failure to vote the first time there is a fine of five colones, the second time a fine of fifty colones with a ban against holding office for two years.

The President-elect is Otilio Ulate (elected Feb. 8, 1948). The country actually is temporarily ruled by a revolutionary Junta headed by Col. Jose Figueres which took command following a revolution arising out of disputes over election of President Ulate.

Religion and Education. Roman Catholic is the religion, but the nation has religious liberty. Primary education is compulsory and free. The National School of Agriculture is in San Pedro and the National University in San Jose. The language of the country is Spanish. English is taught in the public schools.

Defense. The standing army, by convention (1923) among the six Central American or Middle American States, is limited to 500, but with the reserve and national guard, the protective forces are much larger.

Currency. The monetary unit is the colon.

Cuba

(REPUBLICA DE CUBA)

Capital, Havana—Area, 44,206 square miles—Population (estimated 1947), 5,130,000.

Descriptive. Cuba, the "Pearl of the Antilles," largest island of the West Indies, lies among the Gulf of Mexico, the Strait of Florida and the Atlantic Ocean on the north and the Caribbean Sea on the south. Key West, Fla., is about 90 miles distant. The Windward Passage, 50 miles w separates it from Haiti to the east, and Jama (British) lies 85 miles to the south. Yucatan is miles to the west. Its length is 730 miles, and breadth averages 50 miles, with a maximum of miles. The coast line, including the larger keys about 2,500 miles in length. It has numerous h bors, notably that of Havana, one of the finest safest in the world, also Guantanamo, and Ba Honda. Guantanamo was leased for an ann rental of $2,000 to the United States (July 2, 19 and has since been maintained as a naval base.

Mountains rise in Pinar del Rio Province in west, and in Oriente in the east, wh they reach a general elevation of about 3, ft.; with Pico Turquino (8,320 ft.) as the high point. Santa Clara is rough and broken, Matanzas and Havana are flat and rolling.

The soil is alluvial and under the tropical h and humidity the vegetation is of rare richn It is estimated officially that 8,628,434 acres covered with dense forest. The royal palm t dominates every landscape. All tropical fruits vegetables flourish. At Havana the mean tempe ture is 76 and the mean rainfall 40.6 inc

Resources and Industries. Commercial relati between Cuba and the United States have b specially close since Cuban independence.

Sugar is the predominant crop, and 2,285, acres are given over to growing it. Cuba is largest cane sugar producer in the world. bacco raising and the manufacture of cigars cigarettes rank next in importance. The amo of sugar exported to the United States is in cordance with a quota established by the Washi ton government.

Molasses and other derivatives with sugar, rep sent 73% of the exports. Tobacco is cultiva chiefly in the famous Vuelta-Abajo district. Ot agricultural products are coffee, pineapples, nanas, citrus fruit and cocoanuts. Cabinet wo (mahogany and cedar), dyewoods, fibres, gu resins and oils are important commercially. Ir copper, manganese, gold, petroleum and salt some of the minerals.

The livestock industry has been expanded fr an importing to an exporting basis. The last li stock census (1940) reported 5,334,813 head of c tle, the largest ever recorded.

There are more than 3,000 miles of railroa with a main trunk line running across the Isla from Guantanamo Bay to Guane, a distance more than 700 miles. Havana, Camaguey and S Antonio de los Banos are important air bases.

History and Government. The island was disc ered by Columbus on his first voyage of explorat (Oct. 28, 1492). He landed at what is now kn as the Bay of Nuevitas and took possession of country in the name of the King of Spain. It called successively Juana, Santiago and Ave Ma finally regaining its Indian name of Cuba.

Cuba, with the exception of the period (1762- remained a Spanish colony until the sovereig was relinquished (Dec. 10, 1898) under the ter of Treaty of Paris which ended the armed int vention of the United States in the fight of Cubans for freedom. The island assumed a publican form of government (1902) with the C stitution providing for the election of a pre dent for a term of four years (he is ineligible succeed himself); a Vice President, a Senate w eight-year terms and a House of Representati with four-year terms.

The Constitutional Convention (elected Nov. 1939) was inaugurated (Feb., 1940) and draf a new Constitution providing for social secur wages and hours regulations and other refor This Constitution went into effect (Oct. 10, 19 replacing the 1902 Constitution and the consti tional statutes by which Cuba had been gover (1903-1940). Voting is compulsory. The Presid is Dr. Carlos Prio Socarras, elected for a four-y term (May 31, 1948).

A new treaty between the United States Cuba was ratified by the U. S. Senate (1934). superseded that of May 22, 1903, and abando the right of the United States to intervene in internal affairs of Cuba under the Platt Ame ment.

Education and Religion. Education is compuls between the ages of seven and 14. Among higher institutions of learning is the University Havana (founded in 1721). The Roman Cath religion is predominant. The language is Spa with English widely understood.

Defense. Compulsory military service was est lished (Jan. 5, 1942).

Currency. The monetary unit is the peso.

Czechoslovakia

(CESKOSLOVENSKA REPUBLIKA)

Capital, Prague (Praha)—Area, 49,358 squ miles—Population (estimated 1948), 12,339,000.

Descriptive. Czechoslovakia lies athwart the eart of Europe from east to west and, like Switzer-nd, Austria and Hungary, is a land-locked coun-y without direct access to the sea. Its boundaries re, in the north, Germany and Poland; in the outh Austria, Hungary and Rumania; in the west ermany, and in the east Poland and Rumania. Its extreme length is about 600 miles and its width aries from 50 to 100 miles.

There are two extensive mountain systems in zechoslovakia: the Carpathian in the eastern parts f Moravia, Slovakia and Carpathian Ruthenia nd the Sudeten in the west on the German bor-er. Forests are famous for hunting and are he habitat of the bear, the chamois, the ibex, ildcat and wild boars.

The subterranean caverns are among the curiosi-es of Europe; the spas and mineral springs also re noted.

Prague, the capital, has a wealth of medieval rchitecture equalled by few other cities of Eu-ope. More than 3,500 years back there was a ettlement within the territory which is now oc-upied by present day Prague, on the site of the astle of Vysehrad.

Resources and Industries. Czechoslovakia pos-esses one of the richest territories in Europe, both n the matter of natural resources and industrial evelopment. Agriculture and forestry claim 40% of he population. Wheat, rye, barley, oats, potatoes, gar beets, corn and hops are grown in abundance. eer production was enormous. The Skoda muni-on factories in Pilsen were among the most exten-ve and efficient in the world. There were also umerous textile and paper mills, glass, furniture, one, metal and chemical factories. Since 1924, hen the land reform bill was actually followed by he sequestration of the large estates owned by the ormer Austrian aristocracy, the country has been eveloped into a land of peasant holdings. Mineral ealth is great and comprises both soft and hard oal, iron, graphite and garnets, silver, copper, ead, and rock-salt.

History and Government. The Czechs and Slo-aks are two closely related branches of Slav rigin. Each has its own literary language, but a zech understands Slovak without any effort and ce versa. In the ninth century they formed a ngle state, the Great Moravian Empire, which as destroyed during the Magyar invasion of Cen-al Europe in the tenth century. Later the Slovaks ved in the Hungarian and the Czechs in the Aus-ian half of the Austro-Hungarian Empire. Re-gious and political persecutions in the sixteenth nd seventeenth centuries led to an unsuccessful evolt of the Czechs which resulted in the loss of heir freedom at the Battle of the White Mountain ear Prague in 1620.

The Czechoslovak Republic was created after Vorld War I, under leadership of Thomas G. Masaryk and independence was declared (Oct. 8, 1918) after the break-up of Austria-Hungary. t was composed of two closely related Slav na-ons: the Czechs of Bohemia and Moravia-Silesia, nd the Slovaks of Slovakia.

The areas and populations follow:

	Area (sq. mi.)	Population (1930)
Bohemia	20,101	7,109,376
Moravia-Silesia	10,351	3,565,010
Slovakia	18,921	3,329,793

To these were added as a trust several northeast ungary counties, which were called the autono-ous province of Subcarpathian Ruthenia. The establishment of independence marked the cul-ination of the struggle of the Czechs and Slovaks or freedom, the beginning of which went to the liddle Ages, when the ancient independent king-om of Bohemia was absorbed within the Habsburg Monarchy.

The first Constitution of the republic was adopted y the National Assembly (Feb. 29, 1920), providing or a National Assembly with the legislative au-hority over the whole country, Subcarpathian uthenia to have autonomy. The Assembly, elected y universal suffrage, and with proportional repre-ntation, is composed of a Chamber of Deputies, x-year tenure, and a Senate, eight-year tenure; oth in joint session to elect the President of the epublic for a seven-year term.

A four-Power conference held in Munich (Sept. 9, 1938) broke up the Czechoslovak Republic fol-wing Germany's demands for the "Sudeten" nds, the strategically important Bohemian moun-in bastion. Governments participating in the unich conference were Great Britain, France, ermany and Italy. Bohemia and Moravia were rganized as a protectorate of the Reich until the nd of World War II. Territory seized by Germany, ungary and Poland was returned to Czechoslo-kia by order of the Allied Control Council (1945). ubcarpathian Ruthenia was transferred to the oviet Union by the Treaty of Moscow (July 29, 945).

A new Constitution, heavily concentrating power in the National Assembly, elected (May 30, 1948) under a single-list vote and dictated nominations system, was unanimously approved by the Chamber of Deputies (May 9, 1948) and signed by then Premier Gottwald (June 8) upon President Benes' refusal to do so.

The nationalization law, passed by the Provisional Parliament and signed by President Benes (1945) has transferred Czechoslovakia into a highly socialistic nation. The law provides for State ownership of commercial banks, insurance companies, mines, mineral deposits, defense industries, steel plants, and other industries.

In the elections (May 26, 1946) the Communists were victorious. The total vote for the Leftist bloc of communists, Social Democrats and Slovakian Laborites was 3,601,669 against 3,456,687 for the Rightist bloc of National Socialists, People's party, Slovakian Democrats and Slovakian Freedom party.

Communists completely took over control of the Government (Feb. 25, 1948) when President Benes acceded to demands that Premier Gottwald receive permission to install a Cabinet of his own choosing. The Governments of the United States, Great Britain and France officially condemned the Communist coup (Feb. 26).

The President is Klement Gottwald, Communist leader, appointed by Parliament (June 14, 1948) following the resignation of Dr. Eduard Benes, veteran Czech statesman who had been President (since Dec. 18, 1935). The Premier is Antonin Zapotocky (appointed June 14, 1948).

Education and Religion. An estimated 75 percent of the population is Roman Catholic, the rest Protestant.

Institutions of higher learning are the Czech University in Prague (founded in 1348); the Universities of Brno and of Bratislava and the German University in Prague.

Defense. Universal military service for all between 20 and 50 was re-established in 1945, with service for two years.

Currency. The monetary unit is the koruna.

Denmark
(KONGERIGET DANMARK)

Capital, Copenhagen—Area 16,575 square miles —Population (estimated 1948), 4,190,000.

Descriptive. Denmark, a kingdom, occupies the peninsula of Jutland, thrusting out to the north from Germany, which is its only land neighbor, between the North Sea and the Baltic Sea, with the adjacent islands. The Skagerrak separates it from Norway, and Kattegat from Sweden. The country consists of low, undulating plains.

Resources and Industries. Danish dairy products are world famous and the country in normal times exports more butter than any in the world and produces more bacon than any other with the exception of the United States. The fisheries also are important. One third of the population lives by agriculture which occupies more than 70 percent of the usable land.

The first cooperative consumers society was established (1866) and today the system has 1,964 affiliated societies and includes 370,000 households, about 45% of the whole population, and employs about 21,000 workers. Danish farmers operate more than 1,400 co-operative dairies, 60 co-operative bacon factories and numerous slaughterhouses.

History and Government. The origin of Copenhagen (Köbenhavn) dates back to ancient times, when the fishing and trading place named Havn (port) grew up on a cluster of islets in the Sound, but Bishop Absalon (1128-1201) is regarded as the actual founder of the city. On one of the islets he built a stronghold against the pirating Wends and the remnants of this still exist underground in front of Christiansborg. Elsinore (Helsingör) contains the reputed grave of Hamlet, the Danish prince immortalized by Shakespeare. A great attraction here is the castle of Kronberg with historic casemates and old bastions, the bronze guns of which once commanded the Sound when duties were exacted from every passing vessel.

The King and the Rigsdag (Diet) jointly hold legislative power. The Rigsdag is of two bodies—the Folketing (House of Commons), with 149 members, and the Landsting (Senate), with 76 members. Men and women of 25 years of age have the franchise.

Social legislation was greatly advanced and the laws codified and simplified, placing Denmark on a level with the most advanced countries, by the Social-Democratic-Radical government which came into power (1929). Four Acts of Parliament (passed May 20, 1933) cover public assistance, health insurance, disability and old-age pensions, workmen's compensation and unemployment insurance.

The King of Denmark is Frederik IX (born March 11, 1899) who succeeded to the throne on the death of his father, King Christian X (April 20, 1947.) He married Princess Ingrid of Sweden

and they have three daughters who have no right to succession to the throne. The heir presumptive is Prince Knud, brother of King Frederik IX (born July 27, 1900) who married Princess Caroline Mathilde of Denmark (Sept. 8, 1933.) They have two sons and one daughter.

The Premier is Hans Hedtoft, Social Democrat (appointed Nov. 11, 1947).

Education and Religion. The Evangelical Lutheran is the established religion, but there is complete religious tolerance. Education is compulsory. The University of Copenhagen was founded in 1479.

Defense. The Army is in the form of a national militia, every able-bodied man being liable for service from 20 to 36. The Navy comprises fleet and coast defense forces with an aircraft fleet of 65 units.

Currency. The monetary unit is the krone.

The **Faroe Islands** in the North Atlantic, about 300 miles northwest of the Shetlands, belong to Denmark. Great Britain established a protectorate over the islands (April 12, 1940). The islands have a combined area of 540 square miles and a population (1935) of 25,744. The Assembly proclaimed the independence of the Islands (Sept. 18, 1946) after a referendum had voted in favor of the action. Local autonomy, except in foreign affairs, was confirmed by a bill signed by King Frederik (March 30, 1948).

GREENLAND

Greenland, a huge island between the North Atlantic and the Polar Sea, is separated from the North American continent by Davis Strait and Baffin Bay. It extends northward from 60°-86° N. lat. Its total area, is 827,300 square miles, 705,234 of which are ice-capped. Most of the island is a lofty plateau 9,000 to 10,000 ft. in altitude. The average thickness of the ice cap is 1,000 ft. The population (1941) was 18,000, composed of 16,222 natives and 408 Danes. The capital is Godthaab. Greenland is the only Danish colony.

Greenland trade has been a state monopoly of Denmark since 1776. Denmark declared the entire island Danish territory (May 10, 1921) and (June 16) ordered all coasts and islands closed to non-Danish vessels.

The deposits of cryolite are the largest in the world. Fish, fur and graphite are the other exports.

Dominican Republic
(REPUBLICA DOMINICANA)

Capital, Ciudad Trujillo—Area, 19,332 square miles—Population (estimated 1948), 2,214,000.

Descriptive. The Dominican Republic occupies the eastern two-thirds of the Island of Hispanola (called La Espanola by Columbus), second largest of the Greater Antilles, situated between Cuba on the west and Puerto Rico on the east. The boundary between it and the Republic of Haiti, which occupies the western part of the island, is 193 miles long. It has a coastline of 1,017 miles. Climate is generally sub-tropical.

Resources and Industries. The land is very fertile, about 15,500 square miles being cultivable; agriculture and stock raising are the principal industries. Sugar, cacao, coffee, rice, corn and tobacco are the chief products.

The country contains deposits of silver, platinum, copper, iron, salt, coal and petroleum, but the mining industry is undeveloped.

Chief manufactures are rum, alcohol, molasses, textiles and apparel, chemicals, shoes and furniture.

History and Government. The Republic was formed (1844) after the successive expulsion of the Spanish, French and Haitians. Santo Domingo was long the center of Spanish power in America.

A new constitution was proclaimed (June 20, 1929) and modified (June 9, 1934) and again (Jan., 1942). The President is elected by direct vote every five years. The National Congress consists of a Senate and a Chamber of Deputies. All persons over 18 have the right of suffrage. The President is Rafael Trujillo (elected May 16, 1947) for his fourth term.

Education and Religion. The population is composed of whites, mulattoes, and a 19 percentage of negroes. The State has no religion and there is toleration for all faiths. The population is almost wholly Roman Catholic. Education is free and compulsory. The language is Spanish, but English is widely spoken. The University of Santo Domingo (founded 1538) was established by the friars of the Dominican Order.

Defense. The Army consists of approximately 4,000 officers and men. The Navy operates a coastal patrol with gunboats. There is a small aviation corps.

Currency. The monetary unit since October, 1947 is the peso, at par with the U. S. d United States currency which has circulated July 1, 1897, is being replaced.

Ecuador
(REPUBLICA DEL ECUADOR)

Capital, Quito—Area (estimated), 175,830 s miles—Population (estimated 1948), 3,362,000.

Descriptive. Ecuador, on the Pacific Coa South America, extends from about 100 miles of the Equator to 400 miles south of it. bounded by Colombia on the north and Peru o east and south. Two cordillera of the Andes the country, with a dozen peaks above 16,000 height, of which Chimborazo (21,424 ft.), Cot (19,550 ft.), Cayambee (19,534 ft.) and Ant (19,260 ft.) are the highest.

Although a century-old boundary dispute Peru was settled (May 20, 1944), no definite f of the area of the country can be given, the c lations of various geographers varying widely.

Included in the area of Ecuador but not population are the Galapagos Islands with an of 3,028 miles. The chief islands in the archip are San Cristobal (Chatham), Santa Maria (F na), Santa Cruz (Indefatigable), San Salv (James) and Isabella (Albemarle).

Resources and Industries. The country is ri undeveloped minerals. Rich silver ore is foun Pillzhum in Cañar. Petroleum output is increa Large deposits of copper, iron, lead, coal and phur are known to exist. Agricultural product clude rice, cereals, potatoes, fruits, cocoa, c Wild rubber, mangrove bark (for tanning) alli skins, and kapok are exported commercially. so-called Panama or "Jipijapa" hats, mad Toquilla straw, are manufactured in Ecuador.

Ecuador is the chief source of the suppl balsa, a light wood, half as heavy as cork exceptionally strong and used in aircraft and rine construction.

The chief imports are cotton goods, me jewelry, foodstuffs, liquors, drugs, chemi woolen, silk, rayon and linen goods. The U States ranks first as the source of Ecuado imports.

History and Government. Following three turies of Spanish rule, the Presidency of (Ecuador) was united to the Republic of Colon Dec. 17, 1819, from which it seceded May 13, and became a Republic.

Under the Republic's new Constitution (pro gated March 6, 1945), the President is electe rectly by the people for a four-year term and Congress consists of a Senate and Chambe Representatives (Diputados).

The President is Galo Plazo Lasso, Nat Democrat (elected June 6, 1948).

In elections to the Constitutional Congress (30, 1946) the Conservatives defeated the n created Republican Union party. The Conse tives (Government party) gained 33 seats, Independents, 6; dissident Liberals, 20; diss Leftists, 2; Democrats, 1.

Education and Religion. Roman Catholic is dominant religion. Primary education is comp ory.

Defense. Military service is compulsory.

Currency. The monetary unit is the sucre.

Egypt
(MISR)

Capital, Cairo—Area, estimated 386,000 s miles—Population (census 1948), 19,528,000.

Descriptive. Egypt occupies the northeast co of Africa with the Mediterranean Sea on the n and the Red Sea on the east. Beyond that, bet the Gulf of Suez and the Canal and the Gu Akabah, lies the Sinai peninsula, 150 miles flat and sandy. On the south is the Anglo-Egy Soudan, the parallel of the 22° north latitude f ing the boundary. To the west is Libya.

Cairo, the capital of Egypt, is a city of exqu conglomerate charm, whose streets resound to ring of three civilizations. Hundreds of mos attract the eye of the tourist. Excursions conducted to the Pyramids and Sphinx of Giza the ruins of ancient Memphis, and the monum at Luxor and Karnak.

The Valley of the Nile and the delta are real Egypt of 60 centuries. Here are 13,600 sq miles of cultivated area; 1,900 square miles taken up by canals, roads, date and other cultural plantations, and 2,850 by the surfa the Nile, its marshes and lakes. The Nile h length of 4,000 miles from the Victoria Nyan the Mediterranean. In the 960 miles of its c through Egypt it receives no tributary str At Cairo the maximum rise (average about 13

reached the beginning of October. The river arries a heavy traffic.

Great dams regulate the flow of the Nile and ne of them, the Gabel Awlia dam, is the longest the world, measuring 16,400 ft.

The Nile irrigates 5,400,000 acres and this number may be increased to 7,600,000 by engineering nprovements. King Mena (about 4000 B. C.) is redited with being the founder of the first cientific system of using the water of the Nile for rigation purposes, and that plan, the basin sysem, is still used for all the land south of Deirut Upper Egypt.

By this system the land is divided into rectangular areas from 5,000 to 50,000 acres in size and rrounded by banks; water is admitted to these asins during the flood period (August) to an verage depth of three feet and is left on the land or about 40 days; it is then run off and the seed own broadcast on the uncovered land. A system f perennial irrigation by digging deep canals was troduced (1820) by Mohammed Ali Pasha; this as restored and greatly improved during the ritish occupation. Two million acres of cultivable land were added, and under the basin ystem, cereals, beans and lentils are grown; under he new perennial system cotton, wheat, cereals, eans, sugar cane, vegetables and fruit are the hief products. Two and three yields a year are rown.

The Suez Canal, 103 miles long, opened to navigation Nov. 17, 1869, connects the Mediterranean ith the Red Sea. The canal is open to all nations nd is free from blockade.

Resources and Industries. A variety of minerals found in Egypt, principally phosphate rock and etroleum. Others are ochres, sulphate of magnesia, alc, building stones, gypsum, natron, salt, gold, lum, copper, beryl, granite and sulphur.

The principal imports are textiles, mineral, hemical and pharmaceutical products; wood and ork articles; paper; metals; machinery and motor ehicles. Exports are chiefly agricultural products nd cotton.

History and Government. Four-fifths of the eople are of ancient Egyptian stock, whose forears by their labor built the pyramids for their ings, and whose physical characteristics were picured in the mural paintings of the temples and ombs and on the papyrus scrolls 6,000 years ago.

Originally a part of the Turkish Empire, with nore or less semi-independent status, England eclared a Protectorate over her temporarily as a ar measure in December (1914), and so remained ntil the Declaration of Feb. 28, 1922, when Engand formally recognized Egypt as a sovereign, independent State. The then Sultan assumed the ew title of King as Fouad I (March 15, 1922). n Anglo-Egyptian Treaty of Alliance was signed t London (Aug. 26, 1936) whereby England was llowed, as the ally of Egypt, the presence of a orce of 10,000 men and 400 airplanes at the Suez anal for twenty years, till such time as Egypt ould build up a force sufficiently powerful to take ver such duties; this Treaty also accorded the ritish, as the ally of Egypt, the use of Alexandria nd Port Said as naval bases; and, as such, further ermitted her to move troops over Egyptian terriory in the event of war or threat of war.

King Farouk I was born Feb. 11, 1920, son of the ate King Fouad I and Queen Nazli; succeeded his ather April 28, 1936. Married Farida Zulfikar Jan. 0, 1938; divorced Nov. 17, 1948. Children: Princess erial, born Nov. 17, 1938; Princess Fawzia, April , 1940; Princess Fadia, Dec. 15, 1943. The heir-resumptive is Prince Mohammed Aly, born Nov. 9, 875, first cousin to the King.

The Constitution of 1923 provides for a Parliament composed of a Senate (Maglis al Shuyukh) nd a Chamber of Deputies (Maglis al Nuwwab). Two-fifths of the Senators are appointed by the King, the remainder elected directly by the people, s are the Deputies. The Premier is Hussein Sirry Pasha, appointed July 25, 1949.

Education and Religion. Moslems form 91.40% f the population, Christians 8.19% and Jews .40%. Illiteracy, which was high until some years go is being eradicated by the Government. Educaion is now compulsory for all children between the ges of 7 and 12. There is a famous seat of Moslem earning in the University of Al-Azhar in Cairo, ounded with the Metropolis about the year 968 .D.; and another, quite modern and up-to-date, he Fouad I University, in Giza, opposite Cairo, ounded in 1908. A new university, Faruk I University, has been established in Alexandria. The merican University in Cairo is the only American niversity in Egypt.

Defense. Military service is compulsory for all nen fit to serve with recruits called to colors on a arge scale in the expansion of the Army. The Air Force also has been expanded.

Currency. The monetary unit is the Egyptian pound.

Estonia

(EESTI VABARIIK)

(Estonian Soviet Socialist Republic)

Capital, Tallinn—Area, (1940), 18,353 square miles—Population (1940), 1,134,000.

Descriptive. Estonia comprises the former Russian Empire province of Estonia, the northern part of Livonia, and western parts of the Government of Pskow and Petrograd. It is bounded by the U.S.S.R. on the east, Latvia on the south, the Gulf of Riga and the Baltic Sea on the west, and the Gulf of Finland on the north. The Estonians are of Finnish-Ugrian origin.

The country is a low plain interspersed with a series of rolling hills from north to south. The coast line is 725 miles long.

Resources and Industries. Estonia has oil shale deposits distributed over an area of 2,000 square miles.

Agriculture is the chief occupation, engaging 60 percent of the population. Rye, oats, barley, flax and potatoes are the principal crops. Dairying and cattle raising are important. Manufactures include cotton, woolens, paper, timber, matches and distilled products.

The chief exports are dairy products, paper, flax, potatoes, timber, cellulose and meat. Imports are mainly cotton, woolens, sugar, iron and steel, and fertilizers.

History and Government. Estonia declared her independence from Russia (Feb. 24, 1918) after the Bolshevist coup d'etat. The country was occupied (June, 1940) and incorporated into the U.S.S.R. This action has not been recognized by the United States.

Estonia is known as a country of quaint old towns. Tallinn was founded (1219) by King Valdemar II of Denmark on the site of an ancient Estonian fortress. It has been held successively by Danes, Germans, Swedes and Russians and Germans. Three churches, the castle and a number of houses and part of the town walls and towers date back to the Danish domination. The bastions surrounding the Old Town gate were constructed during the Swedish period. Another interesting mediaeval town is Narva, founded in the 13th century. It contains a fortress built by the Russian Grand Duke Ivan III (1492).

Education and Religion. There is no state religion; 78.6% of the population are Lutherans, 19% Greek orthodox. Education is free. There is a famous university in Tartu (founded in 1632) and a Technical University in Tallinn.

Ethiopia

(ABYSSINIA)

Capital, Addis Ababa—Area, 350,000 square miles —Population (estimated 1947), 15,000,000.

Descriptive. Ethiopia (or Abyssinia), a kingdom, is a mountainous volcanic country in northeast Africa, bounded by Eritrea (Italian), French Somaliland and British Somaliland on the northeast, Italian Somaliland on the southeast, Kenya Colony (British) on the south, and the Anglo-Egyptian Soudan on the west.

Resources and Industries. The agricultural and mineral resources of the country are comparatively undeveloped, and its wealth of water power is unused.

Cattle, sheep and goats are bred. Horses are small but sturdy and are widely used as polo ponies; mules and donkeys are raised. Cotton, sugar-cane, date palm and coffee are extensively cultivated. The coffee is of three types—Harari (long berry Mocha), Jimma and Sidamo. There is also a wild berry known as Abyssinian coffee. Other important products are hides and skins, wax, barley, millet (dhurra), wheat, gesho (which serves as a substitute for hops) and tobacco. Rubber trees are numerous. Iron is manufactured into spears, knives and hatchets. Gold and other minerals in small quantities not commercially exploited, coal, copper, sulphur, potash and salts also are found.

Trade is chiefly in the export of hides and skins of cattle, goats, sheep, leopards and monkeys. Imports are salt, cotton pieces, goods and yarns, building materials and petroleum products.

History and Government. Italy, after having broken the treaty of friendship and arbitration with Ethiopia which she had signed (1928) invaded the country (1935) without declaring war, with modern arms, airplanes and gas and subjugated it. The Emperor fought with his armies until he was forced to withdraw, leaving for Europe to appeal to the League of Nations for help.

British and Imperial forces occupied Ethiopia (1941) and the Emperor Haile Selassie (born July 23, 1892) was again proclaimed ruler of his country.

Education and Religion. Many Ethiopians adhere

to the Coptic branch of Christianity. The Coptic Patriarch of Alexandria has been the supreme head of the church since the diffusion of Christianity in the fourth century, appointing the Abuna, or Head Bishop of Ethiopia.

Christians predominate in the central, northwestern and northern portions of the country; Mohammedans in the southeastern (Harar and the Ogaden, Jimma and Galla Sidamo) region and parts of the northwest territories. Pagans are scattered throughout the country, particularly in the southeast, south and southwest and along the Sudan borders.

The estimated religious populations follow:

Christians (Amhara and Tigreans) 8,500,000
Mohammedans 2,500,000
Pagans 4,000,000

There are a number of elementary and secondary schools in Addis Ababa, Dessie and Jimma, and government schools for Moslems in several cities. English is the chief foreign language taught in the schools.

Defense. The Army numbers approximately 10,000.

Currency. The monetary unit is the Ethiopian dollar.

Finland

(SUOMEN TASAVALTA)

Capital, Helsinki—Area, 130,165 square miles—Population (estimated 1948), 3,958,000.

Descriptive. The Republic of Finland is bounded on the north by Norway, on the East by the U.S.S.R., on the south by the Gulf of Finland, and on the west by the Gulf of Bothnia, Sweden and Norway.

The lake and canal waterways are navigable for 3,000 miles. Notable are the mighty Imatra rapids of the river Vuoksi.

Resources and Industries. Although extending far north into extremely cold latitudes, with rugged climate and topography, Finland is an agricultural country. Lumbering is the most important industry. The principal crops are rye, barley, oats, potatoes and hay. Other chief industries in the order of their importance are—paper and pulp; iron and mechanical works; textiles; leather, rubber and fur; and chemicals.

The cooperative system has worked throughout Finland for nearly 40 years with marked success.

History and Government. Finland formed part of the Kingdom of Sweden (1154-1809), when it became an autonomous Grand Duchy of the Russian Empire. The country declared its independence (Dec. 6, 1917), established a Provisional Government, and became a republic July 17, 1919.

Finland was attacked by the Union of Soviet Socialist Republics (Nov. 30, 1939) and made peace after three months of fighting. Through the peace (March, 1940) Finland ceded to the U.S.S.R. 16,173 square miles of territory. All this territory was recovered (1941) in the war between Germany and the U.S.S.R. in which Finland became involved as cobelligerent with Germany when the U.S.S.R. renewed its attack (June, 1941) on Finland. According to terms of the armistice between Finland and the U.S.S.R.-Great Britain, Sept. 19, 1944, Finland ceded to the U.S.S.R. the Petsamo area and leased the Porkkala headland for 50 years for use as a Russian base.

Finland signed (April 6, 1948) a ten-year friendship and mutual assistance pact with the U.S.S.R.

The President is chosen for a term of six years by an Electoral College of 300 named by direct vote; he appoints the Cabinet. Juho K. Paasikivi was elected President by Parliament (March 9, 1946). The Premier is Karl Fagerholm, Social Democrat (appointed July 1948).

There is a single legislative chamber, the Diet (Eduskunta) and the voting system is designed for proportional representation.

In the national elections (June 30, 1948), the 200 seats in the Diet were distributed as follows: Agrarians, 56 (a gain of seven); Social Democrats, 55 (gain of five); Popular Democrats, 38 (loss of 11); Conservatives, 32 (gain of four); Liberals, 5 (loss of four); Swedish Peoples party, 14 (loss of one).

Education and Religion. The Evangelical Lutheran Church is the state religion, although there is absolutely free worship. There are three universities—one in Helsinki and two in Turku.

Defense. Universal military service prevails from 17 years to 60. Males reaching 21 are summoned to service for a period of approximately a year for training. There is also an Air Force and a Coast Defense. Finland's peace effective force is limited by the Peace Treaty (Feb. 10, 1947) at 34,400, all arms.

Currency. The monetary unit is the markka.

France

(LA REPUBLIQUE FRANCAISE)

Capital, Paris—Area, 212,659 square m Population (estimated 1948), 41,500,000.

Descriptive. The Republic of France, most erly country of Central Europe, extends from tude to 51°5′ North latitude, and from 7°45′ East l tude to 4°45′ West longtitude.

On the east Germany lies beyond the R the boundary; the Jura mountains and Lak neva separate it from Switzerland and the G Alps and the Maritime Alps from Italy. On south is the Mediterranean Sea and Spain, the Pyrenees for the boundary line. On the w the Bay of Biscay and the Atlantic Ocean, on the north the English Channel and the S of Dover separate it from England, while o landside Belgium forms the boundary. From north to the south its length is approximatel miles, and from the western extremity near to Strasbourg on the Rhine it is about 560 wide. The coastline on the north is 700 miles along the Atlantic and the Bay of Biscay, 86 the Mediterranean, 384 miles.

The island of Corsica, which lies in the Med ranean off the west coast of Italy and nor Sardinia, forms an integral part of France has an area of 3,367 square miles and a popul (1940) of 322,854. The capital is Ajaccio, b place of Napoleon.

France has the highest mountain in Europe of the Caucasus, Mont Blanc (15,781 ft.). On French side of the Pyrenees are several peak ceeding 10,000 ft. in height.

There are four important rivers, the S the Loire, the Garonne and the Rhone, the bank of the Rhine from Basle, Switzerlan Lauterbourg, and a dozen others, all of value because of canalization, which binds together. The waterways total 7,543 mile length, of which canals cover 3,031.

Resources and Industries. French railways, ing 26,417 miles, and formerly owned and ated under seven great railway systems, tw which were State-owned, were merged (Ja 1938) into one French National Railway system Société Nationale des Chemins de Fer Franc

Agriculturally, France is a country of farms, the average unit being 24 acres. The Fr peasant is a frugal individual and grows mo what he eats. The land is suited to a varie products the most important of which fr commercial standpoint are wheat, mixed rye, barley, oats, potatoes and beets. A diversity of fruits are grown, chiefly apples pears, plums, peaches, apricots, nuts and che The fishing industry is extensive.

The country is rich in minerals, and the b of Pas de Calais and Lorraine are noted for huge coal deposits. Subterranean products, be coal, include lignite, iron ore, bauxite, py mineral oils, auriferous ore, asphalt, rock sal potash salts. The iron ore deposits in ea France and the bauxite deposits in central Fr are among the richest in the world.

Manufactures occupy a predominant positi the economic life of the nation, and chief a these are the making of chemicals, silk and c textiles, perfumes and iron products.

History and Government. The monarchical sy was overthrown by the French Revolution (1793) and succeeded by the First Republic; t after successively followed by the First Empir der Napoleon (1804-1814), a monarchy (1814-1 the Second Republic (1848-1852), the Second Em (1852-1870), the Third Republic (Sept. 4, 1

France, after a four-year interlude of tota rian government following her conquest (194 the Nazi war machine and two years of pol changes, adopted (Oct. 13, 1946) a new Con tion establishing the Fourth Republic. France returned, as she did after her defeat i Franco-Prussian War of 1870, to the repub form of government.

France became an authoritarian state in swift current of martial and political events culminated (1940) in France signing an arm with Germany and Italy. France had dec war against Germany (Sept. 3, 1939). A singl litical party was created (Aug. 31, 1940) unde direction of Marshal Henri Philippe Petain, had succeeded to the head of the Governme

The German Army had entered Paris follo its occupation of Holland, Luxemburg, and n ern France. The invasion of the Low Cou began (May 10, 1940) and within a month Germans had seized these lands and had ov northern France. German troops entered (June 14, 1940) and the Government move Bordeaux. The cabinet, by a vote of 13 to 11, a to ask Germany for an armistice. The cabine last under the Constitution of 1875, resigned President Lebrun asked Marshal Petain to

helm. There followed the armistice negotiations. The compact with Germany was signed ne 22, 1940); the one with Italy two days later. he Government moved to Vichy (July 2) and liament voted (July 9) full powers to Marshal ain to revise the Constitution. The vote in the mber of Deputies was 395 to 3 and in the ate 229 to 1.

he members of the Chamber of Deputies and Senate met in National Assembly (July 10) and sed a Constitutional Law giving to Marshal ain as Chief of State the power to promulgate rough one or more Acts a new Constitution for French State," based on the rights of "labor, ily and the fatherland," to be ratified by the ion and applied by the Assemblies to be created. s "Constitutional Law" was adopted by a vote 569 to 80, with 17 members absent.

Vith the liberation of France by the Allied nies (Sept. 1944) a Provisional Government, ded by Gen. Charles de Gaulle as President Council was established by the French Committee of National Liberation which had been formed Algiers, North Africa (1943).

rance held her first free elections in five years t. 21, 1945) and elected a Constituent Assembly rged with the duty of drafting and putting into ct a new Constitution. The de Gaulle Governnt resigned at the first meeting of the Assembly. élix Gouin, Socialist, was elected President of Constituent Assembly (Jan. 23, 1946), but reed (June 11) after a victory of the Popular publican party (M. R. P.) at the polls. Georges ault, 46-year-old former newspaper man and ool teacher, was inaugurated (June 24) as Presit-Premier.

he first draft of the new Constitution was reed (May 5) by the French people by more n 1,000,000 votes, but a second draft was pted (Oct. 13) by a vote of 9,802,467 to 7,790,676, najority of 1,211,791 votes, with more than 1,,000 followers of Gen. de Gaulle abstaining at request. The new Constitution provides for a liament consisting of a National Assembly of puties and a Council of the Republic with Councilors, which takes the place of the former nate.

Under the new Constitution, legislative powers vested exclusively in the Assembly, with the uncil acting merely in an advisory capacity. The sident, has broader powers than under the ird Republic, but he is without power to dissolve Assembly. He is recognized as the head of the nch Union.

The President is Vincent Auriol, a Socialist, ected Jan. 16, 1947 at a joint session of the two ises of Parliament by a vote of 452 out of 833 t). He will serve for seven years. The Premier pt. 20, 1948) is Henri Queuille, Radical party.

Under the Constitution the French Union con-s of 90 Departments of Metropolitan France, en overseas Departments, and a number of Over-s Territories, Trust Territories and Associated tes. The Overseas Territories are endowed with pecial statute with respect to their particular erests within the framework of the Republic. long the 90 Departments into which France is ided for administrative purposes, the three thern departments of Algeria in Northern Africa lgies, Oran and Constantine—have been treated nce 1881) as an integral part of France. The mer colonies of Martinique, Guadeloupe, Reon and Guyane (French Guiana) were given n. 1, 1947) the status of overseas departments. Each of the Overseas units is represented in the amber of Deputies and Council of the Republic. erseas Departments have at their head a Prefet, elected General Council, Municipal Council and yor. According to the development of the terri-ies, their towns have elected municipal councils d mayors.

France is in the vanguard in the matter of social lfare legislation. Both employers and employees ntribute to the old-age pension fund. There is o compulsory social insurance against illness, ternity, disability and death. The legislation s been continued by the French State.

Since her liberation, France has put into effect a gressive program of nationalizing industries, nks, coal mines, air lines, and other public ilities.

Education and Religion. Primary, secondary and her education are free and instruction is com-sory between the ages of six and 14. There are universities in the country.

The country is predominantly Roman Catholic, ly about a million persons adhering to the otestant faith. The State recognizes no religion d tolerates all.

Defense. The Army numbers fewer than 500,000 n. The Air Force has approximately 50,000 and Navy 45,000. Twelve months of compulsory litary training was authorized by the National sembly (March 11, 1948) for 20-year-olds.

Currency. The unit of currency is the franc. France devalued the franc (Jan. 25, 1948) from 119 to the dollar to an official exchange rate of 214.392 francs to the dollar, with a free variable gold rate to be determined by operation of supply and demand.

ALGERIA
(L'Algerie)

Algeria is in the northern part of Africa, extending for 650 miles along the Mediterranean Sea, between Tunisia on the east and Morocco on the west. Both neighbors are French Associated States. The northern territory extends inland approximately 350 miles; beyond, the four southern territories extend southward indefinitely into the Sahara Desert, merging into French West Africa. On the coast is an area, the Tell, from 50 to 100 miles wide, of very fertile plains with valleys running out from the hills, mainly owned by Europeans, which is cultivated scientifically. Behind the Tell is the tableland of the Shat with an elevation of 3,000 ft., arid, or covered with salt lakes and swamp. The two chains of the Atlas Mountains, reaching to altitudes of 7,000 feet, divide the country from the Sahara. Algeria has a population (1936) of 7,234,684; and area of 847,552 square miles. The capital is Algiers. The natives are Moslems.

The Northern Territory, area 80,117 square miles, is divided into three Departments: Algiers, population, 2,240,911; Oran, 1,623,356; and Constantine, 2,727,766. Each Department sends Councillors and Deputies to the National Assembly which alone has the right to legislate for Algeria.

Nationals must serve two years with the army and then may be called up as reservists in case of mobilization.

Agricultural products include wheat, barley, oats, corn, potatoes, artichokes, flax and tobacco. Wine and olive oil are produced. Dates, pomegranates and figs grow abundantly. Cattle grazing is the chief agricultural pursuit. There are large deposits of iron, zinc, lead, mercury, copper and antimony.

The principal imports are textiles, machines, automobiles, petroleum, sugar, coal, iron and steel, cereals and coffee. Exports consist chiefly of wines, cereals, sheep, olive oil, alfalfa, spirits. Trade is mainly with France.

The Southern Territory, area 767,435 square miles, forms a separate colony under military command which acts in conjunction with the Governor General. The Southern Territory has a population (estimated 1948) of 645,000.

In the elections to Algeria's first Assembly (April 4 and 11, 1948) center and moderate groups supporting Charles de Gaulle's principles won a large majority of the 120 seats.

The unit of currency is the French franc.

TUNISIA
(Afrikiya; Tunisie)

Tunisia, an Associated State, one of the former Barbary states under the suzerainty of Turkey, is situated on the northern coast of Africa, with the Mediterranean Sea on the north and east, Italian Libya on the southeast, the Sahara Desert

on the south and Algeria on the west. The capital is Tunis. The country has an area of 48,313 square miles and a population (estimated, 1945) of 3,015,-170, including 123,170 aliens. The native population is composed of Arabs and Bedouins.

The French were obliged to send a military force into the country (1881) to protect Algeria from the raids of the Khroumer tribes, which resulted in a treaty (signed May 12, 1881) placing Tunisia under the protectorate of France.

The titular ruler is Lamine Bey and the Premier is Mustapha Saak. The French Resident General is Jean Mons.

There are large fertile valleys in the mountainous north, excellent land for fruit culture in the northeast peninsula, high tablelands and pastures in the center, and famous oases and gardens in the south, where dates grow in profusion. The chief industry is agriculture, and wheat, barley, oats, olives, grapes and dates are produced in abundance, besides almonds, oranges, lemons, shaddocks, pistachios, alfa grass, henna and cork. Lead, iron, phosphate and zinc are the most important minerals.

Textiles, manufactured metals, and minerals comprise the chief imports; agricultural products, olive oil, and minerals are the principal exports.

MOROCCO

(For information on the French Associated State of **Morocco,** *see Index Morocco.)*

FRENCH WEST AFRICA

French West Africa, an Overseas Territory, reaches from the Atlantic Ocean at about 17° west longitude across Africa to the Soudan at about 15° east longitude and from the southern desert boundaries of Morocco, Algeria, Tunis and Italian Libya to the Gulf of Guinea and the indeterminate boundary of French Equatorial Africa. It has been formed by consolidation of seven colonies. The capital is Dakar.

The colonies export fruits, palm nuts and oil, rubber, cotton, cacao, woods, and peanuts. The chief imports are foodstuffs, textiles, machinery and hardware, and spirits. Trade is mainly with France.

Colony	Sq. M.	Pop., 1943
Senegal, incl. Dakar Dist.	77,730	1,727,000
Mauritania	323,310	377,000
French Guinea	96,886	2,164,000
Ivory Coast	184,174	4,124,000
Dahomey	43,232	1,436,000
French Sudan	590,966	3,875,000
Niger	499,410	2,058,000
Dakar and dependencies	60	182,000
Total	**1,815,768**	**15,943,000**

FRENCH EQUATORIAL AFRICA (French Congo)

French Equatorial Africa is in the heart of Africa and has a seacoast on the South Atlantic Ocean between Spanish Guinea and the Belgian Congo.

Its other neighbors are the Cameroons, Anglo-Egyptian Sudan, Libya, French West Africa and Nigeria. French acquisition began (1841) and its territory has since been extended by exploration and settlement. That part (107,270 square miles) ceded to Germany as compensation for acknowledgment of the Morocco protectorate (1911) was restored to France in the Treaty of Versailles and incorporated in this territory. The capital is Brazzaville. The constituent colonies are:

Colony	Sq. M.	Pop., 1946
Gabun	93,218	383,715
Middle Congo	166,069	655,497
Ubangi-Shari	238,767	1,062,300
Chad	461,202	1,902,221
Total	**959,256**	**4,003,733**

Europeans number 8,333.

There are 300,000 square miles of tropical forests, rich in timber, but the output as yet is only wild rubber, and palm oil and ivory. Copper, lead and zinc have been found. Commerce is chiefly with France.

CAMEROONS AND TOGOLAND

Cameroons is that part of the former German Colony Kamerun (captured Feb., 1916). It consists of 166,489 square miles and was allotted to France as a Mandate by the Treaty of Versailles, constituted an autonomous territory by decree (March, 1921), and made a U.N. Trusteeship (Dec. 1946). It is governed by a Commissioner. The capital is Yaounde. Its population (estimated 1948) is 2,700,000 including several thousand Europeans.

The colony has two seaports. Its chief products are palm oil, groundnuts, almonds, hides, cacao and ivory. Trade is principally with France.

Of **Togoland,** pre-World War I, German colony, France received 21,893 square miles, about two-thirds, which was attached to French Dahomey. It now is a U.N. Trusteeship with a population of 780,497.

FRENCH SOMALILAND

French Somaliland lies between Eritrea, E opia and British Somaliland and is separ by the Straits of Bab-el-Mandeb from A (British).

The area is 9,071 square miles and popula (1944) 49,685; the capital is Jibuti, its port on Gulf of Aden (acquired 1862).

The colony has few industries, but hides, co and ivory are exported. Jibuti is connected Addis Ababa by railroad and much of Ethiop commerce passes through it.

MADAGASCAR

Madagascar, an Overseas Territory, is an isl off the east coast of Africa from which it is arated by the Mozambique Channel (240 miles at its narrowest part). It is about 980 miles and 360 miles wide at its greatest breadth. area is 241,094 square miles; population (estim 1941 includes Mayotte and Comoro Islands) 4,2 381. The capital is Tananarive. To Madagasca attached for government the prosperous archi ago of the **Comoro Islands** with an area in a about 790 square miles, and a population of (1 130,253.

Madagascar came under a French protecto (1885) and was declared a French colony (18 More than 3,000,000 acres are under cultivat the chief crops being rice, manioc, beans, van maize, sweet potatoes, corn, coffee, cloves, toba sugar cane and cacao. The forests are rich cabinet wood and tanning bark, raffia, resins, g and beeswax.

Agriculture and stock-raising are the chief dustries. Minerals found include graphite, m precious and industrial stones, kaolin, nickel phosphates, gold and radium.

REUNION

Reunion, a Department, is an island in Indian Ocean, about 420 miles east of Madagas and has belonged to France since 1643. Reu is entitled to representation in Paris by Councillors and three Deputies. The area is square miles; the population (1941) 220,955, whom 203,319 are of French extraction. The c products are sugar, rum, coffee, manioc, tapi vanilla and spices. The chief imports are rice cereals.

FRENCH INDIA

The French possessions in India lie along Coromandel coast, on the Bay of Bengal, in southeastern part, to the north of the islan Ceylon. The most important is Pondicherry, es lished by the French East Indian Company (16 which, after changing hands eight times, fi rested in the control of France (1814). The c nies are divided in five dependencies: **Pondiche** population (1941), 204,653; **Karikal,** 60,760; **Ch dernagor,** 38,284; **Mahe,** 14,092; **Yanaon,** 5,711. colonies send one Senator and one Deputy to liament at Paris. Agriculture is the chief indu and oil seed the chief export.

The total population of French India is 323, the area is 196 square miles. Pondicherry is capital.

FEDERATION OF INDO-CHINA

	Area (sq. mi.)	Pop (Est. 1
Tonkin	40,530	9,600,
Annam	56,973	6,200,
Cochin-China	26,476	5,200,
Cambodia	67,550	3,000,
Laos	89,320	1,000,
Total	**280,849**	**25,000,**

The Federation of Indo-China (French I China), Associated States situated in the so eastern part of Asia comprises the five states li above. The group is bounded on the north China, on the east and south by the South C Sea, and by Thailand on the west. The popula includes about 42,000 Europeans. The capita Hanoi, Tonkin.

Under the terms of settlement (1941) of a bo dispute, French Indo-China ceded 21,750 sq miles to Siam. Cambodia yielded 16,887 sq miles and Laos 4,863.

France recognized the Viet Nam Republi Annamese Nationalists (March 7, 1946) as a state within the Indo-Chinese Federation French Union." The nationalist movement be (1941) and gained impetus during World Wa Viet Nam is the ancient Annamese name for kin, Annam and Cochin-China. Recognition o Annamese Nationalists was reversed when Fr recognized a new anti-Communist Provisional ernment of Viet Nam (June 5, 1948) as a mer state of the French Union. Brig. Gen. Nguyen Xuan was elected President of the Provisi Government (May 20, 1948). Bao Dai, who a cated as Emperor of Annam (August 1945) restored to power and responsibility with the "Chief of Government" (June 14, 1949), follo

n agreement signed in Paris (March 8) providing or an independent Viet Nam Republic within the rench Commonwealth, and opening the way for ochin-China to accede to Viet Nam.

Cochin-China proclaimed itself a free republican tate (Feb. 4, 1947).

The chief minerals are iron, tungsten and manganese. The chief exports are rice, rubber, fish, oal, lumber, pepper, cattle and hides, corn, zinc nd tin. The principal imports are cotton and silk loths, metal articles, kerosene and automobiles.

GUADELOUPE

Guadeloupe, a Department, consisting of two arge islands, Basse-Terre and Grande Terre, eparated by a narrow channel and five smaller slands, is a group of the Leeward Islands in the Vest Indies between Antigua and Dominica. They ave been in the possession of France since 1634 nd are represented in Parliament at Paris by two ouncillors and three Deputies. The government onsists of a Prefet and an elected General Council. he soil is very productive. The area of the entire roup of islands is 583 square miles; population 1936) is 304,209. Basse-Terre is the capital.

The principal exports are sugar, coffee, rum, acao, vanilla, bananas.

MARTINIQUE

Martinique, one of the Windward Islands, in the Vest Indies, has been a possession since 1635, was ade a Department of France (Jan. 1, 1947). It is epresented in the French Parliament by two Counillors and three Deputies. It is administered by a refect, a General Council, and elective Municipal Councils. In Martinique is located the famous olcano, Mt. Pelee, which in eruption on (May 8, 902) destroyed the city of St. Pierre with all its 0,000 inhabitants. The island is the birthplace of he Empress Josephine.

Martinique has a population (Est. 1939) of 52,000, and an area of 380 square miles. The capital is Fort-de-France. The status of the island was hanged (1946) to a Department of France, effective Jan. 1, 1947.

The chief exports are sugar, rum, bananas, pineapples and cacao beans. Trade is mainly with rance and the United States. The franc is the ionetary unit.

ST. PIERRE AND MIQUELON

St. Pierre and Miquelon are two groups of rocky arren islands close to the southwestern coast of ewfoundland, inhabited by fishermen. Townhips were abolished (July 18, 1935) and an adinistrator, assisted by a council, rules the islands. he exports are chiefly cod, dried and fresh, and ther fish products. Imports consist of textiles, alt, wines, foodstuffs and meat. A regular boat ervice is maintained with North Sydney and Halix. A telegraph cable connects St. Pierre with urope and the American continent. The French anc is the medium of exchange.

The St. Pierre group has an area of 10 square iles; Miquelon, 83 square miles. Total population Est. 1936), 4,175. The capital is St. Pierre.

FRENCH GUIANA

French Guiana, a Department, is on the north oast of South America on the Atlantic Ocean with utch Guiana on the west and Brazil on the east nd south. The country has lost heavily in population in the last several decades, the census of 911 returning 49,009 inhabitants as compared with 3,975 in 1936 (including the hinterland of Inini, eparated territorially from Guiana July 6, 1930). he area of Guiana is 34,740 square miles. The area f Inini is 30,301 square miles. Guiana sends one ouncillor and one Deputy to the Chamber at aris. The colony has a Prefet and a Council Genral of 16 elected members. France has had a amous penal colony there since 1885, known as evils Island. France ordered (1946) the prison to e liquidated and its 2,800 inmates repatriated. he capital is Cayenne.

Immense forests of rich timber cover the terriory. Very little of the land is cultivated. The rincipal crops are rice, corn, manioc, cacao, bananas, and sugar cane. Placer gold mining is the ost important industry. Exports comprise cacao, ananas, various woods, gold, fish glue, rum, rose-ood essence, lumber and hides

CEANIA—SOCIETY ISLANDS (TAHITI, ETC.)

The French possessions, widely scattered in the outhern Pacific Ocean, were grouped together 1903) as one homogeneous colony under one Prefet ith headquarters at Papeete, **Tahiti**, one of he **Society Islands**. The other groups are the **Marquesas**, the **Tuamotû Group**, the **Leeward Islands**, he **Gambier**, the **Tubuai**, and **Rapa Islands**. Tahiti is picturesque and mountainous with a productive coastland bearing cocoanut, banana and range trees, sugar cane, vanilla and other tropical fruits. Preparation of copra, sugar and rum re the chief industries.

The area of the islands administered at Tahiti is 1,520 square miles; the population is 39,920.

New Caledonia, with an area of 8,548 square miles and a population (Est. 1944) of 59,889, is 248 miles long and has an average breadth of 31 miles. It is about half way between Australia and the Fiji Islands. Its dependencies are: The **Isle of Pines**, the **Wallis Archipelago**, the **Loyalty Islands**, the **Huon Islands**, **Fortuna**, and **Alofi**. The group was acquired by France (1854), and a penal colony was maintained on **Nou Island** until 1896.

The colony is administered by a Prefet and an elective council general. Noumea is the capital.

Mining is the chief industry. Chrome, cobalt, nickel and manganese abound. Other minerals found are antimony, mercury, cinnabar, silver, gold, lead and copper. Agricultural products include coffee, copra, cotton, manioc (cassava), corn, tobacco, bananas and pineapples.

The **New Hebrides**, 250 miles northeast of New Caledonia and 500 miles west of Fiji, is a group with an aggregate area of 5,700 square miles, having a native population estimated at about 49,000, and a white population (1946): British, 183; French, 758. The group has been a Condominium since 1906 and administered jointly by High Commissioners of France and Great Britain. Chief products are copra, cotton, cacao and coffee.

Germany

(Deutschland)

Capital, Berlin—Area, 143,200 square miles—Population (1946), enumerated in four zones of occupation, including Berlin, 67,032,242.

Descriptive. Germany, in Central Europe, is bounded on the north by the North Sea, Denmark and the Baltic Sea; on the east by Poland, Czechoslovakia and Austria; on the south by Austria, and Switzerland; on the west by France, Luxemburg, Belgium, the Netherlands (Holland) and the North Sea.

Present day Germany, as occupied by the Allied Armies, is the German Reich of pre-World War II, minus her eastern provinces—Silesia, Pomerania, West Prussia and East Prussia. An order by the Allied Control Council also made Germany disgorge all the territories she annexed after Dec. 31, 1937—Austria, Czechoslovakia, Memel, Poland, Eupen and Malmedy, Alsace-Lorraine, Danzig, the North Eastern Italian districts, Luxemburg and Northern Slovenia.

The climate of Germany is quite mild in summer and rather cold in winter, as in all western Europe. The soil is not naturally fertile, being largely a glacial plain over which the action of the ice moved much sand: it has always demanded unusual artificial fertilization. The land is heavily wooded. Forestry is far advanced, perhaps more perfected as a science than in any other country. The Black Forest of Germany is famed for its timber and as a resort. The highest mountains are the Bavarian Alps in the south. The northern part is a plain sloping to the north and west.

Agriculture is a highly specialized industry. Some of the more important crops are wheat, rye, barley, oats, potatoes, sugar beets and hay. Other commercial products are tobacco, grapes, hops, apples, pears, plums, cherries, apricots, peaches and walnuts.

The principal minerals are coal, lignite, iron, zinc, lead, copper, salt, potash, petroleum.

Occupation authorities reported that approximately 75 per cent of German industries survived World War II. By January 1949, with many former managers in charge, the Ruhr area had a steel-producing capacity of more than 12,000,000 tons annually as against the 1938 wartime peak of 15,000,000 tons. Western Germany's industries as a whole were more than 70 percent of normal production.

The German merchant marine (1939) had 2,466 ships of 4,492,708 gross tonnage, compared with 3,459,296 tons (1914).

Resources and Industries. Germany had (1937) approximately 132,000 miles of roads, of which 26,000 miles were highways, 52,300 miles first class country roads and 87,100 second class country roads.

History and Government. Germany's history dates back to the Franks, Goths, Huns and other invading tribes from central Asia, one of which—the Franks—gained supremacy and one of whose rulers, Charlemagne, became Emperor of the Roman Empire. The Reformation made a large part Lutheran about 1547. The Thirty Years' War (1618-1648) left the German Empire divided into hundreds of small principalities, with the Province of Prussia gradually gaining supremacy among the many rival factions. Following the defeat of Austria, a major contender for control of Germany, in the Seven Weeks' War (1866), the North German Confederation was formed in 1867.

The German Empire (Deutsches Reich) was proclaimed Jan. 18, 1871, in the palace of Versailles by Chancellor Bismark of Prussia, who made the King of Prussia, William I of Hohenzollern, German Emperor (Deutscher Kaiser). Bismark became Imperial Chancellor. Increasing international rivalries, fed by German military and naval expansion, culminated in World War I, in which Germany was defeated. William II abdicated and by the Treaty of Versailles, 1919, Germany ceded Alsace-Lorraine, all colonies, its Polish territory and Navy, and submitted to military restrictions and payment of reparations.

When the German Emperor abdicated and fled to Holland (Nov., 1918) the self-constituted Council of People's Commissioners took over the government and proclaimed a republic. A call was issued for the election of a National Assembly. It met at Weimar (Feb. 6, 1919) and elected Fredrich Ebert President of the republic (Feb. 11). His term was extended to June 30, 1925.

The National Assembly adopted a Constitution (July 31, 1919). It was known as the Weimar Constitution.

Ebert died (Feb. 28, 1925) and was succeeded by Field Marshal Paul von Hindenburg (re-elected 1932). In this election Hindenburg received 19,359,642 votes to Adolf Hitler's 13,417,460. But in the election (March 5, 1933), five weeks after Hindenburg had appointed Hitler Chancellor (Jan. 30, 1933), the Nazis polled 17,277,180 votes (43.9 percent) and gained an absolute majority of the Reichstag.

The new Reichstag which met March 23, 1933, passed the following day an Enabling Act by which absolute power was conferred on Chancellor Hitler and his cabinet and the provisions of the Weimar Constitution set aside. Under the authority derived from the Enabling Act Hitler completely personalized government in Germany. He obtained complete control of all activities throughout the country—political, economic, industrial, commercial and cultural. Freedom of speech and of the press were abolished. Equality before the law applied only to Aryans, the only people in Germany who had full citizenship rights which were restricted by the Gestapo (secret police).

As result of the anti-Semitic campaign of boycott and violence carried on by the Storm Troopers scarcely any of the more than 500,000 Jews in Germany remained at liberty. An estimated 90,000 fled the country.

The National Socialist German Labor Party, familiarly known as Nazis, was founded (1920) in Munich by Hitler (then 31 years old). Austrian-born, he had served throughout the war in the German Army and in consequence had lost his Austrian citizenship. He later obtained German citizenship.

The Nazis were a small group, anti-Semitic, with vague socialist leanings but strongly opposed to the Social Democrats and the Republican Constitution of the Reich. With Hitler and Gen. Ludendorff as leaders, they staged the so-called "Beer Hall Putsch" in Munich (Nov. 8-9, 1923). This proved abortive and Hitler was sentenced to five years' imprisonment—a sentence soon quashed. In the Reichstag election (1924) the party joined with a party called Movement for German Racial Freedom and the combination won 32 seats. But the next year the Nazis reorganized and with each successive election in the next eight years made big gains. Hitler was made chancellor Jan. 30, 1933. President von Hindenburg died Aug. 2, 1934, the day after the Cabinet adopted a decree uniting the office of Reich President with that of Reich Chancellor to take effect after his death. Hitler officially repudiated the Treaty of Versailles and the reparations agreements Jan. 30, 1937. He annexed the Sudetenland and Austria before starting war on Poland Sept. 1, 1939. [*See World War II*]

The National Socialist party continued in control of the country throughout World War II and was succeeded by the Allied Powers when they decreed the occupation of the country after the defeat of Germany, May 8, 1945. Grand Adm. Karl Doenitz, German Navy chief, proclaimed himself Fuehrer (May 1, 1945) with an announcement that Hitler had fallen in battle in Berlin and had proclaimed him (Doenitz) as his successor. Allied authorities were skeptical at the time of the announcement that Hitler was dead. A painstaking investigation by British military intelligence officers later appeared to show he had committed suicide.

Germany is divided into four Zones of Occupation. The zones, with their rough borders and the power to which each is assigned, follow:

Allied Zones in Germany

U.S.S.R.—All territory east and inclusive of the Prussian province of Saxony, Brandenburg, including the States of Saxony, Thuringia, Anhalt and Mecklenburg.

Great Britain—The Ruhr and the area east and west of the Wesel River, extending to Duesseldorf, Cologne and Aachen, including the former Prussian provinces of Schleswig-Holstein, Hanover, Westphalia and Rhineland (northern portion); the former states of Oldenburg, Brunswick, Hamburg and Lippe.

France—The left bank of the Rhine, including the Palatinate and the Saar, and the districts Trier and Coblenz; right bank of the Rhine, including the areas of South Baden, Bavaria and Wurttemberg-Hohenzollern (including Lindau).

United States—Territory bounded on the e by the Russian zone and Czechoslovakia, on north by the British zone, on the west by French zone, and on the south by Austria, cluding Bavaria (major portion), Wurttemb (northern portion), Baden (northern portio most of Hesse and Hesse-Nassau, and Bremer

The territory east of the Oder-Neisse line wit 1937 boundaries is under Polish administrat except for northern East Prussia which is un U.S.S.R. administration.

There also was created the area of Greater B lin, within but not part of the U.S.S.R. zone, wh is administered by the Inter-Allied governing thority with representatives of each of the f Powers. The United States High Commissioner Germany is John J. McCloy, appointed May 1949, who succeeded Gen. Lucius D. Clay, f U. S. Military Governor.

Germany, by the census of 1939, had an area 182,471 square miles and a population of 69,022,2 Present-day Germany, under Allied Military cupation, has an area and population (Octo 1946) as follows:

Zone	Area, sq. mi.	Popula
Russian zone	46,600	17,300,
British zone	42,700	22,800,
United States zone	36,900	16,700,
French zone	16,700	5,900,
Berlin	300	4,332,
Total	**143,200**	**67,032,**

No time limit was set on the occupation and promises were made to the German people. It made plain by the Allies that the length of occupation would depend on how long it would t to eradicate all traces of militarism and to est lish a representative, democratic government bef returning the country to the German people.

A 48-point proclamation (Sept. 25, 1945) legali the Allies' control of every phase of German and ordered the abolition of "all German la naval and air forces, the SS (Elite Guard), SA (Storm Troops) and the Gestapo with all t organizations, staffs and institutions." This cludes all the groups "which serve to keep a the military tradition in Germany"—the Gen Staff, the officers' corps, the reserve corps, m tary schools, war veterans' organizations and ot military and quasi-military formations.

The proclamation also signed the final de warrant for the Nazi party. The party "finally abolished and declared to be illegal" a the proclamation added, there would be no m secret organizations in Germany and no m religious or racial discriminations. The Ger diplomatic corps also was abolished.

Allied occupation authorities quashed all tences on persons convicted under the Hi regime on political, racial or religious grounds Created a system of democratic jurisprudenc

The Saar Basin, area 738 square miles, separated from Germany after World Wa and administered by the League of Nations thro a commission. The French had the sole righ work the coal mines for 15 years in recompense the destruction of the coal mines in North France. The Saar, which by a vote of 477,11 48,637 (Jan. 13, 1935) declared its desire to re Germany, was returned to the Reich by the Le (March 1, 1935). But in the first post World II election (Oct. 5, 1947) the Saar population v overwhelmingly for an economic union France. Its area has been enlarged to about square miles.

An autonomous Saarland government granted by France (Jan. 3, 1948), subject to Fre economic and financial legislation.

The American Military Government establish political entity, Greater Hesse, consisting of former Prussian province of Hesse-Nassau State of Hesse. Hesse-Nassau was annexed by Prussians (1866). It is hilly and not rich agri turally but its forests are the richest in Pru

The first free municipal elections in Germ since 1933 were held (May 26, 1946) in 38 c of the American occupation zone. The results the moderate Christian Socialist Union 484 Cou seats; the leftist Social Democrats, 421; the So sponsored Socialist Unity Party, 47, and the r tionary Liberal Democrats, 34.

In Berlin, controlled by the Big Four Pow the first post-war municipal elections (Oct. 1946) brought out more than 2,000,000 voters

ose 130 City Councilors and 805 Borough Coun-
ors. The results were:

Party	Total vote	Percentage of vote
cial Democrats	999,170	48.7
ristian Socialists	454,202	22.1
cialist Unity Party	405,992	19.8
eral Democrats	192,527	9.4
valid ballots	39,164	

In the first elections for the Landtag (Diet) held the Russian occupation zone outside of Berlin, e Social Democrats were barred from participa-n because the Soviet authorities contended they d been absorbed by the Socialist Unity Party. e latter party and affiliated minor groups polled ct. 20, 1947) a total of 4,959,716 votes, but the ristian Democrats and the Liberal Democrats ceived a combined vote of 4,808,181.

A series of conflicts between the Western occupy- powers and the U.S.S.R. over the economic d political administration of Germany culmi-ted (1948) in the virtual partition of Germany o two well defined zones under rival political d economic control. The U.S.S.R. delega-n walked out of the Allied Control Council in rlin (March 20), denying further usefulness of Council as an organ of government, began a ies of blockades against the other Allies (March , and announced (July 1) it would no longer rticipate in the four-power Berlin Kommanda-a. The Western powers utilized a gigantic air program to supply blockaded Berlin during 8-1949.

The 11 German Minister-Presidents of the West-n zones, reversing a previous stand, accepted ly 26, 1948) the responsibility of initiating a vernment for the 11 States of non-Soviet Ger-ny.

After eight months of constitutional delibera-ns, the Parliamentary Council (Constituent sembly) May 8, 1949 in Bonn by a vote of 53 12, gave final approval of a basic law under ich the 11 Laender of Western Germany would m a federal government in which "all authority anates from the people." The draft consti-ion was approved with reservations May 12 by Western military governors. It provides for a vernment comprising two houses of Parliament—Bundestag and a Bundesrat—with the larger, ver house elected directly by constituencies and upper house selected by the Landtage (state vernments). It specifies a federal President cted for five years by a convention consisting members of the Bundestag and equally by dele-es from the Laender. The President would minate the federal Chancellor subject to con-nation by the Bundestag. The Chancellor would pose the federal ministers to be appointed. clusive rights to legislation would be assigned the federal government on foreign affairs, izenship, passports, emigration, currency, etc. The proposed state, proclaimed in Bonn, chosen the capital, on May 23, 1949, to be officially own as the Federal Republic of Germany, em-aces about two-thirds of the population and f the territory of the former German Reich. e 11 Laender in the Western zone include: North rttemberg-Baden, Hesse, Bremen (U. S. Zone); leswig-Holstein, Hamburg, Lower Saxony, rth-Rhine Westphalia (British Zone); Rhine-d-Palatinate, Saarland, South Baden, Wurt-berg-Hohenzollern (French Zone).

A charter for joint Western allied control in Republic of Germany, by an Allied High Com-ssion, replacing military control, signed in ris June 20, 1949, by the United States, Great tain and France, was made public June 29. will operate under provisions of the previously olished Occupation Statute, and vests chief nomic control in the United States.

In Western Germany's first post-war general ction, Aug. 14, 1949, in which 24,492,752 people .5% of the eligible electorate) voted, the 402 ts of the Bundestag (Parliament) were distrib-d as follows: Christian Democrats (Catholic), ; Social Democrats, 131; Free Democrats, 52; mmunists, 15; other parties totaled, 65.

Education and Religion. There were (1939) 50,592 ools and 186,582 classes and 7,503,195 pupils, ght by 177,303 teachers. There are 29 univer-es in Germany, the oldest being Heidelberg unded in 1386). Elementary education is com-sory.

Major educational reforms designed to make German school program more democratic are ler way in Western Germany. Formerly only ut 10 percent of the students were chosen to end higher schools and universities; the re-nder remained in elementary schools and rned trades.

The government sought (1934) to bring the vari- Lutheran churches into a single German angelical Church under the direction of a pro-zi bishop and, failing in this, promulgated a r (Sept. 24, 1935) giving absolute powers in urch matters to the Minister for Church Affairs. In the course of the conflict more than 700 Lutheran pastors were arrested. Conflict with the Roman Catholic Church developed over control of education of youth organizations, the administration of which was guaranteed to the Church under the terms of the German-Vatican concordat of July 20, 1933. Complete religious freedom is guaranteed by the occupation forces.

Defense. Germany no longer has any armed forces of its own. Defense is vested in the four occupying powers.

Currency. Separate currency systems are maintained in the Western and Eastern zones. A new Deutsche mark to replace the Reichsmark in the Western zones was announced, exchange being at the rate of one Deutsche mark for 10 Reichsmarks.

Helgoland, an island of 130 acres in the North Sea, was taken from Denmark by a British Naval Force (1807) and later ceded to Germany to become a part of Schleswig Holstein Province in return for rights in East Africa. The island was heavily fortified and formed a large part of the German defenses in the North Sea. After capitulation of Germany in World War II. the island was surrendered (May 23, 1945) to Great Britain and occupied. The island was demilitarized (April 18, 1947) when the British Navy set off 3,500 tons of high explosives stored in the island's eight and a half miles of tunnel system. The explosion demolished tunnels, radar stations, submarine pens and sent large sections of the cliffs tumbling into the sea.

Greece

(VASILION TIS ELLADOS)

Capital, Athens—Area, 50,257 square miles—Population (estimated 1948), 7,780,000.

Descriptive. Greece occupies the southern peninsula of the Balkans, stretching down into the Mediterranean Sea, with the Ionian Sea on the west and the Aegean Sea on the east. On the northwest lies Albania, on the north Yugoslavia and Bulgaria, and on the northeast Turkey. The Pindus Mountains, a continuation of the Balkans, run through the country from north to south. The coastline is broken by many gulfs and bays. Islands account for 8,819 square miles of its total area.

Resources and Industries. Greece proper is chiefly agricultural, with little manufacturing. Only one-fifth of the total area is arable; 13,350,000 of the total of 16,074,000 acres are covered by mountains and lakes and rivers. The forests have been denuded, but reforestation is going on; they cover 5,944,059 acres of which 4,121,119 are state-owned. The chief agricultural products are wheat, rye, barley, oats, corn, tobacco, olives, lemons, oranges, mandarins, apples, pears, figs and nuts. The principal minerals are iron, zinc, lead, lignite and salt.

History and Government. The authentic history of Greece began (776 B. C.) although the country attained its greatest glory and power in the fifth century B. C. It became a province of the Roman Empire (46 B. C.), of the Byzantine Empire (395 A. D.) and was conquered by the Turks (1456). Greece won its war of independence (1821-1829) and became a kingdom under the guarantee of Great Britain, France and Russia (1830).

The Greek National Assembly (1925) voted the overthrow of the monarchy and the establishment of a republic, which lasted for ten years, or until a plebiscite (Nov. 3, 1935) restored the throne to George II, King of the Hellenes, who had been forced to abdicate Dec. 18, 1923.

Greece was occupied (1941) by Germans, Italians and Bulgarians after having defeated the Italians and later resisted German aggression.

When Greece was cleared of Germans during World War II (1944) the Cabinet returned to Athens. Various groups of partisans carried on civil war that resulted in King George renouncing the throne (Dec. 30) and the appointment of Archbishop Damaskino as regent. He resigned (1946).

In general elections (March, 1946) the Populist party was victorious. A second plebiscite was held (Sept. 1, 1946) and King George regained the throne.

King George died (April 1, 1947) and was succeeded by his brother, Paul. King Paul was married (Jan. 9, 1938) to Princess Frederika Louise of Brunswick (born April 18, 1917) and they have three children: Princess Sophia (born Nov. 2, 1938); Princess Irene (born May 11, 1942); and Crown Prince Constantine (born June 2, 1940).

The Premier is Alexander Diomedes, Liberal Party, appointed June 29, 1949, to succeed the late Themistocles Sophoulis.

Civil strife which began during World War II continued to plague Greece in 1949.

Education and Religion. Greek Orthodox is the official church. Education is compulsory. There are six schools of university rank in Athens, and one in Thessaloniki.

The rocky promontory of Mount Athos (121

square miles), is occupied by 20 monasteries of the Greek Orthodox Church, each a sort of little republic in itself. The monks number 4,800. No females are allowed to enter the territory, which has been granted a constitution by the Greek government, receiving autonomous powers as a monastic republic under Greek sovereignty, but with an appointed Greek Governor.

Defense. Military service is compulsory between the ages of 21 and 50. There is a small Air Force and a Navy of light craft.

Currency. The monetary unit is the drachma.

DODECANESE ISLANDS

The Dodecanese are a group of about 50 islands and islets in the southeastern portion of the Aegean Sea, 14 of which are permanently settled. They were occupied by Italy during the war of 1912 with Turkey and though claimed by Greece were retained by Italy. The inhabited area is 1,586 square miles and population (Census, 1947), 115,343. Rhodes is the capital.

After World War II the islands were ceded to Greece at the Paris Conference of Foreign Ministers (June 27, 1946), handed over to Greece by the British Military Administration (March 31, 1947), and formally annexed (March 7, 1948).

Guatemala
(REPUBLICA DE GUATEMALA)

Capital, Guatemala City—Area, 45,452 square miles—Population (estimated 1948), 3,717,000.

Descriptive. Guatemala, the most northerly state of Central or Middle America, has Mexico for its neighbor on the north and west, British Honduras on the east, Honduras and Salvador on the east and south and the Pacific on the southwest. A range of mountains containing many volcanic peaks runs from northwest to southeast near the Pacific. The narrow west slope is well watered, fertile and the most densely settled part. Guatemala is one of the six Central American or Middle American States.

More than 50% of the population is pure Indian and most of the remainder is of mixed Spanish and Indian blood.

There are famous Mayan ruins in Uaxactun (pronounced Wa-shock-tune) in Petén, northern Guatemala, about 25 miles south of the Mexican and 20 miles west of the British Honduran boundaries. They are partially surrounded by logwood swamps and by thick jungles whose luxuriant foliage swarms with monkeys and parrots. Only habitations are the rude camps of chicle gatherers and timber cutters.

Besides these and other ruins in the Department of Petén, there are the beautiful Maya ruins of Quiriguá, discovered (1840) by the American explorer John L. Stephens and situated in the valley of the Motagua river, 60 miles south of Puerto Barrios, in the center of the banana plantations of the Atlantic coast of Guatemala. The ruins are about 140 miles from Guatemala City and consist of temples and monoliths covered with inscriptions of the Maya chronology.

Resources and Industries. Agriculture is the most important industry, the Guatemalan soil being exceedingly fertile. Coffee accounts for 70% of the exports. Other important crops are bananas, sugar, beans, corn and wheat. Chicle gum is exported to the United States. Silver, gold, copper, iron, lead and chrome are found. The principal imports are cotton textiles, cinchona bark, wheat, flour, cotton yarn, petroleum, medicines, hardware and motor cars, and silk textiles. The main port of entry is Puerto Barrios on the Atlantic, 800 miles south of New Orleans. A railroad connects the port with the capital, Guatemala City, and San Jose, a port on the Pacific.

History and Government. The old Maya empire flourished in what is today Guatemala during the first 1000 years of the Christian era. For reasons unknown they abandoned several of their important cities after the IX or X century and built a new Empire in the Peninsula of Yucatan.

The Republic of Guatemala was established (1839). The 1945 Constitution provides for a semi-parliamentary government and establishes freedom of the press, speech and assembly, women's suffrage and protection for workers.

The President is Juan Jose Arevalo, elected for a six-year term (1944).

Peonage was abolished (1936).

Guatemala and Salvador abolished their frontier in 1945. Troops were withdrawn and passports no longer are needed.

Education and Religion. Roman Catholic is the prevailing religion but all creeds are tolerated. Education is compulsory. The University of Guatemala is in Guatemala City. The language of the country is Spanish.

Defense. Military service is compulsory between the ages of 18 and 50. The strength of the Ar approximately 22,000 with a small auxiliary and a small Air Force.

Currency. The monetary unit is the quetza

Haiti
(REPUBLIQUE D'HAITI)

Capital, Port-au-Prince—Area, 10,714 s miles—Population (estimated 1946), 3,500,000.

Descriptive. Haiti occupies the western thi the island known as Hispaniola, the second la of the Greater Antilles, lying between Cuba o west and Puerto Rico on the east. The bou which separates it from the Dominican Repub the east is about 193 miles long.

Negroes form the majority of the population remainder being mulattoes descended from fo French settlers. There are about 3,000 white eigners.

Resources and Industries. The minerals, la undeveloped, include copper, gold, silver, antimony, tin, sulphur, coal, nickel, porphyry gypsum.

Coffee is the chief product, along with co raw sugar, bananas, cocoa, sisal, and tobacco, is grown for domestic consumption. There a a large production of molasses. Logwood and other valuable woods are exported. In recent cattle breeding has been encouraged and shown gains.

History and Government. Haiti, discovere Columbus (1492) and a French colony from attained its independence (1804), following th bellion headed by Toussaint L'Ouverture. 1910 to 1915 there were seven presidents: the Gen. Sam. assumed office (March 4, 1915), refuge in the French Legation (July 26, 1915) 167 political prisoners had been massacred in and at the funeral of the victims was dragge and killed. Two hours later a United States en landed marines at Port-au-Prince, United S forces occupied the country and restored order.

The American occupation terminated (Aug 1934). A fiscal representative appointed by President of Haiti on recommendation of P dent Franklin D. Roosevelt remained to supe the customs. The fiscal representative was drawn (1941) and supervision of customs was to the Banque Nationale d'Haiti.

The National Assembly consists of two hous Senate of 21 members, ten of whom are appo by the President, and a Chamber of Deputies members. Former presidents who have serve least one term (six years) also are membe the Senate. Senators are elected for six years Deputies for four. The Constitution provides members of the Assembly must own prop Women who are 30 years old have the right to public office but do not have the vote.

The administration of the country is carrie by departments under the direction of the P dent who is elected by a two-thirds vote of Assembly. Dumarsais Estime was elected Pres (Aug. 16, 1946) in succession to Elie Lescot was deposed by a military coup (Jan. 11, 1

Education and Religion. Roman Catholicis the state religion, and the clergy are French (m ly Bretons). Education is compulsory. There approximately 1,060 schools with 1,190 teachers an enrolment of 100,000 pupils. French is official language of the country, but a dia French Creole, is spoken by the majority. teaching of English in the schools is obligator

Defense. The only military force is an a constabulary (Garde d'Haiti) consisting of officers and men.

Currency. The monetary unit is the gourde.

Honduras
(REPUBLICA DE HONDURAS)

Capital, Tegucigalpa—Area, 59,161 square —Population (estimated 1948), 1,260,000.

Descriptive. Honduras is a Republic of Centr Middle America, bounded on the north by Caribbean Sea, on the east and south by Nicara on the south and west by Salvador and on the by Guatemala.

The coast line on the Caribbean is 500 miles the chief ports being Truxillo, Tela, Puerto C Omoa, Roatan and La Ceiba. On the Pacific it has a coast line of 40 miles on the Gu Fonseca. The country is mountainous, very f though mostly uncultivated, and covered with forests. The inhabitants are of Spanish and I extraction.

Resources and Industries. Mineral resource abundant but undeveloped, and include gold, s copper, lead, zinc, iron, antimony and coal. chief export (65%) is bananas, grown on the C bean coast. Valuable hardwoods, cocoanuts,

tobacco are other important products. Cattle ing is important.

istory and Government. Honduras became in-endent (1838) when it freed itself from the eration of Central America.

he President is elected for six years, as are members of the only legislative house—the mber of Deputies of 38 members chosen by ular vote for a six-year term.

he President is Juan Manuel Galyez (Jan. 1, 9).

ducation and Religion. Education is compulsory. ere is a university in the capital and 1,136 public ools throughout the country. Roman Catholic is prevailing religion. The language is Spanish.

efense. Military service is compulsory from the of 21 with three months service in the Army in the reserve from 23 to 40. The size of the y is fixed at 2,500. There is a small Air Force.

urrency. The monetary unit is the lempira.

Hungary

(PEOPLE'S REPUBLIC OF HUNGARY)

apital, Budapest—Area, 35,902 square miles—ulation (census 1948), 9,201,158.

escriptive. Hungary, a Republic in Central rope is bounded by Czechoslovakia on the north, goslavia on the south, Rumania on the east and stria on the west.

esources and Industries. Hungary is primarily agricultural country. The Alfold, or Great Plain, a is among the most fertile in the world. The ncipal Hungarian crops are wheat, rye, barley, s, corn, potatoes, sugar beets. It is in the hilly ntry, near Tokay, in the northeast section of the ntry, that the best Hungarian wines are made. other important wine district is situated along north shore of Lake Balaton.

lungary's bauxite deposits are considered one of largest in the world. The output of coal is ex-sive, particularly from the Mecsek Mountains the district of Pecs. Other industries are mill-, distilling, manufacture of sugar, hemp, flax, n and steel. About three-quarters of her oil uirements are found in the wells drilled by erican interests in the southwest corner of ns-Danubia.

listory and Government. For a thousand years home of the Magyars and independent king-n, Hungary became part of the Dual Monarchy h Austria in 1867. After its defeat with the er Central Powers in 1918, Hungary was much uced in size by the Treaty of the Trianon ne 3, 1920), losing Transylvania to Rumania, atia and Batchka to Yugoslavia, as well as per Hungary (i.e., Slovakia and Carpatho-Ruth-a) to Czechoslovakia.

fter the abdication of King Charles (Nov. 13, 8), a republic was proclaimed with Michael rolyi as president. A Bolshevik government Bela Kun dominant was set up (March 22, 9) but was swept away by public distrust. elected government (March 23, 1920) declared ngary again a monarchy and named Admiral holas Horthy as Regent. He was ousted (1944). lungary joined Germany in World War II and occupied (March 23, 1944) and a puppet Nazi vernment established. Russian troops captured greater part of the country (1945) and after surrender of the Axis Powers the Allied Con-l Commission took charge of the country. By the ns of an armistice signed with the United ions (Jan. 20, 1945) Hungary agreed to return Czechoslovakia, Yugoslavia and Rumania the ritories taken from these countries following the nemberment of Czechoslovakia (1938) and Vienna Conference (Germany and Italy, 1940) to withdraw to within the limits of her Dec. 1937, frontiers.

lections were held (1945) with the Small Land-ners party victorious, the Communists second Social Democrats third. The National Assem-proclaimed Hungary once again a Republic 46) and elected Zoltan Tildy president for a r-year term with limited powers. In the 1947 ctions the Independence Front received the jority of votes and the Communist Party became strongest in the country. President Tildy gned (July 30, 1948) and was replaced by Ar-Szakasits, Pro-Communist Socialist (Aug. 3, 8).

Communists ousted Ferenc Nagy, head of the i-Communist section of the Small Landowners ty, as Premier (May 1947) on charges of con-acy against the Republic. The present (1949) mier is Istvan Dobi.

lore than 80 percent of Hungary's industries e been nationalized (1948) and a system of col-ivized, or at least cooperative, farming is nned.

ducation and Religion. There is no state re-on and all are tolerated. In the 1941 census 65.7 per cent of the population were Roman Catholic.

Public school education is compulsory and free for nine years. Church schools, largely Roman Catholic, were nationalized (June 16, 1948). There are six universities maintained by the State, including the University of Budapest and Technical University.

Defense. All males between the ages of 18 and 60 are liable for military service.

Currency. The monetary unit is the forint.

Iceland

(ISLAND)

Capital, Reykjavik—Area, 39,709 square miles—Population (estimated 1948), 138,000.

Descriptive. The Republic of Iceland is an island of volcanic origin, close to the Arctic Circle in the North Atlantic. It has many geysers and hot springs. The climate is modified by the Gulf Stream. There are no railroads.

Natural hot water from many of Iceland's volcanic springs is piped into Reykjavik and provides heat for office buildings, homes and hot houses.

Resources and Industries. Agriculture engages about 35 percent of the population. About six-sevenths of the land is unproductive and only about 65,000 acres are under cultivation, producing potatoes, turnips and hay. The fishing industry is important and the catch, mostly cod and herring, is huge. The annual catch averages 352,000 tons at a per capita rate of 7,055 pounds.

The principal imports in the order of their value are coal and petroleum, textiles, timber and wooden goods, machinery, metals and hardware, cereals and paper. Exports, in order, are fish, herring oil and meal, conserved goods, skins and wools.

History and Government. Iceland was an independent republic (930-1262), when it joined with Norway. The two came under Danish rule (1380). When Norway separated from Denmark (1814) Iceland remained under Denmark. Denmark acknowledged Iceland as a sovereign state (1918) united with Denmark only in that the Danish King, Christian X, was also King of Iceland.

The Althing (Parliament) voted (May, 1941) to cancel the union with Denmark, declaring Iceland independent; resolved to elect a regent to assume the functions of the King and to introduce a republican constitution as soon as the union ceased.

Sveinn Bjornsson was elected regent for one year and re-elected (1942, 1943) for one year terms.

The people of Iceland voted (May 20, 21, 22, 1944) by 70,536 to 365 to complete the establishment of an independent republic. About 98 percent of the eligible voters participated. The Althing formally severed the union with Denmark (June 17, 1944) and proclaimed a republic.

The President is Sveinn Bjornsson (elected June 17, 1944 and re-elected July 7, 1945 for a four-year term).

The Premier is Stefan Johann Stefansson, Social Democrat. Communists are excluded from the Cabinet. The Independence party holds four portfolios, the Social Democrats two, and the Farmers party three.

The Althing is composed of varying numbers of members not exceeding 52, of whom 41 are elected in constituencies, each electing one or two members except the capital which elects eight. The representatives of the capital and the six double-member constituencies are elected by proportional representation, while a necessary number of supplementary seats—not exceeding 11—are distributed among the political parties which have received too few members in proportion to their voting strength. The Prime Minister and his cabinet are responsible to the Althing. Men and women over 21 enjoy suffrage.

National health service and social security was enacted (1946), effective in 1947.

The people of Iceland celebrated (June 23-28, 1930) the 1,000th anniversary of the Althing, the oldest parliamentary assembly in the world.

American and British forces were stationed on Iceland during World War II. Keflavik Airport, used by the United States, was returned to Iceland (Sept. 20, 1946) and became available as an international civilian airport along the northern trans-Atlantic air route.

Education and Religion. The Icelandic language has maintained its purity, as in Eddas and Sagas, for 1,000 years. Danish is widely spoken. Eight years of elementary education is compulsory. There is no illiteracy. There is a University in Reykjavik. The national church is Evangelical Lutheran, but there is complete religious freedom.

Defense. Iceland has no army, navy or fortifications.

Currency. The unit of currency is the krona.

Iran
(PERSIA)

Capital, Tehran—Area, 628,060 square miles—Population (estimated 1946), 17,000,000.

Descriptive. Iran is the official modern name for Persia. The people refer to themselves as Irani. The Kingdom occupies the western and larger half of the great Iranian Plateau between the rivers Indus and Tigris in Southwestern Asia. It is bounded on the north by the U.S.S.R. and the Caspian Sea; on the east by Afghanistan and the sub-continent of India; on the south by the Arabian Sea and the Persian Gulf; on the west by Iraq and Turkey. The exact boundaries are indeterminate—a cause of much friction.

Across the plateau, which lies at an altitude of 4,000 to 8,000 ft., in the north central part, from northwest to southeast, stretches a desert, 800 miles long, varying from 100 to 200 miles wide. There are many peaks from 9,000 to 10,000 ft. high.

Resources and Industries. Fine forests cover the maritime plains and mountain slopes. Mineral deposits still undeveloped, are known to be considerable. Turquoise mines are worked crudely in Nishapur.

Agriculture is a prime industry, wheat, barley, rice, fruits, gums, drugs, wool, tobacco and cotton being the chief products. Some wines are famous. Persian carpets, all made on hand looms, are produced in Tabriz, Sultanabad and Kerman. Khurasan is famous for the quality of its wool. The chief exports are petroleum, cotton, carpets, fruits, gums, hides, wool, opium and rice; the chief imports are textiles, sugar, tea and manufactures of metals. Rug exports to the United States in normal times average more than $3,000,000 a year.

The Iranian oil field in the southwest territory at the head of the Persian Gulf is the richest single field in existence. William Knox D'Arcy, an Englishman, obtained (1901) for about $20,000 a 60-year monopoly for the exploitation of petroleum in a territory comprising 500,000 square miles, five-sixths of the Kingdom. The British government owns a controlling interest in the company; the Anglo-Iranian Oil Co. A new agreement, much more favorable to the Iranian government, was drawn up by the League of Nations, and signed by the company and the Persian government (1933). The Shah granted (March 6, 1937) American companies the privilege of developing oil concessions in the eastern district of Iran. Other minerals include iron, coal, copper, lead, manganese, marble, borax, nickel and cobalt.

History and Government. One of the oldest of countries, Iran was called Elam in the Bible. Its government was similar in form to that of Turkey until 1906.

Legislative government consists of a National Assembly called Majlis, elected every two years, established (Jan. 1906) when the Persian people demanded representative institutions. The king—called Shah—appoints a Prime Minister who (if acceptable himself) selects a cabinet agreeable to the Majlis. The 1906 Constitution was amended May 9, 1949, to permit the Shah to dissolve Parliament if deemed necessary.

The Shah is Mohammed Riza Pahlevi (born Oct. 12, 1919). He married Princess Fawzia, eldest sister of the King of Egypt (March 15, 1939); divorced Nov. 19, 1948. A daughter, Princess Chahinaz, born in 1940. The Premier is Mohammed Maraghei Said (appointed Nov. 8, 1948).

British and Russian forces entered Iran (Aug. 25, 1941) and occupied the country until conditions permitted their withdrawal. A treaty of alliance was signed with the Union of Soviet Socialist Republics and Great Britain (Jan. 29, 1942) in which these countries pledged themselves to respect the territorial integrity, sovereignty and political independence of Iran and to grant economic assistance during and after the war.

Education and Religion. The Moslem religion predominates. A law providing for gradual establishment of compulsory education was passed (1943).

Defense. The Army, Navy and Air Force are being reorganized.

Currency. The unit of currency is the rial.

Iraq
(MESOPOTAMIA)

Capital, Baghdad—Area, 116,600 square miles—Population (census 1947), 4,794,449.

Descriptive. Mesopotamia is the name applied to the areas between the Euphrates and the Tigris Rivers. Iraq is the Arab name for this territory which includes the former Turkish Vilayets of Basra, Baghdad and Mosul. It is bounded on the north by Turkey; on the east by Iran; on the south by the Persian Gulf, Kuwait and Saudi Arabia; on the east by Hashemite Jordan and Syria.

The country is mostly alluvial plain. The temperature varies widely; 120° fahrenheit in the shade is not uncommon, contrasted with severe frosts in the winter.

The soil is of extraordinary fertility, and engineers estimate that the Tigris-Euphrates Basin could irrigate 7,000,000 acres in winter and 3,000,000 of varied crops in summer.

The Baghdad railway line links Iraq and Turkey, connecting the cities of Iraq, Mosul, Baghdad and Basra. Baghdad and Basra have modern airports.

Resources and Industries. Wheat, barley, millet and cotton are the chief crops, with tobacco in the Kurdish hills. Dates are grown in the long stretches of the Shatt el Arab and beyond. From Fao to Qurna the river flows through a continuous date grove. Large flocks of sheep are raised in the north, and wool and skins form a considerable export.

Iraq is one of the great oil-producing countries of the world.

History and Government. The Tigris-Euphrates valley is the legendary cradle of the human race, regarded by some Biblical scholars as the original Garden of Eden. It was here that the ancient cities of Nineveh and Babylon flourished. Ur, the most ancient city in the world as yet discovered, was built more than 6000 years ago. It is the birthplace of the Prophet Abraham.

The mandate (under the Treaty of Peace with Turkey, 1920) for Mesopotamia as an independent state was intrusted to Great Britain by the Allied British and Indian forces having conquered the country during World War I, occupying Basra (Nov. 22, 1914) and Baghdad (March 11, 1917). Emir Feisal, third son of the Grand Sherif of Mecca, then King of the Hejaz, was chosen King by a referendum. On his death (Sept. 9, 1933) he was succeeded by his son, Ghazi Ibn Feisal (born March 21, 1912). King Ghazi was killed in an automobile accident (April 4, 1939) and was succeeded on the throne by his son, Emir Feisal, as King Feisal II (born May 2, 1935). Emir Abdul Illah, the maternal uncle, was named Regent.

A Constituent Assembly met in Baghdad (1925) and passed an organic law and an electoral law. By the election of a Chamber of Deputies. A Constitutional Monarchy, hereditary in the family of King Feisal, was created with a Chamber of Deputies of 115 members, elected for four years by suffrage. The King nominates the Senators for eight years and their number should not exceed one-quarter of the number Deputies.

Modifications of the Organic Law and the Electoral Law now permit the King to dismiss the Government, and enable any Iraqi to be nominated for election to Parliament if able to procure signatures on a petition.

The Prime Minister is appointed by the King and (if acceptable himself) selects a cabinet agreeable to the legislature. Iraq is under British protection by terms of a 20-year treaty (signed Jan. 15, 1948). The Premier (Jan. 6, 1949) is Gen. Nuri as-Said.

Education and Religion. Elementary education is free and nominally compulsory. Arabic is the language of the majority. The people are preponderantly Mohammedan. Two thirds of the Mohammedans belong to the Sunni sect and one-third belong to the Shi'ah sect. Jews number about 100,000; Christians 90,000.

Defense. The Iraq army numbers 30,000 in normal times. Military service is compulsory between the ages of 19 and 25. The Defense Ministry is advised by a British Military Mission.

Currency. The monetary unit is the dinar.

Ireland
(EIRE)

Capital, Dublin—Area, 27,137 square miles—Population (estimated 1948) 3,023,000.

Descriptive. Ireland, an island in the Atlantic Ocean near the European mainland, is a sovereign independent republic, separated from Great Britain on the south by St. George's Channel, the Irish Sea and the North Channel.

Ireland is a picturesque country consisting mainly of a central plateau surrounded by isolated groups of hills and mountains, the coast of which is much indented by the sea, affording many inlets and coves. Because of a luxurious growth of rich green vegetation, Ireland has been called the "Emerald Isle." The mean annual temperature ranges from 48 degrees in the north to 52 degrees in the south. Dublin has an average temperature of 39 in the coldest month and 60 in the warmest. There are numerous lakes (called loughs), the largest known of which are situated in Killarney. The most important river is the Shannon, about 250 miles long. Some mountains attain an altitude in excess of 3,000 ft. Wildlife is scarce, and there are no known snakes existent.

point of interest to visitors is an old castle in village of Blarney, four miles northwest of , built on a limestone rock on the site of an stronghold erected (1446) by Cormac arthy. Some 20 feet from the top of the castle famous stone called the Blarney Stone which, rding to tradition, invests great powers of uasion on those who kiss it.

sources and Industries. The country is chiefly ultural, the ranking crops being wheat, oats, y, rye, potatoes, turnips, mangels, sugar beets, age, flax and hay.

story and Government. The Constitution which e into operation (Dec. 29, 1937), restored the er name of Ireland (Eire) and declares that nd is a sovereign, independent, democratic . The Constitution applies to the whole of nd but it provides that, pending the re-ration of the national territory and without udice to the right of the Parliament and Gov-ent established by the Constitution to exercise diction over the whole of that territory, the ap-tion of the laws enacted by that Parliament have the same area and extent of application ose of the Irish Free State which did not in-e six of the nine counties of the province of r known as Northern Ireland.

e government of Ireland is bicameral with a ident elected directly by the people for a of seven years; a House of Representatives d Dail Eireann, consisting of 147 members ed by the people; and a Senate (Seanad ann). The Senate consists of 60 members, n of whom are appointed by the Taoiseach, ne Minister) who is the Head of Government. he remaining 49, the universities elect six and palance are elected from five panels of candi-s established on a vocational basis, represent-the following public services and interests—(1) onal Language and Culture, Literature, Art, cation and other professional interests that be defined by law from time to time; (2) Agri-re and allied interests, and fisheries; (3) r, whether organized or unorganized; (4) In-ry and commerce, including banking, finance, intancy, engineering and architecture; (5) lic administration and social services, including ntary social activities.

e Senate considers and amends legislation has no veto power. The Government exercises executive power. The President, on the advice e Taoiseach, summons and dissolves Dail Eire-

He signs and promulgates laws. On the ination of Dail Eireann he appoints the Tao-h and on the nomination of the Taoiseach the previous approval of Dail Eireann he ints the other members of the government. supreme command of the Defense Forces is d in him.

an T. O'Kelly was elected President (June 945).

the general election (Feb. 4, 1948) Premier alera's Government party, Fianna Fail, lost ajority in the Dail Eireann. The final stand-of the parties as compared with the previous ament were:

	1944	1948
anna Fail (Government party)	77	68
he Gael	28	31
ann na Poblachta (Republican)	2	10
bor	8	14
ann na Talmhan (Farmers)	11	5
tional Labor	4	5
dependent	8	14

e Prime Minister is John A. Costello, coalition idate, elected by the Dail (Feb. 18, 1948). 75 to s the deputies ended Eamon de Valera's 16-year re as Taoiseach.

der the terms of a treaty concluded (April 25, with Ireland, Great Britain surrendered her y rights over the Irish ports of Cobh (Queens-), Bere Haven and Lough Swilly "together the buildings, magazines, emplacements, in-ents and fixed armaments" at those ports land became completely free from England 18, 1949, following repeal Dec. 21, 1948 of a allowing the King to sign credentials of Irish mats. The six counties of Northern Ireland Feb. 10, 1949 to remain with Great Britain.

ucation and Religion. Roman Catholic is the ailing religion with an enrollment of (1936 us) 2,773,920. Other chief sects are: Protestant opalians 145,030; Presbyterian 28,067; Meth-, 9,649.

mentary education is free and compulsory, and Irish language is a required study in all na-l schools. Institutions of higher learning in-e the National University (founded 1908), com-ng the Constituent Colleges of Dublin, Cork, ay and St. Patrick's, Maynooth; Trinity Col-Dublin (founded 1591); the Dublin Institute Advanced Studies, and the Royal Irish Acad-

fense. Defense forces are being reorganized). There is an Air Corps and a marine service.

Currency. The monetary unit is the Irish pound which has the same value as the British pound.

Israel

(REPUBLIC OF ISRAEL)

Capital Tel Aviv (provisional)—Area (estimated 1949) 7,100 square miles—Population (estimated 1949) 1,080,000.

Descriptive. The Republic of Israel, created in 1948, occupies the major portion of Palestine, the Holy Land. It lies on the western edge of Asia bordering on the Mediterranean Sea. It is bounded on the north by Lebanon and Syria, on the east by Jordan and on the south by Sinai, Egypt.

On the west is the coastal plain a hundred miles long and 15 wide, fertile and well watered. In the center is the plateau of Judea. A triangular-shaped semi-desert region, the Negeb, extends from south of Beersheba to an apex at the head of the Gulf of 'Aqaba. The eastern border drops sharply into the depressed valley of the River Jordan and the Dead Sea, 46 miles long, with an average width of eight miles, 1,292 ft. below sea level.

Israel's area, as defined by armistices with the Arab nations, includes all the land assigned to it under the 1947 partition resolution of the UN General Assembly, as well as Western Galilee and a corridor to Jerusalem. By the terms of the armistice with Syria, July 20, 1949, last of the Arab states to conclude military action, demilitarized zones were set up in Mishmar hay Yarden, Dardara on the eastern edge of Lake Hule, and the southeastern shore of Lake Galilee, site of Israel's Ein Geb settlement which is located on the Syrian border, detached from the remainder of the Israeli area.

The increase in population in the whole of Palestine (1922-1944) was estimated at 987,576, divided: Moslems, 472,100; Jews, 444,912; Christians, 64,083; others, 6,481. Approximately four-fifths of the increase in the Jewish population has been contributed by immigration. In 1944 there were 14,464 Jewish immigrants. With establishment of the new State, all restrictions on Jewish immigration which had been in effect during British rule were abolished and during its first year, Israel received 220,000 immigrants. Israel's population (estimated July 1, 1949) is 1,080,000, including 925,000 Jews and 155,000 Arabs.

Resources and Industries. Israel is primarily an agricultural country, the growing of citrus fruit being the most lucrative commercial activity. The principal crops include wheat, barley, durra, olives, melons and watermelons, grapes, figs, tomatoes. The citrus fruits and bananas also are grown. Wine making is an extensive industry. Minerals found are limestone, petroleum, sandstone, gypsum. The valley of the Jordan and the shores of the Dead Sea yield rock salt and sulphur and potash.

The chief ports of Israel are Haifa and Jaffa, with light draft vessels going to Tel-Aviv.

There has developed considerable trade in manufactured commodities, both in local and imported raw materials. Small scale industries and handicrafts still predominate although there has been a flow of capital equipment for industrial enterprises. Oil tanks and refineries have been constructed in Haifa to process petroleum from the Mosul fields.

Israel's main exports are citrus fruits and fruit juices, olive oil, polished diamonds, artificial teeth, textiles, chemicals, brushes, fountain pens, pharmaceutical products and a variety of industrial products. Imports include processed agricultural products, industrial and agricultural machinery, chemicals, textiles, grain, timber, hides and other raw materials.

History and Government. Palestine formerly was a vilayet of the Turkish province of Syria. It was conquered during World War I by British troops under General (later Field Marshal) Viscount Allenby, Jerusalem being surrendered (Dec. 9, 1917). Jerusalem had been in Moslem hands since 1244, had been conquered and reconquered in the Crusades, and had been under the rule of the Turks since 1517. It remained under British Military Administration until July 1, 1920, when a civil government was set up. The country was governed by Great Britain (1923-1948) under a mandate granted by the League of Nations.

The efforts of Great Britain to establish Palestine as a Jewish homeland in accordance with the "Balfour Declaration" met with much opposition from the Arabs, and outbreaks of violence have marked the history of the country for many years.

The Balfour declaration (Nov. 2, 1917) was: "His Majesty's Government views with favor the establishment in Palestine of a national home for the Jewish people, and will use their best endeavors to facilitate the achievement of that object. It being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country."

Sir Philip Cunliffe-Lister, Colonial Secretary (Oct. 31, 1933) restated the policy of the Mandatory Power: "There is under the mandate the obligation to facilitate the establishment of a National Home for the Jewish people in Palestine, but at the same time there is an equally definite obligation to safeguard the rights of all inhabitants of Palestine. Both obligations will be most carefully observed."

Lord Passfield in a White Paper (Oct. 20, 1930) announced that "no margin of land available for agricultural settlement by new immigrants remained," therefore "it was the duty of the mandatory power to suspend such immigration until the unemployed portion obtain work."

The Palestine question was placed before the United Nations (1947) and plans were submitted by two sub-committees of the U. N. General Assembly Ad Hoc Committee on Palestine. One called for partition into two independent Jewish and Arab states; the other, composed of Arab nations, proposed unitary independence for the entire nation and included elaborate provisions for the guarantee of Jewish rights.

The General Assembly voted (Nov. 29, 1947), 33-13, to partition Palestine into independent Jewish and Arab states by Oct. 1, 1948 and the formation of an Enclave of Jerusalem, area 289 square miles; population, Arab: 105,000; Jewish: 100,000, to be administered by the U. N. Trusteeship Council through a U. N.-appointed Governor. The General Assembly appointed a five-nation commission to supervise the partition.

The plan called for evacuation of British troops by Aug. 1, 1948 and the ending of her mandate; elections two months after British withdrawal to elect constituent assemblies in the two zones, which assemblies would be charged to draft constitutions and choose provisional governments; and a U. N. commission to draft a charter for the economic union of Palestine, including a customs union, uniform currency system, and joint railways, highways, telephone and airport systems.

Communal strife began immediately following the partition vote. Great Britain requested the U. N. that her mandate be ended by May 15, 1948, and withdrew her forces by that date.

A new independent Zionist state, the Republic of Israel, was proclaimed (May 14-15, 1948), coincident with British withdrawal. No boundaries were immediately set, but leaders declared they controlled essentially all the area assigned them by the 1947 partition resolution of the U. N. General Assembly, consisting of a large area in southern Palestine, a smaller northern area and a strip along the west coast, a total area of approximately 5,500 square miles and a population of 538,000 Jews, 397,000 Arabs. Under the U. N. plan (Nov. 29, 1947) the Arab state would have an area of 4,500 square miles; population, 804,000 Arabs, 10,000 Jews.

Dr. Chaim Weizmann (born in Motele, Russia, Nov. 27, 1874) was elected Provisional President of the Council of Government of the new state (May 16, 1948).

Large scale military operations against the Jews were begun by armies of Syria, Lebanon, Saudi-Arabia, Iraq, Transjordan and Egypt (May 15-16, 1948).

Sporadic outbursts of warfare continued through 1948 and into 1949 between Israeli forces and one or another of the Arab nations, the latter forces gradually becoming disorganized and concluding separate armistices.

In the elections (Jan. 25, 1949) the Mapai Party (Moderate Socialist) won 46 seats in the Assembly against 19 for the Mapam (Left-Wing Socialist) Party.

Israeli's first Constituent Assembly (Knesset Hagdola) was formed Feb. 14, 1949, its membership comprising 120, consisting of 108 men and 12 women, of whom 117 were Jews and three Arabs. The Assembly elected Dr. Chaim Weizmann, Provisional President since May 16, 1948 the Republic's first president on Feb. 17, 1949 and adopted an interim Constitution.

Premier David Ben-Gurion presented a four-year plan in Tel Aviv March 8, 1949, proposing an Israeli-Arab cultural and economic alliance, but the future status of the Arab in Palestine remained in doubt with the All-Palestine Government established September 1948 in Gaza and King Abdullah of Transjordan, acclaimed "King of All Palestine" at a meeting of Arab leaders in Jericho, Dec. 1, 1948, both claiming to represent the government of the Arab population, much of which existed as displaced persons during 1949. The Arab state contemplated under the United Nations plan has not yet come into existence (July 1, 1949) and the majority of the areas assigned the Arabs by the UN being occupied by Egypt and Jordan.

Israel was admitted to membership in the United Nations May 11, 1949.

Education. A dual system of education, Arab and Hebrew, prevails and schooling is to be compulsory. There were (1942-1943) 1,530 schools with 7,896 teachers and an attendance of 188,779. Under the Arab system of education there were 1944) 422 Government schools with an att of 63,141 pupils, the majority Moslems. brew public schools system had (1947-19 schools with 97,668 pupils. There were 327 Moslem schools and 324 private Jewish

Hebrew University (opened 1925) on Scopus in Jerusalem reported (1948-1949) a of 150 teachers and 700 students.

Currency. The unit of currency is the pound, issued Aug. 16, 1948.

Italy

(REPUBBLICA d' ITALIA)

Capital, Rome—Area, 119,800 square Population (estimated 1948), 45,706,000.

Descriptive. The Republic of Italy occu entire Italian peninsula, stretching from t southeast into the Mediterranean, with the of Sicily, Sardinia, Elba and about 70 small On the east is the Adriatic Sea; on the so Mediterranean, on the west between the m and Sicily and Sardinia is the Tyrrheni and further north the Ligurian Sea. Th time Alps on the west separate it from the Swiss Alps in the north from Swit and the Dolomite Alps from Austria, a Carnac and Julian Alps on the east from slavia. The great plain shut in by the mountains, and the Ligurian Apennine watered by the River Po (220 miles lon the Adige, shared by the departments mont, Lombardy, Emilia and Venetia, a across the top from the Maritime A the head of the Adriatic. The Ligurian tains, circling the Gulf of Genoa, run do middle of the peninsula as the Apennines, the southern province, Calabria, to the the boot" at Cap Spartivento.

Across the narrow Strait of Messina the tain range continues through the Island o with its famous volcano, Mt. Etna (altitud ft.) having a record of more than 120 er The active volcano, Mt. Vesuvius (altitud 4,300 ft.), with a record of 50 known er rises to an altitude of more than 4,000 ft. Bay of Naples, and north of the Strait of is the island volcano of Stromboli (3,022

The length of the peninsula is 760 mile its breadth nowhere exceeds 150 miles a not generally measure more than 100 mile

Two rivers, having the greatest historic tance, rise in the Apennines, and flow the sea—the Tiber, which moves through and the Arno, which waters the Florentin Between the spurs of the Alps lie sever tiful lakes, especially noteworthy being Lugano, Maggiore and Garda, the largest Maggiore and Garda are more than 30 mil

The Adriatic coastline is flat and has fo of major importance. Venice, Ancona, B Brindisi.

The climate of Italy is sunny, although n Italy has a cold winter; snow is rarely Naples, and olives, oranges, lemons, figs, almonds, and pomegranates flourish in s Italy. In the plains the soil is fertile, but mountainous regions which cover a large the Peninsula, cultivation is difficult. Italy of the most densely populated states in having a population (1948) of 381 to the mile.

Resources and Industries. Agriculture is t industry, with an area (1939) comprising 76 acres with 8,756,848 engaged in it (1936). T cipal crops are wheat, barley, oats, rye, co beans, potatoes, sugar beets, grapes and Dairy farming and cheese making are impo Northern Italy.

Italy is not rich in mineral deposits, especially lacking in coal, although she is producer of sulphur, chiefly in the volcanic of Sicily. Other minerals are iron, ma mercury, lead, zinc, antimony and bauxite

Italy has more than a thousand hydro and 225 thermo-electric power installation supply energy to her industrial centers. production of electricity is approximately 2 kilowatts in normal times.

The largest and most important industr from agriculture, is the manufacture of Silk culture is carried on extensively in Lo Piedmont and Venetia. Other principal n tures are chemicals (sulphuric acid, su phate and copper phosphate); electrica automobiles and heavy machinery; sugar, and macaroni.

History and Government. Divided and bered for centuries, Italy began to take sh unit when, following the war of 1859, Lo by the peace of Zurich, came under the King Victor Emmanuel II, of Sardinia of t of Savoy. By plebiscite (1860) Parma, Mod

nagna and Tuscany joined, to be followed at once Sicily and Naples, and by The Marches and Um- a. The first Italian Parliament assembled (Feb. 1) and (March 17, 1861) declared Victor Emman- King of Italy. Mantua and Venetia were added 66), an outcome of the Austro-Prussian war. The pal States were taken possession of by Italian ops (Sept. 20, 1870) after the withdrawal of the nch garrison in the Franco-Prussian war (see ex, Vatican City), and by plebiscite (Oct. 2) e annexed to the kingdom, thereby rounding out ited Italy. The Papal States were Marches, naqua and Umoria, which were annexed pre- usly. What was occupied in 1870 was the city Rome and environments, long known as the atrimony of St. Peter."

ascism appeared in Italy (March 23, 1919) en the original Fascisti—called Black Shirts ause of their garb—organized into an asso- tion against Communism and Socialism under the dance of Benito Mussolini. The original group composed of about 150 ex-soldiers. The or- ization grew in numbers and power until, owing a general strike (Aug. 22) and chaotic ditions in the capital, it marched on Rome and a bloodless revolution took over the Government the invitation of the King Oct. 28, 1922.

s leader of the Fascisti and head of the Gov- ment, Mussolini acquired dictatorial powers over life of the country. He was known as Duce ader). Mussolini was put to death by a firing ad of Partisans (April 28, 1945) in the village Dongo on Lake Como. [*See World War II*]

s result of World War II, Italy lost its colonies most of the province of Venezia Guilia was arded to Yugoslavia. Trieste was created a free t.

taly became a Republic (1946) in a series of idly moving events which included the abdica- n of the King, general elections and a referen- n in which the monarchy was voted out and a nstituent Assembly named to form a new Govern- nt. The move toward a Republic began (May 9) en King Victor Emmanuel III announced his ab- ation in favor of his son, Crown Prince Humbert o took the name of Humbert II. King Victor Em- nuel was permitted to leave the country and de- ted for Egypt, where he died (Dec. 28, 1947).

eneral elections were held (June 2-3) including eferendum on the establishment of a Republic the overthrow of the monarchy. The vote: or the Republic, 12,717,923.

or the monarchy, 10,719,284.

ing Humbert departed from Italy for Barcelona ne 13) and Premier Alcide de Gasperi automat- ly became head of State.

he Constituent Assembly elected Enrico de ola, elderly Neapolitan parliamentarian and ner member of the Liberal party, provisional sident of the Republic (June 28), and re-elected n (June 26, 1947). He was succeeded by Luigi audi, First Vice Premier and Minister of the get, elected by a joint session of the Senate and mber of Deputies for a seven-year-term (May 1948).

nder Italy's new Constitution (effective Jan. 1, 8), the Senate is composed of 237 elective Sena- and 113 appointed; the Chamber of Deputies nbers 574 members. Italy is described by the stitution as a "democratic republic founded on k." Re-organization of the Fascist Party is bidden.

n the elections (April 18-19, 1948) the Christian nocrats scored a victory over the Popular Front ty (Communist) assuring continuation of the lition regime of Premier Alcide de Gasperi. The ristian Democrats won 130 of the 237 elective ts in the Senate, and 307 seats in the Chamber Deputies.

he Senate, including elective Senators and 113 ointive ones, is composed as follows:

hristian Democrats	151
opular Front	115
ight-Wing Socialists	25
ational Bloc	18
ndependents	18
onarchists	6
epublicans	6
ther parties	11

hamber of Deputies:

hristian Democrats	307
opular Front	182
ight-Wing Socialists	33
ational Bloc	18
onarchists	14
epublicans	9
ther parties	11

he vote for the Senate was: Christian Demo- ts, 10,740,131 (47.9%), Popular Front, 6,955,229 %), Right-Wing Socialists, 1,580,722 (7%), Na- al Bloc, 1,364,741 (6.1%), Republicans, 637,433 %), Monarchists, 436,597 (2%), Independents, 351 (1.2%), Italian Social Movement, 244,646 %), other parties, 183,333 (1.8%).

hamber of Deputies: Christian Democrats, 12,751,841 (48.7%), Popular Front, 8,025,990 (30.7%), Right-Wing Socialists, 1,860,528 (7.1%), National Bloc, 1,100,156 (3.8%), Monarchists, 729,987 (2.8%), Republicans, 650,413 (2.5%), Italian Social Movement, 525,408 (2.1%), other parties, 618,644 (2.3%).

Women of 21 years and over have the right to vote.

Education and Religion. Roman Catholic is the state religion, made so (March 26, 1947) when the Lateran agreement between Italy and the Holy See was made an integral part of the Constitution. The census (1936) returned 41,017,369 Catholics (99.6%) 83,618 Protestants and 47,825 Jews.

Italy has 26 universities, with ten of them dating from the 13th century or the first years of the 14th. Famous among these are Bologna (founded 1088); Genoa (1243); Naples (1224); Padua (1222); Pisa (1338); Rome (1303), and Turin (1404). Primary education is compulsory between the ages of six and 14.

Defense. The Army of Italy is in the process of reorganization with compulsory service but not extending beyond one year. The main purpose is frontier defense and a small force has been proposed. There is an Army Air Force; also a Navy Air Force.

The Navy consists of two battleships, four cruisers and four destroyers.

Currency. The monetary unit is the lira.

Italy's Surrendered Colonies

The deputies of the Allied Council of Foreign Ministers met in London [Oct. 6, 1947] to discuss the future of Italy's former colonies. They appointed a commission to investigate conditions in the colonies and sound the sentiment of the local populations. In the absence of mutual agreement between the three Western Allies and the U.S.S.R., the deputies decided (Sept. 15, 1948) to refer the question to the United Nations General Assembly.

Italy's colonial venture which began in Africa (1870) when the port of Assab in the extreme southern part of Eritrea was purchased, came to an end (1943). The African Empire which Premier Mussolini had sought to extend by entering the war had been lost colony by colony to the British: Eritrea, Somaliland, Ethiopia, Cyrenaica and Tripoli.

Once before (1889) an effort to establish a protectorate over Abyssinia (since called Ethiopia) had been upset by King Menelik, who with an army of 80,000 had annihilated a force of 12,000 Italians in the Battle of Adowa (1896). Eritrea was established a colony (1890).

Eritrea stretches for 670 miles along the African coast of the Red Sea from Cape Kasar to Cape Dumereh. To the west it is bordered by the Soudan, on the south by Ethiopia, and French Somaliland, a small section of which bordering on the Gulf of Eden was transferred to Italy by France (1935) when an interest in the railroad from Djibouti to Addis Ababa was also transferred to her. The total area (1931) was 15,754 square miles and the population 600,573, including 4,188 Italians. The Italian government (June 1, 1936) transferred the districts of Tigry (Tigrai), Danakilland (Dancalia) and Haussa (Aussa), all formerly a part of Ethiopia, to Eritrea.

The lowlands along the coast are hot and malarial, but the uplands are cool, sometimes cold. Irrigation is necessary to supplement rainfall for the crops, and the soil is poor. Agriculture and stock raising are the chief industries. There is a railroad 75 miles long connecting the seaport Massawa with the capital, Asmara (altitude 7,765 ft.), thence 65 miles to Cheren, thence 53 miles to Agordat. Gold is mined in Hamassen and petroleum is found but there has been as yet no development.

Italian Somaliland (area, 194,000 square miles; population (estimated 1936), 1,300,000) extends along the Indian Ocean from the Gulf of Aden to the Juba River. The coastline extending in a northeast-southwest direction, is 1,100 miles long, with no indentation of importance.

Italian Somaliland is the source of half the world's supply of incense. Other exports are oil, gum, hides, kapok, resin and ivory.

LIBYA
(Libia Italiana)

Italian Libya in North Africa extends along the Mediterranean Sea from Egypt on the East to Tunis (French) and Algeria on the West. On the south Libya extends to Algeria, to French West Africa and the Sudan. Libya for administrative and military purposes is divided into four provinces (Tripoli, Misurata, Benghazi and Derne) and into a military territory in the South having jurisdiction over the southern sections of the four provinces. The four provinces were incorporated into Italy (1939). The area of the territory is esti-

mated at 679,358 square miles with a population (1939) of 888,401. The capitals are Tripoli and Benghazi.

Cyrenaica set up an independent native regime with the Emir Sayed Idriss El Senussi, spiritual and temporal leader of the colony's 250,000 Senussi Arab tribesmen as head of the government, recognized unilaterally by Great Britain June 1, 1949.

Tripoli, formerly one of the Barbary States and independent (since 1714) was reconquered by Turkey (1835). During the Turko-Italian war (1911-12) Italy proclaimed the annexation of Tripoli, which was recognized by the great powers in the Treaty of Ouchy (Oct. 18, 1912). The oasis of Jarabub, on the eastern side of Cyrenaica, was ceded to Italy by Egypt (1926).

The prevailing religion is Mohammedan, and Arabic is generally spoken.

The country is rather barren, but has date palm orchards, olive groves, lemon, almond and fig trees, and vineyards. Other products include tobacco, matting, carpets, leather articles, and fabrics embroidered with gold and silver.

Tientsin, an Italian concession (since June 7, 1902) lies on the left bank of Pei-Ho and consists of about 130 acres with a population (1936) of 7,953. The concession has been returned to China.

The **Island of Saseno,** in the entrance to Vallona Bay (Albania), is three miles long and 1.25 miles wide. It was held by marines of the Royal Italian Navy and natives. Saseno has been returned to Albania.

Japan

(NIPPON—LAND OF THE RISING SUN)

Capital, Tokyo—Area, 147,690 square miles—Population (estimated 1949), 80,500,000.

Descriptive. Japan, as constituted after defeat in World War II, consists of four islands, Honshu (mainland) with an area of 88,919 square miles: Hokkaido, 34,276; Kyushu, 16,247, and Shikoku, 8,248. The islands lie in the north Pacific Ocean off the coast of China. By the terms ending World War II, Japan was forced to surrender her other seized lands, including Manchuria (Manchukuo) with an area of 404,428 square miles and a population of 43,233,954; the southern half of Sakhalin Island, the Kuriles, Korea, Formosa, and the mandated islands in the Pacific, the Marshalls, the Carolines, the Ladrones and the Palaus, former German possessions. Greater Japan was reduced from an area of 773,783 square miles, including Manchukuo, and a population (estimated in 1939) at 195,226,101.

The Japanese coast is deeply indented, its coast line measuring 17,150 miles. Few places in Japan are far removed from the mountains or really distant from the sea. The northern islands are a continuation of the Russian Karafuto chain running down through Yezo and the mainland. The continuation of the Kuentin mountain range of China appears in the southern islands, the ranges meeting in the grand Japanese Alps. In the vast transverse fissure crossing the mainland from the Sea of Japan to the Pacific rises a group of volcanoes, mostly extinct or dormant, with the majestic sacred mountain Fujiyama lifting its white cone 60 miles west of Tokyo to an altitude of 12,425 ft. The earthquake zone—where the average is said to be four slight ones a day, with serious ones every six or seven years—has its greatest center along the Pacific Coast near the Bay of Tokyo.

Tokyo (1939) had an estimated population of 7,094,600, which was reduced during the war to 3,276,000. The city absorbed (Oct. 1, 1932) 82 suburban boroughs and villages, increasing its area 214 square miles (137,190 acres).

Separating the islands of Shikoku and Kyushu from the mainland is the famous Inland Sea, opening both into the Sea of Japan and the Pacific. It is 255 miles long and 56 wide, with a coast line of 700 miles and a surface expanse of 1,325 square miles.

Heavy snowfalls are frequent on the Japan Sea slopes of the mountains of Yezo, while the Pacific side, by which flows the Japan Current, enjoys pleasing winter weather. There is an abundant rainfall. The streams are short and swift, of little value for transportation, offering a vast but as yet little developed supply of hydroelectric power.

Myriads of waterfalls add their charm to the magnificent scenery. The "Splendor of the Sun" at Nikko makes an unbroken plunge of 350 ft. There are a thousand mineral springs.

Resources and Industries. More than half the land is used for growing rice, the chief food of the country. Wheat, barley, rye, tobacco, tea, beans, peaches, pears, apples, grapes, persimmons and mandarins are also produced. Mulberry trees are widely grown, and the annual output of silk is huge (three-fourths of the world's total). The country possesses a variety of minerals including gold, silver, copper, lead, zinc, iron, chromite, white arsenic, coal, sulphur, salt and petroleum.

After agriculture and the making of silk, the principal industries before World War II w manufacture of woolens, cottons, paper, p vegetable oil, leather and matting. The chi ports in the order of their monetary value we cotton, wool, wrought iron, mineral oil, maci beans, crude rubber, wood, iron ore and co ports comprised, in order, cotton tissues, ra rayon cloth, machinery, canned goods, silk knitted goods, potteries, wrought iron, yarns, toys and vegetable oil.

Total industrial production for the yea was 40.9 percent of 1930-1934 level, and b January and November, 1948, rose fron percent to 61.1 percent.

There were in normal times 67 ports o foreign trade, the most important being Yoko Kobe and Osaka on the Pacific Coast of the island, and Niigata on the Japan Sea Coa port of trans-shipment for Vladivostok.

History and Government. According to the ese, the empire was founded by Emperor Tenno (660 B.C.). Temporal power was ex by successive families of Shoguns (1186-1867 recovered by the Emperor Meiji (1867). The system was suppressed (1871) marking the the upper middle classes led by the powerful t families.

By the terms of the surrender (Aug. 14, 194 the Potsdam proclamation which preceded th render and outlined the terms, Japan agr establish a new order of peace, security and with a democratic government and free ele The Potsdam proclamation specified that fr of speech and religion and thought as well spect for the fundamental rights of human established.

Gen. Douglas MacArthur was appointe preme Commander for the Allied Powers a cupied Japan. Occupation was to continu the democratic objectives had been attaine the adoption of a new Constitution. The ol ernment was retired with the occupatio Baron Kijuro Shidehara, one of the co best known liberals and a former ambassa the United States, was named Premier and a new Cabinet. One of the first acts Cabinet was to grant suffrage to women lower the voting age for men from 25 to 20

The vast family trusts under which Japs able to mobilize her financial and ind strength to wage war also were dissolved.

Gen. MacArthur informed the Japanese that he would permit them to govern ther under Allied directives and would employ to enforce his orders when necessary. N limit was set for occupation but the Po proclamation said withdrawal would be when the democratic objectives had been at

Parliamentary elections for the House of sentatives of the bicameral Diet were orde Gen. MacArthur (Jan. 1, 1946) and when the held (April 10) there were more than 1,900 dates for the 466 seats of the lower house. T turns were: Liberals, 139; Social Democra Progressives, 91; Independents, 84; Commu and minor parties, 38. There was a tie for maining seat. Women voted for the first Among the candidates elected were 38 Premier Shidehara resigned (April 22) an peror Hirohito appointed Shigeru Yoshida, Foreign Minister and head of the Liberal p succeed him on the day the new House h first meeting (May 16). Yoshida was su (May 19, 1947) by Tetsu Katayama, a Social a Christian, who was followed by Hitoshi who was replaced Oct. 15, 1948 by Shigeru Yo

A new Constitution was promulgated Japanese government Nov. 3, 1946 and effective May 3, 1947, with the approval MacArthur who called it an "enlightened" ment which placed "sovereignty squarely hands of the people." In an Imperial R Emperor Hirohito "commanded" that the tution be based on "the general will of the and the principle of respect for the funda human rights."

The new charter, which takes the place peror Meiji's Constitution of 1889, opens preamble in which the Japanese people "re forever" the right to wage war or maintain land, sea or air forces. It strips the Empero pretensions of "divinity" and provides he be the symbol of the state and of the unity people, deriving his position from the sovere of the people," but it reaffirms the Emperc of direct succession within his family. It a parliamentary regime in which the Diet i nized as the "highest organ of state pov sole law-making authority," and abolish House of Peers which is to be replaced by of Councillors whose members are ele popular ballot. The new Constitution als lishes a bill of rights for the Japanese peo are granted "freedom of thought and con and are guaranteed due process of law fear of despotic police methods, infliction of

ent in public or involuntary servitude. It also ants equal rights to husband and wife, specifying at marriage "shall be based only on mutual con- nt of both sexes." It prohibits the government om giving support to Shintoism, which was based the old concept that the Emperor was "God" d destined to rule the world, and also forbids e government to engage in religious education any other form of religious activity.

The first election for the House of Councillors, e upper house of the Diet, under the new con- tution, was held (April 20, 1947) and the first ection for the lower house (April 25). The Com- unists polled only 3 percent of the total popular te. The line-up of the Diet was as follows:

	Councillors	Representatives
cialists	47	143
berals	39	132
emocrats	32	122
mmunists	4	4
dependents and others	128	65

In the Jan. 1949 House of Representatives elec- n, the Communist party polled 9.6 percent of e total vote, electing 35 members.

The Cabinet organized Feb. 16, 1949, consists of members of the Democratic Liberal Party, 2 emocrats and 1 of the Ryokufukai (a conserva- ve group).

The Emperor is Hirohito (the 124th of his line, rn April 29, 1901). He succeeded his father, shihito (Dec. 26, 1926); was crowned (Nov. 10-14, 28); constituted Regent (Nov. 25, 1921) because his father's ill health; was married (Jan. 26, 24) to Princess Nagako Kuni. The Crown Prince Akihito Tsugu No Miya (born Dec. 23, 1933). her children are Princess Shigeko (born Dec. 6, 25), Princess Kazuko (born Sept. 30, 1929), Prin- ss Atsuko (born March 7, 1931). Prince Masa- to (born Nov. 28, 1935). A daughter, the sixth ild, was born (March 2, 1939) and christened kako Suganomiya. She is known as Princess ga.

Education and Religion. Japan has no State re- gion and all faiths are tolerated. The principal rms of religion are Shintoism with 13 sects and ddhism with 12 sects. There are 110,431 Shinto rines, 106,634 Buddhist temples and 2,104 Chris- an Churches. The Roman Catholics have an rchbishop and three suffragan bishops.

Shinto—the ancient religion, or "Way of the ds"—embodies strong nationalist concepts.

Nine years of education is compulsory, consisting six years of elementary and three years of lower condary education. There are seven national iversities: Tokyo, (founded 1877), Kyoto (1897), hoku at Sendai (1907), Kyushu at Fukuoka 910), Hokkaido at Sapporo (1918), Osaka (1931), d Nagoya (1939). Illiteracy is only 10% in the tion. English is the language of commerce and required study in the high schools.

Defense. Japan has no army and navy.

Currency. The monetary unit is the yen.

SURRENDERED COLONIES

The future of the **Spratly Islands** in the South hina Sea, occupied by the Japanese (March 31, 39) before the outbreak of World War II, will e decided by the terms of the still unwritten peace eaty with Japan. The islands, seven in number, nsist of 247 acres of coral reefs 700 miles south- est of Manila, P. I., and the same distance south Hainan, an important island off the coast of rench Indo-China. The islands were discovered 87 and were considered by Britain as one of her ssessions until the French occupied them and ade a formal claim for them (1933). Japan aimed them on the ground that Japanese traders d tried to exploit the phosphate deposits there 925).

Japan lost her other colonial possessions and andated islands under the terms of the Yalta greement

Jordan (Transjordan)

(HASHEMITE JORDAN KINGDOM)

Capital, Amman—Area, 34,740 square miles—opulation (estimated), 400,000.

Descriptive. Jordan, formerly known as Trans- rdan, is an independent State in Western Asia, rmerly an Arab State within the Palestine Man- te.

The boundaries of Jordan have not been etermined, but roughly, on the west the line eparating it from Israel runs from the Lake Tiberias down the Jordan to the Dead Sea and ence south across Wadi el Araba to Marashash the Gulf of Sinai; on the north it is separated om Syria by the River Yarmuk, thence eastward Imtar and thence a straight line northeast to- ard Abu Kamal on the Euphrates; on the east ie boundary between it and the Iraq runs south om Abu Kamal to the junction of the boundaries the Iraq and Nejd; on the south lies the kingdom Saudi Arabia.

Resources and Industries. The country is largely desert except for a 30-mile strip between the Jordan and the Hejaz railroad which traverses the country from Dera to Maan. The fertile portion, however, has a high agricultural potential. Phosphate and potash deposits are under development. Roads, many of them metalled, are being built to aid better communication between various important centers. Petroleum deposits are being surveyed.

History and Government. Jordan was set up within the Palestine Mandate (Sept. 1, 1922) but gained its independence (March 22, 1946) when Great Britain and Jordan signed a mutual assistance treaty.

The King of the Hejaz (1924) transferred Akaba, Maan and Tebuk to Jordan.

Under the Organic Law the Emir administers the country under a council of advisers. There is a legislative Assembly of 20 elected deputies.

Emir Abdullah became King Abdullah Ibn Ul-Hussein (May 25, 1946) in colorful ceremonies. He is the second son of the late Hussein Ibn Ali, former King of the Hejaz, and a brother of King Feisal II of Iraq. He was born in Mecca (1882) and became Emir (April, 1921).

The country's popular name, Transjordan, was banned April 26, 1949, in favor of the constitutional name, Hashemite Jordan Kingdom.

The Premier is Samir Pasha Rifai.

Religion. The population is chiefly nomad Arabs of whom about 330,000 are Arab Moslems, 50,000 Arab Christians, and 20,000 Circassians. The official language is Arabic.

Defense. Jordan's military forces comprise an Arab Legion, an air force, and a Frontier Force totaling approximately 10,000.

Currency. The monetary unit, the Palestine pound, is being replaced by new currency.

Korea

(Chosen)

Capital, Seoul—Area 85,246 square miles—Population (estimated 1949), 30,000,000.

Descriptive. The Republic of Korea occupies a mountainous peninsula in northeastern Asia dividing the Yellow Sea from the Sea of Japan. The boundaries on the mainland are the Yalu River and the Tamean River. Its coastline is more than 6,600 miles long. Southern Manchuria lies along its northwest frontier for 500 miles and it touches Siberia for a few miles, a scant 100 miles from Vladivostok, in the extreme northeast.

Resources and Industries. The forests in the north are of great value, and there is much mineral wealth awaiting development. Gold, silver, zinc, copper, lead, iron, tungsten, graphite, hard coal and kaolin are present.

The climate is dry and bracing. The mulberry tree thrives, 60,000 acres being planted with them. Silkworm culture was much encouraged by the Japanese and the quality of the cocoons improved. Some 786,000 families are engaged in the industry. Rice is an important crop. Barley, wheat, tobacco, and beans also are grown.

There has been considerable development of cotton spinning, cotton, silk and rayon weaving industries in recent years. Fertilizer and chemical works have been developed; also cement, paper, pottery, electric bulbs and enamelled ironwares.

History and Government. Korea was an ancient kingdom with a history extending back to the 12th Century B.C., long known as the "Hermit Kingdom." Situated between Vladivostok and Port Arthur, then a Russian leasehold and subject to diplomatic control and penetration by Russia, Korea became to Japan "a dagger pointed at her heart"—the chief immediate cause of the Russo-Japanese War of 1904-1905. After this war the "complete independence" of Korea that had been recognized in the treaty following Sino-Japanese War of 1894-1895 (which also was for the control of Korea) gave way to a recognition by Russia of Japan's paramount interest in Korea. Japan continued her military occupation of the country, and (Aug. 22, 1910), annexed Korea outright.

The independence of Korea was restored after the surrender of Japan in World War II. A provisional Government was established (Feb. 6, 1946) with ten members, five from the United States and five from the U.S.S.R. zones. These nations occupied the country, the northern half, above the 38° parallel, with a population of about 9,000,000, by Russia and the southern half below the 38° parallel, with a population of approximately 21,000,000, by the United States.

The Soviet puppet government of northern Korea adopted a constitution claiming jurisdiction over all Korea (May 1, 1948). The action was not recognized by the United Nations. A National Assembly was elected in Southern Korea under observation of a United Nations committee (May 10, 1948). The Russian-held zones did not participate. The As-

sembly approved (July 12) a Constitution which provides for a President and Vice President with four-year terms elected by the Assembly, sole legislative body; a Prime Minister and Cabinet appointed by the President with approval of the Assembly; and a Supreme Court. State ownership of most resources and utilities is provided for, except where licenses may be issued for private operation. The Republic was proclaimed Aug. 15, 1948 and received formal full recognition by the United States Jan. 1, 1949. Korea was formally cleared of United States troops June 29, 1949.

The President of Korea is Syngman Rhee (born 1875), veteran Korean statesman, elected (July 20, 1948) by the Assembly, and inaugurated (July 24). The Prime Minister is Lee Bun Suk (Aug. 2, 1948).

Education and Religion. Confucianism, Buddhism and Shintoism are the chief religions and Christianity has grown greatly. Many modern schools were established by the Japanese. There is a university in Seoul (Keijo), the capital.

Currency. The monetary unit is the won.

Latvia

(LATVIJAS REPUBLIKA)

Capital, Riga—Area (1940), 25,395 square miles —Population (estimated 1940), 1,994,506.

Descriptive. The Republic of Latvia is one of the three Baltic States of Northeastern Europe. It is bounded on the north by the Gulf of Riga and Estonia, on the east by Russia, on the south by Lithuania and Poland and on the west by the Baltic Sea.

Resources and Industries. About half the population engages in agriculture, dairying, livestock and other food producing industries, but the country is increasingly becoming industrialized. Potatoes are the chief agricultural product, followed by oats, rye, barley, wheat and flax.

Latvia provides the natural route for trade between Russia and western nations. Three Russian main railway lines converge in Riga, Windau and Libau. All of Latvia's ports have excellent harbors. Riga has ice breakers that keep the port open during the winter. Founded in 1201, Riga was a Hanseatic town in the Middle Ages and a Swedish fortress from 1621 to 1710. It is today the largest port on the Baltic.

History and Government. Formerly a Russian province, Latvia became a republic (Nov. 18, 1918). Latvia was occupied by the Union of Soviet Socialist Republics (1940) and incorporated into the Soviet Union. This action has not been recognized by the United States.

Education and Religion. Latvia is Protestant by 55.15%; Roman Catholic by 24.45. Education is compulsory from 7 to 16 years. There is a university in Riga.

Lebanon

Capital, Beirut—Area, approximately 3,600 square miles—Population (estimated 1946), 1,160,000.

Descriptive. The Republic of Lebanon, in the Levant, occupies a strip along the Mediterranean littoral in southwest geographical Syria about 120 miles in length and varying in width from 30 to 35 miles, extending from Palestine on the south to Nahr al Kebir on the north, with its eastern boundary running down the Anti-Lebanon mountain range. Beirut is the chief seaport.

Resources and Industries. The country is primarily agricultural, the most important products being fruits, tobacco, silk and cotton.

History and Government. Lebanon was formed from the five former Turkish Empire Sanjaks (districts) of North Lebanon, Mount Lebanon, South Lebanon, Beirut and Bekaa, and became, with Syria, an independent state (Sept. 1, 1920), following the Treaty of Sevres (Aug. 10, 1920). The states were administered under French Mandate (1920-1941). An agreement (signed Dec. 27, 1943) transferred nearly all powers hitherto exercised by France to the Syrian and Lebanese Governments (effective Jan. 1, 1944). Foreign troops subsequently were withdrawn (April 1946). Elections to the Lebanese Parliament were held May 25, 1947.

Lebanon is a member of the United Nations and became a member of the Arab League by a pact signed in Cairo (March 22, 1945).

The President, elected for a six-year term, is Beshara al-Khoury (elected Sept. 21, 1943; re-elected May 27, 1948). The Prime Minister is Riadh el-Sulh.

Education and Religion. The population is composed mainly of Moslems. There is an American and a French University in Beirut, in addition to elementary and secondary schools. Arabic is the principal language.

Defense. Lebanon introduced (July 1949) in Parliament a bill creating universal compulsory military service between the ages of 18 and instituting military training in the school

Currency. The monetary unit is the Le pound.

Liberia

Capital, Monrovia—Area, 43,000 square Population (estimated 1946), 1,600,000.

Descriptive. The independent Negro Repu Liberia lies on the southwest (Guinea) co Africa between Sierra Leone (British) on th and the French colony of the Ivory Coast east; with a coast line on the South Atla about 350 miles. It extends inland 75 to 150 Most of the country is covered with tropical rich in timber and oil nuts but lacking in tra tation. There were estimated (1937) to be 000 rubber trees. There are no railroads miles of motor roads can carry light traffic.

Resources and Industries. The chief produ fibre, palm kernels, crude rubber, rice, c coffee, and sugar. Mineral resources includ iron ore. Diamonds have been found in son tricts.

History and Government. The population tirely of the African race; about 100,000 dwellers along the coast may be considered ized. The number of American Negroes is est at 20,000. Liberia was founded (1822) w settlement was made at Monrovia by Negro men from the United States with the ass of American colonization societies. It w clared a republic (July 26, 1847). Its Co tion is modelled on that of the United Electors must be of Negro blood and owners The Government rests with a President elec eight years; a Senate of eight, elected for six and a House of Representatives of 15 for four years. The President is William V man (elected May 4, 1943) for an eight-yea

Education and Religion. In religion the are Protestant (Anglican, Presbyterian, Bap Methodist). There are 206 schools—81 of are maintained by the Government and 83 ligious missions. There are two colleges.

Defense. All citizens between the ages of 45 years are liable for service for defense country.

Currency. The money in circulation is States currency (since 1942). There als Liberian coinage in silver and copper.

Liechtenstein

Capital, Vaduz—Area, 65 square miles— tion (census 1945), 12,197.

Descriptive. Liechtenstein is a Principality Upper Rhine between Austria and Switzerl was (until 1866) a member of the German eration, and was practically a dependency tria until the Diet declared its complete in dence (Nov. 7, 1918). By treaty with Swit (1920) that country administers its posts a graphs and by treaty (March 29, 1923) it wa porated in the Swiss customs territory. Its interests are represented by Switzerland.

Resources and Industries. The people a cultural; stock raising is highly developed.

History and Government. The monarchy editary. By the Constitution (1921) leg powers rest in a Diet of 15 members, ele four years by direct vote, on a basis of u suffrage and proportional representatio reigning prince is Franz Joseph II. He su his uncle, Prince Franz I, on the latter's ab (March 30, 1938). The Prime Minister Alexander Frick.

The ruler of Liechtenstein makes an contribution to the public treasury (about a year). The country is virtually taxless, by reason of the ruler's contribution but the fact that, because they are tax-exemp international corporations set up head there, pay nominal fees for the privilege an the taxes in their own countries.

Education and Religion. The country is inantly Catholic. There are 42 elementary continuation schools.

Defense. Liechtenstein has no military The police force numbers 50.

Currency. The monetary unit is the fran

Lithuania

(LIETUVA)

Capital, Vilna—Area (1940), 22,959 squa —Population (estimated 1940), 2,879,070.

Descriptive. Lithuania, a Baltic state, is on the north by Latvia, on the east by Po the south by Poland and East Prussia and west by East Prussia and the Baltic Sea.

Resources and Industries. Lithuania is essentially n agricultural country, the soil claiming 76.7% of ne population. More than 45% of the land is in rms, 18.6% in forests. The chief crops are rye, heat, barley, oats, potatoes and flax. The prinpal exports are meat, butter, flax and eggs.

History and Government. A Grand Duchy under ne Russian Empire, Lithuania proclaimed its inependence (Feb. 16, 1918). It was recognized by ost of the powers and by Russia in the Treaty of oscow (July 12, 1920). The dispute with Poland, elative to whether certain Lithuanian areas were be left as a part of the country or become part Poland, was under consideration by the League Nations when (Oct. 9, 1920) General Zeligowski, ith 15,000 Polish troops, occupied Vilna, historic ithuanian capital, and declared it annexed to oland. Vilna, by a decision of the League of ations (1923) with its strip of territory, about ,400 square miles, was awarded to Poland.

Memel and its territory (1099 square miles, popution 152,000), the chief port of Lithuania with odern wharves, warehouses and docking machiery, was returned to Germany (March 22, 1939), n a demand of the Reich based on the self-deterination of the peoples.

Lithuania was occupied by the Union of Soviet ocialist Republics (1940) and incorporated into ne Soviet Union. The action has not been recogzed by the United States.

Education and Religion. The nation has a uniersity, art schools and other cultural institutions, national opera and several museums.

Luxemburg

Capital, Luxemburg—Area, 999 square miles—opulation (estimated 1948), 292,000.

Descriptive. Luxemburg is a European Grand uchy, bounded by Germany on the east, Belgium n the north and west, and France on the south. measures only 55 miles long by 34 miles wide.

Resources and Industries. Luxemburg is a coun- y of small landowners; 430,000 of the 500,000 res devoted to agriculture are farmed by resident wners. The principal crops are oats and potatoes. The mineral output of Luxemburg, despite its ze, is enormous and includes iron, pig iron and eel.

History and Government. The integrity and neuality of Luxemburg were guaranteed by the reaty of London (May 11, 1867), having been preously (since 1815) a part of the Germanic Confedration. As a Grand Duchy Luxemburg is governed nder a Constitution (1868), modified (1919). Legistive power rests with a Chamber of Deputies, 55 number, elected by universal suffrage with exutive power held by a Minister of State and a binet of at least three Ministers. Luxemburg is led by Grand Duchess Charlotte (born Jan. 23, 96), who succeeded on the abdication of her ster, Marie Adelaide (Jan. 9, 1919) and was arried (Nov. 6, 1919) to Prince Felix of Bourbonrma. They have a son and heir, Prince Jeane orn Jan. 5, 1921) and four daughters and anher son.

The Prime Minister is Pierre Dupong.

Education and Religion. The population is almost tirely Roman Catholic. Education is compulsory tween six and 13. The nation has several colleges d higher institutions of learning.

Defense. Luxemburg founded its first Army 945). Two battalions of light infantry, comprisg 1,825 men, were formed at the start and Prime inister Dupong said it was planned to raise and uip a force of 15,000. Service is obligatory.

Currency. The unit of currency is the franc.

Mexico

(ESTADOS UNIDOS MEXICANOS)

Capital, Mexico City—Area, 763,944 square miles Population (estimated 1948), 23,876,000.

Descriptive. Mexico, a Federal Republic, is unded on the north by the United States, on the st by the United States (Texas), the Rio Grande rming the boundary line, and the Gulf of Mexico; the south by Guatemala and on the southwest d west by the Pacific Ocean. The Gulf of Calirnia makes a huge indentation in the western ast, completely separating the narrow, mountains, sterile and sparsely inhabited peninsula of wer California, 760 miles long, from the mainnd. On the east the province Yucatan juts out to the Gulf of Mexico, connected with the main rritory of the country by a narrow strip northwest the Guatemala frontier. The coast line on the cific is 4,574 miles long and 1,727 on the Caribn. The northern boundary is 1,600 miles long. The Sierra Madre mountains run north and uth near the western coast, turning near Colima d continuing nearly due east, paralleling the ast into the Central American countries. Near e Gulf Coast another range of mountains—a continuation of the Rocky Mountains—runs down nearly to Vera Cruz.

Between the two ranges lies the vast tableland of Mexico, altitude from 5,000 to 8,000 feet, with a delightful climate and with the vegetation and products of the temperate zone varying with the altitude. The lowlands along the coast are tropical, rising to subtropical in the foothills; hot and unhealthy with a heavy rainfall on the Gulf side. Along the Pacific slope and in the interior irrigation is needed and natural streams from the mountains are used to supply it.

Resources and Industries. The principal industry in Mexico is mining, and until recently 97% of the 31,000 mining properties had been foreign-owned. Mexican silver accounts for 40% of the world's output. Among the minerals are gold, copper, lead, zinc, antimony, mercury, arsenic, amorphous graphite, molybdenum, coal and opal. Petroleum production is huge and the industry was nationalized (March 18, 1938).

Agriculture and stock-raising likewise are important industries. The country is marvelously rich, but the land is barely scratched except on the larger ranches; primitive methods of cultivation prevail. Arable lands are estimated at 275,000,000 acres of which 12,000,000 acres are farmed. The grazing lands cover about 120,500,000 acres and forests 44,000,000 acres of which 25,000,000 are estimated to be rich in pine, spruce, cedar, mahogany, rosewood and logwood. Some of the more important products are corn, rice, sugar, wheat, coffee beans, tomatoes, tobacco, cotton, garbanzos, cocoa, sisal, bananas. About 50% of the world's supply of sisal comes from Yucatan.

History and Government. Mexico has been much torn by civil war and insurrection since achieving its independence from Spain (proclaimed Sept. 15, 1810, and effected in 1821).

Mexico is governed under a Constitution (promulgated Feb. 5, 1917) replacing the Constitution of 1857. It was amended chiefly as to tenure of office (1929 and 1933) and now provides that the president shall be elected for a term of six years and thereafter shall be ineligible for that office; the 58 Senators for six years (half the Senate being renewed at a time) and Deputies (one to every 150,000 population) for three years. Senators and Deputies are ineligible to succeed themselves in office until one term has intervened. The Senate has two members from each State and the Federal District; the Chamber is elected on a population basis.

Mexico is declared to be a Federal Republic of 28 States, each having a large measure of home rule and with governor, legislature and judiciary elected by universal suffrage in a general election. There are also two territories whose governors are appointed and may be removed by the President, and a Federal District containing Mexico City governed by Federal Commissioners. The President appoints a Cabinet of nine ministers and eight department heads with cabinet rank, who are responsible to him and may be dismissed by him. He has the right to expel from Mexico without "judicial process" any foreigner whose presence he may deem "inexpedient."

At a general election (July 7, 1946) Miguel Aleman was elected President.

Mexico has pursued (since 1915) a policy of land distribution, seizing large estates and partitioning them among the landless peasants. The title rests in the Government, but the peasants are allowed to use the lands. There were distributed (1915-1941) 65,000,000 acres among 1,606,507 peasants.

It was decreed (1940) that individual land titles be given "as soon as possible" to 1,500,000 Mexican peasants living on the Republic's communal farms. Under the decree 65,000,000 acres have been parceled out among the peasants, but communal operation of the farms continues.

The Government regulates farm production and fixes maximum and minimum prices for farm products. The exportation and importation of agricultural products are under State control.

Labor laws exist similar to those in the United States, pertaining to employer-union dealings.

Mexico established (1943) a social security system for insurance to cover industrial accidents and diseases, non-industrial diseases and maternity, incapacity, old age and death, and involuntary unemployment at an advanced age.

Defense. Military service in the Army or National Guard is compulsory. The President, through the Secretary of War, exercises supreme command. The measure (made a law 1940) calls for the training of 50,000 reserves annually until a reserve of 200,000 has been developed. There is a small Navy and Air Force.

Education and Religion. Education is free and compulsory up to 15 years of age. Vocational instruction, particularly in agriculture, is being promoted. There are normal schools for both sexes throughout the country and some hundred technical schools. The National University of Mexico

(founded 1553), is famous among Latin-American universities, and in the capital are many higher institutions of learning and culture and scientific institutions and societies. Education in primary, secondary and normal schools is socialistic and divorced from all religious doctrines.

There is full religious freedom. The majority of the people are Roman Catholic. The Mexican Constitution forbids any church to own real estate.

Currency. The monetary unit is the peso.

Monaco

Principal towns: La Condamine, Monte Carlo, Monaco—Area, 0.59 square mile—Population (estimated 1948), 21,000.

Descriptive. Monaco is a small principality on the Mediterranean surrounded on all but the sea side by the French Department of the Alps Maritimes. It is noted for an exceptionally mild climate and magnificent scenery.

Resources and Industries. Monaco's fame as a tourist resort and international conference city is widespread. Its revenues derive from indirect taxation, a tobacco monopoly, postage and the gaming tables of the Monte Carlo Casino. Monte Carlo is a town with a resident population of 9,428.

History and Government. An independent principality for 800 years, the reigning Prince was dispossessed by the French Revolution. The line was re-established (1814) and placed under the protectorate of France (1815) of the Kingdom of Sardinia. King Charles III (1861) ceded his rights upon Menton and Roquebrune to France. The Prince of Monaco was an absolute ruler until a Constitution was promulgated (June 7, 1911). This provided for a National Council of 12 members (1917) elected by universal suffrage for four years. Monaco is divided into three communes: Monaco-Ville, La Condamine and Monte Carlo, administered by a municipal body elected by vote. There is a local police force of 200.

The ruler of Monaco is Prince Rainier who succeeded his father, Prince Louis II, on the latter's death, May 9, 1949.

Currency. The French franc is the unit of currency.

Morocco

(MOGHREB-EL-AKSA, i.e. THE FARTHEST WEST)

Capital, Rabat—Area, 172,104 square miles—Population (estimated 1947), 9,591,000.

Descriptive. Morocco of today is the remnant of the great Shereefian Empire founded by the Arabs at the close of the seventh century and ruled all northwestern Africa and most of the Iberian Peninsula. It is bounded on the east by Algeria, on the north by the Mediterranean, the extreme point opposite Gibraltar being Ceuta; on the south by Rio de Oro and Algeria, and on the west by the Atlantic Ocean.

Along the 200 miles of the Mediterranean littoral run the Riff hills. The country has been mapped and motor roads run up and down the whole area. Through the country from northeast to southwest extend the Atlas Mountains in five great ranges rising to an altitude of 12,000 ft. Between these ranges lie fertile well-watered plains and the northern slopes of the mountains are well wooded. Irrigation is much used, though all agricultural methods and implements are primitive.

The climate is healthy, especially on the Atlantic Coast, which is shielded from the hot winds of the Sahara by the Atlas Mountains, and where there is a "tell" or fertile region. Tangier is a recognized health resort, also Mogador, where the temperature never rises above 80 or falls below 40.

The French protectorate encompasses the whole of Morocco (except the Ifni enclave and the Cape Juby area) from the Algerian frontier to the Atlantic Ocean and from the Sahara Desert in the south to the boundary of the Spanish zone in the north. The area is approximately 153,870 square miles; population (estimated 1947), 8,500,000. The Spanish section is the northern strip that extends (except for the small internationalized Tangier area) from a point in the Atlantic about 16 miles south of Larache to the river Moulouya. Spain also exercises jurisdiction over the Ifni enclave and the Cape Juby area on the Atlantic Ocean in the extreme southwest of the country. Spanish-controlled territory totals approximately 18,009 square miles with a population (estimated 1940) of 991,900.

The most numerous of the inhabitants are the aboriginal Berbers, mountain dwellers, whose forebears thrice conquered Spain. The plains are mostly occupied by Arabs and a mixture of the two races, known to foreigners as "Moors." The latter are also town dwellers. The third race is Jewish, in two sections, one settled there from time immemorial, and the other driven from Europe in comparatively modern times, who live near the ports, and have much of the trade.

Resources and Industries. The people are ag cultural and pastoral. Eggs and poultry have come the chief articles of export, reaching even England. Other important exports are skins, hid wool, beans, barley, linseed and wheat, almon cummin and gums. The chief imports are textil sugar, tea, machinery and hardware, candles spirits. Fruit and vineyards are abundant dates a regular crop. Carpets, leather goods, fezz woolen and silk stuffs are among the manuf tures, chiefly for domestic consumption. Mine deposits are undeveloped, but much copper, l and tin are known to exist. An oil field exte from Fez to Laraish. Phosphate exists in gr abundance, estimated at 100,000,000 metric tons

History and Government. The Empire theore cally is an absolute monarchy, but the country divided into three zones—French and Spanish zo and the neutral Tangier area. The Sultan resi in Rabat in the French zone, but Fez, Mar kesh and Meknes are accepted as capitals by tra tion.

Morocco came under French influence beca of its proximity to Algeria. A general rising of tribes (Oct. 1910) culminating in the siege Fez, called out a French expedition of pacificati which occupied Fez (1911). For two decades the after the country was restless, with frequent risings, and pacification was not completed u the exile of Abd-el Krim (1926) and surrender Sidi Ali Hociene, last die-hard chief (1933.)

The reigning Sultan of Morocco is Sidi Moha med (proclaimed Nov. 19, 1927). He was the th son of Moulay Youssef (reigned 1912-1927).

Education and Religion. The native population largely illiterate. There are numerous Kora schools imparting an elementary education, a in the French Zone education on European li is provided in the French schools. The most nota Islamic school is the Kairoween University in F The principal languages are Moorish-Arabic a the Berber dialects. French and Spanish are u for official and business purposes in their resp tive zones. The population is predominan Moslem.

Currency. The monetary unit in the French Z and Tangier is the franc. Spanish currency c culates in the Spanish zone.

Tangier, a seaport of 60,000 inhabitants, a surrounding territory, which occupies the extre northwest corner of Africa on the Atlantic, is ternationalized. The Tangier Zone comprises square miles and a population estimated at 100,0

A convention was signed (Dec. 18, 1923) and protocol (July, 1925) by Great Britain, France a Spain, providing for its permanent neutrality, curity and internationalization. Spain, however, opened the question (1926) by a demand for control and the incorporation of Tangier within Spanish protectorate. A new accord was sig (July 25, 1928) giving Spain control of policing committee of eight insular officers and an inter tional legislative assembly of 27 members, form the government until 1945.

A conference of French, British, United Sta and Russian experts agreed (Aug. 22, 1945) on establishment of a provisional international gime based on the 1923 convention, and reques withdrawal of Spanish occupation forces. international administration went into effect (O 11, 1945).

Nepal

Capital, Katmandu—Area, 54,000 square mile Population (estimated 1948), 7,000,000.

Descriptive. Nepal is an independent kingdom the southern slope of the Himalayas, bounded the north by Tibet, on the east by Sikkim Bengal and on the south and west by the Domi of India. Although friendly, a policy of exclu has been followed and travel discouraged u recently.

There are many fertile valleys lying in the sl of the bleak and lofty mountains, including Everest (altitude 29,002 feet), and its territory n into the Terai on the plains of India. The cap is in a fertile valley, 15 miles long and 20 m wide, which supports 450,000 inhabitants and noted for its 2,700 Buddhist shrines, nearly lavishly decorated examples of Nepalese art.

Resources and Industries. Nepal has rich for and quartz deposits. A survey of mineral resou was authorized (1948) following the visit of American diplomatic mission. The country exp jute, rice, grain, cattle, hides, wheat and dr and imports textiles, sugar, salt, hardware, et

History and Government. Nepal was origin divided into numerous hill clans and petty p cipalities, the inhabitants of one of which— Ghurkas, a Mongolic-Hindu strain—became dominant (about 1769). The ruling family s then, however, are Hindu Rajputs. The sover is Maharajadhiraja Tribhubana Bir Bikram (1 June 30, 1906). All power is held by the Pr

inister, always the oldest active male member of e ruling Rana family. The Premier is Maharaja andra Shumshere Jung Bahadur Rana (1948). he Ranas are predestined at birth to be generals d to hold all principal posts in the Government, hereas the Thapas family of the King, who is tually a figurehead, are mere colonels by heredity.

Slavery was abolished (1925); and purdah, Mosm custom of secluding women (1945).

The United States recognized the independence Nepal and established diplomatic relations rough an agreement of friendship and commerce 947).

Education and Religion. Educational facilities are ing improved, and compulsory education is under nsideration. Ancient Hinduism is the religion of e bulk of the people.

Defense. The army consists of 20,000 regular fantrymen.

Currency. The monetary unit is the Nepalese pee. Paper currency was issued for the first time 1945.

Netherlands

(KONINKRIJK DER NEDERLANDEN)

Capital, Amsterdam—Area, 15,764 square miles Population (estimated 1948), 9,794,000

Descriptive. The Netherlands, a kingdom in rthwestern Europe, is bounded by Germany on e east, Belgium on the south and the North Sea the west and north. Its surface is flat, with an erage height above sea level of 37 feet, and with out one-fourth of its land below sea level, reimed and protected by dykes, of which there are 00 miles. Drainage of half of the shallow Zuyder e, which covers 1,350 square miles, with an ening into the North Sea about 19 miles wide, ded 900 square miles to the cultivable land, e areas being called "polders."

The Hague is the official residence of Queen liana and the seat of her government, but nsterdam is the sole capital of the Kingdom and e inauguration of the King or Queen—in accordce with the constitution—is held there.

Resources and Industries. Of the country's 47,875 acres given over to agriculture (including rdens, orchards and pastures) 90 per cent are holdings of fewer than 50 acres and more than per cent of fewer than 10 acres. Cereals, potaes, sugar beets and other crops are raised. Comercial fishing engages about 25,000 persons. Dairy oducts are an important industry; the cheese oducts are famous and the cattle high grade. the very special type of soil found on the edge the polders and the sand dunes along the coast, lips and other flowering bulbs and roots are own. The Dutch bulb is not indigenous to Hold but originated in Persia, whence it was taken Holland several hundred years ago. The village Boskoop, with 600 nurseries, is the largest center the world for flowers and ornamental plants.

The most important industries before World War were shipbuilding, the manufacture of machin-y, textiles (including rayon), and chemical prodts; also brewing and distilling and flour milling. nsterdam is famous for diamond cutting; Delft r pottery. Coal is found in Limburg. The mines e mostly government owned.

Canals, of which there are 4,817 miles, are most portant in internal communication; elaborate stems are in the cities and feed the harbors. he Rhine and the Scheldt reach the sea through e Netherlands and carry enormous traffic, the heldt including that from Antwerp.

History and Government. The first Constitution ter the reconstruction of the Netherlands as a vereign state was promulgated (1814), and re-ed (1815) after the addition of the Belgian ovinces, and (1840, 1848, 1887, 1917, 1922 and 38). It assures a hereditary constitutional monchy. Executive power rests exclusively in the vereign and the States-General (Parliament) of o Chambers: First Chamber, 50 members, elected r six years (one-half every third year) by the ovincial legislatures, and the Second Chamber, Deputies, elected for four years directly. Uniral suffrage for citizens of both sexes over 23 ars of age and proportional representation are force. The Sovereign exercises the executive thority through a Council of Ministers, the esident thereof corresponding to a Prime Minis-. There is a State Council named by the vereign, of which she is President, to be con-ted on all legislative and some executive matters. The reigning Sovereign is Queen Juliana Louise mma Marie Wilhelmina (born April 30, 1909), ly daughter of former Queen Wilhelmina, who ceeded to the throne (Sept. 4, 1948) on the abdi-ion and retirement of her mother (announced ay 12, 1948). Queen Juliana was married (Jan. 7, 37) to Prince Bernhard of Lippe-Biesterfeld orn June 29, 1911), Prince Consort, known as he Prince of the Netherlands" since the accession of Juliana. They have four daughters, Princess Beatrix Wilhemina Armgard (born Aug. 5, 1939), heiress-apparent; Princess Irene Emma Elizabeth (born Aug. 5, 1939), Princess Margaret Francisca (born Jan. 19, 1943) in Ottawa, Canada, and Princess Maria-Christina (born Feb. 18, 1947).

Parliamentary elections were held (1946) with the following results:

First Chamber (May 29)—Catholic, 17; Labor, 14; Anti-Revolutionary, 7; Christ Historical, 5; Communists, 4; Freedom, 3.

Second Chamber (May 17)—Catholic, 32; Labor, 29; Protestant, 23; Liberal, 6; Communist, 10.

In a special Parliamentary election (July 7-8, 1948), made necessary by proposed Constitutional changes, the lineup of the Second Chamber became as follows: Catholic party, 32; Socialists, 27; Anti-Revolutionary, 13; Christian Historical Union, 9; Communists, 8; Liberals, 8; State Reformed, 2; Catholic splinter group, 1.

The Premier is Willem Drees, Labor Party.

Under the revision of the Constitution in 1922 Netherland India was abolished as a colony and made an integral part of the Kingdom.

Education and Religion. Entire liberty of worship and conscience is guaranteed. The royal family belongs to the Netherlands Reformed Church. The state contributes to the support of several religious denominations.

Education is obligatory from ages seven to 13. Instruction is free or subject to a small fee, in both public and denominational schools and teachers are paid by the State. There are universities in Amsterdam (two), Utrecht, Leyden, Delft (Engineering), Groningen, Wageningen (Agriculture), Rotterdam (Commerce), Nijmegen (Roman Catholic), and Tilburg (Commerce, Roman Catholic).

Defense. Army service is compulsory between the ages of 20 and 40. The Navy consists of one carrier, two cruisers, seven destroyers, a number of submarines and minor miscellaneous craft. The Netherlands also maintains an Air Force.

Currency. The monetary unit is the guilder (florin).

INDONESIA
(Former Netherlands Indies)

The overseas territories of the Netherlands in the East Indies consist of an archipelago lying along the Equator from about 6° north latitude to 10° south latitude, between the Asiatic mainland and the Philippines, and Australia. The great majority of the natives are Mohammedans. The population of Indonesia (estimated 1949) is 76,000,000, including approximately 290,000 Europeans and Eurasians. The area of the islands is 743,483 square miles. The capital is Batavia, Java.

There are vast resources of tin, oil and coal. Principal crops are rice, maize, cassava, sweet potatoes, ground-nuts, soya beans, native tobacco, coffee, rubber and cinchona.

Indonesia comprises five large islands—Java, Sumatra, part of Borneo, Celebes and the western half of New Guinea—and thousands of small ones. Areas and populations (estimated) of the principal divisions are:

	Area (Sq. Mi.)	Population
Borneo (Netherlands)	208,286	3,000,000
Riouw Archipelago	4,000	200,000
Bangka	4,549	230,000
Billiton	1,873	80,000
Sumatra	180,000	11,490,000
Java and Madura	50,000	50,000,000
Islands of State of East	142,986	11,000,000
Indonesia:		
Celebes	72,986	5,500,000
Lesser Sunda Islands	35,000	4,600,000
Moluccas	25,000	600,000
Others	10,000	300,000
New Guinea (Netherlands	151,789	1,000,000

Since about 1900, the Netherlands have been aiming at the gradual abolition of colonial relationships through the granting of political responsibility to the Indonesians in the local and central legislature and administration. Queen Wilhelmina announced the constitutional equality of the Netherlands Overseas Territories with the mother country in a speech from the throne Dec. 7, 1942.

The Dutch-held portion of Indonesia (Dec. 1948) was composed of six Federal States, 10 provisional autonomous territories and other unorganized areas.

A provisional Federal Government of Indonesia, consisting of the then Acting Governor-General Hubertus van Mook and a number of Secretaries of State and military heads, was installed March 9, 1948 to provide interim rule of Indonesia, except in the then Republican-held areas.

Provision has been made by the Netherlands government for the formation of a Netherlands-Indonesian Union. Also, in a resolution, Jan. 28, 1949, the United Nations Security Council called for the formation of a sovereign United States of

Indonesia by July 1, 1950, with co-equal status with the Kingdom of The Netherlands.

The High Commissioner of the Crown is Dr. A. H. J. Lovink, installed June 2, 1949.

The monetary unit—the guilder—has the same foreign exchange valuation as that of the Netherlands.

REPUBLIC OF INDONESIA

A revolutionary nationalist movement, seized power from the Japanese after the latter's capitulation in World War II and on Aug. 17, 1945, Achmed Soekarno proclaimed the Indonesian Republic of which he became President, claiming jurisdiction over all of Indonesia.

Defacto authority of the Republic over the islands of Madura and most of Java and Sumatra, except in cities under Netherlands occupation, was recognized by The Netherlands in the Basic Agreement of Linggadjati (Cheribon Agreement) in December 1946, formally signed in Batavia, March 25, 1947. The agreement gave the Republic the status of a member state in the projected sovereign United States of Indonesia.

Fighting began (July 20, 1947) between Netherlands and guerrilla Republic forces as result of disputes over details of the projected interim national government. A truce, arranged by the Good Offices Committee of the United Nations, was signed Jan. 17, 1948, giving the Netherlands interim rule over most of Java and Sumatra. An accompanying statement of political principals (Renville Agreement) gave the Republic the status of a member state in the projected U.S.I. and provided for plebiscites in areas of Java and Sumatra remaining to the Republic to permit residents to decide whether their respective areas would enter the U.S.I. as parts of the Republic, or as separate states, or as parts of other states.

Before police action taken by The Netherlands in December 1948, the Republic had an estimated total area of 159,840 square smiles, of which 15,840 square miles were on Java and 144,000 square miles were on Sumatra. The population (estimated 1948) was 29,000,000, of which 22,400,000 were on Java and 6,600,000 on Sumatra. The capital was Jogjakarta.

A preliminary Dutch-Republican agreement was reached May 7, 1949 in Batavia aiming toward preparation for the return of the Republican Government to Jogjakarta and the restoration of order. Accordingly, the Indonesian army took control of the city June 24-30. War was formally ended Aug. 3, 1949, by a cease-fire order from President Soekarno to guerrilla armies, and the establishment of an armed truce. The Sultanate of Jogjakarta has an area of about 1,280 square miles and a normal population of approximately 2,000,000.

NETHERLANDS WEST INDIES AND SOUTH AMERICAN POSSESSIONS

Surinam, also known as Netherlands Guiana, is situated on the north coast of South America, between French Guiana on the east and British Guiana on the west; forests and savannas on the south stretch to the Tumuc Humac Mountains. The area is 55,143 square miles. The population is 188,484. Paramaribo is the capital.

The Dutch by the Treaty of Breda (1667) gave New Netherlands (New York) to England in exchange for Surinam.

The United States established (1941) a military outpost in Surinam. Brazil shared in the arrangement.

The chief export is aluminum ore "bauxite," and 65 per cent of the American consumption of this important raw material comes from Surinam. Other exports are sugar, coffee, bananas, balata and high quality lumber. The Netherlands guilder is the monetary unit.

The overseas territory of **Curacao** consists of two groups of islands; **Curacao, Aruba** and **Bonaire** are near the Venezuelan coast and **St. Eustatius, Saba** and the southern part of **St. Martin** are 500 miles to the northeast and belong to the Lesser Antilles. The area of the group is 381.1 square miles, divided as follows: Curacao, 172.5 square miles; Bonaire, 111.9; Aruba, 69.9; St. Martin (Dutch part), 13.2; St. Eustatius, 11.8, and Saba, 4.8.

The population (Jan. 1, 1940) was 105,617. Willemstad is the capital. The chief products are corn, pulse, salt and phosphates; the principal industry is the refinery of oil. On Curacao the Royal Dutch Shell and on Aruba the Standard Oil Company of New Jersey have large oil refineries, refining the oil from Venezuela.

Nicaragua
(REPUBLICA DE NICARAGUA)

Capital, Managua—Area, 57,145 square miles—Population (estimated 1948), 1,160,000.

Descriptive. Nicaragua, largest of the Central or Middle America States, lies between the Caribbean Sea and the Pacific Ocean with more than 200 miles of coastline on each. The country is bordered by Honduras on the north and Costa Rica on South. The Cordillera range of mountains, ciuding many volcanic peaks, runs from north to southeast through the middle of the cou Between this range and a range of volcanic p to the west lie Lake Managua, 30 miles lon 15 miles wide, and Lake Nicaragua, 100 miles and 45 miles wide, of great importance in the tr port system of the country. The governr owned Pacific railroad, running from Corint Leon and from Managua to Granada (171 m is the only one in the country.

Resources and Industries. The country has v able forests, some gold is mined, but it is essent an agricultural and stock raising community. the broad tropical plains to the east coast, ban and sugar cane are cultivated, and coffee is gr on the mountain slopes. The production of has attained first rank in the country, ta precedence over coffee, which formerly held lead.

Other products are mahogany and hides skins. Chief imports are textiles, machinery, ch icals and flour. The chief trade is with the Un States.

History and Government. The country has a stormy political history; revolutions have frequent and it has been necessary for the Un States to land Marines there on several occas to protect American lives and property.

The Constitution (March 22, 1939, amended 23, 1948) provides for a congress of two chami a House of Deputies of 40 members elected fo years, and a Senate of 15 members elected fo years, all chosen by popular vote. Ex-presidents serve in the Senate and are appointed for The President is elected for a period of six ye The President is Dr. Victor Roman y Reyes (ele Aug. 14, 1947).

Education and Religion. Roman Catholic is prevailing religion, but there is complete free of worship. The teaching of English in the pu schools is compulsory.

A Central University of Nicaragua was es lished (1941). The University of Leon was fou in 1814; the name was changed (1947) to Nati University of Nicaragua.

Defense. The National Guard (1939) num 3,538 officers and men with a trained reserv 4,000. Aviation is being developed.

Currency. The monetary unit is the cordoba.

Norway
(NORGE)

Capital, Oslo—Area, 124,556 square miles—P ulation (estimated 1948), 3,181,000.

Descriptive. Norway occupies the west part of Scandinavian Peninsula in Northwest Europe the Skagerrak, which separates it from Denm to the North Cape in the Arctic Ocean, wher the east it meets Finland and the U.S.S.R. Kjoelen Mountains, which separate Norway Sweden to the east, give to Norway in the nort part but a narrow fringe of country washed by Arctic and North Atlantic Oceans, and cut by fjords of scenic grandeur.

In the North Cape area is seen the phenom known as the "Midnight Sun." The sun does set from the middle of May until the end of nor does it appear to rise from approximately 18 to Jan. 23. The vari-colored Northern L are visible in winter.

The climate is mild and moist, on the west c but fairly cold and dry in the interior and in north and east sections. The country is 1,100 long and its greatest width is 270 miles. The c line including the fjords and greater islan 12 000 miles long, and includes 150,000 islan

Norway has only 4,300 square miles of land u cultivation; rivers and lakes occupy 5,000; forests 29,455; three-fourths of the land is u ductive. Norway is essentially a maritime-c try.

Resources and Industries. The chief agricul products are wheat, barley, oats, rye, corn, pot and hay. Forests are one of the principal na sources of wealth. Huge quantities of cod, her whale, walrus, seal, mackerel and salmon caught. Mining is an important industry an country yields silver, copper, pyrites, nickel, zinc and lead.

The country lacks sufficient coal but ha come a great power producing country by uti its greatest natural asset—water power.

The principal manufactures are food proc machinery and metal work, paper and pulp, tiles, wood, animal oils, soap and electroche products, especially nitrates.

History and Government. Norway, under its stitution (adopted May 17, 1814) is a constitu hereditary monarchy. Independent for cent

Norway was united with Denmark (1381-1814), and Sweden (1814-1905). Norway and Sweden signed an agreement repealing the union (Oct. 26, 1905).

The legislative power is vested in the Storting, whose 150 members are elected for four years. The Storting discusses and votes on all political and budgetary questions, but divides itself into two sections for questions of legislation. One-fourth of the membership forming the Lagting, and three-fourths the Odelsting, which consider the legislation separately, sitting in joint session on failure to agree separately, when decision is made by a two-thirds majority. The King may exercise the veto twice, but if the same bill is passed a third time, it becomes law.

Elections to the Storting were held (Oct. 8, 1945) with the following results: Labor, 76; Conservative, 25; Liberal, 20; Communist, 11; Agrarian, 10; Christian Popular, 8.

The king of Norway is Haakon VII. (born Aug. 3, 1872) second son of Frederick VIII., King of Denmark. He was elected King of Norway by the Storthing (Nov. 18, 1905) and crowned (June 22, 1906), married (July 22, 1896) to Princess Maud who died (Nov. 20, 1938), third daughter of King Edward VII of Great Britain. The heir to the throne, Crown Prince Olaf (born July 2, 1903) was married (March 21, 1929) to Princess Martha of Sweden, daughter of Prince Charles. A son, Hereditary Prince Harold, was born (Feb. 21, 1937) and two daughters. Princess Ragnhild Alexandra (June 9, 1930) and Princess Astrid (Feb. 12, 1932).

The Premier is Einar Gerhardsen.

Education and Religion. The Evangelical Lutheran religion is endowed by the State and its clergy are nominated by the King. All religions are tolerated.

Education is compulsory from seven to 14, and the school system is highly organized. There is, so to speak, no illiteracy. The University of Oslo (founded in 1811) is subsidized by the State.

Defense. The Army is the national militia with universal and compulsory service beginning with the age of 18 and continuing until 55.

There is a small Navy and Air Force.

Currency. The monetary unit is the krone.

SPITZBERGEN
(Svalbard)

Spitzbergen, a group of mountainous islands in the Arctic Ocean between 76° 26′ and 80° 50′ north latitude and 10° 20′ and 32° 40′ east longitude. The largest, West Spitzbergen (12,000 square miles), lies about 370 miles due north of Norway, half-way to the Pole. Discovered by Norsemen (1194) and rediscovered by Barents (1596,) the islands had been the resort of whalers of several nations. Norway periodically asserted (since 1261) her claims to the islands. Following action by the Peace Conference (1919) a treaty was signed in Paris (Feb. 9, 1921) by the United States, Great Britain, Denmark, France, Italy, Japan, the Netherlands, Sweden and Norway, which put Spitzbergen under the flag of Norway. The area is about 24,095 square miles; the population, 2,700.

The development of the coal fields has proceeded rapidly. The resources are estimated at 9,000,000,000 tons. There are large deposits of low-grade iron and gypsum, and signs of oil have been reported.

MINOR ISLAND POSSESSIONS

Jan Mayen, a desolate area of 144 square miles between Greenland and Northern Norway and about 300 miles north of Iceland. The Norwegian Meteorological Institute established (1921) a weather station there. Otherwise Jan Mayen is uninhabited.

Bouvet Island, area 22 square miles, is an uninhabited tract in the Southern Atlantic. Great Britain relinquished (1928) its claim to the Island to Norway.

Peter I Island, with an area of 94 square miles, lies in the Antarctic and is uninhabited.

Norwegian Antarctic Dependency, lying between the Falkland Islands dependency and the Australian Antarctic dependency, was placed under Norwegian sovereignty (Jan. 14, 1939).

Palestine

Palestine, the ancient Holy Land of the Christian, the Jew and, to some extent, of the Arab, lies on the western edge of Asia bordering on the Mediterranean Sea. It is bounded on the north by Lebanon and Syria, on the east by Jordan and on the south by the province of Sinai, Egypt.

The capital of Palestine was Jerusalem. Its area was 10,429 square miles and population (estimated 1946), 1,912,000.

A new independent Zionist state, the Republic of Israel, was proclaimed (May 14-15, 1948), coincident with British withdrawal in accordance with a decision of the General Assembly of the United Nations (Nov. 29, 1947) to partition Palestine into independent Jewish and Arab states.

For information concerning the Republic of Israel, see Index.

Panama
(REPUBLICA DE PANAMA)

Capital, Panama—Area, 28,575 square miles—Population (estimated 1948), 746,000.

Descriptive. The Republic of Panama occupies the entire isthmus of that name connecting Central and South America, lying between the Caribbean Sea on the north and the Pacific Ocean on the south. It is one of the six Central or Middle American States.

Daily air mail and passenger services operate between Panama and United States cities, and connect with other Central and South American countries.

Resources and Industries. Of the total area of Panama, five-eighths are unoccupied and only a small part of the remainder is properly cultivated. The forest resources are great. Stock raising is extensively carried on. The chief exports are bananas, cacao, coffee and coconuts.

History and Government. Panama, under Spanish rule (from 1538) became independent (Nov. 28, 1821), joined the Great Colombian Confederation from which it seceded (Nov. 3, 1903) and became an independent Republic.

By treaty (Nov. 18, 1903) ratified (Feb. 23, 1904) and with a supplemental (Taft) agreement (1904) the United States acquired the right to construct the Panama Canal across the Isthmus, a strip (the Canal Zone) extending for five miles on each side of the Canal, the terminal cities of Cristobal, adjacent to Colon, and Balboa, adjacent to Panama, and islands for defensive purposes in the bay, in perpetuity and exclusive control for police, judicial, sanitary and other purposes. The United States also has nearly complete jurisdiction over sanitary and quarantine regulations in the two cities of Colon and Panama and owns and operates the Panama railroad, 47 miles long, connecting these cities. In return the United States paid Panama $10,000,000 outright and $250,000 gold a year rental, beginning after the lapse of nine years.

A new treaty with the United States replacing the Taft agreement (abrogated June 1, 1924) and modifying the treaty of 1904 was signed in Washington (March 2, 1936), by which the United States renounced its guarantee of Panaman independence specified in the treaty of 1903, also the right to intervene to maintain order in the cities of Panama and Colon. The annual rental charge of $250,000 in gold was changed (retroactive to Feb. 26, 1934, in consequence of the dollar devaluation) to 430,000 balboas, the currency of Panama. The treaty further provided that no new private business be established in the Canal Zone, and only Government employees be allowed to reside there.

Panama adopted (March 1, 1946) its third Constitution replacing the totalitarian document adopted in the rule of Arnulfo Arias. The President Domingo Diaz Arosmena (elected May 9, 1948) died August 23, 1949. First Vice President Dr. Daniel Chanis Jr., who took over the Government as Provisional President, will complete his term.

Women voted for the first time in 1945.

Education and Religion. The Roman Catholic religion prevails but other faiths have representation. Education is compulsory for all children between the ages of seven and 15. There are 588 primary schools, seven secondary schools, a college for the higher instruction of boys, a secondary school for girls, a professional school for girls and crafts and trades schools for boys. The National University is in Panama City. Spanish is the official language and its use is compulsory.

Currency. The silver balboa is the unit of currency, and is equivalent in value to the United States dollar.

Paraguay
(REPUBLICA DEL PARAGUAY)

Capital, Asuncion—Area, 150,515 square miles. Population (estimated 1948), 1,270,000

Descriptive. Paraguay, one of the two inland countries of South America, is bounded on the north by Bolivia and Brazil, on the east by Brazil and Argentina, on the south by Argentina, and on the west by Argentina and Bolivia. The extensive plains are excellent for pasturage and agriculture, and the mountain slopes are covered with luxuriant forests. It is one of the best watered countries in the world. The Paraguay River, the Republic's most important waterway, is navigable for vessels of 12-foot draft as far as Asuncion and Concepcion, and beyond for smaller craft for practically its entire length (1,800 miles). The country still is deficient in adequate roads.

Regular steamer service is maintained from Buenos Aires on the Parana-Paraguay Rivers as

far as Asuncion, where extensive port improvements have been made, including the dredging of an adequate river channel and the construction of fireproof warehouses and railway terminals. There are air mail and passenger services between Asuncion and Argentina and Brazil.

Paraguay regained 91,800 square miles (Oct. 10, 1938) by the terms of the Gran Chaco Peace Settlement by which almost the entire Chaco country was awarded to Paraguay, thus ending a dispute with Bolivia since 1870.

Resources and Industries. The most important agricultural crops are corn, mandioca, cotton, beans, peanuts, tobacco and citrus fruits. The livestock industry is important. Latest statistics show that Paraguay has about 4,500,000 cattle excluding hogs and other livestock. Several saladeros, or beef curing establishments, are located near Asuncion.

The chief exports are oranges, yerba mate, timber, hides, tobacco, beef products, quebracho wood, cotton, tannin, lace and vegetable oils. Chief imports are textiles, foodstuffs, hardware, fancy goods, wines and spirits, pharmaceutical products, automobiles, ready-made clothing and hats.

History and Government. Paraguay gained its independence from Spain (1811), was governed by a dictator (1815-1840). A Constitution was adopted (1844) during the regime of Carlos Lopez, providing for the election of a president.

Shortly after the war with Brazil, Argentine confederation and Uruguay (1870), a Constitution, modeled after that of the United States, providing for a republican form of government, was adopted.

Still another Constitution (accepted in a plebiscite 163,628 to 13,521, Aug. 4, 1940) is designed to eliminate anti-social abuses, regulate national economic life with a view to preventing monopolization of consumption goods and artificial price fixing. The new Constitution retains the fundamental rights of the 1870 Constitution and is designed to eliminate oligarchic or other anti-social conditions, gives to all citizens the right to work, to meet peacefully, to petition the authorities, to publish their views in the press without previous censorship, to dispose of private property as the owner sees fit and to form associations for legitimate ends.

Congress is composed of one Chamber, with the members elected one for each 25,000 inhabitants. A Council of State succeeds the Senate and the members are nominated by the Government on a corporative basis. The President is elected for five years and appoints a Cabinet which exercises all the functions of the Government. It informs the Chamber and Council of State of its policies. Private property is guaranteed by the Constitution, but the State has the right to regulate economic activities.

The President's office remained in doubt in 1949. J. Natalicio Gonzalez, elected Feb. 15, 1948, was overthrown by a political coup Jan. 30, 1949, succeeded by Gen. Raimundo Rolon and the latter a month later by Dr. Felipe Molas Lopez.

Defense. All citizens from 18 to 20 years of age are subject to obligatory military service. A modernly equipped naval fleet patrols the rivers.

Education and Religion. The Roman Catholic religion is established, but others are tolerated. Primary education is compulsory between the ages of seven and 14. There are six normal schools, one in the capital and five throughout the country, and a university in Asuncion. Spanish is the universal language, but Paraguayans are bilingual and also speak Guarani (the language of the now extinct Guarani Indians).

Currency. The monetary unit is the guarani.

Peru

(REPUBLICA DEL PERU)

Capital, Lima—Area, 482,258 square miles—Population (estimated 1948), 7,246,000.

Descriptive. Peru, situated on the Pacific coast of South America, is bounded on the north by Ecuador, on the northeast and east by Colombia and Brazil, and on the southeast by Bolivia; at its southernmost tip is the narrow Republic of Chile. Peru has a Pacific coastline of 1,410 miles and an extreme width, from coast to eastern jungle, of about 800 miles.

Here the Andes reach their highest altitudes, seven peaks towering above 19,000 feet. The 30-mile-wide strip of land along the Pacific is a desert except as it is irrigated from streams from the mountains; the uplands or western slopes of the Andes are well watered and also the eastern descent to the Amazon basin, tropical lowlands, very fertile, thickly wooded in parts with much wild rubber, and thinly populated. Iquitos, the capital of this district, is over 2,000 miles up the Amazon.

Lima, the capital, is called "City of the Kings," it is the most important commercial center of the country. Callao, important industrially and chief seaport, is connected with the capital by railroads and three highways.

The first trans-Andean highway to penetrate Amazon basin of Peru was completed (1943). roadway extends northward from Lima across Andes via Oroya, Cerro de Pasco, and Tingo Ma to Pucalipa, a small port on the navigable wa of the Ucayali River. The new 500-mile road opens a vast undeveloped region to settlement

Resources and Industries. Though agricult and pastoral products comprise only 40% of value of the total exports, 85% of the popula is dependent, directly or indirectly, upon them agriculture and stock raising.

The chief crop and leading agricultural ex is cotton and averages 20% of the country's t exports. About 100,000 persons are engaged the industry. Second only to cotton as a mo crop is sugar. Wheat, rice, potatoes, beans, ba and quinua are also raised. Corn, native to P is grown throughout the country, forming a st food for a large part of the Indian populatio

Of the total arable area of 29,460,000 acres i estimated that only 3,617,000 acres are actu under cultivation.

The mountains are rich in minerals and m valuable mines, some dating back to the In are being worked. The country is one of the lar producers in the world of vanadium. Petroleum its derivatives account for nearly half of the v of total mineral production.

The chief exports are crude petroleum and troleum derivatives, sugar, copper bars and cot imports are machinery and vehicles, foodstu textiles, metals and products, chemicals, dyes paints.

Peru has made great strides in aviation deve ment in recent years.

History and Government. Culturally it is oldest of the South American nations, having h for centuries the leading political power on continent; first as the center of the Inca Emp later as Spain's foremost viceroyalty in the N World.

By the Constitution (April 9, 1933) the gove ment consists of a President and two Vice-Pr dents, elected by direct suffrage for a period six years and are barred from re-election. tional legislative authority is vested in a C gress composed of a Chamber of Deputies an Senate. The number of members in each determined by law, and elections are for six ye Chamber members must be at least 25 years age; Senate members at least 35 years of age, all must be native-born Peruvians and in pos sion of the right to vote. The President is adv by an Economic Advisory Council of approxima 50 members, specialists in their fields.

Suffrage is granted to literate citizens, and municipal elections, to adult or married wom Voting is compulsory for literate males betw the ages of 21 and 60.

General Manuel Odria became President O 29, 1948) following a revolt which ousted inc bent Jose Luis Bustamente Rivero (elected 10, 1945).

Education and Religion. Religious liberty vails but the Roman Catholic religion is prote by the State.

Education is free and compulsory between ages of seven and 14. The University of Marcos (founded May, 1551) is one of the o institutions of learning in the western hemisph There are three other universities.

About 60 per cent of the population is Inc the white (10%) is predominantly of Spa descent. The remainder are chiefly Mestiz Spanish is the official language, but a large of the Indian population still speaks Quechu Aymara.

Defense. Military service is compulsory with years in the active army, five years in the reserve, five in the second reserve and 20 yea the National Guard.

Currency. The monetary unit is the sol.

Philippines

(REPUBLIC OF THE PHILIPPINES)

Capital, Quezon City (Luzon)—Area, 114,830 sq miles—Population (estimated 1948), 19,964,00

Descriptive. The Republic of the Philipp largest island group in the Malay Archip (land area 114,830 square miles)—lies bet 21° 10′ and 4° 40′ north latitude and bet 116° 40′ and 126° 34′ east longitude. There 7,083 islands extending 1,150 statute miles north to south and 682 miles from east to Of this number 462 have an area of one square or over; 2,441 are named and 4,642 unnamed. A 63 per cent of the archipelago is suitable for vation.

Eleven of the islands have an area of more

00 square miles each. They are: **Luzon,** 40,420; ndanao, 36,537; **Samar,** 5,050; **Negros,** 4,906; lawan, 4,550; **Panay,** 4,446; **Mindoro,** 3,579; yte, 2,786; **Cebu,** 1,695; **Bohol,** 1,534; **Masbate** 55.

The islands have a foreign population (1939 nsus) of 166,654, including 117,487 Chinese, 057 Japanese and 8,709 Americans, exclusive of e military personnel and their families.

Other groups in the Archipelago are the **Sulu,** or o Islands in the South, the **Babuyanes** and tanes in the North, the **Catanduanes** in the East, d **Calamianes** in the West.

The archipelago has a coast line of 14,407 statute les. There are 21 fine harbors and eight land-ked straits. Manila Bay, with an area of 770 iare miles, and a circumference of 120 miles, is e finest harbor in the Far East. It is a roadstead all parts of which vessels can anchor, but a eakwater has been constructed for shelter in bad ather. Manila, Cebu, Iloilo, Zamboanga, Jolo, arri, Davao and Legaspi are the ports of entry.

The extensive mountain system of the Philippines ongs to the succession of volcanic ranges of the cific system of the world's surface. There are 20 re or less active volcanoes. Mount Apo, 9,610 , in Mindanao, and Mayon Volcano, 7,943 ft., in bay, are the most famous. Between the moun-ns, and the sea lie great fertile, well-watered ins. The principal islands have important river stems.

The average temperature during the four winter nths is about 78° F.; in the three hot months, ril to June, about 84; in the other months, about

Quezon City, a suburb, replaced Manila as the icial capital by a decree signed by the President ly 17, 1948).

Resources and Industries. The chief agricultural oducts are—unhusked rice ("palay"), Manila mp ("abaca"), copra, sugar cane, corn, tobacco d maguey. The principal fruit is the pineapple t there are also mangoes, papaya, lanzones, inut, chico, mandarins and oranges.

Forests provide cabinet and construction timber large quantities; also gums and resins, vegetable s, rattan and bamboo, tan and dye barks and e woods. Rubber is being cultivated as well as Chinchona tree for quinine.

The islands are rich in mineral resources. Gold, ver, lead, zinc, copper, iron, coal, petroleum, romite, asbestos and manganese are mined, as ll as clay, marble, salt, etc. It is estimated that ere are 75 square miles of coal fields containing nite and bituminous.

The few manufacturing industries have been couraged largely by the free-trade relations with e United States which are maintained to the esent time by an enactment of the United States ngress and subsequent treaty arrangements.

History and Government. The Philippines were covered by Magellan (1521) and conquered by zin (1565). The islands were ceded to the ited States by the Treaty of Paris (Dec. 10, 98), following the Spanish-American War.

Princess Hadji Piandao, niece and adopted ughter of the late Jamalul Kiram II, Sultan of lu, transferred (April, 1940) legal ownership of ndreds of islands in the Sulu Archipelago to the mmonwealth of the Philippines. Estimates of e number of islands in the Archipelago vary be-een 250 and 700, scattered for 220 miles from ndanao southwestward to Borneo. The islands e populated chiefly by Moslem natives.

On July 4, 1946, the independent Republic of e Philippines was proclaimed in accordance with e Tydings-McDuffie Act passed by Congress nited States) in 1934, providing for Philippine dependence in 1946. President Truman formally cognized the Philippines as a separate and self-verning nation, announcing the withdrawal and rrender by the United States of all rights of ssession, supervision, jurisdiction, control or sov-ereignty over the new republic's territory and ople.

The Constitution provides for a legislative body lled the Congress of the Philippines, consisting of Senate with a membership of 24 Senators, elected large, and a House of Representatives with a eoretical membership of 120 (actually there are). The members of the House of Repre-ntatives are apportioned among several prov-ces according to the number of their respective habitants. The term of office of members of e House is four years.

The Congress enjoys extensive powers in the gulation of capital and labor, utility franchises, pervision of power development, and exploita-n of natural resources.

The term of the President and Vice President four years, and the President may be re-elected ly once. The Cabinet consists of 13 members.

The Chief Executive is Elpidio Quirino who, as ce President, succeeded President Manuel A. oxas on the latter's death (April 15, 1948).

The Supreme Court comprising a Chief Justice and 10 justices appointed by the President cannot declare a law or a treaty unconstitutional except by a two-thirds vote. Freedom of the press, religion, and the right of assembly are guaranteed in the Bill of Rights. Women have suffrage on equal terms with men.

All lands in the public domain, all waters, minerals, coal and petroleum, all forces of potential energy and other natural resources of the Philippines belong to the State and their disposition, exploitation, development and utilization are limited to citizens of the Philippines or corporations and associations of which 60% of the capital is owned by such citizens subject to present leases and concessions. By an amendment to the Constitution (1947), the right to develop Philippine natural resources and to own and operate public utilities for a limited period was extended to citizens of the United States.

The Philippines and the United States signed (March 14, 1947) a 99-year agreement for American military and naval bases in the islands. The agreement provides that in the interest of international security any of the bases may be made available to the Security Council of the United Nations.

Education and Religion. Education is free in the public schools, secular and coeducational on the basis of a common language, English. The national language is Tagalog (a Malayan dialect) but the teaching of English is compulsory. Approximately 5,000,000 persons speak English and 500,000 Spanish. There were published (1947) 464 newspapers and magazines printed in English, Spanish, local dialects and other languages.

Among the special Government institutions are the Normal School, the School of Arts and Trades, the Nautical School, and the Central Luzon Agricultural School. There are provincial trade schools. Higher learning is provided by the State supported University of the Philippines, Manila, and the Dominican University of Santo Tomas (founded 1611). Manila has 10 universities, including one restricted for women. The Silliman University in Dumaguete is maintained by the cooperative support of the United Evangelical Church of the Philippines, the Presbyterian Church in the United States and the American Board of Commissioners for Foreign Missions.

According to the 1939 census, Philippine literacy had reached 48.8 per cent. The rate in 1903 was approximately 10 per cent.

About two-thirds of the inhabitants are Roman Catholics and about 1,500,000 belong to the Independent Catholic Church, organized (1899) by a Filipino priest, Fr. Gregorio Aglipay. There are 378,000 Protestants, about 675,000 Moslems and 626,000 pagans, and a number of others.

Currency. The monetary unit is the peso.

Poland

(RZECZPOSPOLITA POLSKA)

Capital, Warsaw—Area, 121,131 square miles—Population (census 1946), 23,930,000; enumerated within boundaries established at Potsdam and according to Treaty with the U. S. S. R. (Aug. 16, 1945).

Descriptive. Poland, a Republic in Central Europe, is bounded on the north by the Baltic Sea, East Prussia and Lithuania, both parts of the U. S. S. R.; on the east by the U. S. S. R.; on the south by Czechoslovakia, and on the west by Germany.

Resources and Industries. Sixty-five per cent of the population engages in agriculture. Mining and woodworking industries are important.

Poland possesses great mineral wealth, particularly coal, besides iron, lignite, petroleum, natural gas, salt, potassium salts and zinc.

History and Government. Poland, whose history dates from 966, and a great power from the fourteenth to the seventeenth century, in four partitions (1772, 1793, 1795 and 1939) was apportioned among Prussia, Russia and Austria and Germany and Russia. Overrun by the Austro-German armies in World War I, its independence (self-declared on Nov. 9, 1918) was recognized by the Treaty of Versailles (June 28, 1919) and by the Treaty of Riga.

Before World War II, Poland's population was 34,775,698 and her area 150,470 square miles. In compensation for 69,860 square miles of territory in the east ceded to the U. S. S. R. under a treaty signed in Moscow (Aug. 16, 1945), Poland received 38,986 square miles in the west—the former German provinces of Silesia, Pomerania and West Prussia.

Germany and Russia invaded and conquered Poland (Sept. 1-27, 1939). A treaty of partition (the fourth partition of Poland) was signed by Germany and the U. S. S. R. (Sept. 29) by which they divided the country. It is estimated that Germany received 72,500 square miles with a popula-

tion of approximately 22,500,000—all the territory ceded to Poland by the Treaty of Versailles. To the U. S. S. R. went some 78,000 square miles of territory with a population of 12,775,000. The territory gained by Russia comprised portions of White Russia and the Western Ukraine; all of which was annexed by the U. S. S. R.

Poland and Russia signed an agreement in London (July 30, 1941) abrogating the German-Russian accord partitioning Poland.

Russia cleared Poland of the German invader (1945) and the lands taken in the fourth partition were returned.

A Government-in-Exile was formed by the Poles in Paris (1939). It moved to Bordeaux (1940) and then to London. There was formed in Lublin, Poland (1944) a Polish Committee of National Liberation designed to perform the functions of the London Government in the liberated sections of Poland.

A "Government of National Unity" was formed June 28, 1945, including members of the Provisional (Lublin) and London governments. Edward Osubka Morawski was named Premier.

A national referendum, the first election in Poland in 11 years, was held (June 30, 1946) to vote on a proposal for the establishment of a one-house Parliament, maintenance of economic reforms and settlement of permanent frontiers on the Baltic and Oder and Neisse Rivers. The plan carried by a vote of 7,844,522 to 3,686,029.

Elections to the Sejm (Parliament) were held (Jan. 19, 1947) and the Government bloc, Communists and Socialists, won 394 of the 444 seats. The Peasant party captured 28, Work party, 12; Polish Peasant party (New Liberation), seven; Independent Catholics, three.

An interim constitution was adopted by Parliament (Feb. 19, 1947), by a vote of 330 to 17, dividing power between the Legislative Sejm, the Executive, and the President. The new Constitution also created a Council of State consisting of the President of the Republic, the president and three vice presidents of the Parliament and the chairman of the Supreme Control Chamber which is responsible for the State accounts. The Parliament may empower the Government to enact decrees between Parliamentary sessions except for introduction of new taxes or conscription, changes in the Constitution, electoral law, national economic plan, monetary system and ratification of international treaties.

Parliament elected Boleslaw Bierut, a Communist, President (Feb. 5) for seven years. He received 408 votes. The Premier is Joseph Cyrankiewicz, Socialist.

The Government nationalized all basic industries (Jan. 4, 1946).

Officer training camps for the Army, which is being reorganized, have been opened. The Navy has one cruiser, six destroyers, six submarines and miscellaneous craft.

Education and Religion. Education is free and compulsory in the Polish Republic. There are universities in Warsaw, Cracow, Posnan (Posen), Breslau (Wroclaw), and Lublin.

The great majority of the population is Roman Catholic.

Currency. The monetary unit is the zloty.

DANZIG (Gdansk)

The former Free City of Danzig (Gdansk), once a part of the German Empire, is a port on the Baltic Sea through which runs the Vistula River. The Free State has an area of 754 sqare miles and an estimated population of 415,000. Poland gained access to the port by the Treaty of Versailles (1919) and Danzig was brought within the Polish customs frontier (1922).

Danzig was proclaimed part of the German Reich (Sept. 1, 1939); Russian troops captured the city (March 30, 1945). Under the terms of the Potsdam Declaration (Aug. 1945) Danzig was placed under Polish administration.

Portugal
(REPUBLICA PORTUGUESA)

Capital, Lisbon—Area, 35,466 square miles—Population (estimated 1948), 8,402,000.

Descriptive. Portugal occupies the western part of the Iberian Peninsula in Europe, being bounded on the north and east by Spain and on the south and west by the Atlantic Ocean. The **Azores** and **Madeira Islands** in the North Atlantic, are politically an integral part of the republic. The area of the Azores is 888 square miles with a population (1940) of 537,000. The area of the Madeira Islands is 308 square miles with a population (1940) of 250,000 The country is mountainous. About one-third of the land is cultivated.

Resources and Industries. Wheat, maize, oats, barley, rye and rice are important crops. Vineyards abound, and wines, olive oil and f are largely produced. Wine-making is the c industry. Forests of pine, oak, cork and ches cover 19% of the country, and cork, of which average annual production is 140,000 metric t is the second largest industry. Portugal has m mineral wealth (including coal, pyrites, lead, per, tin, wolfram, kaolin, sulphur, lithium, nium), which has not yet been fully developed cause of a scarcity of electric power and trans tation. The sardine fisheries are important. wine, canned sardines, and resins are expor

History and Government. Portugal, an indep dent state since the twelfth century, was a k dom until a revolution (1910) drove King Ma II, from the throne and a republic was proclai A new Constitution adopted by a plebiscite (1 and several times amended, provides some tures of "Corporative State." At the elections (1 1938, 1942 and 1946) only one list of candid selected by Government committees was presen Republicans and Socialists abstained. Two ass blies of 120 members each were chosen—the f the National Assembly, to exercise legisla powers, by direct election by heads of fam regardless of sex; the second, the Corpora Chamber, chosen through a system of guild syndical representation. The Corporative Ch ber deals with economic and social matters, advises the National Assembly. The Assembly override a Presidential veto by a two-thirds The President is Marshal Antonio Oscar de goso Carmona (elected 1926 and re-elected 1935 and 1942 for 7-year terms). The Premie Antonio de Oliveira Salazar.

Suffrage is extended to males and females either certain educational or tax payment qu fications.

Education and Religion. The dominant reli is Roman Catholic; there is freedom of wors There are four universities, three university sch 45 lyceums, 54 technical schools (agricultural, dustrial and commercial), six art colleges and elementary schools.

Defense. Military service is compulsory betw the ages of 20 and 48. There is a small Navy

Currency. The monetary unt is the escudo.

PORTUGUESE POSSESSIONS

Portuguese India includes **Goa** (capital, Goa or Pangim), on the Malabar coast; **Da** near Bombay; and **Diu,** a small island 140 m from Damao. There is a total area of 1537 sq miles and a population of (1940) 624,177. Sa produced in Goa and Damao, and manganese Mormugao, where there are 200 mines. Other ports are cocoanuts, fish, spices, caju-nuts, copra.

Macao, China, with an area of six square mile on an island of the same name at the mouth o Canton River. Population (1940 census) is 374 The trade, mostly transit, is handled by Ch merchants.

Portuguese Timor is the eastern part of Malay Island of that name, off the north coa Australia, Netherlands having the western The area is 7,330 square miles and the popul (1936) was 463,796. Exports are coffee, sandalw sandal root, copra and wax.

The Cape Verde Islands in the North Atla longitude 25°, latitude 15°, are 15 in number. total area is 1,557 square miles and the popul (1940) 181,286, of which about 7,017 are w Chief products are coffee, medicinal proc hides, fruit and grain.

Portuguese Guinea, on the coast of Senegal (chief port, Bissau) has an area of 13,944 s miles and a population (1940) of 351,089. exports are rubber, wax, oils, ivory and hides

The Islands of San Tome and Principe 125 miles off the west coast of Africa in the of Guinea, form a province under a Gove The islands have an area of 372 square population (1940) 60,490. Chief products are coffee, rubber and cinchona.

Angola, Portuguese West Africa, has a 1,00 coast line stretching south from the mouth Congo. It is governed by a Governor G with large powers. The Portuguese have ow since 1575. Its area is 481,226 square miles; lation (1940) 3,738,010, including 44,088 Euro The capital is Luanda.

Chief products are coffee, rubber, wax, sug seeds, cocoanuts, ivory, cattle, fish, tobacco ton. Diamonds are mined and exported prin to Belgium. There are large deposits of mal copper, iron and salt, and gold has been Portugal supplies from 45% to 50% of the im

Mozambique, Portuguese East Africa, e from Cape Delago (10° 40′ south latitude)

ion of South Africa. To the west lies the Union South Africa and Rhodesia (British). On the rth is Tanganyika, British Mandate. More than square miles of that territory, the Kionga iangle, was transferred to Mozambique (1919). Mozambique has 297,731 square miles, and a pulation (1940) of 5,085,630. The capital is urenco Marques. Chief products are sugar, cocoa- ts, and beeswax. Coal deposits exist. It has vast tural resources practically untouched.

Rumania

(ROMANIA)

(PEOPLE'S REPUBLIC OF RUMANIA)

Capital, Bucharest—Area, 91,584 square miles—pulation (census 1948), 15,873,000.

Descriptive. Rumania, a country of Europe, is unded on the north by the U. S. S. R., on the st by the Ukraine and the Black Sea, on the ith by Bulgaria, and on the west by Yugoslavia d Hungary. For 243 miles the Danube forms her ithern boundary; for 190 miles, from Calarasi to e Black Sea, it flows through Rumanian terri- y. The Carpathian mountains extend southward m Bukowina to Buzau, thence westward to sova on the Danube.

Bessarabia (17,325 sq. mi.) and Northern Buko- fertile. Four-fifths of the population engage in riculture and stock-raising. The most important ricultural products are wheat, corn, rye, barley d oats. Vineyards and orchards are plentiful. e country yields salt, petroleum, natural gas, nite, gold, iron, copper, zinc and pyrites. Flour lling, brewing and distilling are important in- stries.

History and Government. Rumania, whose his- y began in 101 A.D. with the Roman coloniza- n of the Dacian Kingdom, was formed by the ion (Jan. 24, 1859) of the principalities of allachia (Muntenia) and Moldavia; proclaimed r independence (May 10, 1877) during the sso-Turkish War from Turkish suzerainty, ac- owledged through mutual assistance pacts in e 16th century.

Bessarabia (17,325 sq. mi.) and Northern Buko- na (2,035 sq. mi.), with a combined population of 48,063, transferred to Rumania from Russia 918), were occupied by the U. S. S. R. armies lowing an ultimatum (June, 1940).

The armistice terms (March, 1945) provided that e Soviet-Rumanian frontier of June 28, 1940 uld be restored and that northern Bukowina and ssarabia would be recognized as part of the viet Republic. Rumania returned to Bulgaria 940 the two Southern Dobrudja counties won by e Treaty of Bucharest (1913) with an area of ne 3,000 sq. mi., and a population (1940) of 3,900.

According to the Constitution of 1886 (modified 23, and restored by royal decree Aug. 31, 1944), mania was proclaimed a constitutional monar- y; Government was vested in a King, a Senate d a Chamber of Deputies. Basic freedoms of the lividual, the secret ballot and rights of private operty were guaranteed.

The United States and Great Britain recognized e de facto Groza Government (Feb. 5, 1946), after e Cabinet had been reorganized and free elec- ns, freedom of the press, speech, assembly and ligion had been granted. Women voted for the st time (1946) in the national elections.

The exiled King of Rumania, Michael I (born t. 25, 1921), only son of ex-King Carol II who dicated (Sept. 6, 1940) and Princess (now Queen- other) Helen of Greece; abdicated (Dec. 30, 1947), d renounced his abdication (March 4, 1948), aming Communist domination of the government his act. Michael married (June 10, 1948) incess Anne of Bourbon-Parma.

Coincident with Michael's abdication, a People's public was proclaimed by the government. A aft Constitution was approved (April, 1948) sed on the Communist model.

In the elections (March 28, 1948) the Communist- minated Popular Democratic front won 405 seats the new National Assembly; Liberals, 7; Demo- atic Peasants, 2.

The Prime Minister is Peter Groza.

Most of Rumania's industry was nationalized by vote of the Assembly (June 11, 1948).

Education and Religion. Primary education is e and obligatory.

Liberty of worship is assured. Orthodox clergy e paid by the State, other clergy being sub- ntioned.

Defense. Military service is universal and com- lsory between the ages of 21 to 50. Normal ser- e is for two years. Rumania has a small Navy d Air Force.

Currency. The monetary unit is the lei.

Salvador

(REPUBLICA de EL SALVADOR)

Capital, San Salvador—Area, 13,176 square miles—Population (estimated 1948), 2,100,000.

Descriptive. Salvador, smallest of the six Central American or Middle American Republics and the only one without an Atlantic seacoast, is bounded on the west by Guatemala, on the north and east by Honduras and the Gulf of Fonseca, and on the south by a Pacific coastline of about 160 miles. A country of mountains, hills and upland plains, it is entirely within the tropics, but tropic heat is modified by the elevation, making Salvador's climate tropical in the lowlands, semi-tropical in the plateau and highland valley areas and temperate on the upper mountain slopes. There are about 360 rivers, none of which is navigable but two forming valleys of considerable size—the Lempa and the Rio Grande de San Miguel. The mountains are not of extreme height, the highest being Santa Ana volcano (7,825 feet).

San Salvador, the capital, has a population of about 105,000. Situated at an altitude of 2,238 feet and founded on the present site in 1539, it is connected by rail or highway with all towns of importance. Three seaports, La Libertad, Acajutla and La Union (Cutuco) are the principal means of entry.

The three racial types are white, mestizo (of mixed white and Indian blood) and Indian, the latter comprising about 20 per cent of the entire population. About 62 per cent of the population is rural.

Resources and Industries. The coffee plantations on the mountain slopes are the country's economic mainstay. Henequen, gold, sugar and balsam are also exported. Imports include cotton textiles, iron and steel manufactures, automobiles and trucks, wheat and wheat flour, drugs and pharmaceuticals.

History and Government. Salvador became an independent republic upon the dissolution of the Central American Federation (1839). The Constitution (adopted Nov. 1945) is an amended version of a former constitution (1886). It provides for a unicameral legislative system, the National Assembly of Deputies which holds two sessions a year. Three deputies and two alternates from each department are elected by popular vote for one year terms. All males more than 18 years who possess their civil rights are required to vote. Military men in active service, however, have no right to vote and are ineligible to hold elective office, except the presidency. Married women more than 25 and unmarried women more than 30 are allowed franchise. Women with a professional degree are entitled to vote when they are 21. Executive power is vested in the president who is elected by direct, popular vote for a four-year term and is ineligible for immediate reelection. The president is assisted by a Council of Ministers who are named by him.

Salvador is ruled (1949) by a Revolutionary Council, in power since President Salvador Castaneda Castro was forced to resign, Dec. 14, 1948. The Council plans drafting of a new Constitution.

Defense. There is military instruction between the ages of 18 and 40. There is one Aviation Corps.

Education and Religion. The dominant religion is Roman Catholic and the language is Spanish. Education is free and compulsory.

Currency. The unit of currency is the colone.

San Marino

Area, 38 square miles—Population (census 1948), 12,100.

Descriptive. San Marino is a Republic situated on the slope of Mount Titano in the Apennines near Rimini, in the heart of Italy.

Resources and Industries. Agriculture and stock raising are practically the only industries. Chief exports are wine, cattle and building stone.

History and Government. The Republic claims to be the oldest State in Europe and to have been founded in the fourth century. A treaty of friendship with Italy (June, 1897) was revised (1908) and renewed (1939).

San Marino is governed by a Grand Council of 60 members elected by popular vote, two of whom are chosen to exercise executive power for a term of six months. In the elections (Feb. 26, 1949), Communists won 35 Assembly seats, continuing San Marino as the only Communist government in Europe outside the "Iron Curtain."

Defense. The militia—in number 900—consists of all able bodied persons between the ages of 16 and 55, with the exception of teachers and students.

Currency. San Marino has its own coinage and

postage stamps, but Italian and Vatican City currency are in general use. There is no public debt.

Spain
(ESPANA)

Capital, Madrid—Area 196,607 square miles—Population (estimated 1948), 27,761,000.

Descriptive. Spain, a Republic in Western Europe, is bounded on the west by Portugal and the Atlantic Ocean, on the north by the Atlantic and by France, on the east and south by the Mediterranean Sea, the British fortified station of Gibraltar being at the southernmost tip, guarding the entrance to the Mediterranean from the Atlantic. The Balearic Islands in the Mediterranean (capital, Palma; area, 1,935 square miles; population, 386,173) and the Canary Islands (area, 2,807 square miles; population, 564,273), in the Atlantic, are provinces of Spain; Ceuta, a fortified post in Africa, opposite Gibraltar (area, five square miles; population, 39,510), is part of the Province of Cadiz.

Spain occupies the entire Iberian peninsula with the exception of Portugal. The lofty Pyrenees separate it from France. The interior is a high inclosed plateau traversed east and west by mountain ranges and deficient in rainfall.

Resources and Industries. The productive land of Spain comprises nearly 114,000,000 acres, about 90% of the total area, but only about 56,000,000 acres are under cultivation, while 60,000,000 acres are pastures and mountains.

The principal agricultural products of Spain are wheat, barley, oats, rye, olives, grapes, lemons, oranges and other fruit, onions, almonds, esparto, flax, hemp, pulse and cork. Wine-making is important. Spain possesses an abundance of minerals, iron, copper, zinc, coal, cobalt, quicksilver, silver, sulphate and soda, sulphur and phosphates.

History and Government. The first Republic of Spain (1873-1875) was followed by a resumption of the traditional Monarchy. The present Second Republic was established (1931) when, following the victory of the Republicans in the municipal (city, not national) elections, Alfonso XIII, King of Spain from his birth (May 17, 1886), and Queen Victoria, with the Royal family, went into exile (April 14, 1931). A self-formed provisional government headed by Niceto Alcala Zamora carried on. A Cortes, the first in eight years, was elected (June 28, 1931) and formed itself into a Constituent Assembly with members elected by universal suffrage for four years. Zamora was elected President for six years, and a constitution adopted (Dec. 9, 1931), under which Church and State were separated, Church property confiscated, education made entirely secular, provision made for the division of the large estates among the peasants and other socialistic plans made possible.

President Zamora dissolved the Cortes (1934) and the new one elected (Feb. 16, 1936) with a Leftist (Popular Front) majority, at once removed Zamora from the presidency for violation of the Constitution in dissolving the previous Cortes. Manuel Azana, the Premier, was elected President for a six-year term (May 11, 1936). Santiago Casares Quiroga formed a Leftist Cabinet without participation of the Extremists.

A revolution, counter to a series of revolutionary movements which had disturbed the country since 1931, was begun (July 19, 1936) by the political elements opposed to the Popular Front. The Nationalists set up a Government at Burgos under the leadership of Gen. Francisco Franco (born Dec. 14, 1892). The war continued until the surrender of Madrid (March 28, 1939). Azana had resigned as president (Feb. 27, 1939), the day that Great Britain and France recognized Franco, and fled to France. The United States formally accorded recognition to the Franco government (April 1, 1939).

The first meeting after the civil war of the Grand Council of the Falange Espanola Tradicionalista, which under the Spanish totalitarian system replaced the Parliament, opened in Burgos (June 5, 1939) under the presidency of Gen. Franco to legislate for the peace time organization of the country.

Gen. Franco announced (Aug. 10, 1939) his new cabinet with himself as Chief-of-State, Commander in Chief of the Army, Prime Minister and head of the Falange party. The Cortes was re-established (July, 1942) on Fascist lines, as the supreme organ of State for legislative action. It was composed (March, 1943) of 438 members (procuradors), representing all phases of national life. There was a mass shake-up of the Cabinet (July 21, 1945) when nine of the 13 ministers resigned, including Gen. Jose Luis de Arrese, secretary-general of the Falange party. Other Falange leaders also were lost in the shake-up but many remained. Alberto Martin Artajo, Catholic Action member, was named Foreign Minister, a post equivalent to Prime Minister.

A law, promulgated by Gen. Franco (March 31, 1947) and ratified by the Cortes (June 7), gra
him life tenure as Chief-of-State and set u
Regency Council, or Council of the Realm, whi
to enthrone a King of his choosing as his succe
if he dies or is incapacitated. By his directi
popular referendum on the law was held (Jul
the results of which, as officially tabulated, w
For, 12,628,983 votes; against, 643,501; blank
lots, 295,208; nullified votes, 25,669. A 12-me
Council was sworn in by Gen. Franco (Feb.
1948).

All railroads were placed under governm
ownership and operation (Feb. 1, 1941) in an e
to solve the country's transport tangle. Na
gauge and mining railroads were not affecte

Education and Religion. Under the Republ
Constitution Spain had no State religion, altho
a vast majority of the population is Catholic.
Franco Government has reestablished Catholi
as the State religion. Religious bodies have re
ered their legal status and confiscated property
been returned. Primary education is compul
and free and religious teaching has been retu
to its former status.

Defense. Service in the Army is compulsory
two years. There is a small Navy and Air Force

The Merchant Marine consisted (Jan., 1
of 1,006 vessels with a gross tonnage of 1,037,

Currency. The monetary unit is the peseta.

SPANISH COLONIES

The colonies of Spain are now relatively u
portant, in sharp contrast with her holdings in
sixteenth, seventeenth and eighteenth centuries

Fernando Po and several smaller islands,
Continental Guinea are the two districts com
ing Spanish Guinean lands in Africa. (Area,
036 square miles; population 140,000.) They
relatively undeveloped and small values are t
therefrom. The products include cocoa, gold,
fee and wool.

Spain has given France the right of pre-emp
in case of the sale of any of these African colo
or the adjacent Islands.

Morocco, over a part of which (area, 18
square miles; population, 991,900) Spain exer
a protectorate is less developed than the Fre
Algerian and other African possessions. *See I
Morocco.*

Spanish Sahara includes the zones of **Rio de
(73,362 square miles) and Sekia el Hamra (3
square miles).

Ifni (area 741 square miles; population 35,
in northern Morocco was ceded to Spain by Mo
(1860) and effectively occupied (April 6, 1934).

Sudan, Anglo-Egyptian

**Capital, Khartoum—Area, 969,600 square
—Population (estimated), 7,498,090.**

Descriptive. The Sudan, a Condominium
bounded by Libya and Egypt on the north
line being the 22° north latitude; the Red Sea
Eritrea and Ethiopia on the east, Uganda (Bri
and the Belgian Congo on the south, and Fr
Equatorial Africa and Libya on the west.

Its greatest length north and south is 1,650 m
and its greatest breadth east and west is 900 m
The northern zone consists of the Libyan d
on the west, and the mountainous Arabian d
extending to the Red Sea on the east, sepa
by the narrow valley of the Nile; the central
has large areas of fertility, including the rain
of Kassala and Tokar, the Gezira plain an
pastures and gum forests of Kordofan; an
southern equatorial belt where the soil is r
and watered by tropical rains.

The White Nile flows north through the m
of the country; the Blue Nile, rising in the m
tains of Ethiopia, flows northwest to its jun
at Khartoum with the White Nile to mak
Nile that flows on in a huge S curve to enter
at Wadi Halfa. Khartoum is 1,345 miles so
Cairo, and 1,255 ft. above sea level. Form
hot bed of malaria, modern sanitation has
nated the mosquito.

Resources and Industries. The Sudan ha
per, gold, salt and other as yet untapped m
resources. The country is the principal sou
the world's supply of gum arabic. Cotton is
extensively. Other important products are s
senna leaves and pods, ground-nuts, dates,
and skins, mahogany, dom nuts (vegetable
chillies, semn (ghee), melon-seeds, beans,
trochus and mother of pearl shell, shea nuts
ivory and gold. The staple food of the inhab
is dura (great millet). Part of the Sudan
cluded in a vast British program of hydroe
expansion.

History and Government. The Mahdist
lion (1884), culminating in the fall of Kha
and the death of Gen. Gordon (Jan. 26,

rced the Egyptian Government to withdraw om the Sudan, retaining only Wadi Halfa on e Nile and Suakin on the Red Sea as frontier rts.

The population estimated at 9,000,000 (1884) deeased to 2,000,000 through war, famine and disse under Dervish misrule. The Dervishes were erthrown by Lord Kitchener with the Anglogyptian army at Omdurman (Sept. 2, 1898). On e reconquest of the Sudan an agreement was gned (Jan. 19, 1899) between Egypt and Great ritain, which fixed the boundary, provided for the lministration of the territory by a Governor Genal appointed by Egypt with the consent of Great ritain (aided since 1910 by a council) empowered make laws by proclamation; and providing that e British and Egyptian flags fly together.

Sudan is divided into eight Provinces under overnors and advisory Statutory councils. The overnor-General is Sir Robert Howe (appointed pril, 1947).

Defense. Sudan has its own defensive force ith a few Egyptian soldiers.

Education and Religion. Sudanese inhabitants re Arabs, Negroes and Nubians of mixed Arab and egro blood; the Arabs and Nubians are Mohamedans. The educational system is directed mainly the government and consists of post-secondary, condary, intermediary and elementary schools. here are a few non-Government schools, manged by Europeans and the various communities.

Currency. The monetary unit is the Egyptian ound.

Sweden
(SVERIGE)

Capital, Stockholm—Area 173,347 square miles—opulation (estimated 1948), 6,924,888.

Descriptive. Sweden occupies the eastern and rgest part of the Scandinavian peninsula in orthwest Europe. Isolated mountain groups, genally referred to as the Kjölen or Kölen range, parate the country from Norway on the west, and e Gulf of Bothnia and the Tornea River from nland on the east. The Baltic Sea separates it om the Baltic States and Germany on the southst and south and the Kattegat from Denmark on e southwest.

Resources and Industries. Although of broken, ountainous topography, Sweden contains much oductive land, well watered, on which the Swedes ve attained high efficiency in agriculture. Half e people are on farms which number about 4,000; of which 118,000 are under five acres, and 1,000 between five and 50 acres. Sweden's total ea divides 9.4% arable, 2.3% meadows, 59.4% rests; The forest area is about 56,500,000 acres. Of the forest lands 46% are owned by farmers, % by large landed proprietors, 25% by companies ving sawmills, pulp mills, etc., and about 25% the state. In forestry, lumbering, sawmills and lp mills more than 86,000 men and women are gularly employed. Sweden exports much of her wed and planed wood, woodpulp and paper proction.

Many industries flourish in Sweden, the chief rricultural industries being the manufacture of eese and butter; tobacco raising and wine mak- also are extensive. Watch and clock making is important branch of industry.

Fabrication of rayon and other textiles made of lp has increased, and it has even been possible produce cattle fodder from woodpulp.

About 10,000 persons are engaged in the mining dustry, most extensive north of the Arctic Circle. he Swedish steel is of especial value for tool aking. The iron and mechanical industry emoys about 175,000; textiles, 80,000, and the paper dustry, 60,000.

The Government's hydro-electric plant, Porjus, Lapland many miles north of the Arctic Circle, e center of a vast iron mining section, has a pacity of 150,000 horsepower. The water power sources of the country are approximately ,000,000,000 kwh of which about one-third have yet been harnessed.

The merchant marine had (1945) 2,094 ships with gross tonnage of 1,569,141.

History and Government. The Government is a nstitutional monarchy. The Riksdag (Parliament) has two Chambers, the first of 150 members nd the second of 230 members. All persons, men nd women, over 21 are entitled to suffrage.

The King of Sweden is Gustav V. (born June 16, 58), succeeded on the death of his father, Oscar (Dec. 8, 1907). He married (Sept. 20, 1881) rincess Victoria, daughter of Friedrich, Grand uke of Baden (died in Rome, April 4, 1930). The rown Prince Gustav Adolf (born Nov. 11, 1882) arried (June 15, 1905) Princess Margaret (died ay 1, 1920), daughter of the Duke of Connaught nd granddaughter of Queen Victoria. He has one ving son and one daughter by his first marriage. One son, Gustav Adolf, was killed in an airplane accident (Jan. 26, 1947.) The Crown Prince took for his second wife Lady Louise Mountbatten (Nov. 3, 1923.)

The Coalition Government resigned (July, 1945) and the Social Democrats named the cabinet. Sweden voted (Sept. 1948) for members of the Second Chamber of the Riksdag. The party rankings in the last two elections follow:

	1944	1948
Social Democrats	115	112
Liberals	26	57
Agrarians	35	30
Conservatives	39	23
Communists	15	8

The Prime Minister is Tage Erlander, Social Democrat (appointed Oct. 9, 1946).

Education and Religion. The population is very homogeneous, being entirely of the Scandinavian branch of the Germanic family, except about 35,000 Finns and 6,500 Lapps. Most of the people are Lutheran Protestant, which is the state religion, but complete freedom of worship exists. Education is compulsory.

Defense. Service in the Army is compulsory between the ages of 20 and 47. There is an Air Force of 16 groups. The Navy has three cruisers, seven coast defense ships, 21 destroyers, 18 torpedo boats, 42 minesweepers, 26 submarines, two mine layers and miscellaneous ships. Other destroyers, cruisers and smaller ships await completion. The personnel is approximately 8,000 officers and men.

Currency. The monetary unit is the krona.

Switzerland
(SCHWEIZ—SUISSE—SVIZZERA)

Capital, Berne—Area, 15,737 square miles—Population (estimated 1948), 4,614,000.

Descriptive. Switzerland, in Central Europe, is bounded on the west by France, the north by Germany, the east by Austria and Italy, and the south by Italy. It is mostly mountainous, having many high peaks of the Swiss Alps, with many fertile and productive valleys between, in which dairying flourishes, and much foodstuff is produced.

The chief cities are Zurich, Basle, Berne, Geneva, Lausanne, St. Gall, Winterthur and Lucerne.

Switzerland is the winter playground of Europe. Four large riverine districts contribute to its grandeur—the Rhine, Rhone, Po and Danube. Almost three-quarters of the country serves as a watershed for the Rhine, whose more important tributaries are the Aare, Limmat, and Reuss. The formation of the courses of the rivers and the channels which they have carved in the valleys impart to Switzerland—situated as it is in the heart of Europe—great geographical importance from the traffic point of view, for the shortest roads between north and south, east and west, ran through this country from time immemorial. The northern escarpment of the Alps extends into the foothills and rolling midlands, which are bounded by the Jura range running from north-east to south-west. The Alps constitute 61%, the midlands 27%, and the Jura 12% of Switzerland.

The midlands, lying between the Jura, a low-lying ancient deciduous limestone range, and the Alps, is the cultivated and industrial district, where towns, commerce and industry flourish.

The Alps, from the scenic point of view, constitute the most varied and beautiful chain of high mountains in the world. In the Swiss Alps there are no fewer than 70 peaks with an altitude ranging from 10,000 feet to approximately 15,000. The largest number is in Canton Valais, where the Dufour Peak of Monte Rosa, 15,217 ft. above sea level, is the highest in the country. The lowest point in Switzerland is also in the region of the Alps—the shore of Lake Maggiore, which is about 650 ft. above sea level, while the bottom of the lake itself is 575 ft. below sea level. Other Swiss lakes famous for their beauty are Zurich, Zug, Lugano, Walensee, Brienz, Thoune, Lucerne, Geneva, and Constance. In all, there are 21 large lakes.

Resources and Industries. About 3,000,000 acres are under grass and about 2,000,000 acres pasturage. Dairy products form the chief agricultural industry, followed by cattle, pigs, fruit, poultry, tobacco, wheat, rye, oats and potatoes. The country is famous for its wine and cheese. The principal minerals are salt, iron ore, and manganese. Watchmaking and embroidery are important manufactures; also silk, wool and cotton articles; electrical products and pharmaceuticals.

A Swiss merchant marine, under the administration of a Federal Maritime Navigation Bureau, was established (1940) with its seat at Basle. The country had (1942) an aggregate of 50,000 tons of merchant shipping.

History and Government. Switzerland is a confederation of 22 cantons, three of which once (1291) were members of a defensive league and

later formed Helvetia of the Holy Roman Empire from which they declared themselves independent (1648). The cantons are joined under a Federal Constitution (that of May 29, 1874, being now in force), with large powers of local control retained by each canton. The national authority vests in a parliament of two chambers, a "Ständerat" or States Council to which each canton sends two members. The lower house, Nationalrat or National Council has 194 members elected according to population, one representative to about 22,000 persons.

The President serves for one year and is succeeded by the Vice President. The President (1949) was Ernst Nobs, the Vice President Max Petitpierre.

Social welfare legislation covers subsidies for health insurance, accident insurance, unemployment relief, old age pensions and professional training courses.

Education and Religion. Primary education has been free and compulsory since 1874. There are seven universities, the oldest, Basle, founded in 1460. The German language is spoken by a majority of the people in 16 of the cantons, French in five, and Italian in one.

There is complete freedom of worship.

Defense. Service in the national militia is compulsory and universal and the liability extends from 18 to 60 years.

Currency. The monetary unit is the franc.

Syria

Capital, Damascus—Area, approximately 54,300 square miles—Population (estimated 1948), 3,400,000.

Descriptive. The Republic of Syria in the Levant is bounded on the north by Turkey, on the east by Iraq, on the south by Hashemite Jordan and Palestine, and on the west by Lebanon and the Mediterranean Sea. It is traversed by the Orontes and Euphrates Rivers. Beirut is the chief seaport.

Resources and Industries. Mineral wealth is comparatively small, except for oil, found chiefly in the Deir-Ezzor region. The principal industries are agriculture and cattle breeding; the chief crops are wheat, barley, tobacco, citrus fruits, olives, grapes and sorghums. Wine is produced and among local manufactures are leather, wool and silk goods, and copper and brass utensils. A $100,000,000 oil concession was granted to independent United States oil companies in March, 1949.

History and Government. The State (later Republic) of Syria was formed from the former Turkish Empire Sanjaks (districts) of Damascus, Aleppo, Homs, Hama, Deir-Ezzor, Latakia, the Hauran, the Euphrates and Jezireh, and Jebel Druse. Syria was made an independent State by the Treaty of Sevres (Aug. 10, 1920) and divided into the States of Syria and Greater Lebanon (Sept. 1, 1920). Both were administered under a French mandate (1920-1941).

A Franco-Syrian treaty approving establishment of an independent Syrian State under French military supervision was signed (Sept. 8, 1936). Syria was proclaimed a Republic (Sept. 16, 1941) by the occupying French authorities. An agreement (signed Dec. 27, 1943) transferred nearly all powers hitherto exercised by France to the respective Syrian and Lebanese governments (effective Jan. 1, 1944). All foreign troops subsequently withdrawn (April 1946).

Syria is a member of the United Nations, and became a member of the Arab League by a pact signed in Cairo (March 22, 1945).

Syria has a unicameral Assembly elected by direct vote. The President is elected by the Assembly which also appoints a Ministry formed from the dominant party.

President Shukri bey al-Kuwatly was overthrown in a political coup March 30, 1949 by Colonel Husni el-Zayim who was installed as President June 26, 1949. Colonel Zayim and Premier Barazi were tried and executed Aug. 14, 1948, during a military uprising. Legislative and executive authority were placed in the hands of a civilian coalition cabinet pending the election of a constituent assembly.

Education and Religion. The population is composed mainly of Sunni Moslems but there is a large number of Christians. Arabic is the principal language. There is about a score of Arabic newspapers published in Damascus. There is a public education system, also a number of private and foreign schools. There is a Syrian University in Damascus, agricultural colleges in Selemie and Bekaa, and an engineering college in Aleppo.

Currency. The monetary unit is the Syrian pound.

Thailand (Siam)

(PRADES THAI OR MUANG-THAI)

Capital, Bangkok—Area, 200,148 square miles—Population (estimated 1948), 17,666,000.

Descriptive. Thailand, a kingdom, is situated Southeastern Asia, with Burma on the northw and west and French Indo-China on the northe and east, and the Gulf of Thailand, which is p of the China Sea, on the south and east. It occupies the neck of the Malay Peninsula as far the Malayan Union. It is of rolling topogra with large areas susceptible to irrigation, of wh about 250,000 acres have been under water si 1922.

The Government voted (July 20, 1948) to cha the official name of the country to Thailand, ancient name of Siam.

Bangkok, the capital, in the delta of the Men is a modern city.

The town of Nakon Sritamaraj, 1,000 years is the home of perhaps the most distinctive T art, the "Niello" work which has been practi for more than eight centuries. The process c sists in the tracing of designs on silver by me of gentle repoussé work and afterward filling the depressions with a black metallic substa obtained from lead, copper and silver, melted w sulphur.

Resources and Industries. There are many la forests, teakwood being an important article export. Labor is higher than in almost any ot Oriental country.

The chief crop is rice, the staple food of people and heavily exported. Other import products are para-rubber, cocoanuts, tobacco, p per and cotton.

Mineral resources are extensive and include c tin, iron, manganese, tungsten, antimony mercury.

History and Government. Siam, one of last absolute monarchies, underwent (1932) bloodless revolution. King Prajadhipok, a libe signed a new constitution, establishing a limi monarchy, full franchise for the people and elected parliament. He refused to sign a meas abdicating the royal power of life and death resigned. He was succeeded by his nephew, Pri Ananda (born Sept. 20, 1925).

King Ananda was found dead of a bullet wo (June 9, 1946) and the legislature named brother, Prince Phumiphon Aduldet (born 19 to succeed him. Later Parliament elected a t man regency council, Prince Chainat and P Manaveraj Sevi, to rule Siam for the new king.

A new Constitution, providing for a Senate a House of Representatives, elected by the peo was signed by King Ananda (1946) and the f wholly elected Siamese Parliament was ope (June 1).

Following a revolution (Nov. 9, 1947) a pr sional Constitution was adopted creating a preme State Council.

The Siamese Cabinet invited King Phum Aduldet (May 21, 1948) to be crowned follow his 21st birthday (Dec. 5, 1948) and set Marc 1949 as the coronation date.

The Premier is Field Marshal Luang Pibul So gram, head of the military junta.

Education and Religion. Buddhism is the vailing religion. There were (1938-1939) 18 temples with 140,774 priests. Primary educatio compulsory and free in local public and munic schools.

Defense. All able-bodied males between the of 18 and 30 are liable to military service. Navy is small, as is the Air Force.

Currency. The monetary unit is the baht (tic

Trieste

(FREE TERRITORY OF TRIESTE)

Area, 320 square miles—Population (estim 1948), 320,000.

The Free Territory of Trieste is bounded on north by Italy, on the east and south by Y slavia and on the west by the Gulf of Panz an arm of the Adriatic Sea.

The Free Territory was set up by the Big Foreign Ministers Council under the terms of peace treaty with Italy (Feb. 10, 1947) and pl under the jurisdiction of the United Nations curity Council.

The statute of the Free Territory, as adc by the Big Four Powers, provides that it be demilitarized and neutral, with only ai forces authorized by the Security Council all inside its borders. The presence of semi-mil formations, such as Fascists, or any activitie them, is strictly forbidden. The Territory, how was authorized to set up a police force and sec services.

The statute also guarantees to all citizen the Free Territory the enjoyment of human r and the fundamental freedoms, including fre of religious worship, language, speech and pu tion, education, assembly and association. citizens regardless of origin are eligible for p office.

Citizenship was granted to Italians domiciled in the Trieste area on June 10, 1940 (the date of Italy's entry into World War II), and their children born after that. Only residents who had been members of the former Italian Fascist police and who had not been cleared by the Allied military authorities, were excluded from citizenship. Italian residents, however, were given six months in which to apply for Italian citizenship and another year in which to leave the Free Territory.

The official languages of the Free Territory are Italian and Slovene, and the flag and coat-of-arms are those of the City of Trieste.

Provision was made for a constitution to be drafted along the lines of the statute and adopted by a vote of a two-thirds majority of a Constituent Assembly which is to be elected by the people of Trieste. A Council of Government to advise the Governor also is to be set up and among other functions is to recommend candidates for appointment to the courts.

After the adoption of a Constitution, a popular Assembly consisting of a single chamber is to be elected on the basis of proportional representation and of universal, equal and secret suffrage.

The conduct of foreign affairs is entrusted to the Governor. The Territory has its own monetary system.

A free port under the supervision of an international commission was established in the Free Territory and freedom of transit through other countries of goods to and from the free port was guaranteed.

The Free Territory is garrisoned by 5,000 troops apiece of the United States, Great Britain and Yugoslavia.

Under the terms of the peace treaty all property owned by the Italian Government or any of its official or semi-official agencies was turned over to the Free Territory, as well as all archives relating to Trieste and the surrounding area. Italy also was directed to return all property removed from the area after Sept. 3, 1943, including shipping.

The American Military Government office was abolished and a native local government was set up in the Anglo-American zone (June 25, 1948).

In municipal elections held June 12, 1949 to provide the city with its first freely appointed city administration since 1922, pro-Italian parties won 40 of the 60 City Council seats; 20 seats were won by parties favoring independence or union with Yugoslavia.

Gianni Bartoli, Christian Democrat, was elected Mayor at the first meeting of the new Administrative Assembly, July 18, 1949—the first democratically elected Mayor of Trieste since 1922.

Turkey

(TURKIYE CUMHURIYETI)

Capital, Ankara—Area, 296,107 square miles—Population (estimated 1948), 19,500,000.

Descriptive. Turkey, a Republic, occupies territory in both Europe (9,257 square miles), and Asia (285,236 square miles). European Turkey is bounded on the north by the Black Sea, Bulgaria and Greece, on the east by the Black Sea and on the west by the Aegean Sea and Greece. Turkey in Europe is separated from Turkey in Asia by the Bosphorous at Constantinople and the Dardanelles (Hellespont), approximately 40 miles long with a width varying from one to four miles. Turkey in Asia is bounded on the east by the Caucasus and Iran, on the south by Iraq, Syria and the Mediterranean and on the west by the Mediterranean and the Aegean.

The area and 1945 population of Turkey is divided between Europe and Asia as follows:

	Area (Square Miles)	Population
Europe	9,257	1,493,976
Asia	286,850	17,366,246

Resources and Industries. Four-fifths of Turkey's population derive their income from agriculture, the products including tobacco, cereals, olives and olive oil, wool, silk, cotton, figs, nuts, fruits of almost all varieties, opium and gums. About 20 million acres are in forests.

Turkey has large mineral resources, not yet developed, including chrome and iron ore, zinc, manganese, antimony, copper, borax, emery, asphalt, meerschaum, some coal and lignite, salt, some gold and silver, and petroleum on lands bordering the Marmora Sea.

Turkey manufactures cotton and woolen yarn, cement, paper, and bottles and other glassware.

History and Government. Up to the beginning of World War I, Turkey or the Ottoman Empire, included European Turkey, Anatolia, Arabia, Syria, Palestine, Mesopotamia, Armenia and Kurdistan, also groups of islands in the Aegean Sea.

The areas of the Turkish Empire (as late as 1916) totaled about 710,224 square miles, with about 21,273,900 population.

Under the Treaty of Sevres (Aug. 10, 1920), imposed on Turkey after World War I, various divisions of her territory were made and a neutral zone was set up on either shore of the Dardanelles, the Sea of Marmora, and the Bosphorus.

The Sanjak of Alexandretta set up (Jan. 1, 1925) as part of the State of Syria, became an independent province known as the Hatay Republic under a treaty concluded (June, 1938) between France and Turkey. Its capital is Antioch. Hatay was ceded to Turkey by France (June 23, 1939) in a mutual assistance pact.

The real power in the Turkish Empire was seized by the Grand National Assembly and a responsible Ministry set up by the Nationalists at Ankara, in Anatolia, which was the most genuinely Turkish section of the old Ottoman Empire, after the last Chamber of Deputies, sitting at Constantinople, was dissolved (April 11, 1920). The Assembly declared that Mohammed VI was deposed as Sultan, and the Sultanate abolished. It declared (March 2, 1924) that his successor as Caliph, Abdul Medjid II, was deposed as Caliph (spiritual head of Islam) and that the Caliphate was vested in the Assembly.

Turkey (April 10, 1936) asked the powers signature to the Treaty of Lausanne (July 24, 1923), which took the place of the Treaty of Sevres, for further revisions to permit it to remilitarize the Dardanelles Straits and the Bosphorus. The powers met at Montreux, Switzerland (July 20, 1936), and agreed (July 18) to the Montreux Convention which permitted Turkey to refortify the straits and to close them if it were at war or threatened by aggression. But the agreement also permitted free passage through the straits at all times for merchant vessels, in peace or war and even if Turkey were a belligerent, provided the unarmed vessels did not assist the powers at war.

The U.S.S.R. Navy was given complete liberty to pass through the straits and enter the Black Sea in peace time, but no outside nation was permitted to send fleet units totaling more than 20,000 tons through the straits at one time and all non-Black Sea nations were limited to a grand total of 30,000 tons at one time.

The Montreux Convention was ratified (Nov. 8, 1936) by Great Britain, France, Greece, Japan, Rumania, Soviet Russia, Yugoslavia and Turkey, but Italy refused to recognize it. The U.S.S.R. sent a note to Turkey (Aug. 10, 1946) demanding revision of the Montreux Treaty and joint Turco-Russian control of military bases on the Dardanelles, with only Black Sea nations taking part in the revision negotiations.

A constitution replacing the Fundamental Law of 1921 was adopted (Oct., 1925). It provided for a single legislative National Assembly of 283 Deputies elected on a basis of one to each 50,000 people by males over 18. This provision was changed (Dec. 14, 1934) when the franchise was given to women and the age of both men and women made 22 years, and the ratio changed to one for 40,000. A law guaranteeing the secret ballot and open vote counting was passed (July 10, 1948).

A general election was held (July 21, 1946), the first under universal suffrage, the secret ballot and with more than one party in the field. The Republican People's party won 395 seats in the Assembly, the Democratic party 66 and the Independents four.

The President, elected by the National Assembly, is Ismet Inonu, who is serving his fourth four-year term. The Premier is Shemsettin Gunaltay, People's Party.

Education and Religion. Islam is no longer recognized as the State religion, but the vast majority of the Turkish population is Moslem. Turkish has been substituted for the liturgical language in all mosques. The law forbids the wearing of clerical garb except in places of worship during Divine service.

Education is compulsory, free and secular between the ages of seven and 16. There are primary, intermediate, secondary and vocational schools with universities in Istanbul and Ankara. Turkey ended a 25-year ban on religious education (May, 1948) by a resolution providing for optional religious training under state supervision.

Defense. Military service is compulsory; the Air Force has been strengthened and the Navy is under reorganization.

Currency. The monetary unit is the piastre.

Union of Soviet Socialist Republics

(RUSSIA)

Capital, Moscow—Area (estimated 1947), 8,518,000 square miles—Population (estimated 1947), 211,384,985.

Descriptive. The Union of Soviet Socialist Republics—in area the largest country in the world—stretches across two continents from the North Pacific Ocean to the Gulf of Finland. It occupies

the northern part of Asia and the eastern half of Europe, from the Arctic to the Black Sea. Its western borders brush against Finland, the Baltic Sea, Poland, Czechoslovakia, Hungary and Rumania. On the south it is bounded by Rumania, the Black Sea, Turkey, Iran, Afghanistan, China, Mongolian People's Republic and Korea. In the far northeast the Bering Strait separates the U.S.S.R. from Alaska.

The vast territory of the U. S. S. R., one-sixth of the earth's land surface, contains every phase of climate, except the distinctly tropical, and a varied topography. The European portion is a vast low plain with the Ural mountains on its eastern edge, the Crimean and Caucasian mountains on the south and southeast. The Urals, separating the European from the Asiatic portions of the country, stretch north and south for 2,500 miles. The Asiatic portion of the U. S. S. R. also consists largely of an immense plain, with mountain ranges on its eastern and southern borders.

The rivers in the European section include the Dnieper, flowing into the Black Sea, the Volga and the Ural, flowing into the Caspian Sea, the Don into the Sea of Azov; the Western Dvina into the Baltic and the Northern Dvina into the White Sea. The Asiatic section is drained by three great rivers, the Ob, the Yenisei and the Lena, each over 2500 miles long, which flow across Siberia into the Arctic Ocean, and contains several large rivers in the South, including the Amur, which flows into the Pacific Ocean.

The capital is Moscow where the Kremlin, ancient citadel of the Czars, forms the nerve center of the federated republics. Leningrad (formerly St. Petersburg and Petrograd), situated in the delta of the Neva River, was the capital of the Russian Empire for 200 years and now is the second largest city of the Union. Kiev, the 1,000-year-old capital of the Ukranian S. S. R., is the industrial center of the south. Since 1930 many new industrial cities have arisen in the Urals, Siberia and the Soviet Far East. The Crimea is the vacationland of the U.S.S.R. and the highway from Sevastopol winds past Yalta, Mischor, Massandra and other health resorts along the shores of the Black Sea.

EXPANSION OF THE U.S.S.R.

The expansion of the U.S.S.R. in recent years was the result of numerous military and diplomatic actions: In Sept., 1939, after Hitler began war on Poland, the Soviet Union denounced its treaties with Poland, invaded its territory and divided Poland with Germany, approximately the eastern two-thirds going to the Soviet Union. A large part of this domain had been Russian imperial territory ever since the Polish kingdom was finally divided among Russia, Austria and Prussia in 1795. When the Polish republic was reconstituted after World War II, the Soviet Union still retained about 69,860 sq. miles, pop. est. 12,775,000.

The Soviet armies also occupied and incorporated the independent republics of Latvia, Lithuania and Estonia, former Russian imperial territory recognized as independent after the first World War. The Soviets also moved against Finland, defeating it twice (1939-1944) exacting large reparations and the cession of the Petsamo (Pechora) region, incorporating it in the Karelo-Finish S.R., which has over 450,000 pop. Finland, from 1809 to 1917, was a grand duchy of the Russian empire. These Baltic lands added over 6,000,000 population to the U.S.S.R.

In 1944 the Tuvinian Peoples Republic in Outer Mongolia, at one time a Russian protectorate, was made a part of the central Russian Soviet Federal Socialist Republic; its area was given as 64,000 sq. miles, pop. about 65,000.

Subcarpathian Ruthenia was taken over in 1945 and united with the Ukrainian S. S. R. This region was a part of Hungary until 1918; then it was made part of Czechoslovakia; in 1939 it was reoccupied by Hungary; in 1944 it was taken by the Soviet Union and by agreement at the Potsdam conference of Stalin, Truman and Churchill it was ceded to the Soviet Union. The Czech residents were allowed to transfer to Czechoslovakia if they wished. Pre-war pop. est. 800,000, 63% Ukrainian.

The Soviet Union also took over Moldavia and most of Bessarabia; the latter had been shuttled back and forth between imperial Russia and Rumania.

The Potsdam Conference also approved the transfer to the Soviet Union of most of East Prussia, including the Baltic port of Koenigsberg and about 7,000 sq. miles east of it; the southern part going to Poland.

By the terms of the Yalta agreement, between Stalin, Churchill and President Roosevelt, the Soviet Union, upon entering the war against Japan three weeks after Germany's surrender, would establish its title to the Kurile islands and the southern half of the island of Sakhalin. The Kuriles are 47 islands, area 3,944 sq. miles, pop. 350,000, stretching from Japanese Hokkaido to Kamchatka peninsula. They were once important seal and otter hunting grounds. They were held by imperi Russia until 1875, when Japan acquired them. T southern half of Sakhalin was taken from Russ at the end of the Russo-Japanese war of 1904- and given to Japan by the Portsmouth Peace Co ference. The island has forests and coal and cove 13,030 sq. miles.

POLITICAL ORGANIZATION

The U.S.S.R. is a federation consisting of Union Republics, within certain of which a further subdivisions, such as Autonomous Sovi Socialist Republics, Autonomous Regions and N tional Districts. Four of the Union Republics co tain 16 Autonomous Soviet Socialist Republics ar nine Autonomous Regions; the largest Union R public, the R.S.F.S.R. has also 10 National Di tricts. The autonomous republics are:

The Russian Socialist Federated Soviet Republ (Soviet Russia proper), contains over 50% of th population of the Soviet Union and includes 74 of its territory. Its territories stretch from t Estonian, Latvian and Finnish borders and t White Russian and Ukrainian lines on the wes to the shores of the Pacific Ocean, and from t Arctic Ocean on the north to the shores of t Black and Caspian seas and the borders of Kazak S. S. R., Mongolia and Manchuria on the sout The capital is Moscow.

The Ukrainian Soviet Socialist Republic is t most densely populated of the constituent r publics. It borders on the Black Sea, with Ge many, Hungary and Rumania on the west an southwest. The northern part of Bukowina w added to the Ukraine S. S. R. (1940) from Rumani The capital is Kiev. The population is 80% Ukrai ian. Carpatho-Ukraine (Subcarpathian Ruthenia is a part of this republic.

The Ukraine contains the famous black soil bel the chief wheat-producing section of the Sovi Union. Sugar beets and oil seeds are importa crops and livestock breeding is rapidly advancin

In the Donets Basin the Ukraine has a hug storage of coal, iron and other metals. Here a produced 54.1% of the coal mined in the countr 60% of the pig iron, 48% of the steel and 35% the manganese. There are heavily developed chem cal and dye industries and salt mines. Electr power development has made rapid advances.

The largest hydro-electric development in Europ constructed on the Dnieper River and known the Lenin Hydroelectric Station, with an ultima capacity of 558,000 kilowatts, was dynamited (194 by Russia during the war with Germany. Since t expulsion of the Germans the plant has been r stored to operation. The development is common known as the Dnieper Dam.

Byelorussian Soviet Socialist Republic (Whi Russia), situated on the western border of t U.S.S.R., was proclaimed Jan. 1, 1919.

Under the Czars Byelorussia was the pale settlement of the Jewish population. It suffer greatly from periodical pogroms and from inte racial struggles. Between 1914 and 1920 it was field for military operations. The racial compo tion is Byelorussians 80.6%; Jews, 10%; othe Russians, Ukrainians, Poles. Minsk is the capit

The country is agricultural. Much of the la is marshy, but modern drainage methods ha increased the arable area. Principal crops are fl grain and potatoes. Chief industries include woo working, matches, linen, paper, leather, oil pre ing, glass.

Azerbaijan has in the vicinity of Baku, the ca tal, the most important oil fields in the U.S.S Before the second world war it produced more th 25,000,000 tons of oil a year. Its natural wea includes deposits of pyrites, barites and fos copal, as well as zinc, silver, gold, copper, vanadium and molybdenum. Establishment large irrigation projects during recent years made cotton growing important. In recent year high quality Egyptian type cotton has been grow Three-fifths of the population is composed of Az baijanians, a Turkish people. **Georgian S. S.** situated in the western part of Transcaucasia, c tains the largest manganese mines in the wo There are rich timber resources. Large coal depo have recently been discovered. Output of industr machinery has become increasingly importa Grain and wine grapes are principal crops. population includes two-thirds Georgians. capital is Tbilisi (Tiflis).

Armenian S. S. R., with its capital in Erev depends largely on irrigation. Cotton and tob are widely grown. Copper and lead mining h been developed. The population is 85% Armen

The Uzbek Soviet Socialist Republic and Turkmen Soviet Socialist Republic in Cen Asia were organized in 1924. The **Uzbek Repu** contains the finest cotton lands in the So Union. A high quality caracul fur is produced export. Its mineral wealth includes coal, sulp copper and oil. In the **Turkmen Republic** pri

al crops are cotton, grain and oil seeds. Mineral ealth includes oil, coal, sulphur, barite, lime/ ypsum. The Kara Kum desert occupies four- fths of the territory. From 1927 to 1939 about 400 new schools were opened. The capital of urkmen is Ashkhabad. Uzbek built a canal in 1940 hat irrigates over 1,000,000 acres. The capital of zbek is Tashkent. Samarkand, Tamerlaine's old pital, is in Uzbek.

Tadzhik S.S.R. (Tadzhikistan), formed from the rmer regions of Bokhara and Turkestan, was dmitted as a constituent republic on Dec. 5, 1929. hree-quarters of the population are Tadzhiks, ostly Sunnis, speaking an Iranian dialect. Chief ccupations are farming, horticulture and cattle reeding. Cotton, grain, sugar cane and a variety f fruits are grown. Heavy industry, based on rich ineral deposits and hydroelectric power, has re- aced handicraft. Stalinabad is the capital.

The Kazakh Socialist Soviet Republic extends om the lower reaches of the Volga river in Europe the Altai mountains on the Chinese border. contains over 100,000,000,000 tons of coal, 100,- 00,000,000 tons of oil, vast deposits of gold, lead, nc, nickel, copper, iron, tin, aluminum and min- al salts. It has the largest amount of nonferrous etals, builds machinery and during the war was a reat industrial arsenal. Fish for its canning in- ustry are caught in Lake Balkhash and the Cas- an and Aral seas. Before the Revolution only 2% the people was literate; now 350 newspapers are ublished. The capital is Alma-Ata (Father of pples), which has several moving picture studios. araganda and Balkhash are large new centers.

The Kirghiz Soviet Socialist Republic is located the eastern part of Soviet Central Asia, on the ontier of Sinkiang (Western China). The people, ice nomadic, breed cattle and horses and grow bacco, cotton, rice and sugar beets. The capital Frunze.

The Karelo-Finnish Soviet Socialist Republic has en formed since the war from the former Kar- ian S. S. R. and territory ceded by Finland. It as 26,000 lakes, covering about 15% of its domain. ine, fir and birch forests cover two-thirds of the ea; under-surface wealth includes granite, dia- se, porphyry, sandstone, marble, mica, pigma- tes, iron, tatano-magetites, nonferrous metals and at. The capital, Petrazovodsk, was founded in the th century by Peter the Great.

The Moldavian Soviet Socialist Republic, in the uthwest part of the Union, is a fertile back earth aln between the Pruth and Dniester rivers. It as created from territory of the former Moldavian utonomous Republic and Bessarabia. It is an gricultural region that grows wheat, barley, corn, ums, apples, peaches, walnuts, tomatoes, water- elons and garden truck. It was greatly devastated the German armies.

The Lithuanian Soviet Socialist Republic, on the altic sea, is an agricultural region, where dairy ttle and hogs are bred. The capital is Vilnius ilna). **The Latvian Soviet Socialist Republic** on e Baltic Sea and the Gulf of Riga, has timber d peat resources estimated at 3,000,000,000 tons. addition to agricultural products it produces bber goods, dyes, mineral fertilizers and glass- are. The capital is Riga, on the Western Dvina ver. **The Estonian Soviet Socialist Republic** is cated on the Baltic sea, between the gulfs of ga and Finland. It has textile, shipbuilding and ilroad repair industries and its shale refining in- ustry is reported to be the largest of its kind in e world. Tallinn is the capital. These three Bal- c states were overrun by both sides during the ar. Eventually Russian armies occupied them, the gular governments were dispossessed and Com- unist-dominated parliaments were elected on one- rty tickets. Their incorporation into the U.S.S.R. as not been recognized by the United States.

POPULATION

No accurate estimate of the 1949 population of e Soviet Union is available. Figures furnished by e Information Bureau of the Soviet Embassy in ashington, based on the 1940 population, show a pulation in the 16 union republics of 192,756,000. hich differs only slightly from the total of 194,- 9,385 reported in previous issues of the World manac. At the time of the German invasion, ne, 1941, the U.S.S.R. is reported to have had 0,000,000 inhabitants (est.). The casualties of e war are estimated by the government at over 000,000.

The following table of the area and population of e 16 constituent republics, while not official, is lieved to reflect the actual conditions of 1940:

Republic	Area sq. mi.	Pop. (1940)
ussian S. F. S. R.	6,372,860	109,279,000
oviet Russia proper)		
krainian S. S. R.	215,600	40,200,000
elorussian S. S. R.	88,146	10,400,000
hite Russia)		
Armenian S. S. R.	11,580	1,253,985
Georgian S. S. R.	27,020	3,542,289
Azerbaijan S. S. R.	33,196	3,209,727
Uzbek S. S. R.	145,908	6,282,446
Turkmen S. S. R.	171,384	1,253,985
Tadjikistan S. S. R.	55,584	1,485,091
Kazakh S S. R.	1,059,184	6,145,937
Kirghiz S. S. R.	76,042	1,459,301
Karelo Finnish S. S. R.	16,173	469,100
Moldavian S. S. R.	19,176	3,464,952
Lithuanian S. S. R.	22,959	2,879,070
Latvian S. S. R.	25,402	1,950,502
Estonian S. S. R.	18,353	1,134,000
Total	**8,358,567**	**194,409,385**

According to the census of 1939, the Russians formed 58.4% of the total population; the Ukrainians 16.6%; the Byelorussians 3.1%, the Uzbeks 2.9%; the Tatars 2.5%. Five nationalities, the Kazakhs, Jews, Azerbaijanians, Georgians and Armenians, each comprised between 1 and 2% of the total. The population added in 1940 by the acquisition of territory (officially styled "reuniting with the Motherland") was about 23,000,000, which is included in the total shown in the table.

RESOURCES

The Soviet Union contains practically all natural resources used by man. Known mineral resources include coal, peat, oil, iron ore, manganese, copper, potassium, apatite, zinc, lead and others. Their development has become tremendous in recent years. The coal deposits are estimated at one-fifth of the known deposits of the world and second only to those of the United States, and in petroleum the U.S.S.R. is one of the richest countries in the world. Land potentially suitable for agriculture is estimated at upward of 1,037,400,000 acres, including a black soil belt of 247,000,000 acres, more than 3,000 miles long, largest single agricultural area in the world. There are nearly 2,500,000,000 acres of forest land containing about one-third of the world's lumber supply. The U.S.S.R. is an extensive fur producer and its rivers and seas are rich in fish. The power capacity of its rivers is estimated to equal slightly less than one-third of the potential water power capacity of the world.

ECONOMIC SYSTEM

The economic foundation of the U.S.S.R. is the socialist system of economy and socialist ownership of the instruments and means of production. Socialist property exists in two forms: (1) State property; (2) Cooperative and collective farm property. State property includes the land, minerals, waters, forests, mills, factories, mines, rail, water and air transport, banks, communications, large agricultural enterprises (Sovkhozy), municipal enterprises and the bulk of dwellings.

The common enterprise of collective farms and cooperative organizations (Kolkhozy), their output and common buildings constitute the common, socialist property of the collective farms and cooperative organizations. Members of the Kolkhozy also have small plots of land attached to their dwellings for their own use. Peasants unwilling to enter a Kolkhoz may retain their individual farms, but are not allowed to exploit hired labor. Land occupied by collective farmers is secured to them in perpetuity as long as they use it in accordance with the law. A decree issued by the Presidium Aug. 29, 1948, gave citizens the right to buy or build dwellings containing not more than five rooms.

Agriculture was collectivized during the First Five-Year Plan (1928-1932) when peasants were organized into collective farms or cooperative enterprises in which members jointly own the farm facilities and jointly rent, from state-owned machine and tractor stations, the mechanical equipment. Before the second world war there were 250,000 collective farms and 4,000 state farms operated by the state; 6,000 tractor stations providing over 500,000 tractors and other equipment. The government estimated that the Germans looted or destroyed 98,000 collective farms, 1,876 state farms and 2,890 tractor stations. In 1946 the U.S.S.R. experienced probably the worst draught in its history; in 1947 it had a bumper crop. In Dec., 1947, all food rationing was abolished.

A system of planned development, embracing not only the entire economic field, but all cultural, scientific and public health activity as well, is in operation in the U.S.S.R. This has taken the form of a series of Five-Year Plans, with intermediate annual schedules.

FOURTH FIVE-YEAR PLAN

The goals of the Fourth Five-Year plan, on an annual output level, scheduled for completion in 1950, are officially given as follows:

Iron and Steel: Iron, 19,500 tons; steel, 25,400,000 tons; rolled goods, 17,800,000 tons.

Fuel and Power: Coal, 250,000,000 tons; petroleum, 35,400,000 tons; coal and shale gas, 1,090,-

000,000 cu. meters; natural gas, 8,400,000,00 cu. meters; electric power, 82,000,000,000 kw. hrs. (One cubic meter equals 35.314 cubic feet.)

Rolling Stock and Vehicles: Steam locomotives, 2,200; Diesel locomotives, 300; electric locomotives, 220; two-axle freight cars, 146,000; passenger coaches, 2,600; motor trucks, 428,000; passenger automobiles, 65,500; motor buses, 6,400.

Factory Machinery: Steam turbines (kw), 2,-906,000; water turbines, (kw) large, 372,000; medium, 150,000; small, 500,000; electric motors up to 100 kw., 624,000; over 100 kw., 9,000; spinning frames, 1,400,000; looms, 25,000.

Farm Machinery: Tractors, 112,000; tractor-drawn plows, 110,000; power-driven threshers, 18,300.

Timber and Building Materials: Felled timber, 280,000,000 cu. meters; sawed lumber, 39,000,000 cu. meters; cement, 10,500,000 tons; slate, 410,000,000 sheets; window glass, 80,000,000 sq. meters. (One sq. meter equals 10.76387 sq. feet).

Textiles, etc.: Cotton fabrics, 4,686,000,000 meters; woolen fabrics, 159,400,000 meters; leather footwear, 240,000,000 pairs; rubber footwear, 88,-600,000 pairs; socks and stockings, 580,000,000 pairs. (One meter equals 3.28085 feet).

Foodstuffs: Meat, 1,300,000 tons; butter, 275,000 tons; vegetable oil, 880,000 tons; fish, 2,200,000 tons; sugar, 2,400,000 tons; flour, 19,000,000 tons; soap, 870,000 tons; alcohol, 100,800,000 decalitus (One decalitus equals 2.64 gallons).

The U.S.S.R. government's production report to the United Nations for its Statistical Bulletin (March 1949) listed percentage gains, but no actual comparative figures, for 23 major industries. The statistics report gross output of industry in 1948 exceeded its established goal for the year by 6% and was 18% above the average level in 1940. Total output of industry was reported at 3% above the level scheduled for the first three years of the 1946-1950 fourth Five-Year Plan.

The number of workers (1940) was 30,400,000 and the estimate (1950) was 33,500,000. The wage fund (1940) was 161,000,000,000 rubles and the estimate (1950) 252,300,000,000.

Industrial production in rubles was:

1937	1940	1950 (Est.)
95,500,000,000	137,500,000,000	205,000,000,000

GOVERNMENT

The first Russian state centered on Kiev in the 9th century. In the 13th century the Mongols overran the country. It recovered under the grand-dukes and princes of Muscovy, or Moscow, and by 1480 freed itself from the Mongols. Ivan IV, the Terrible, was the first to be formally proclaimed Czar in 1547. Peter the Great, (1682-1725), extended the domain and in 1721 founded the Russian empire. The abortive Revolution of 1905 demonstrated the insecurity of the regime and led to mild concessions. The Revolution of 1917 led to the end of the empire (Nov. 7). The first provisional democratic government under Kerensky was in turn routed by the extreme bolshevists under Lenin. The first Soviet constitution was adopted in 1918 for the R.S.F.S.R.; the U.S.S.R. was formed in Dec., 1922, and the first Union constitution adopted in 1923. A new constitution, usually called the Stalin constitution, was adopted Dec. 5, 1936.

The highest authority is the Supreme Soviet, consisting of the two legislative chambers, the Soviet of the Union and the Soviet of Nationalities. The first house is elected on the basis of one deputy for every 300,000 population; the second is elected on the basis of 25 deputies from every Union republic, 11 from every autonomous republic, 5 from every autonomous region and one from every national district. The Supreme Soviet meets twice a year for a four-year term and chooses a Presidium, which has broad administrative powers between sessions and in some instances the right to declare war. The chairman of the Presidium performs the duties of the titular head of the state. The present incumbent is N. M. Shvernik.

The 1936 Constitution provides for universal direct suffrage with secret ballot. It was modified Feb. 1, 1944, to give each of the constituent republics the right to have separate commissariats for defense and foreign affairs. The land, air and naval forces of the U.S.S.R. were unified in the People's Ministry by a decree of the Presidium, Feb. 25, 1946. The ministry now deals with all questions of foreign affairs affecting the Union and influences the foreign policy of the constituent republics. Right of the republics to withdraw from the Union was expressly recognized in the 1936 Constitution.

The highest judicial organ is the Supreme Court, whose members are elected by the Supreme Soviet for five-year terms. Similiar courts are elected within the constituent republics. The law courts of the R.S.F.S.R., which are exemplary of other republics, are divided into People's Cou and Special Courts, the latter including a La Section of the People's Court, Rural Commissio Arbitration Committees, Military Tribunals a Disciplinary Courts. Capital punishment in pea time was abolished in the U.S.S.R. by the Pres ium, May 26, 1947.

The highest executive and administration org of state power is the Council of Ministers appoin by, and responsible to the Supreme Soviet. Cha man of the Council is Generalissimo Joseph Stalin; vice-chairman, Vyacheslav M. Molot who also is chief deputy premier.

The Foreign Minister is Andrei Y. Vishinsky, a pointed March 4, 1949.

Generalissimo Stalin is a deputy to the Supre Soviet of the U.S.S.R., a member of the Milit Council of the Supreme Soviet, and General Sec tary of the Communist Party of the U.S.S The military title of Marshal was bestowed Stalin by the Presidium (1943). He was ma Generalissimo (1945).

Stalin was born Dec. 21, 1879 in Gori, near Tifl Georgia, the son of a cobbler. His real name w Joseph Vissarionvich Dzugashvili and he w named Stalin (meaning steel man) by Nico Lenin.

Politically active citizens belong to the All-Uni Communist party. The highest authority in t party is the party congress which elects a centi committee, organizational and political bureau and a secretariat. Divisions of the Communist pa correspond to the territorial divisions of the sta According to the U.S.S.R. government, the Co munist party (Bolshevists) had 6,300,000 membe in the autumn of 1947. The party's directive bo is the Central Committee, elected by membersh of the party congresses. The Committee sele a small executive body, the Politburo (Politi Bureau) which by its position of party leadersh makes the decisions on policy which are follow by the Government. The Politburo consists of members and four substitutes or alternates. T members are Stalin, Molotov, A. A. Andreyev, K. Voroshilov, L. M. Kaganovich, A. I. Mikoyan, N. Khrushchev, L. P. Beria, G. M. Manlenkov, a one vacancy. The substitutes are N. A. Voznesensk N. A. Bulganin, A. N. Kosygin and Shvernik.

The republics and other subdivisions of the Uni follow the same general pattern of governmen and-party organization, except that the supre soviets of the republics have only one chamber.

The budget reflects the economic progress of t Soviet Union because of the high degree of socia zation of the nation. The first "firm" budg (1923-1924) balanced at 2,317,600,000 rubles.

Budgets (in thousands of rubles) for the la ten years follows:

	Receipts	Expenditu
1940	183,955,000	183,955,0
1941	222,375,000	216,052,0
1942	182,841,000	182,841,0
1943	249,576,000	249,576,0
1944	245,600,000	245,600,0
1945	325,252,000	298,591,0
1946	333,000,000	319,269,0
1947	391,500,000	371,400,0
1948	428,000,000	387,900,0
1949	445,208,000	415,355,0

The 1949 budget increased military appropriatio to 79,000,000,000 rubles from the 1948 figure 66,000,000,000 an increase of nearly 20 percent, a representing about 19 percent of the governmen total expenditures. Many of the U.S.S.R. bud figures do not include items which would ma them comparable to the United States bud figures.

Since Soviet currency circulates only within t Soviet Union, both exports and imports ther are prohibited by law. All payments abroad made in gold or foreign currency.

EDUCATION AND RELIGION

Universal compulsory education for children, troduced for a four-year period (1930), has si been extended. Education begins at the age seven.

The number of pupils in secondary and elem tary schools (1946) was 29,339,000. In the sa year there were 772 universities and technical c leges of university standards with 670,000 studie and 65,000 in the faculties. In 1946 there w 2,700 vocational railway and factory apprentices schools. A system of tuition was introduced (19 in the secondary schools and higher educatio institutions. Heretofore tuition had been free.

Religious education is permitted but it must violate the basic principle of separation of church and State, established Jan. 23, 1918.

There were (1945) 20,000 religious congregati of the Orthodox faith with 30,000 priests; theological seminaries, a theological academy Moscow, another in Leningrad and 87 monaste and convents.

MILITARY

The fighting forces are consolidated under the ople's Ministry. Stalin resigned as supreme mmander-in-chief in 1947 and appointed Gen. kolai Alexandrovitch Bulganin to the office. Mili- ry training begins in the schools at 12 (two urs a week). Compulsory service begins at 16. The Army and the Navy have separate air forces. precise information on the size of the present my, navy and air forces is available. It was timated in 1949 that 30 divisions of 20,000 men ch were based in occupied territory and that 0 divisions of 10,000 men each were used in home ty, but this is conjectural. An extensive program airplane development, including jet planes, is dicated by the planes exhibited at the Moscow air views. The first public exhibition of Soviet-pro- iced jet planes was given on Aviation Day, ly 17, 1949, at Moscow, at which Stalin's son, eut. Gen. Vassily Stalin, was vice marshal. For- gn military attaches observed that the planes own were modern and reached an extremely high eed.

Principal ships in service in 1948 included three ttleships, 10 cruisers. Believed in service also ere 260 submarines, 50 destroyers, 15 torpedo- ats and a large number of auxiliary vessels. Forty-five warships were received (Feb. 9, 1948) the U.S.S.R. share of the Italian navy.

The civil air force has been expanded to cover pproximately 105,000 miles by 1950 with the addi- on of 20 major airports and 16 landing strips.

Uruguay

(REPUBLICA ORIENTAL DEL URUGUAY)

Capital, Montevideo—Area, 72,172 square miles—opulation (estimated 1947), 2,300,000.

Descriptive. Uruguay, the smallest and one of the ost advanced Republics in South America, is ounded on the north and east by Brazil, on the uth by the South Atlantic Ocean and the River lata, and on the west by Argentina, the boundary ne being the River Uruguay, which is navigable om the Plata to Salto, 200 miles north. Lying etween latitudes 30° and 35° south and consisting rolling grassy plains, it enjoys an extraordinarily ealthy climate with a uniform temperature.

Resources and Industries. More than 2,150,000 res are under cultivation. The chief products re meat, wool, hides, corn, wheat, citrus fruits; ce, tobacco, oats and linseed. The textile and ine making industries are important.

History and Government. Uruguay, once a part the Spanish Viceroyalty of Rio de la Plata and ter a province of Brazil, declared its indepen- ence (Aug. 25, 1825), which was confirmed by a reaty with Brazil and Argentina (Aug. 27, 1828). he first Constitution was adopted (July 18, 1830). he present Constitution (adopted April 19, 1934) rovides for a Chamber of Deputies of 99 members lected by the Provinces according to population, nd a Senate of 30 members elected by the nation s a whole, 15 being from the party polling the argest vote and 15 from the party with the next argest vote. Suffrage is universal with propor- ional representation in operation. Foreigners may ecome naturalized without losing their former itizenship.

The President, Senators and Deputies have four- ear terms. The President appoints a Cabinet of ine from the parties which have a majority in arliament. President and Ministers are subject to otes of censure. The President is Luis Batlle erres, who succeeded to the office (Aug. 2, 1947) n the death of President Berreta.

Much of the Uruguayan code of advanced social egislation was written into the Constitution, which rovides for old-age pensions, child welfare, State are of mothers, free medical attention for the oor, workmen's accident insurance, cheap dwell- ngs for laborers, an eight-hour day and a six-day eek, a minimum wage and special consideration or employed women and minors. It recognizes orkmen's right to strike and form unions.

Education and Religion. Church and state are eparate and there is complete religious tolerance. he preponderant religion is Roman Catholic. rimary education is compulsory and free. There s a university in Montevideo. The language is panish.

Defense. There is compulsory military training. he Army is composed of volunteers between the ges of 18 and 45. There is a small Air Force and avy.

Currency. The monetary unit is the peso.

The State of Vatican City

(STATO DELLA CITTA DEL VATICANO)

Area, (108.7 acres) .16 square miles—Population Dec. 1932), 1,025.

The Popes for many centuries, with some slight interruptions, held temporal sovereignty over mid-Italy (the so-called Papal States), extending from sea to sea, comprising an area of some 16,000 square miles, with a population in the nineteenth century of more than 3,000 000. This territory in the reign of Pius IX was incorporated in the Kingdom of Italy, the sovereignty of the Pope being confined to the palaces of the Vatican and the Lateran in Rome and the villa of Castel Gandolfo, by the Italian law (May 13, 1871). This law also guaranteed to the Pope and his successors in the chair of St. Peter a yearly indemnity of 3,225,000 lire ($622,425 at par of exchange), which allowance, however, remained unclaimed and unpaid.

Final settlement of the Roman question came after negotiations (begun Oct. 4, 1926), when the Treaty of Conciliation, the Concordat and the financial convention were signed in the Lateran Palace (Feb. 11, 1929) by Cardinal Gasparri and Premier Mussolini. The Treaty and Concordat established the independent state of Vatican City, and gave the Catholic religion special status in Italy. The treaty (Lateran Agreement) was duly ratified by the Pope and by the Italian Parliament (May 14 and 25) and signed by the King (May 27) and became effective (June 7) by exchange of ratification at the Vatican.

The Lateran Agreement was made an integral part of the Constitution of Italy (March 26, 1947). The Lateran Agreement became Article 7 of the Constitution. The article reads as follows:

"The State and the Catholic Church are each in its own order independent and sovereign. Their relations are regulated by the Lateran Agreement. Any modification of these agreements if bilaterally accepted does not require the procedure of a constitutional amendment."

Vatican City includes St. Peter's, the Vatican Palace and Museum covering more than 13 acres, the Vatican gardens, and neighboring buildings between Viale Vaticano and the Church. Thirteen buildings in Rome, although outside the boundaries, enjoy extra-territorial rights; these include buildings housing the congregations or officers necessary for the administration of the Holy See.

The legal system is based on the code of canon law, the apostolic constitutions and the laws especially promulgated for the Vatican City by the Sovereign Pontiff or those to whom he may delegate legislative power. In all cases not covered the Italian law of Rome applies. The Secretariat of State of His Holiness represents the Holy See in its diplomatic relations with foreign countries. By the Treaty of Conciliation the Pope is pledged to a perpetual neutrality with respect to political disputes between governments and to absention from international congresses called to cope with same, unless his mediation is specifically requested by both parties to a dispute. The flag of the State is white and yellow, charged with the crossed keys and triple tiara. Postage stamps have been issued, and a complete coinage was struck (1931).

Police duties are carried out by the Pontifical Armed Corps which comprise the Noble Guards, the Swiss Guards, the Palatine Guards of Honor and the Pontifical Gendarmerie.

The present Sovereign of the State of Vatican City is the Supreme Pontiff, Pius XII, Eugenio Pacelli born in Rome and elected Pope, 262nd, in succession to Pius XI (March 2, 1939). The late Pius XI in 1933, began to go outside Vatican City, and summered, with more or less regularity, at Castel Gandolfo in the Alban Hills. He modernized life and habits in the State of Vatican City by full use of wireless, telegraph, telephone, radios, automobiles and other up-to-date conveniences.

Venezuela

(ESTADOS UNIDOS DE VENEZUELA)

Capital, Caracas—Area, 352,150 square miles—Population (estimated 1948), 4,490,000.

Descriptive. Venezuela is the northernmost state of South America and is bounded on the north by the Caribbean Sea, with a coast line of 1,750 miles, on the east by British Guiana, the southeast by Brazil, and the west and southwest by Colombia, with maximum measurements of 928 miles from east to west, 790 miles from north to south. Seventy-two islands are included in the territory of Venezuela, the largest being Margarita (20 by 40 miles) which has been made the state of Nueva Esparta, and is an important pearl center.

The Orinoco River, with its tributaries, drains about four-fifths of the country. About 1,100 miles in length and 13½ miles wide at the apex of the delta, it is the third largest river system in South America, and is navigable to Puerto Ayacucho (more than 1,000 miles upstream), where the extensive rapids of Atures and Maipures prevent further navigation.

Venezuela is entirely within the torrid zone, the southern boundary extending to less than one degree north of the equator. The northernmost

point is 12° 11'. The spurs of the Eastern Andes and the foothills are covered with dense forests; the high plateaus provide excellent grazing. The climate is tropical in Central Llanos and in the coastal regions, becoming temperate between 1,800 and 6,000 feet, and cold in the higher sections.

The Trans-Andean highway extends from Caracas west to San Cristobal near the Colombian border, and to Cucuta, over the line, a distance of 790 miles through the richest parts of the country, crossing the Andes at an altitude of 14,100 ft. Buses make it in three days. A concrete road, remarkable equally for its engineering and its incomparable mountain scenery, 25 miles long, connects La Guaira, the seaport, with Caracas, a distance of about seven miles airline. The connecting railway is 23 miles long. In all, Venezuela has more than 6,000 miles of highways.

Resources and Industries. Agriculture and stock raising are the chief industries. It is estimated that 20% of the total population (or about 75% of those gainfully employed) is engaged in the former. Coffee is the major agricultural export, and is second only to petroleum in total export value. Other important exports are cacao, balata, tonka beans, hides and rubber. Imports are textiles, machinery and hardware, foodstuffs, chemicals and drugs. Venezuela is one of the foremost petroleum countries of the world. Other minerals are gold, copper, coal, salt, iron, tin, asbestos and mica. Diamonds are also mined.

History and Government. The Republic was formed after an amicable secession from the Colombian Federation (1830).

Venezuela has had many revisions of its Constitution since the first was adopted (1819). That now in force, replacing the 1936 version, was signed and promulgated (July 5, 1947). Venezuela's Independence Day. It provides for a President, elected for a four-year term by direct universal vote, who cannot succeed himself for at least two following terms; a Senate and Chamber of Deputies; and a Supreme Court. The Constitution recognizes and protects the right of private property, guarantees to the individual rights of education, employment and health, and also embraces a basic labor law that calls for a degree of profit-sharing, the right to organize and strike, paid vacations, pensions, dismissal indemnity. It guarantees a fair return to capital, although it prohibits monopolies while permitting the formation of employer associations.

Voting is by secret ballot and is open to all over 18, including illiterates.

Lt. Col. Carlos Delgado Chalbaud was named Provisional President by a military junta (Nov. 24, 1948) which replaced Romulo Gallegos, first president under Venezuela's new Constitution (elected Dec. 15, 1947).

Education and Religion. The language is Spanish and Roman Catholic is the religion of the majority of the people, but religious freedom is guaranteed. All education, including college, is free. Primary and secondary education are compulsory.

Defense. Military service is obligatory for all persons, 18 to 45. The Navy consists of several gunboats and minor craft.

Currency. The unit of currency is the bolivar.

Yugoslavia

(FEDERAL PEOPLE'S REPUBLIC OF YUGOSLAVIA)

Capital, Belgrade—Area, 95,558 square miles—Population (estimated 1948), 15,752,000.

Descriptive. The Republic of Yugoslavia, composed of six republics—Serbia, Croatia, Slovenia, Montenegro, Bosnio-Herzegovina and Macedonia—is bounded by Austria, Hungary and Rumania on the north, by Rumania and Bulgaria on the east, by Greece on the south, and Albania, the Adriatic Sea and Italy on the west.

Resources and Industries. Agriculture is the basic industry, for Yugoslavia is a country of small peasant holdings, and it is closely followed by cattle raising and forestry. These furnish occupation for 85% of the population. Nearly one-third of the area is covered with forests (19,068,637 acres), about 60% (35,963,159 acres) is devoted to agriculture, and of this, 80% is sown to cereals. The chief crops are wheat, barley, rye, oats, corn, hops a grapes. The principal minerals are coal, iron, co per, chrome-ore, lead, salt and bauxite. The cou try is the largest producer of copper in Europe.

History and Government. The scene of ma historical events, the area of present-day Yug slavia was part of the Empire of Alexander t Great (336-323 B.C.), and the Balkans divided t Roman Empire into its eastern and western part Serbia, which had since the Battle of Koso (1389), been a vassal principality of Turkey, w established as an independent kingdom by t Treaty of Berlin (July 13, 1878). After the Balk wars (1913) her boundaries were enlarged by t annexation of Old Serbia. The Government Austria-Hungary laid the assassination of t Archduke Franz Ferdinand (June 28, 1914) to Serbian plot and by invasion following her ult matum brought on the World War (1914-18).

At the dissolution of the Austro-Hungarian Em pire, the National Assemblies formed in differe provinces of the Empire: Croatia, Slovenia, Da matia, Bosnia, Herzegovina, Voyvodina and t former independent state of Montenegro as w voted the reunion in one common and independe state, together with Serbia. This union was pr claimed and became effective (Dec. 1, 1918) wi Peter I of Serbia as King of the new "Kingdo of the Serbs, Croats and Slovenes," later official named "The Kingdom of Yugoslavia." King Pet I was succeeded on his death (1921) by his son Ale ander I, who was assassinated (Oct. 9, 1934) Marseilles, France, by a terrorist. Crown Prin Peter (born Sept. 6, 1923) was proclaimed Kin (Oct. 11, 1934), his uncle, Prince Paul acting regent until he became of age.

Following popular opposition to the government action in signing the German-Italian-Japane Tri-Partite Pact in March, 1941, Germany invad the country (April 6, 1941) and Hungary follow four days later. King Peter escaped and establish a Government in London. The Yugoslav Arm capitulated within two weeks and a partition the country followed the occupation. A nation liberation movement headed by Marshal Tito t gether with elements of the Russian army dro out the invaders (1944-1945). By terms of t peace treaty with Italy, Feb. 10, 1947, the great part of the Italian province of Venezia Giuli Zara, Pelagosa and adjacent islands were ceded Yugoslavia.

King Peter II named a new regency coun (March 2, 1945) and on its organization Marsh Joseph Broz (Tito), Communist, was chosen Prin Minister. Elections for a Constitutional Assemb were held (Nov. 11), with the Government party easy victor.

Yugoslavia became a Federated Republic (Ja 31, 1946) under a new Constitution setting up government closely resembling the Russian patter The Constituent Assembly unanimously accept the new basic law and named Marshal Tito form the new government. The Constituent Asse bly had proclaimed Yugoslavia a republic (Nov. 1945). King Peter in London refused to recogn the provisional Tito Government (Aug., 1945).

The new Republic deprived King Peter II a other members of the Karageorgevitch dynasty their nationality and confiscated their prope (March 8, 1947).

Yugoslavia's Parliament, which elects the Pres ium for a four-year period is composed of t chambers, likewise elected for four years—the Fe eral Assembly (Representatives) and a Chamb Council of Nationalities (Senate). The Preside of the Presidium is head of the state. The Co stitution enfranchises women, separates Chu and state, and lays down a number of econor principles, including the breaking up of large tates into units not larger than 90 acres, a placing foreign trade under state control.

A five-year plan, embracing industrializati electrification and agricultural development w put into effect (1947).

Education and Religion. Elementary education nominally compulsory and free. There are univ sities in Belgrade, Zagreb, Lyublyana, Skoplye a Subotica. All religions are recognized and en equal rights. Serbia-Orthodox ranks first, follow by the Roman Catholic.

Defense. The Yugoslav Army is composed of v unteers, with about 10 per cent of them wom The Air Force is in process of reconstruction. T Navy was destroyed in the war.

Currency. The monetary unit is the dinar.

Britain Invaded Many Times

Napoleon and Hitler failed to invade Britain, but before them the British isles were invaded many times. Major invasions, which established governments, were: Roman's 55 B.C.; Scots and Picts, 360 A.D.; Angles and Saxons, 450 A.D.; Danes, 800 A.D.; Normans, 1066 A.D. After the Norm over 25 expeditions reached English or Irish sho including those of Robert of Normandy, 1103 A. Edward IV, 1471; Duke of Monmouth, 1685; V liam of Orange, 1688; James Stuart, 1708 and 17 the French in Wales, 1797.

International Bank for Reconstruction and Development

International Bank for Reconstruction and Development—Eugene R. Black, President; Robert L Garner, Vice President. Address, 1818 H St., N.W., Washington 25, D. C.

The International Bank for Reconstruction and Development (also known as the **World Bank**) was established under Articles of Agreement formulated by 44 nations at the United Nations Monetary and Financial Conference at Bretton Woods, New Hampshire (July 1-22, 1944). United States participation in the Bank was authorized by the Bretton Woods Agreements Act, approved July 31, 1945.

The Articles of Agreement of the Bank entered into force Dec. 27, 1945 and the Bank formally began operations on June 25, 1946 with an authorized capital of $10,000,000,000, of which $7,670,000,000 had been subscribed by 38 of the nations represented at the Bretton Woods Conference. Since that time ten other countries have become members of the Bank, bringing the total capital subscriptions to $8,348,500,000, of which 20 per cent has been paid in, 2 per cent in gold or dollars and 18 per cent in the currencies of the member countries. This paid-in portion of the capital subscription may be used by the Bank in certain cases for making loans. Other loans are financed out of funds borrowed in the capital markets of the world. The remaining 80 per cent of the Bank's subscribed capital is reserved to meet the Bank's obligations. The total amount outstanding of guarantees, participations in loans and direct loans made by the Bank may not be increased at any time to an amount in excess of the total unimpaired subscribed capital, reserves and surplus of the Bank.

The aims of the Bank, as stated in its Articles of Agreement, are:

To assist in the reconstruction and development of territories of members by facilitating the investment of capital for productive purposes, including the restoration of economies destroyed or disrupted by war, the reconversion of productive facilities to peacetime needs and the encouragement of the development of productive facilities and resources in less developed countries.

To promote private foreign investment by means of guarantees or participations in loans and other investments made by private investors; and when private capital is not available on reasonable terms, to supplement private investment by providing, on suitable conditions, finance for productive purposes out of its own capital, funds raised by it and its other resources.

To promote the long range balanced growth of international trade and the maintenance of equilibrium in balances of payments by encouraging international investment for the development of the productive resources of members, thereby assisting in raising productivity, the standard of living and conditions of labor in their territories.

To arrange the loans made or guaranteed by it in relation to international loans through other channels so that the more useful and urgent projects, large and small alike, will be dealt with first.

To conduct its operations with due regard to the effect of international investment on business conditions in the territories of members and in the immediate postwar years, to assist in bringing about a smooth transition from a wartime to a peacetime economy.

The Bank has a dual role—that of both a lender and a borrower.

Loans which the Bank has already made include four direct loans for reconstruction purposes, totaling $497,000,000 to the following European countries: $250,000,000 to France, $195,000,000 to The Netherlands, $40,000,000 to Denmark, and $12,000,000 to Luxembourg. These loan agreements provide for the purchase of specific commodities—mainly industrial and agricultural machinery, transportation equipment and basic raw materials—which the borrowing countries needed to step up production and to contribute to the reconstruction of Europe as a whole. To the European area the Bank has also loaned $12,000,000 to four Dutch shipping companies for the purchase of six merchant vessels, and $16,000,000 to Belgium for re equipment of its steel and power industries.

In the more recent loan operations of the Bank emphasis has shifted to "development" financing. Loans which the Bank has made for the purpose of developing the productive facilities and untapped resources of its less developed member nations include: $16,000,000 to instrumentalities of the Chilean government for the development of hydroelectric power and water resources and the importation into Chile of modern agricultural machinery; $34,100,000 to agencies of the Mexican government for electric power development in various parts of Mexico; and $75,000,000 to the Brazilian Traction, Light & Power Co. for the expansion of hydroelectric power facilities and of local and long distance telephone installations in Brazil.

In its role as borrower, the Bank increases its supply of loanable funds in two ways: 1) by borrowing funds directly through issuance and sale of its own bonds; 2) by selling from its loan portfolio securities issued to it by borrowers under its loans. To date the Bank has sold its own bonds in the amount of $250,000,000 on the United States market. One issue comprised $100,000,000 of Ten Year 2¼% Bonds; the other $150,000,000 of Twenty-Five Year 3% Bonds. Both issues were oversubscribed. As circumstances permit the Bank intends to supplement its borrowing in the United States by selling its bonds on the markets of other countries. Its first non-dollar bonds comprised an issue of 2½% Swiss Franc Serial Bonds maturing in 1953 and 1954, amounting to 17 million francs, equivalent to approximately $4,000,000. With regard to sales from its portfolio, the Bank to date has sold to institutional investors in the United States $12,000,000 of the notes received in connection with the Dutch shipping loans, and $16,000,000 of the bonds received in connection with the loan to Belgium.

Assistance which the Bank renders its member countries is not confined to actual lending operations. Upon request of its member governments, the Bank has already sent missions of investigation to approximately 25 member countries in Latin America, Europe, the Middle and Far East. This is in accord with the Bank's policy of cooperating within its own sphere to the fullest possible extent with President Truman's proposals for a technical assistance program, popularly known as the U. S. president's "Point IV" program.

The United States has subscribed to a greater portion of the Bank's capital stock than any other member country. Its subscription totals $3,175,000,000 of which it has paid in 20 per cent or $635,000,000. The United States subscription is 38.32 per cent of total capital subscriptions. The four next largest subscribers are the United Kingdom, China, France and India. The principal office of the Bank is located in Washington, D. C. The Bank also has a branch office in New York.

The Bank's members are:

Australia	El Salvador	Norway
Austria	Ethiopia	Panama

Area and Population of the World

Continent	Area sq. miles	Population	Continent	Area sq. miles	Population
Africa	12,563,807	175,869,488	Oceania (c)	3,645,294	23,796,858
Asia (a)	17,300,000	1,223,110,905	Antarctic Regions.	6,205,000	.....
Europe (a)	3,769,107	547,730,000			
North America (b)	9,028,716	192,656,859	Total (d)	59,407,786	2,264,563,771
South America	6,895,862	101,399,661			

(a) Includes U.S.S.R.: Asia, 6,513,098 square miles (population, 44,769,655); Europe, 1,960,346 (160,615,330); total, 8,473,444 (211,384,985). (b) Including Mexico and Caribbean. (c) Including Australia, New Zealand and certain Netherlands, British and French possessions, and U. S. Trusteeship.

(d) It is estimated that the superficial area of the earth is 196,950,000 square miles, of which 139,440,000 are water. In many cases exact populations are not known and the figures are more or less uncertain or even hypothetical.

The International Monetary Fund

IMF—International Fund—Camille Gutt, Managing Director and Chairman of Executive Directors. Address, Washington 6, D. C.

The International Monetary Fund was established in terms of Articles of Agreement adopted by 44 nations at the Bretton Woods Conference (July, 1944). The Articles of Agreement came into force (Dec. 27, 1945) and at the time of the first meeting of the Executive Directors (May 6, 1946) 38 countries had become members. Ten countries joined later.

The main purposes of the Fund, as set out in the Articles of Agreement, are: (1) to promote international monetary cooperation through a permanent institution which provides machinery for consultation and collaboration on international monetary problems, and, more specifically, (2) to promote exchange stability and avoid competitive exchange depreciation, (3) to assist in the establishment of a multilateral system of payments in respect of current transactions, which means the eventual elimination of restrictions in the making of payments and transfers for current international transactions and the avoidance of discriminatory currency arrangements or multiple currency practices, and (4) to permit members, under appropriate conditions, to draw upon the resources of the Fund with a view to shortening the duration and lessening the degree of any disequilibrium which may from time to time arise in their balances of payments.

The Fund obtains its resources from the payment by members of quotas, the size of which was for original members agreed at Bretton Woods. Each member pays in gold either 25 per cent of its quota or 10 per cent of its net official holdings of gold and U. S. dollars, whichever is the smaller, and the remainder in the member's own currency. The aggregate of members' quotas as of June 30, 1949, was equivalent to $8,046,500,000. The total subscriptions paid on that date amounted to the equivalent of $6,968,449,109, of which $1,427,237,529 was held by the Fund in gold.

Members are under an obligation, once the foreign exchange values of their currencies have been agreed with the Fund, to make no change in their exchange rates without consultation with the Fund. The Fund, however, is not entitled to object if the proposed change does not exceed 10 per cent of the original par value. Agreed par values were announced (Dec. 18, 1946) for 32 members, to which eight others have subsequently been added. From the commencement of operations on March 1, 1947, through June 30, 1949 exchange transactions of the Fund amounted to the equivalent of U. S. $725,483,380.

Of the fourteen Executive Directors of the Fund, five represent the members with the largest quotas, United States, United Kingdom, China, France and India. The voting power of the Executive Directors is approximately proportional to the quotas of the member or members whom they represent. The United States director is entitled to cast 30.13 percent of the total vote.

The Cominform (Fourth International)

At a secret meeting in Poland Sept. 21-28, 1947, representatives of the Communist parties of nine European nations reestablished the Communist International (Comintern) which had been officially dissolved in Moscow May 22, 1943. Formation of the Fourth International, officially called in "Information Bureau" was announced in Moscow Oct. 5, 1947 where a manifesto adopted at the secret conclave was made public. The new International became known as the Cominform.

The Communist parties of the following nations were represented at the meeting: U.S.S.R., Yugoslavia, Poland, Hungary, Bulgaria, Rumania, Czechoslovakia, France and Italy.

Headquarters of the Cominform originally was established in Belgrade, but was moved to Bucharest, Rumania, July 3, 1948, four days after Yugoslavia had split with Russia and been expelled from the Communist International.

The manifesto issued by the Cominform set forth that since the end of World War II two opposite lines had crystallized in world politics: "On the one extreme the U.S.S.R. and the democratic countries aim at whittling down imperialism and strengthening democracy. On the other side the United States of America and England aim at the strengthening of imperialism and the strangulation of democracy. * * * In this way there have arisen two camps—the camp of imperialism and anti-democratic forces, whose chief aim is the establishment of a world-wide American imperialists' hegemony and the crushing of democracy; and an anti-imperialistic democratic camp whose chief aim is the elimination of imperialism, the strengthening of democracy and the liquidation of the remnants of fascism.

"Because of the above, the imperialistic camp and its directing force, the United States, show a growing aggressive activity. This activity manifests itself at the same time in all spheres—in the spheres of military and strategic activities, economic expansion and ideological warfare. The Truman-Marshall plan is only a farce, a European branch of the general world plan of political expansion being realized by the United States in all parts of the world."

United States Foreign Grants and Credits

July 1, 1940 to June 30, 1945; July 1, 1945 to March 31, 1949 (In Dollars)

					1567 James VI.

he first royal Stuart was Robert II (1316-1390). was called the "Steward," and was a son of lter, the Steward of Scotland by the latter's e, Marjorie, daughter of King Robert the Bruce. ames VI of Scotland succeeded to the throne of land as James I and was crowned in 1603.

Margaret (1286), the "Maiden of Norway," granddaughter of Alexander, was recognized by the States of Scotland although a female, an infant, and a foreigner. She died on her passage to Scotland. In the competition for the vacant throne, Edward I of England decided in favor of John Baliol.

Rulers of France

fter Hannibal crossed the Alps in 218 B.C., the nans held possession of Gaul until 428 A.D., en the Franks (Merovingian branch), a Gerlic people, expelled them as a governing class, began the gradual establishment of the Kingl of France, which then included Belgium and Rhine Valley to the sea, as well as much of rmany.

he first great Merovingian king was Clovis lodwig, Ludwig, Louis) son of Childeric, who an to reign in 481 A.D. The Dynasty lasted il Childeric III, 742, when Charles Martel, conror of the invading Saracens, took hold. Meane the Merovingians had split into east and west sses, called Austrasians and Neustrians. The yors of the palace were often the real rulers.

he first powerful mayor of the palace was Pepin Herstal (687-714), now a suburb of Liege, and the next after him was his natural son, Charles Martel (martel means hammer), father of King Pepin the Short and grandfather of Charlemagne (Charles the Great) who, in 800, at Rome, was crowned Emperor by Pope Leo III.

The original Pepin in history came from Landen, in what is now Belgium, about 25 miles north northwest of Liege, but his origin is obscure. The Pepins were warriors.

Charlemagne and his brother Carloman, who were born at or near Landen, were to rule jointly over France, Germany, Spain and Italy; Carloman lived only three years thereafter. Charlemagne died in 814, at Aix la Chapelle, which the Germans call Aachen. His grandsons fought among themselves with armies backing them, but made peace at Verdun in 843 and the empire was divided.

France fell to Charles the Bald, son of King Louis, and thereafter was a separate kingdom.

D.	Name	A.D.	Name
	The Carlovingians		**House of Bourbon**
0	Charles (the Bald), Emperor of the Romans.	1589	Henry IV. of Navarre, son-in-law of Henry II: murdered.

9	Francis II., son, married Mary Stuart.		
0	Charles IX., brother, son of Catherine de Medici.		
4	Henry III., brother, King of Poland, stabbed to death.		

Rulers of Germany

Carlovingian Dynasty

First ruler to create administrative divisions in Germany after the Romans was Frankish king, Charles the Great, or Charlemagne. Crowned emperor by Pope, 800 A.D. Succeeded by Louis I (Ludwig) and by Louis the German, 843-876.

Charles "The Fat," 876-887; reunited the Empire of Charlemagne, was crowned Emperor by the Pope and deposed after a treaty with the Normans.

Arnulf, Duke of Karthia, 887-900; nephew of Charles the Fat; final separation of the Empire.

Ludwig "The Child," 900-911; last of the descendants of Charlemagne.

Konrad I, Duke of Frankonia, 911-919; first elected sovereign.

Saxon Dynasty—Henry I "The Fowler," Duke of Saxony, 919-936.

Otto I "The Great," 936-973; son of Henry the Fowler, crowned in 962 by the Pope John XII as Emperor of the Holy Roman Empire.

Otto II, 973-983; son of Otto I; attempted the conquest of Lower Italy from the Greeks and Arabs and lost the battle of Cotrone; was buried in Rome.

Otto III, 982-1002; son of Otto II; was 3 years old when his father died; regency of his mother Teophano and his grandmother Adelheid; at the age of 16 was crowned Emperor by the Pope.

Henry II, Duke of Bavaria, 1002-1024; son of Henry the Quarreler, duke of Bavaria, and great-grandson of Henry the Fowler.

House of Franconia (The Salic House)

Konrad II, 1024-1039, great grandson of Konrad I, and son-in-law of Otto the Great.

Henry III, 1039-1056; son of Konrad II; occupied himself with church affairs; at the Synod in Sutry deposed three popes and had a German bishop elected; annexed Bohemia to the Empire and was temporarily recognized as ruler of Hungary.

Henry IV, 1056-1106; son of Henry III; regency of his mother, Agnes of Poitou; contest with the Pope Gregory VII.

Henry V, 1106-1125; son of Henry IV; continuation of the conflict with the church; agreement of Worms 1122; end of the Salic House.

Lothar, Duke of Saxony, 1125-1137; crowned in Rome 1134; beginning of the contest between the Suabian House of Staufen and the Bavarian House of Welf; 1134 Albrecht the Bear was made count of the Northern Mark, from which developed Prussia.

Hohenstaufen Dynasty

476	End of Empire in West; Odovacar, King of Italy

Rulers of the Roman Empire in the East sat in Constantinople, and for a brief period in Nicaea, until ne capture of Constantinople by the Turks in 1453, when it was succeeded by the Ottoman Empire.

Rulers of Modern Italy

After Napoleon fell in 1814 and Murat, King of aples, was shot in 1815, the Congress of Vienna estored pre-Napoleonic political states as follows: ardinia and Genoa under King Victor Emmanuel of Savoy; Parma and Piacenza under Duchess Marie Louise, former French queen; Modena under rchduke Francis IV of Hapsburg; Tuscany, under uke Ferdinand III of Hapsburg; Lucca under uchess Maria Louisa of Bourbon; Naples and icily under King Ferdinand I of Bourbon; the apal State under Pius VII; Lombardia-Venetia nder Austria; Corsica under France. This re-ction led to half a century of bloody conflict, evolts, suppressions by Austrian and French oops. Most spectacular were two campaigns led y Guiseppe Garibaldi, first in 1849, when he pene-rated to Rome, and again in 1860, when he lib-rated Sicily and marched into Naples with Victor mmanuel II. The latter was proclaimed king of Italy at Turin, 1861. Rome was captured by Gen. Cadorna Sept. 20, 1870 and made the capital. Succession; (1878) Humbert I; (1900) Victor Emmanuel III who, in 1937, was proclaimed Emperor of Ethiopia. The Allies in 1943 restored Haile Selassie on the throne of Ethiopia. In 1946 Victor Emmanuel III abdicated, succeeded by his son Crown Prince Humbert (Humbert II). Victor Emmanuel III died (1947).

The Italian Supreme Court announced June 18, 1946, on the results of the June 2, plebiscite for a monarchy or a republic, confirming that the electorate had chosen a republic. Premier Alcide de Gasperi assumed the powers of provisional Chief of State on June 13, 1946, the same day King Humbert II went to Portugal as an exile. On June 28, 1946, the Constituent Assembly elected Enrico de Nicola, Liberal, as Provisional President of the Italian Republic. Luigi Einaudi was elected President (May 11, 1948).

Turkish Rulers (Sultans)

(1389) Bajazet I.
(1403) Interregnum.
(1413) Mohammed I.
(1421) Murad II.
(1451) Mohammed II.
(1481) Bajazet II, son.
(1512) Selim I, son.

Poets-Laureate of England

There is no authentic record of the origin of the office of Poet-Laureate of England. According to Warton, there was a Versificator Regis, or King's Poet, in the reign of Henry III (1216-1272), and he was paid 100 shillings a year. Geoffrey Chaucer (1328-1400) assumed the title of Poet-Laureate, and in 1389 got a royal grant of a yearly allowance of wine. In the reign of Edward IV (1461-1483), John Kay held the post. Under Henry VII (1485-1509), Andrew Bernard was the Poet-Laureate, and was succeeded under Henry VII (1509-1547) by John Skelton. Next came Edmund Spenser, who died in 1599; then Samuel Daniel, who died in 1619, and then Ben Jonson (app't'd 1619). Sir William D'Avenant was appointed in 1638. John Dryden was appointed in 1670 but was deposed the Revolution. The others, with the date of pointment, when known, have been: Tho Shadwell, 1689; Nahum Tate, 1692; Nicholas R 1715; the Rev. Laurence Eusden, 1718; C Cibber, 1730; William Whitehead, 1758, on refusal of Gray; Rev. Thomas Warton, 1785, on refusal of Mason; Henry J. Pye, 1790; Rob Southey, 1813, on the refusal of Sir Walter Sc William Wordsworth, 1843; Alfred Tennyson, 1 Alfred Austin, 1896; Robert Bridges, 1913 (April 21, 1930); John Masefield, 1930.

D'Avenant was the godson (and considered some the natural son) of William Shakespe He was 10 years old when Shakespeare died.

Académie Francaise

The **French Academy** was founded in 1630 and incorporated in 1637. It was abolished by the Revo tion but was revived in 1795 as one of the sections of the Institute of France. The Academy, when consists of 40 regular members. There are in addition ten members-at-large (from whom the regu members are selected to fill vacancies), eight foreign members and 70 corresponding members.

Grand Army of the Republic—Last Encampment

Last encampment of the Grand Army of the Republic, founded 1866 by veterans of the Union Army and Navy of the Civil War, was held Aug. 31, 1949, in Indianapolis, Ind., where first encampment met Nov. 2, 1866. Six veterans out of 16 surviving members attended: Theodore Penland, Portland, Ore., 100 years old, commander-in-chief; Albert Woolson, Duluth, Minn., 102, chief of staff; Robert Barrett, Princeton, Ky., 102; Charles L. Chappel, Long Beach, Calif., 102; Joseph Clovese, Pontiac, Mich., 106; James A. Hard, Rochester, N. Y., 108. The final meeting was conducted by Miss Cora E. Gillis, secretary. The frailty of the veterans made necessary the use of wheel chairs: "Only two of the six delegates left the meeting on their own feet," reported Meyer Berger, New York Times. A greeting was dispatched to the last reunion of the United Confederate Veterans, meeting in Little Rock, Ark., in September.

The last parade, with the veterans in motor cars, took place at 7 p.m. and was reviewed by Gov. Henry Schricker of Indiana and witnessed by a huge crowd. The famous old tunes were heard again —"Tramp, Tramp, Tramp the Boys Are Marching," "Tenting Tonight," "The Battle Hymn of the Republic." Taking part in the parade were Sons of Union Veterans and other organizati

The G. A. R. was organized 1866 by Dr. B Stephenson and the Rev. W. J. Rudolph, surg and chaplain respectively of the 14th Illinois fantry. First post organized at Decatur, Ill., A 6, 1866. Largest membership, 427,980, in 1890 1900 the G. A. R. had 287,981; in 1910, 213,901 1920, 102,438. By 1930, 65 years after the clos the Civil War, membership Had dropped to 21 and deaths were reaching 16,000 a year. In only 4,393 survived.

The G. A. R., in its best days, was a powe force in the Republican party and an encampm invariably found many members in office as p masters, sheriffs, etc. Its efforts kept pens high. It supported Memorial Day, made an an event in 1869. Men wearing its army blue civ uniform and wide-brimmed black slouch hat familiar figures on American streets at the of the century. The Woman's Relief Corps was principal female auxiliary of the G. A. R. United Confederate Veterans, organized never attained the membership of the G. A At its best it was under 50,000.

Senator Margaret Chase Smith appeared as a guest on a radio program "Who Said Th reports the New York Herald Tribune and was asked by the chairman, Rob Trout: "I know don't want to be President, Mrs. Smith, but suppose you woke up and found yourself in the W House. What would you do?"

Senator Smith replied: "I'd go straight to Mrs. Truman and apologize and then I'd go home."

POSTMAN'S DILEMMA: MAN WITH LONGEST NAME IN THE WORLD

he man with the longest name in the world, East Indian delegate to the Commonwealth Relations ference at Toronto, Canada, arrived in New York Sept. 1, 1949, by air from London and obligingly ted his name and title on a blackboard for reporters. It is:

Diwan Bahadur Sir Tiruvalyangudi Vijayaraghavacharya

e is the former diwan of Cochin and of Udaipur and vice president of the Imperial Council of cultural Research. He explained that his first name is that of the village where he was born and ns village of the prosperous rice fields. His last name means a war cry and a synonym for Rama. harya was a 14th century Hindu leader from whom he is descended. "In London I was called '754', the number of my room in the Savoy hotel," he explained. "My friends call me diwan, rime minister. My children call me Pop. Ladies simply call me Dear One."

Dives 4,500 Feet for Record

Man's farthest penetration of the ocean depths was accomplished by Otis Barton, Boston explorer, Aug. 16, 1949, when he descended 4,500 feet into the Pacific off Santa Cruz Island, Calif., in a 7,000-lb. "benthoscope."

This was 1,472 feet farther than the record of 3,028 feet, set by Dr. William Beebe and Mr. Barton in Bermuda in 1934, described in Dr. Beebe's book "Half Mile Down." The diving bell was suspended from an accompanying barge on the surface.

The "benthoscope" in which Mr. Barton made his descent from the mother ship, the yacht Velero IV, is similar to the bathysphere employed by the Beebe-Barton expedition in 1934. It is a steel ball with an outside diameter of 57½ inches, 3½ more than the bathysphere; walls 1¾ inches thick or one-half inch thicker than the 1934 mo and is 2,600 pounds heavier. The benthoscope hold two persons; entrance is through a 15- door, sealed with a synthetic rubber gasket. It two windows of fused quartz, one pointed stra ahead, and the other pointed forward and do ward at an angle of 45 degrees, through whic motion picture camera may be aimed.

Two-way telephone contact with the surface maintained with Dr. Maurice Nelles of the gineering staff of the University of Southern C fornia's Allan Hancock Foundation which coll rated in the dive experiment.

The benthoscope is named from the Greek wo "benthos" (sea bottom) and "skopein" (vert view) and was cast of special steel in 1948 by Watson-Stillman Company, Roselle, N. J.

Personalities of Stage, Screen, Radio, Television

Actors, Actresses, Composers, Dramatists, Musicians, Producers, Radio Performers, Singers

diti, Luigi (1822-1903)
ne, Dr. Thos. A. (1710-1778)
nold, Dr. Sam'l (1740-1802)
twood, Thomas (1765-1838)
ber, Dan'l F. E. (1782-1871)
dran, Edmond (1842-1901)
ch, Johann S. (1685-1750)
lfe, Michael W. (1808-1870)
rbieri, Carlo E. (1822-1867)
rker, James N. (1784-1858)
yer, Josef (1852-1913)
zin, Francois E. J. (1816-1878)
er, Max J. (1851-1908)
ethoven, Ludwig (1770-1827)
lini, Vincenzo (1801-1835)
nedict, Sir Julius (1804-1885)
noist, Francois (1794-1878)
noit, Pierre L. L. (1834-1901)
rlioz, Hector (1803-1869)
gnani, Enrico (1836-1894)
nder, Karl (1816-1860)
shop, Sir Henry R. (1786-1855)
zet, Georges (1838-1875)
ccherini, Luigi (1743-1805)
ieldieu, Francois A. (1775-1834)
ito, Arrigo (1842-1918)
nd, Carrie Jacobs (1862-1946)
rdese, Luigi (1815-1866)
rodin, Alexander P. (1834-1887)
ttesini, Giovanni (1821-1889)
ulanger, Ernest H. (1815-1850)
aga, Gaetano (1829-1907)
ahms, Johann (1833-1897)
eval, Jean B. (1756-1825)
istow, George F. (1825-1898)
ck, Dudley (1839-1909)
ow, Hans G. von (1830-1894)
rgmuller, Friedrich (1806-1874)
soni, Ferruccio B. (1866-1924)
dman, Charles Wakefield (1881-1946)
talini, Alfredo (1854-1893)
llier, Alfred (1844-1891)
adwick, George Whitefield (1854-1931)
erubini, Maria L. (1760-1842)
opin, Frederic F. (1810-1849)
ementi, Muzio (1752-1832)
hen, Jules (1830-1901)
leridge-Taylor, S. (1875-1912)
nradi, August (1821-1873)
rnelius, Peter (1824-1874)
rtesi, Francesco (1826-1904)
sta, Sir Michael A. (1808-1884)
uperin, Francois (1868-1933)
i, Cesar A. (1835-1918)
rgomyschski, Alex. (1813-1869)
vid, Felicien C. (1810-1876)
bussy, Claude A. (1862-1918)
Koven, Reginald (1861-1920)
lahye, Leon J., Jr. (1844-1896)
libes, Leo (1836-1891)
linger, Rudolf (1857-1910)
az, Eugenio (1837-1901)
bdin, Charles (1745-1814)
etrich, Albert H. (1829-1908)
nizetti, Gaetano (1797-1848)
ppler, Adolf (1850-1906)
rn, Heinrich, L. E. (1804-1892)
bois, Francois C. T. (1837-1924)
fresne, Alfred (1822-1863)
kas, Paul (1865-1935)
ppez, Gilbert L. (1806-1896)
orak, Antonin (1841-1904)
wards, Julian (1855-1910)
langer, Camille (1863-1919)
ure, Gabriel V. (1845-1924)
vart, Charles S. (1710-1792)
otow, Friedrich von (1812-1883)
erster, Alban (1849-1916)
rster, Joseph (1845-1917)
anck, Cesar A. (1822-1890)
brielli, Nicolo (1814-1891)
ade, Axel W. (1860-1921)
lli, Amintore (1845-1919)
ndini, Alessandro (1807-1871)
utier, Jean F. E. (1822-1878)
y, John (1685-1732)
eisler, Paul (1856-1919)
nee, Franz F. R. (1823-1895)
rshwin, George (1898-1937)
rvais, Charles H. (1671-1744)

WORLD FACTS

Geologic Eras

Source: United States Geological Survey

The rocks composing the earth's crust are grouped by geologists into three great classes—igneous, sedimentary, and metamorphic.

The igneous rocks have been solidified from a molten condition. Those which have become solid after ejection upon the earth's surface, either on land or below water, are known as extrusive rocks; those which have hardened from molten material injected into strata below the earth's surface are known as intrusive rocks. Included in the extrusive rocks are the volcanic rocks: lavas, bombs, pumice, tuff, volcanic ash and other fragmental materials thrown out from volcanoes.

Sedimentary rocks are formed by the deposition of sediment in water (aqueous), or by wind (eolian). The sediment may consist (1) of rock fragments or particles of various sizes which form sandstone, shale, and conglomerate; (2) of t remains or products of animals and plants whi form certain limestones and coals; (3) of t products of chemical action or evaporation th form salt, gypsum, etc.; or (4) of a mixture these materials. A characteristic feature of se mentary deposits is a layered structure known bedding or stratification. It is from the order succession of the sedimentary rocks and that their contained fossils that the fundamental da of historical geology have been deduced.

Metamorphic rocks are derived from igneous sedimentary rocks which have undergone su alteration through heat or pressure, or both co bined, that their original character is lost. Met morphic rocks include gneiss, schist, slate, quart ite and marble.

Era and Length	Period and Length	Epoch.	Characteristic Life.
Cenozoic. (Recent Life.) 55,000,000 yrs.	Quaternary. 2,000,000 yrs.	Recent. Pleistocene, or Glacial.	"Age of man." Animals and plants modern types.
	Tertiary. 53,000,000 yrs.	Pliocene. Miocene. Oligocene. Eocene. Paleocene	"Age of mammals." Possible first appe ance of man. Rise and development highest orders of plants.
Mesozoic. (Intermediate Life.) 106,000,000 yrs.	Cretaceous. 55,000,000 yrs.	Upper. Lower.	"Age of reptiles." Rise and culmination huge land reptiles (dinosaurs). First pearance of birds and mammals; see bearing flowering plants, including pal and hardwood trees.
	Jurassic. 28,000,000 yrs.	Upper. Middle. Lower.	
	Triassic. 23,000,000 yrs.	Upper. Middle. Lower.	
Paleozoic. (Old Life.) 314,000,000 yrs.	Permian 33,000,000 yrs.		"Age of amphibians." Dominance of t ferns and huge mosses. Earliest cone-be ing trees. Beginnings of backboned la animals. Insects.
	Carboniferous 74,000,000 yrs.	Pennsylvanian. Mississippian.	
	Devonian. 37,000,000 yrs.	Upper. Middle. Lower.	"Age of fishes." Shellfish (mollusks) a abundant. Rise of amphibians and la plants.
	Silurian. 22,000,000 yrs.		Shell-forming sea animals dominant. Rise fishes and of reef-building corals.
	Ordovician 79,000,000 yrs.	Upper. Middle. Lower.	Shell-forming sea animals. Culmination the buglike marine crustaceans known trilobites.
	Cambrian. 69,000,000 yrs.	Upper. Middle. Lower.	Trilobites, brachiopods and other sea she Seaweeds (algae) abundant. No trace land animals.
Proterozoic. (Primordial Life.) 1,335,000,000 yrs.	Pre-Cambrian.		First life that has left distinct record. Cr taceans, and algae.

Seven Wonders of the Ancient World

Pyramids of Egypt

Built from 3000 B.C. to 1800 B.C., the pyramids were the monumental tombs of Egyptian pharaohs. The oldest is at Sakkara. The largest are at Gizeh, near Cairo. The great pyramid of Cheops covers nearly 13 acres and originally was 481 feet high and 756 feet square at the base; its size has been reduced because the facing stone has been removed, making its present height 450 feet. The Sphinx is located near the pyramids and lately has been cleared of sand; it is 70 feet high, 150 feet long, and has a face 14 feet wide.

Hanging Gardens of Babylon

Nebuchadnezzar, who destroyed Solomon's Temple, was said to have built gardens on terraces at Babylon for his queen, about 600 B.C. According to the legend there were five terraces, each 50 feet above the other, embellished with trees and flowers. On the flat plain of the Euphrates such works created stupendous admiration among the ancients. No trace of them remains.

Phidias' Statue of Zeus

The statue of Zeus at Olympia, province of Elias, built of marble and decorated with ivory and beaten gold, was made by Phidias after 432 B.C. Destroyed in the wars.

Temple at Ephesus

The temple of Artemis (Diana) at Ephesus, south of Smyrna, was built about 5 B.C. by the Ionian cities and became a famous shrine. It was 425 by 225 feet, had 127 columns of Parian marble each 60 feet high. It was set on fire by Erosthosthenes in 365 B.C. to gain personal notoriety. Praxite built its new altar. It was here that Paul Apostle challenged pagan worship and enra the crowd. The temple was despoiled by Nero destroyed by Alaric the Goth.

Tomb of Mausolus

When Mausolus, King of Caris, Asia Minor, di his widow built a great marble tomb at Halicarn sus, about 325 B.C. The word mausoleum deri from this. The tomb was broken by an earthqua In the 19th century surviving fragments w transferred to the British Museum.

Colossus of Rhodes

The colossus is supposed to have been a bro statue of Apollo, 100 feet high, erected on island of Rhodes near Asia Minor. In 1949 island was the site of conferences between Isr and Egyptian representatives. Erected about B.C., the colossus was thrown down by an ear quake 224 B.C. After lying on the ground m years it was cut up for junk. The legend tha stood astride the channel leading into the por Rhodes is without foundation.

Pharos at Alexandria

A lighthouse built on the island of Pharos out the port of Alexandria became famous under name. Ptolemy Philadelphus built it about 200 and inscribed it: "King Ptolemy to the gods, saviors, for the benefit of sailors." A fire was burning on top. It was partly destroyed 400 A finally levelled by an earthquake 1375 A.D.

Highest and Lowest Continental Altitudes

Source: National Geographic Society

Continents	Highest Point	Elevation (Feet)	Lowest Point	Below Sea Level (Feet)
sia	Mount Everest, Nepal-Tibet	29,002	Dead Sea, Palestine	1,286

The highest point in the West Indies is in the Dominican Republic, Mount Tina (10,301 ft.).

AREA, BOUNDARIES AND DEPENDENCIES OF THE UNITED STATES

Area

Continental United States, 3,022,387 square miles; (land area, 2,977,128 square miles); total, including Territories and Possessions (597,236 square miles), 3,619,623 square miles.

Boundaries and Dependencies

The United States is bounded on the north by Canada, on the east by the Atlantic Ocean and the Gulf of Mexico, on the south by the Gulf of Mexico and Mexico, and on the West by the Pacific Ocean. It comprises 48 States and the Federal District of Columbia. This is called for convenience in ref ence Continental United States. Its non-conti ous areas are the Territories of Alaska and Haw Puerto Rico, the Virgin Islands of the Uni States, American Samoa, Guam, Wake and sc tered islands in the Pacific; and the Panama Ca Zone. The United States also is trustee, by m date of the United Nations, of 625 islands in west Pacific. The islands, formerly held by Ja under League of Nations mandates, include Admiralty, Bonin, Caroline, Gilbert, Marian Marshall, Paulau and Volcano chains.

Australia, sometimes classed as an island, is one of the seven continents. Its area (mainland only) is 2,948,366 square miles.

When island name is indented one space it is part of a group or sub-group named immediately above. Small figure to the left of island name shows rank among the world's ten largest islands. Some islands have not been surveyed accurately; in such cases estimated areas are shown.

Islands in minor waters: Manhattan (22.24 square miles), Staten (57 square miles), and Governors (173 acres), (U. S.), New York harbor; Isle Royale (U. S.), (209.9 square miles), Lake Superior; Penang (110 square miles), (Gt. Br.), Strait of Malacca; Singapore (225 square miles), (Gt. Br.), Singapore Strait.

Atolls: Bikini (United States Trust Territory of Pacific Islands), lagoon area 280 square miles, land area 2.87 square miles; Canton (U. S., Great Britain), lagoon area 20 square miles, land area 4.3 square miles; Christmas (U. S., Great Britain), lagoon area 89 square miles, land area 184 square miles; Funafuti (U. S., Great Britain), lagoon area 84 square miles, land area 1.7 square miles.

The Río de la Plata is the estuary formed by the Paraná and Uruguay Rivers.

The source of the St. Lawrence River is in the State of Minnesota. The St. Lawrence is viewed as a part of the Great Lakes Waterway and its source is considered the head of the St. Louis River which feeds into Lake Superior. The St. Louis River rises in Minnesota.

Area (sq. miles) of great river basins—Amazon (2,722,000); Congo (1,339,923); Nile (1,119,652); Mississippi (1,245,000); La Plata (1,198,000); Yangtze (689,000); St. Lawrence (565,200); Volga (531,000); Danube (320,300); Colorado (246,000); Rio Grande (171,890).

NOTES—There are tens of thousands of waterfalls scattered over the earth, hundreds of them of considerable magnitude. In a brief list it is possible to include only those generally well known because of accessibility or some outstanding feature. Although falls can be classified most conveniently according to height, that factor alone does not indicate the true importance of a cataract. Other significant facts about falls are volume of flow, steadiness or variableness of flow through the year, width of crest, whether the water drops sheerly or over a sloping surface, and whether in a single leap or in a succession of leaps. When relatively low falls occur in succession over a considerable length of streambed, they are classed as cascades.

On the basis of mean annual flow combined with considerable height, Guaira is the world's greatest waterfall. Its estimated mean annual flow is 470,000 cusecs (cubic feet per second). A greater volume of water passes over Stanley Falls in the Congo River, but no one of its seven cataracts, spread out over a distance of nearly 60 miles, is higher than 10 feet.

The estimated mean annual flows of other great waterfalls are: Khon, 400,000 to 420,000 cusecs; Niagara, 212,200; Paulo Affonso, 100,000; Urubupunga, 97,000; Iguassú, 61,660; Patos-Maribondo, 53,000; Victoria, 38,430; Grand (Labrador), 30,000 to 40,000; and Kaieteur 23,400.

Because four of the Great Lakes serve as its reservoir, Niagara has the steadiest flow of all great waterfalls, varying only slightly from its mean (and then mostly because of the direction of the wind on Lake Erie). Cauvery, in India, is one of the most variable. It is known to have fluctuated from a mere trickle in the dry period to 667,470 cusecs during the monsoon season.

In the table above height means total drop whether in one or more leaps. †Falls consisting of more than one leap; *falls that diminish greatly seasonally; **falls that are reduced to a trickle or remain dry for a part of each year. When names of rivers are not shown, in most cases they are the same as those of the falls.

Buzzards Bay	Cape Cod Canal	500	[illegible]
Burlington, N. J.	Delaware River	500	[illegible]
Harry S. Truman	Missouri River	423	[illegible]
Martinez, Calif.	Suisun Bay	**	[illegible]
Jacksonville, Fla.	St. John's River	386	[illegible]

†American span 800 ft.; Canadian, 750 ft. (See below.) ††Rebuilt in 1898.
†††The figure 3,524 is the length of 8 river spans; main channel span is 790 feet.
*"Longest hingeless arch span in the world"—Engineering News-Record, January 15, 1942.
**The vertical lift span has a horizontal clearance of 291.5 feet; seven other spans have horizo clearances ranging from 482 to 512.2 feet.
***Two suspension spans each 2,310 ft. long; three of 1,160 feet; and a cantilever span 1,400 ft. l

The Henry Hudson Arch Bridge, New York City, has the longest plate girder, fixed steel arch in the world. The main central span is flanked by 300-ft. continuous steel girder viaducts of 60-ft. spans. The total length of steel is 1,555 feet and the total length of entire structure is 2,000 feet.

The $18,000,000 Bronx-Whitestone bridge is a link in the Belt Parkway system of New York City and is 4,000 feet long from anchorage to anchorage with a main span of 2,300 feet; entire length, including approaches, 7,140 feet.

The $35,000,000 Golden Gate Bridge crosses the portal of the harbor of San Francisco. Its towers are 746 feet tall. The center span clears water by 220 feet. It is 4,200 feet in length and is the longest single span in the world.

The $60,000,000 Triborough Bridge in New York City consists of a suspension bridge of 1,380 ft. channel span and 705 ft. side spans over the East River at Hell Gate; a vertical lift bridge over the Harlem River with lift span of 310 ft.; fixed truss spans over the Bronx Kills with channel span of 350 ft.; plate girder viaduct structure in Que on Wards and Randalls Island, over Little Gate and in Manhattan.

The Thousand Islands, International Bridge tends from Collins Landing (near Alexandria in New York State to Ivy Lea (near Gananoque Ontario. This crossing, 8½ miles long, utilize islands to reduce the span lengths requ The Canadian crossing includes a contin truss of two 300-ft. spans (from Hill Islan Constance Island), a steel arch of 348-ft. (from Constance Island to Georgina Island), a suspension bridge of 750-ft. span and 12 underclearance from Georgina Island to the On mainland.

James River Highway bridge, near Nev News, Va., length including approaches six n without approaches four-and-one-half miles.

The bridge at Cleveland, Ky., is the highest tinuous steel-deck bridge in the United St 1,736 feet from hill to hill and 250 feet a river level.

Record of Polar Explorations

Amundsen-Ellsworth-Nobile Expedition (by dirigible, May 12)	1926	90°	Spitsbergen to Alaska	Norway-U. S.-Italy
Sir Hubert Wilkins (by airplane, April 15).	1928	84°	Point Barrow to Spitsbergen	United States
Gen. Umberto Nobile (by dirigible, May 23)	1928	90°	Spitsbergen to North Pole	Italy
Lavel Golovin (by airplane, May 5)	1937	90°	N. Pole: fog prev. land. ice floe.	U.S.S.R.
Prof. Otto J. Schmidt and 32 (by airplane, May 21)	1937	90°	North Pole, by flight from Rudolf Island	U.S.S.R.
Sir Hubert Wilkins (by airplane)	1937–8	88°	North of the coast from Point Barrow to the mouth of the Mackenzie River	Great Britain

ANTARCTIC EXPLORATION

Commander	Date	Latitude	Longitude	Nationality
Capt. James Cook (Jan. 30)	1774	71° 10′ S.	106° 54′ W.	Great Britain.
Capt. Nathaniel Brown Palmer (Nov. 18)	1820	63° 45′ S.	60° W.	United States
James Weddell (Feb. 20)	1823	74° 15′ S.	34° 17′ W.	Great Britain.
Charles Wilkes Expedition	1839	70° S.	105° W.	United States.
Sir James Clark Ross (Feb. 22)	1842	78° 10′ S.	161° 27′ W.	Great Britain.
Carstens E. Borchgrevink (Feb.)	1900	78° 50′ S.	165° 50′ W.	Great Britain.
Capt. Robert F. Scott (Dec. 30)	1902	82° 17′ S.	163° E.	Great Britain
Sir Ernest Shackleton (Jan. 9)	1909	88° 23′ S.	162° E.	Great Britain.
Roald Amundsen (Dec. 14)	1911	90°		Norway.
Capt. Robert F. Scott (Jan. 18)	1912	90°		Great Britain.
Adm. Richard E. Byrd, by airplane (Nov. 29)	1929	90°		United States.
Lincoln Ellsworth, by airplane (Nov. 23-Dec. 15)	1935	76-79° 58 S.	80-120°. W.	United States.
Adm. Richard E. Byrd, by airplane (Feb. 16)	1947	90°		United States.

The Globe's surface at the North Pole is at sea level, water, ice-covered much of the time; the South Pole is on ice-covered land, elevation 9,500 feet.

The land which Palmer saw in 1820 is now recognized to have been the Antarctic Continent.

In January and February, 1840, Charles Wilkes, commander of America's first naval exploring expedition, sighted the Antarctic Continent and then followed its coastline for a distance of about 1,500 miles. Though not the earliest to glimpse land in the South Polar region, he was the first definitely to announce the existence of an Antarctic Continent.

Roald Amundsen was the first to discover the South Pole (Dec. 14, 1911); he reached the North Pole May 12, 1926, 17 years after Admiral Robert E. Peary.

Richard Evelyn Byrd flew over the South Pole Nov. 29, 1929. Made first expedition to Antarctic 1928-30; second expedition, 1933-May 10, 1935.

RECENT EXPEDITIONS

On May 21, 1937, Prof. Otto J. Schmidt and four fellow Russians landed by plane on an ice floe within a few miles of the North Pole. Four scientists were left on the floe. Polar ocean depth was found to be 14,070 feet. While drifting for nine months and for more than 1,500 miles, the scientists made daily radio reports of meteorological and magnetic data.

U.S.S.R. ice-breaker Sedoff, Capt. K. S. Badigan, trapped in polar ice Oct. 23, 1937, drifted by Aug. 29, 1939, to 86° 39′ N. Lat. and 47° 55′ E. Long., farthest north reached by ship—250 miles from the North Pole. Scientific observations were made until the Sedoff was extricated Jan. 13, 1940.

Taking off from Princess Elizabeth Land, Jan. 11, 1939, Lincoln Ellsworth flew over 77,000 square miles of Antarctic territory, "American Highland," and claimed it for the United States.

ANTARCTICA—RECENT EXPEDITIONS

1946-47—Rear Admiral Richard E. Byrd, with a contingent of 4,000 officers and men, conducted his fourth expedition to the Antarctic, 1946-47, this time under the auspices of the U. S. Navy. A task force of 13 ships including two icebreakers, a carrier with landplanes, and seaplane tenders was engaged in the operation. The principal base was established at Little America. The expedition investigated approximately 1,700,000 square miles of Antarctica, of which the area hitherto unseen is estimated tentatively at 340,000 square miles pending compilation of aerial maps. In addition flyers investigated 5400 miles of coastline of which about 1400 miles were previously unknown, and 2900 miles had been incorrectly located. Ten new mountain ranges were discovered and peaks estimated to be nearly 10,000 feet high.

In the coastal region extending westward from Ross Sea aerial observers saw and photographed ice-free valleys and hills, including an area spotted with unfrozen lakes—an indication of receding glaciers.

1946-1947—The U. S. Navy Task Force 39, consisting of 2 modern, heavy icebreakers explored the coastal area of the Antarctic from the region of Mt. Gauss at 66° 48′ S. and 89° 19′ E. eastward to the Palmer Peninsula, covering more than half of the Antarctic coastline.

1947-48—The Ronne Antarctic Research Expedition, Commander Finn Ronne, leader, returned to the United States in April 1948 after having spent nearly a year at its base in Marguerite Bay on the west coast of the Palmer Peninsula. The party consisted of 23 members, including the first two women one of them Mrs. Edith Ronne) known to have wintered on the Antarctic Continent. Their 183-foot boat was the first motor vessel to be frozen intentionally in Arctic or Antarctic waters. The expedition revealed several previously undiscovered islands.

Great Inventions—U. S. and Foreign

Inventions	Date	Inventor	Nationality
A.C. receiving tubes (radio)	1933	Freeman & Wade	U. S.
Adding machine	1642	Pascal	French
Adding machine (recording)	1888	Burroughs	U. S.
Air brake	1869	Westinghouse	U. S.
Airplane	1903	Jatho	German
Airplane, experim'tal	1896	Langley	U. S.
Airplane, helicopter	1916	Brennan	English
Airplane, motor driven	1903	Orville and WilburWright	U. S.
Airplane, hydro	1911	Curtiss	U. S.
Airplane engine, super-charger	1917	Moss	U. S.
Airship	1852	Giffard	French
Airship, non-rigid dirigible	1898	Santos Dumont	Brazil
Airship, rigid dirigible	1900	Zeppelin	German
Aluminum, electrolytic process	1886	Hall	U. S.
Aluminum, Hall process	1886	Hall	U. S.
Arc tube	1923	Alexanderson	U. S.
Arc tube, immersion igniter	1932	Siepian-Ludwig	U. S.
Aspirin	1899	Dreser	German
Atomic hydrogen welding	1924	Langmuir-Palmer	U. S.
Autogyio	1920	de la Cierva	Spanish
Automatic acceleration of railway motors	1904	West'ghouse, G.	U. S.
Automobile, differential gear	1885	Benz	German
Automobile, electric	1892	Morrison	U. S.
Automobile, gas	1887	Daimler	German
Automobile, gasoline	1892-1893	Duryea, C. E. (See Note)	U. S.
Automobile, gasoline	1895	Selden	U. S.
Automobile, magneto ignition	1899	Daimler	German
Automobile, self-starter	1911	C. F. Kettering	U. S.
Automobile, steam	1889	Roper	U. S.
Babbitt metal	1839	Babbitt	U. S.
Bakelite	1907	Backeland	Belg.U S.
Balloon	1783	Montgolfier	French
Barbital sedative	1903	Fischer	German
Barometer	1643	Torricelli	Italian
Bessemer process steel	1847	Kelly	U. S.
Bicycle	1842	MacMillian	Scottish
Bicycle, modern	1884	Starley	English
Bicycle, safety	1886	Pope	U. S.
Bifocal lens	1780	Franklin	U. S.
Bleaching powder	1798	Tennant	English
Block signals, railway	1867	Hall	U. S.
Bomb, depth	1903	Unge	Swedish
Bomb, depth	1916	Tait	U. S.
Bordeaux mixture (lime-copper sulfate)	1885	Millardet	French
Bromine, from sea water	1924	Edgar and Kramer	U. S.
Browning gun	1916	Browning	U. S.
Burner, gas	1855	Bunsen	German
Calcium carbide	1888	Willson	U. S.
Carbon oxides (hydrogenation to gasoline and oils)	1925	Fisher and Gropsch	German
Camphor, synthesis of	1896	Haller	French
Car coupler	1873	Janney	U. S.
Card time recorder	1894	Cooper	U. S.
Carding machine	1797	Whittemore	U. S.
Cash register	1879	Ritty	U. S.
Cellophane	1912	Brandenberger	French
Celluloid	1870	Hyatt	U. S.
Cement, Portland	1845	Aspdin	English
Chlorine (air and hydrochloric acid)	1868	Deacon	English
Circuit breaker (oil blast)	1925	Hilliard	U. S.
Clock, pendulum	1657	Huygens	Dutch
Coal gas (water)	1875	Lowe	U. S.
Coal, hydrogenation	1910	Bergius	German
Coaxial cable system	1929	Affel & Espenschied	U. S.
Coke, oven	1893	Hoffman	Austrian
Collar, paper	1854	Hunt	U. S.
Color photography, controlled penetration process	1928	Mannes and Godowsky	U. S.
Combine, harvester, thresher	1888	Matteson	U. S.
Communited carbide	1922	Schaoter	U. S.
Compass, gyro	1906	Anschutz-Kampfe	U. S.
Comptometer	1887	Felt	U. S.
Condenser microphone (telephone)	1920	Wente	U. S.
Cotton gin	1793	Whitney	U. S.
Cream separator	1880	DeLaval	Swedi
Cultivator, disc	1878	Mallon	U. S.
Cyanide (CaC & N)	1905	Caro & Frank	Germa
Dental plate, rubber	1855	Goodyear	U. S.
Dial recorder	1889	Day	U. S.
Diesel engine	1893	Diesel	Germa
Dye, aniline (coal tar) mauve	1856	Perkin	Englis
Dynamic loudspeaker	1924	Rice and Kellogg	U. S.
Dynamite	1867	Nobel	Swedi
Dynamo, continuous current	1860	Picinotti	Italia
Dynamo, continuous current	1870	Gramme	Belgia
Dynamo, hydrogen cooled	1915	Schuler	U. S.
Dynamo, electric machine modulator	1939	Alexanderson Edwards	U. S.
Electric filter (telephone)	1911	Campbell	U. S.

Welding, controlled tube	1930	Prince	U. S.
Welding, electric	1877	Thomson	U. S.
Wireless, see Telegraph			

The invention of the first successful American gasoline automobile has been credited for years to Charles E. Duryea, a bicycle maker, who in the 1920s set April 19, 1892, as the date for his first successful test of the car in his Springfield, Mass., shop. On March 28, 1892, he hired his brother, J. Frank Duryea, 8 years his junior, to work for him. Charles E. Duryea applied for his automobile patent April 30, 1894, and received it June 11, 1895. Within recent years J. Frank Duryea, the surviving brother, and the Automobile Old Timers have contended that the 1892 car did not run until Sept. 1893, after J. Frank Duryea had made essential changes. J. Frank Duryea said: Charles had the idea and had certain plans drawn of a car. These plans covered the principal structural features, but certain accessories were lacking." He cited specifically the gear and clutch transmission system as his own work. Charles E. Duryea testified in the Selden patent lawsuit, 1905, that he designed the Duryea car "but because of my connection with the bicycle business I entrusted the work to the charge of my brother, J. Frank Duryea, and many of the details were, therefore, worked out, altered or improved by him. We were in frequent communication, however, and the work was recognized as my work in all important questions were submitted to me.

Engine and motor parts also were patented by J. Frank Duryea; vehicle patents were taken by Charles; one patent is in the name of both. J. Frank Duryea drove a Duryea car in the first American auto race in Chicago, Nov. 28, 1895, winning $2,000. This was a 2-cylinder car, driving 55 miles through snow and slush at an average of 7½ mi. an hour; it used 3½ gals. of gasoline and 19 gals. of water. The Duryea car at the Smithsonian Institution, called No. 2 by Charles is No. 1 by J. Frank Duryea, now bears the legend "Built by the Duryea brothers."

Movable type—Their origin is obscure. Wood type preceded metal. Laurens Janszoon Koster of Haarlem, Holland (1370-1450), printed from movable type about 1438, and used his own ink. Johann Gansfleisch (1397-1468), commonly called Gutenberg, because his mother came from there, was the first to make cut metal type, from which, in partnership with a goldsmith named Johann Fust, he printed, in Germany, at Mainz on the Rhine, the first printed Bible, 1450-56.

Notable Tall Buildings in United States Cities

Seattle, Wash.		
L. C. Smith, 506 Second Ave.	42	500
Northern Life Tower, 1212-14 Third Ave.	27	314

Many United States cities have at least one building ranging from 15 to 25 stories in height. The World Almanac does not print such a list in its entirety, but such a list would include the following (the number of feet in parentheses):

Baton Rouge, La.—State Capitol, 34 (450). **Boston, Mass.**—United States Custom House, 32 (496). **Columbus, Ohio**—Lincoln-LeVeque Tower, 47 (555). **Denver, Colo.**—Daniels & Fisher Tower, 20 (330). **Hartford, Conn.**—Traveler's Tower, 24 (527). **Los Angeles, Calif.**—The City Hall, 25 (464). **Memphis, Tenn.**—Sterick Building, 29 (365); First National Bank, St. Paul, Minn.—First National Bank, 32 (401), not including sign 100 feet high.

While the "skyscraper" is typically American many cities in countries other than the United States are erecting buildings of 300 feet and over in height. This is especially true in Argentina, Brazil, and Canada.

Some notable high structures (*) in foreign countries are: The Eiffel Tower (984.25), third tallest structure in the world; Pyramid of Cheops, in Egypt (450); and St. Peter's in Vatican City (448).

The spires of Ulm Cathedral (529), and the Cathedral of Cologne (512), both in Germany, are ne tallest in the world. Other such spires include he Strassburg Cathedral (468); St. Stephen's, Vienna (441); Salisbury Cathedral, England (404); 'athedral of Seville, Spain (400); Antwerp Cathedral, Belgium (397); Torazzo of Cremona, Italy (397); Freiburg Cathedral, Germany (385), and St. Paul's Cathedral Cross, London (365).

(*) Height is from the sidewalk to the top roof, including a penthouse, a tower, statue or light atop the building, but not a flag pole.

World Record Fish Caught by Rod and Reel

Shortest Safe Navigable Distances from New York City

NOTE: In the following tables, distances between ew York and foreign ports, and distances be-veen foreign ports, are by the U. S. Hydrographic ffice, Navy Department. North Atlantic distances ollow Tracks B and C, established by the North tlantic Lane Routes agreement. Track B (south-rn) is in effect from April 11 to June 30, inclusive, xcept when ice conditions necessitate the use of rack A (extra southern). Track C (northern) is sed from July 1 to April 10, inclusive, except when ice conditions necessitate the use of Track B.

Distances between United States Ports are from the publication, "Distances Between United States Ports," issued by the Coast and Geodetic Survey, Department of Commerce.

One nautical mile (equivalent to one knot) =6,080.20 feet.

One statute mile=5,280 feet.

All distances in these tables are in nautical miles. For statute miles, multiply by 1.15.

Fastest Trips Around the World

1872. A fictitious journey by Phileas Fogg in Jules Verne's novel, 80 days, Oct. 2 to Dec. 20.

1889. Nellie Bly, 72 days 6 hours 11 minutes.

1890. George Francis Train of New York, 67 days 12 hours 3 minutes.

1901. Charles Fitzmorris, later Chief of Police of Chicago, 60 days 13 hours 29 minutes.

1903. J. W. Willis Sayre, Seattle, Wash. 54 days 9 hours 42 minutes. Henry Frederick. 54 day 7 hours 2 minutes.

1907. Col. Burnlay-Campbell, 40 days 19 hours 30 minutes.

1911. Andre Jaeger-Schmidt, 39 days 19 hours 42 minutes 38 seconds.

1913. John Henry Mears, 35 days 21 hours 36 minutes.

1924. U. S. Army airplanes, 175 days (14 days, 15 hours actual flying time).

1926. Edward S. Evans and Linton Wells for The World of New York, 28 days 14 hours 36 minutes 5 seconds. Mileage, by train and motor car was 4,100; by plane, 8,300; by steamship, 8,000.

1928. John Henry Mears and Capt. C. B. D. Collyer, 23 days 15 hours 21 minutes 3 seconds. They left New York (June 29) by seaplane and overtook the Olympic off Long Island. From Cherburg, July 5, they flew across Europe and Asia, reaching Tokyo July 11. They traveled by steamer to Vancouver, British Columbia (July 20), and flew thence to New York City, arriving July 22.

1929. German dirigible, Graf Zeppelin, left Friedrichshafen, Germany (July 31), reached Lakehurst, N. J. (Aug. 4), left Lakehurst (Aug. 8), reached Friedrichshafen (Aug. 10), left there (Aug. 14), and reached Tokyo, Japan (Aug. 19), left there (Aug. 23), and reached Los Angeles, Cal. (Aug. 26), left there (Aug. 27), and reached Lakehurst (Aug. 29), left there (Sept. 1), and reached Friedrichshafen (Sept. 4). Approximate distance covered 21,700 miles; time from Friedrichshafen to Friedrichshafen (Aug. 14-Sept. 4) 20 days 4 hrs.

Arctic Circle Flights

1931. Monoplane Winnie Mae (Wiley Post, pilot; Harold Gatty, navigator) around the northern air circumference of the world (15,474 miles) in 8 days 15 hours 51 minutes—June 23 at 4:56 a.m., to July 1, at 8:45 p.m.

1933. Monoplane, Winnie Mae (Wiley Post, alone), around the northern air circumference of the world (15,596 miles) in 7 days 18 hours 49½ minutes—July 15, at 5:10 a.m., to July 22, at 11.59½ p.m. James Mattern, a Texas airman, left Floyd Bennett Field (5:20 a.m., June 3), and flew non-stop to Jomfruland, near Oslo (Norway); and thence, via Post's 1931 route, to Moscow, and across Siberia to Khabarovsk, where, on June 13, he left in bad weather for Nome, but had to turn back. On June 14 he started again and got as far as the Anadyr River, in Northeast Siberia (750 miles west of Nome) where he was forced down and his plane cracked up. He was rescued, injured, by fur traders. A Russian plane took him (July 20) to Nome, and thence an American plane landed him at Floyd Bennett Field on July 30.

1936. Three N. Y. City newspaper reporters left that city (Sept. 30), each for a trip around the world to test the commercial flying routes. All went to Lakehurst, N. J., to board the Zeppelin Hindenburg, which took off at 11:17:27 p.m. The first to finish the trip was H. R. Ekins of the New York World-Telegram and the other Scripps-Howard newspapers. He returned at 11:14:20 a.m. Monday, Oct. 19, having made the trip approximately 25,654 miles from Lakehurst to Lakehurst in 18 days 11 hours 14 minutes 33 seconds. The gross elapsed time from The World-Telegram building which he left at 8:17:30 p.m., back to it was 18 days 14 hours 56 minutes 30 seconds. The total flying time was 8 days 10 hours 26 minutes, and the average flying speed 127 m.p.h. Ekins' course was: By the Hindenburg to Frankfort, Germany; by Royal Dutch Airline to Batavia; by Netherlands Indian Airways to Manila; by Pan American Airways to Alameda, Cal.; by United Airlines to Burbank, Cal., by T. W. A. to Newark, N. J.

1938. Howard Hughes, accompanied by four technical assistants, left New York City, (7:26 p.m., July 10) and flew around the world via Paris, Moscow, U. S. S. R.; Omsk, U. S. S. R.; Yakutsk, U. S. S. R.; Fairbanks, Alaska; Minneapolis, Minn., and landed in New York City at 2:34.10 p.m., completing the trip of 14,824 miles in 3 days 19 hours 8 minutes and 10 seconds.

1939. Mrs. Clara Adams of New York departed from Port Washington, L. I. N. Y. (Oct. 28) on the flying boat Dixie Clipper of the American line and landed at Newark Airport (Nov. 15), completing the around the world trip b in 16 days 19 hours 4 minutes.

1941. Captain James W. Chapman, Jr. o Army Air Corps, flew 26,418 miles from Was ton D. C., to Washington, D. C., via Mosco 5 days 1 hour and 55 minutes flying time.

1945. The Globester of the United States Air Transport Command, inaugurating ar the-world service, flew from the National Ai in Washington, D. C., to the starting poi distance of 23,279 miles, in 149 hours 44 mi including ground time of 33 hours 21 minutes flight started Sept. 28 at 3:58 p.m. and e Oct. 4 at 9:42 p.m.

An A-26 completed a 24,859 mile flight ar the world in 96 hours 50 minutes flying time. pilot was Col. Joseph R. Holzapple and the of the flight was westward by way of Hawaii Marianas, Okinawa, the Philippines, India, Africa, Azores, Bermuda and Washington, The flight was completed Nov. 30.

1947. The Reynolds Bombshell, a converted engined Army bomber, with Capt. William Odo pilot, Milton Reynolds, the owner, as navig and T. Carroll Sallee as flight engineer, left York City at 5:11 p.m., April 12; landed at 4:55 a.m., April 13; landed at Cairo, Egypt, p.m.; arrived Karachi, India, 10:02 p.m.; land Calcutta, 3:05 a.m., April 14; reached Tokyo, p.m.; reached Adak, Alaska, 4:25 a.m., Apri arrived at Edmonton, Alta., 3:55 p.m.; landed Guardia Field, 12:06 a.m., April 16. Elapsed 78 hours 55 minutes 12 seconds, distance co 20,000 miles.

Clipper 'Round the World

A regular commercial around-the-world service was inaugurated June 17 when a American World Airways clipper, the Ameri four-engined Lockheed Constellation, took from LaGuardia Field, New York City, at 2 with a party of 15 American newspaper publi and editors and six other passengers. The cl reached Gander, Nfld., at 6:50 p.m. the same London, June 18, Istanbul, June 19, Kar India, June 20, Calcutta, June 21, Manila, 23, Nanking and Shanghai, June 24, Tokyo, 26, Honolulu, June 28, San Francisco, Jun and landed at La Guardia Field at 5:05 June 30. The elapsed time for the global of 22,219 miles was 13 days three hours 10 utes. Actual time in the air was 101 hou minutes. Pilot of the clipper was Capt. Hugh don, and co-pilot, Capt. Gordon F. Maxwell.

On a round-the-world solo flight in a conv Army A-26 attack bomber, William P. Odum ered 19,645 miles in elapsed time of 73 ho minutes. Flying time was 63 hours 15 minutes

1948. Col. Edward P. F. Eagan, chairman o New York State Athletic Commission and pres of the Circumnavigators Club, completed a 22 mile round-the-world flight from New York, Dec. 13, 1948, which established a commercial ord of 147 hours 15 minutes. Planes of Pan A can Airways and Trans-world Airways were Time on the ground totaled 39 hours 50 minu

Superfortress Record

1949. An Air Force Boeing B-50 Superfor the Lucky Lady II, a modified B-29 Superfort, pleted the first non-stop round-the-world March 2, 1949. The bomber covered 23,452 in 94 hours 1 minute at an average speed o MPH and was re-fueled four times in mida B-29 bombers which had been converted into tankers. The Lucky Lady II left the Carswe Force Base, Fort Worth, Texas at 12:21 E.S.T., Saturday, Feb. 26, reached Lagens Force Base in the Azores at 3:55 a.m. Sunday, 27, reached Dhahran at 11:30 p.m.; Clark Base, Manila, P.I., at 8:00 p.m., Monday, Fe Hickam Air Force Base, Hawaii, T.H., 7:15 Tuesday, Feb. 29, and Carswell Air Force 10:31 a.m., March 2. The plane, commande Capt. James Gallagher of Melrose, Minn., ca a crew of 14 men from the 43rd Bomb Group o 8th Air Force.

LIMITS OF CONTINENTAL UNITED STATES

Cape Sable, Florida, is in latitude 25° 07′, longitude 81° 05′. The extreme south point of Texas is in latitude 25° 50′, longitude 97° 24′.

The Lake of the Woods projection extends to latitude 49° 23′ 04.5″ at longitude 95° 09′ 11.6″.

The easternmost land is West Quoddy Head, near Eastport, Me., in longitude 66° 57′, latitude 44° 49′.

Cape Alava, Washington, extends into the Pacific Ocean to longitude 124° 44′, at latitude 48° 10′.

From the south point of Texas due north to the 49th parallel, the distance is 1,598 miles. From West Quoddy Head west along the parall the Pacific Ocean the distance is 2,807 miles. distances are computed to mean sea level.

The length of the Mexican boundary fro Gulf of Mexico to the Pacific Ocean is app mately 2,013 miles.

The length of the northern boundary, excl Alaska, is 3,987 miles.

The geographic center of the United States Smith County, Kansas, latitude 39° 50′ long 98° 35′.

Fast Ocean Passages by Air

DIRIGIBLE BALLOONS

928. The Graf Zeppelin left Friedrichshafen, rmany (Oct. 11, at 2 a.m.), and arrived at Lake- st, N. J. (Oct. 15, at 5:38 p.m.), having flown 10 miles in 4 days, 15 hours, 46 minutes. The af Zeppelin made the trip by the way of Spain, Madeiras and Bermuda.

936. The Hindenburg left Frankfort on the in, Germany (June 30, at 12:29 a.m.) and ched Lakehurst (July 2 at 3:46 a.m.) making trip in 51 hours, 17 minutes. The dirigible de the run over the Atlantic Ocean from Lands d, Northern Ireland, to Land Fall, over Labrador, 22 hours, 50 minutes, after passing over the thern tip of Greenland. The Hindenburg left kehurst (Aug. 9, at 10:35 p.m.) and reached nkfort (Aug. 11 at 5:28 p.m.) in 42 hours, 53 nutes.

AIRPLANES

919. U. S. Navy Seaplane NC4, Commander Al- t C. Read and crew, flew from Newfoundland Lisbon, Portugal, via the Azores (May 16-27). m Alcock and A. W. Brown flew non-stop from wfoundland to Ireland (June 14-15), a distance 1960 miles in 16 hours, 12 minutes.

926. Lieutenant Commander Richard Evelyn rd, U.S.N., flew from Spitzbergen to the North le and return (May 9). Amundsen-Ellsworth- bile expedition flew from Spitzbergen over the rth Pole to Barrow, Alaska, in a dirigible land- at Teller, Alaska, after having been lost over e Arctic area for seventy-eight hours. (May 12.)

927. Charles A. Lindbergh flew from Mineola, Y. to Paris, 3,600 miles, in 33 hours, 30 minutes ay 20-21.) Clarence Chamberlin and Charles Le- e flew from Mineola, N. Y. to Eisleben, Ger- ny, 3,911, in 42 hours, 31 minutes (June 4-6.)

931. Wiley Post and Harold Gatty crossed from rbor Grace, Newfoundland, to England, 2,200 les in 16 hours, 17 minutes (June 23-24.)

932. Mrs. Amelia Earhart Putnam flew from rbor Grace to Ireland 2,026½ miles in 14 hours, minutes (May 20-21.)

937. Mikhail Gromoff, Andrey Yumasheff and rgei Danilin, Russian aviators, flew non-stop m Moscow to San Jacinto, Cal., approximately 62 miles, in 62 hours, 2 minutes, via the North le route (July 12-14.)

938. Douglas G. Corrigan flew his nine-year-old 0 plane from Floyd Bennett Field, Brooklyn, Y. to Baldonnel Airfield, Dublin, in 28 hours, minutes (July 17-18.) British Imperial Airways plane, Mercury, completed non-stop East-to- st flight from Foynes, Ireland to Montreal in hours, 19 minutes. (July 20-21.)

940. The Yankee Clipper of Pan American Air- ys flew from LaGuardia Field, New York Munici- l Airport, to Lisbon, Portugal (April 1-2, 1940) 18 hours 35 minutes flying time. The elapsed ne was 21 hours 56 minutes. The return trip— t-west, was made in 25 hours 1 minute with an psed time of 27 hours 43 minutes. The round flying time was 43 hours 36 minutes.

941. The Atlantic Clipper of the Pan American rways flew non-stop from Bermuda to Lisbon, in hours 30 minutes (Jan. 21-22).

942. An American-built four-engined bomber w 2,200 miles from Newfoundland to Great itain in 6 hours, 40 minutes. Announcement of e flight was made April 2. Capt. Edward A. ewart, of the American Export Flying Ace, made e western crossing of the Atlantic from a ropean port (August) in 21 hours 54 minutes psed time and 19 hours 54 minutes flying time.

943. Capt. G. R. Buxton, a British Overseas ways Corporation pilot, flying a loaded Libera- bombing plane, made a landfall crossing from Newfoundland to Great Britain (date not disclosed) in 6 hours 12 minutes. He flew 2,200 miles from a Newfoundland takeoff to a landing in Britain in 7 hours 16 minutes later. His Montreal to Britain flying time was 11 hours 12 minutes for the distance of 3,150 miles. Capt. E. R. B. Scott flew from Lancashire, England to Quebec, 3,100 miles in 13 hours 30 minutes.

1944. Trans-Canada Air Lines transport plane made a non-stop flight from Great Britain to Montreal, Canada, in 13 hours 16 minutes (announced Feb. 28). Flying Ace, 30-ton American Export Airlines plane, flew 3,329 miles non-stop from Foynes, Ireland to New York City in 15 hours 30 minutes (May 1). Same plane made round trip, New York-Ireland-South America-New York, a distance of 11,746 miles in 66 hours 12 minutes flying time. Capt. Charles A. Thompson in charge. Royal Air Forces Mosquito bomber flew 2,200 miles from Labrador to British Isles in 6 hours 46 minutes (announced May 14).

1945. Mosquito bomber; Benson, England, to Karachi, India; 4,700 miles; 12 hours 25 minutes, including stopover at Cairo, Egypt; average 378 miles an hour; pilot, K. J. Newman; navigator, R. K. Smith (completed June 1). British Air Ministry report. C-54; England to Karachi, India; 9,- 120 miles round-trip; two days eight hours 11 minutes; actual flying time 42 hours 23 minutes; average 215 miles an hour (completed June 10). British Air Ministry report. C-69 Army Transport plane; New York to Paris, 3,600 miles; 14 hours 12 minutes; Brig. Gen. Lawrence A Fritz (completed Aug. 1). B-29; Honolulu to Washington; 4,640 miles; 17 hours 21 minutes; average speed 285 miles an hour; Lieut. Col. Charles J. Miller. (completed Sept. 1). O-54 Air Transport Command plane; Tokyo to Washington; 31 hours 25 minutes; Maj. G. E. Cain (completed Sept. 3). B-29; Iwo Jima to Spokane, Wash.; 5,490 miles; 23 hours 33 minutes; plane flew on to Washington, 2,086 miles; seven hours; flying time Iwo Jima to Washington 30 hours 33 minutes. War Department report. (Completed Sept. 4.) Mosquito bomber; Newfoundland to Cornwall, England; 2,500 miles, five hours 10 minutes; average speed 445 miles an hour; Wing Commander J. R. H. Merfield (Oct. 23). Four B-29s; non-stop Japan to Washington, 6,544 miles; lead plane's time 27 hours 29 minutes; Brig. Gen. Frank A. Armstrong (completed Nov. 1).

1946. Navy P2V patrol bomber, Perth, West Australia, to Columbus, Ohio, 11,236 miles; 55 hours 15 minutes; Cmdr. Thomas D. Davies, pilot (completed Oct. 1). B-29, Honolulu to Cairo, Egypt, via Arctic, 9,422 miles; 39 hours 36 minutes; Col. Clarence S. Irvine, pilot, Lt. Col. Beverly Warren, co-pilot (completed Oct. 6).

1949. A Pan American Airways four-engined Constellation Mayflower, added by tailwinds averaging 78 MPH, set a new commercial speed record of 10 hours 2 minutes on a 3,153-mile New York to London nonstop flight (completed Jan. 18, 1949).

A Pan American World Airways double-decker Stratocruiser, aided by a 110 MPH tailwind, set a non-stop commercial speed record of 9 hours 16 minutes on a 3,565-mile flight from New York to London. Average speed: 365 MPH (completed April 28).

William P. Odom completed a non-stop solo flight, estimated at between 5,010 and 5,300 miles, from Honolulu, T.H., to Teterboro, N. J., at 12:05 p.m., March 8, 1949. He flew a Continental-powered light four-place Beechcraft Bonanza monoplane. Elapsed time: 36 hours. Subject to consideration as an international distance record for the largest class of light planes (2,206.8 to 3,850 lbs. loaded) by the Federation Aeronautique Internationale.

Tale of Two Legacies

n 1904 the State Supreme Court of Massachu- ts decided against the Aldermen of Boston in disposition of money available from a legacy ablished 114 years before. Seems that in 1790 re died, in Philadelphia, an esteemed and l-situated citizen named Benjamin Franklin, o had bequeathed £1,000 (then approximately 000) to a fund, of which a certain amount uld become available after 100 years to the ectmen of Boston and to the pastors of its est Presbyterian, Congregational and Protestant scopal churches, for benevolent purposes. The d had then reached $400,000. The court directed ments to be made as willed. Dr. Franklin was author of the saying: "If you would be wealthy, nk of saving as well as getting."

On Aug. 4, 1949, the Superior Court of Connecti- ordered the immediate execution of the terms the will of Mrs. Ella Burr McManus, who died Hartford, Conn., 43 years earlier and left a trust fund of $80,000. She stipulated this should pay for a memorial for her father, Alfred E. Burr, former publisher of the Hartford Times. The memorial was to be a drinking fountain "for both humans and animals" and the authorities of city or state were to designate a site. The money was to become available on the death of her husband, Dr. James McManus. The latter died in 1920.

In 1923 the fund had reached $120,000; in 1938 it was $350,000; in 1949 it was $454,319.10. The Commission on Fine Arts, in charge, asked the court to permit use of the fund by the new Hartford Public Library, with provision for an entrance court with a memorial fountain. This was opposed by the National Sculpture Society, which contended that such an alteration in the bequest might deter others from making similar legacies. The court held that it could not change the terms of the will and ordered the Commission on the Fine Arts to carry them out.

(*) Maiden voyages. (a) via Canary Islands; left Island of Gomera Sept. 6, reached o Sept. 9, 1492. (b) Sailed 21 knots per hour for several hours, a record. (c) British tea clipper. (d) Emperor's Cup race; average speed 10.31 knots; best day's run 341 nautical miles. (e) First steam cross Atlantic; built in Britain by Lord Cochrane. (f) First American ship to use steam o crossing; sailing vessel with steam auxiliary. (g) First Cunard liner. (h) Carried Capt. (no Charles A. Lindbergh back to the United States after his airplane flight from New York t (j) Carried Hiroshima atomic bomb; arrived at Saipan July 26, 1945. (k) No record claimed run because comparable figures are lacking. Distance is 400 miles shorter than the run fro York to Southampton for which the Queen Mary holds the record.

WEIGHTS AND MEASURES

The Metric System

Source: National Bureau of Standards, Department of Commerce

e International Prototype Meter is kept at the International Bureau of Weights and Measures. efinition the meter now bears no definite relation to the earth's quadrant, but is the length certain platinum-iridium bar when supported in a definitely specified manner, at the temperature elting ice, and at standard atmosphere pressure (760 millimeters of mercury).
e kilogram is independently defined as the mass of a definite platinum-iridium standard, the national Prototype Kilogram, which is also kept at the International Bureau of Weights and ures. The liter is defined as the volume of a kilogram of water, at standard atmospheric pressure, t the temperature of its maximum density, approximately 4° C. The meter is thus the fundamental on which are based all metric standards and measurements of length and area, and of volumes ed from linear-measurements.

supplementary definition of the meter in terms of the wave length of light was adopted pro- ially by the Seventh General (International) Conference on Weights and Measures, in 1927. rding to this definition, the relation for red cadmium light waves under specified conditions of erature, pressure, and humidity is—1 meter=1 553 154.13 wave lengths. This corresponds to a length (cadmium red) of 6 438.469 6×10^{-7} millimeters.

e kilogram is the fundamental unit on which are based all metric standards of mass. The liter econdary or derived unit of capacity or volume. The liter is larger by about 28 parts per million the cube of the tenth of the meter, i.e., the cubic decimeter—that is, 1 liter=1.000 028 cubic eters.
